2019 ESG Data Disclosures for Analysts
Introduction

This document is intended to provide supplementary information to Jacobs’ investor community regarding our Environmental, Social, and Governance (ESG) performance. In addition to the information herein, we strongly encourage review of the following materials for a more comprehensive view of our ESG commitments and performance:

- Sustainability Strategy 2018-2020
- 2019 Integrated Annual Report
- 2018 Annual Report
- 2019 Proxy Statement
- Investor Day Presentation 2019
- Jacobs Code of Conduct
- Supplier Code of Conduct
- Corporate Governance Guidelines
- Modern Slavery Act Statement
- CDP Submission

The document reflects activity through FY18, with inclusion of select notable activity from FY19. We intend to provide periodic updates as our ESG efforts progress.

This document and data within are unaudited.

<td>100%</td>
<td>100%</td>
</tr>
</tbody>
</table>

CH2M was acquired by Jacobs Engineering Group Inc (Jacobs) in December 2017. Corporate activities during 2018 focused on the merger of the two companies. In 2019, the new combined company focused on developing our first global greenhouse gas emissions inventory for fiscal year October 1, 2018 through September 30, 2019.

FY 2015-2017 values reflect only U.K. operations. FY19 Scope 1 emissions include stationary combustion and mobile emission source estimates for 100% of Jacobs’ global operations. In April 2019, Jacobs sold its energy, chemicals and resources (ECR) unit to WorleyParsons Ltd. The sale resulted in a large reduction of emissions from FY18 to FY19. FY19 has been chosen as our baseline year and therefore, in accordance with the World Resources Institute and the World Business Council for Sustainable Development (WBCSD’s) Greenhouse Gas Protocol Initiative — A Corporate Accounting and Reporting Standard guidance, we have removed the GHG emissions associated with the energy, chemicals and resources unit from FY19.

E2. Indirect Greenhouse Gas Emissions (Scope 2)

Our company’s indirect greenhouse gas emissions from energy purchased (purchased and consumed, i.e. without energy trading) (IGHG SCOPE 2) are summarized below.

<table>
<thead>
<tr>
<th>Indirect GHG (Scope 2)</th>
<th>Unit</th>
<th>FY15 (est.)</th>
<th>FY16 (est.)</th>
<th>FY17 (est.)</th>
<th>FY18 (est.)</th>
<th>FY19 (est.)</th>
</tr>
</thead>
<tbody>
<tr>

<td>14% (U.K. only)</td>
<td>100%</td>
<td>100%</td>
</tr>
</tbody>
</table>

To address energy use in FY19, Jacobs purchased 2019 vintage Renewable Energy Certificates (RECs) from Green-e certified wind power facilities in the United States. Jacobs is a partner in the Environmental Protection Agency’s Green Power Partnership, a voluntary program, where the goal is to increase the use of green power among organizations in the U.S. as a way to reduce the environmental impacts associated with conventional electricity use. In the U.K., we purchase 100% renewable electricity through Renewable Energy Guarantees Origin (REGO) certificates for all offices where Jacobs is directly responsible for procuring energy. This accounts for over
half of our U.K. offices. After applying these green power purchases, our FY19 net Scope 2 emissions are 55,047 tonnes CO₂e.

The total FY19 emissions reported here represent 100% of Jacobs' global operations. FY15-17 values reflect only U.K. operations. FY19 Scope 1 emissions include stationary combustion and mobile emission source estimates for 100% of Jacobs' global operations. In April 2019, Jacobs sold its energy, chemicals and resources unit to WorleyParsons Ltd. The sale resulted in a large reduction of emissions from FY18 to FY19. FY19 has been chosen as our baseline year and therefore, in accordance with the World Resources Institute and the WBCSD's Greenhouse Gas Protocol Initiative — A Corporate Accounting and Reporting Standard guidance, we have removed the GHG emissions associated with the energy, chemicals and resources unit from FY19. FY19 emissions include the recent acquisition of KeyW which was also incorporated using the same guidance but had minimal impacts on Jacobs' global footprint.

