FORWARD-LOOKING STATEMENTS AND NON-GAAP MEASURES

Some of the statements in this presentation constitute “forward-looking statements” about Sunoco LP (“SUN”), Energy Transfer Equity, L.P. (“ETE”), Energy Transfer Partners, L.P. (“ETP”), and their respective affiliates that involve risks, uncertainties and assumptions, including, without limitation, our discussion and analysis of our financial condition and results of operations and our expectations regarding the acquisition of ETP’s remaining wholesale fuel and retail assets (the “Retail Acquisition”). These forward-looking statements generally can be identified by use of phrases such as “believe,” “plan,” “expect,” “anticipate,” “intend,” “forecast” or other similar words or phrases in conjunction with a discussion of future operating or financial performance. Descriptions of SUN’s, ETE’s, ETP’s and their respective affiliates’ objectives, goals, targets, plans, strategies, costs, anticipated capital expenditures, expected cost savings, potential acquisitions and related financial projections are also forward-looking statements. These statements represent present expectations or beliefs concerning future events and are not guarantees. Such statements speak only as of the date they are made, and we do not undertake any obligation to update any forward-looking statement.

We caution that forward-looking statements involve risks and uncertainties and are qualified by important factors that could cause actual events or results to differ materially from those expressed or implied in any such forward-looking statements. For a discussion of these factors and other risks and uncertainties, please refer to SUN’s, ETE’s and ETP’s filings with the Securities and Exchange Commission (the “SEC”), including those contained in SUN’s 2014 Annual Report on Form 10-K and Quarterly Reports on Form 10-Q which are available at the SEC’s website at www.sec.gov.

This presentation includes certain projections that assume that the proposed Retail Acquisition will be completed. The Retail Acquisition is expected to close in Q1 2016 and will be subject to customary closing conditions.

This presentation includes certain non-GAAP financial measures as defined under SEC Regulation G. A reconciliation of those measures to the most directly comparable GAAP measures is provided in the appendix to this presentation. We define EBITDA as net income before net interest expense, income tax expense and depreciation and amortization expense. Adjusted EBITDA further adjusts EBITDA to reflect certain other non-recurring and non-cash items. Distributable cash flow represents Adjusted EBITDA less cash interest expense, cash tax expense, maintenance capital expenditures, and other non-cash adjustments.

RATING AGENCY COMMENTS

The outlook revision reflects our view that the company's enhanced size and scale accomplished from the transaction only partially offsets our expectation for higher near-term leverage in the range of 5x-5.5x in 2016...A key credit consideration, in our view, is management's ability to effectively manage the pro forma entity such that leverage falls below 5x by 2017.

Standard & Poor's - November 16, 2015

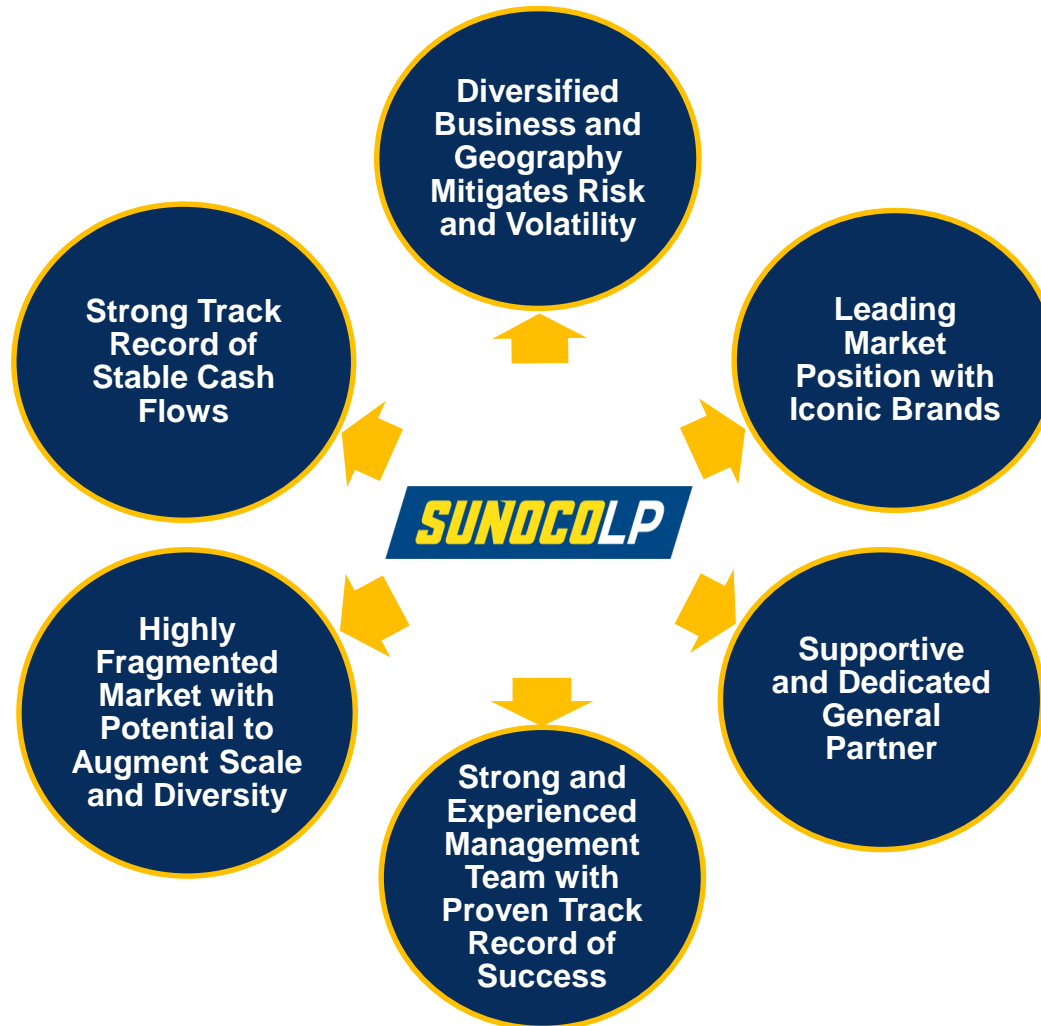

While leverage metrics spike in the short term, we believe that debt/EBITDA will return to its normalized 5-ish range over the next 12-24 months.

Moody's - November 24, 2015

SUN's ratings are reflective of its growing size and scale, as well as, its relationship with the Energy Transfer Equity, LP (ETE; 'BB'/Rating Watch Positive) family...Leverage will flex out in 2016 to between 5.0x to 5.5x pro forma for this announced acquisition but fall to 4.5x and below for 2017 and beyond.

Fitch - November 16, 2015

SUN IS WELL POSITIONED FOR LONG-TERM GROWTH IN UNITHOLDER VALUE

- Historical stability of fuel margins
 - Fuel margins are not commodity price sensitive and have been resilient across economic and commodity cycles