We measure our indirect greenhouse gas emissions according to the location-based method but are currently in the process of implementing the market-based method. We cannot measure actual energy use associated with our 150+ leased offices, but we find value in understanding opportunities to reduce our footprint. For this reason, we estimate energy consumption for most of our leased office space by using data published by the U.S. Department of Energy, which provides average energy use for various types of buildings. Including such averages in our carbon inventory helps us develop strategies to manage resources and consumption. Now that we have completed our baseline global inventory for FY19, we are exploring options for obtaining more actual energy use data, including identifying suppliers as part of the implementation of the market-based method.

A Scope 3 evaluation is underway to identify additional Scope 3 sources that are material to Jacobs and where we can make impactful changes. For FY19, Jacobs reported on Business Travel (air and ground, including hotel stays).

<table>
<thead>
<tr>
<th>Source</th>
<th>Relevance</th>
<th>Metric tonnes CO₂e (est.)</th>

<th>Percentage of emissions calculated using data obtained from suppliers or value chain partners</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business travel</td>
<td>Business travel is a material Scope 3 source and approximately 60% of our FY19 total Scope 1, 2, and 3 footprint. We are performing a Scope 3 evaluation to identify other relevant and material Scope 3 sources.</td>
<td>100,019 met. ton. CO₂e</td>
<td>Emissions are calculated using emission factors from the following sources: Department for Environment Food and Rural Affairs (DEFRA) emission factor categories as defined in their *Guidelines to DEFRA/DECC's GHG Conversion Factors for Company Reporting, Ricaurte, E., &amp; Jagarajan, R. (2019), Benchmarking Index 2019: Carbon, energy, and water. Cornell Hospitality Report, 19(4), 1-23., USEPA Center for Climate Leadership Emission Factors for Greenhouse Gas Inventories.</td>
<td>100%</td>
</tr>
</tbody>
</table>

The total FY19 emissions reported here represent 100% of Jacobs' global operations. FY15-17 values reflect only U.K. operations. FY19 Scope 1 emissions include stationary combustion and mobile emission source estimates for 100% of Jacobs' global operations. In April 2019, Jacobs sold its energy, chemicals and resources unit to WorleyParsons Ltd. The sale resulted in a large reduction of emissions from FY18 to FY19. FY19 has been chosen as our baseline year and therefore, in accordance with the World Resources Institute and the WBCSD's Greenhouse Gas Protocol Initiative — A Corporate Accounting and Reporting Standard guidance, we have removed the GHG emissions associated with the energy, chemicals and resources unit from FY19. FY19
emissions include the recent acquisition of KeyW which was also incorporated using the same guidance but had minimal impacts on Jacobs’ global footprint.

Our short-term priority for Jacobs is to further develop and implement our PlanBeyond™ Sustainability Strategy, launched in 2019, which will provide a roadmap for how Jacobs will address sustainability, both within our operations but also within our client projects. This strategy will consider how a changing climate will impact our own operations and those of clients, exploring both adaptation and mitigation opportunities. Specific priorities will include: strategy formation, business integration, engagement, reporting and communications. As part of the strategy, we have externally published twelve short-term sustainability goals. One of these includes a 20% reduction in our business travel carbon emissions by 2022. Other sustainability goals target driving sustainability improvements by partnering with our supply chain. More information is available on our website.

Efforts to reduce our carbon emissions are underway. For example, to reduce business travel carbon emissions, we have created an employee dashboard so all employees can view their travel carbon footprint and are accountable on an individual level to meet a 20% reduction through reducing their travel and using alternative meeting methods.

**E4. Energy Consumption**

The following table summarizes our company’s energy consumption.

<table>
<thead>
<tr>
<th>Total Energy Consumption</th>

</tr>
</tbody>
</table>

In April 2019, Jacobs sold its energy, chemicals and resources unit to WorleyParsons Ltd. The sale resulted in a large reduction of emissions from FY18 to FY19. FY19 has been chosen as our baseline year and therefore, in accordance with the World Resources Institute and the WBCSD’s Greenhouse Gas Protocol Initiative — A Corporate Accounting and Reporting Standard guidance, we have removed the GHG emissions associated with
the energy, chemicals and resources unit from FY19. Due mainly to the energy, chemicals, and resources unit's operations (equipment use and idling) in Alaska, a large decrease in energy use is shown from prior years. FY19 emissions include the recent acquisition of KeyW which was also incorporated using the same guidance but had minimal impacts on Jacobs’ global footprint.

We cannot measure actual energy use associated with our 150+ leased offices, but we find value in understanding opportunities to reduce our footprint. For this reason, we estimate energy consumption for most of our leased office space by using data published by the U.S. Department of Energy, which provides average energy use for various types of buildings. Including such averages in our carbon inventory helps us develop strategies to manage resources and consumption. Now that we have completed our baseline global inventory for FY19, we are exploring options for obtaining more actual energy use data including identifying suppliers for implementation on the market-based method.

To address energy use in FY19, Jacobs purchased 2019 vintage Renewable Energy Certificates (RECs) from Green-e certified wind power facilities in the U.S. Jacobs is a partner in the EPA's Green Power Partnership, a voluntary program with the goal to increase the use of green power among organizations in the United States as a way to reduce the environmental impacts associated with conventional electricity use. In the U.K., we purchase 100% renewable electricity through REGO (Renewable Energy Guarantees of Origin) certificates for all offices where Jacobs is directly responsible for procuring energy. This accounts for over half of our U.K. offices.

### E5. Water Consumption

The following table summarizes our company's water consumption.

<table>
<thead>
<tr>
<th>Water Consumption</th>
<th>Unit</th>
<th>FY15 (est.)</th>
<th>FY16 (est.)</th>
<th>FY17 (est.)</th>
<th>FY18 (est.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Withdrawal: Total municipal water supplies (or from other water utilities)</td>
<td>Million cubic meters</td>
<td>0.042364 Mio. m³</td>
<td>0.040694 Mio. m³</td>
<td>0.040694 Mio. m³</td>
<td>0.4836 Mio. m³</td>
</tr>
<tr>
<td>B. Withdrawal: Fresh surface water (lakes, rivers, etc.)</td>
<td>Million cubic meters</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>C. Withdrawal: Fresh groundwater</td>
<td>Million cubic meters</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>D. Discharge: Water returned to the source of extraction at similar or higher quality as raw water extracted (applies to B and C)</td>
<td>Million cubic meters</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>E. TOTAL NET FRESH WATER CONSUMPTION (A+B+C+D)</strong></td>
<td>Million cubic meters</td>
<td>0.042364 Mio. m³</td>
<td>0.040694 Mio. m³</td>
<td>0.040694 Mio. m³</td>
<td>0.4836 Mio. m³</td>
</tr>
<tr>
<td>Data Coverage (as % of denominator)</td>
<td>Percentage of global operations</td>
<td>14%</td>
<td>14%</td>
<td>14%</td>
<td>100%</td>
</tr>
</tbody>
</table>

Data for FY15-17 is reflective of our U.K. operations, data for FY18 is reflective of our global operations, however it is calculated based on an assumed consumption of 25L per day per employee.

We have no process water use. Therefore, since our water consumption is not regarded as significant in terms of our Environmental Management System (EMS), we do not monitor or measure water consumption. In addition, minimal data is available, as water consumption is included within landlord service charges. For our total GHG calculation, water consumption and treatment is estimated using employee headcount data provided by Human Resources.
Water consumption for office use is estimated using the number of employees and reported as tCO2e in our CDP disclosure (as Scope 3 GHG emissions).

E6. Waste
The following table summarizes our company’s waste disposed.

<table>
<thead>
<tr>
<th>Waste Disposed</th>
<th>Unit</th>
<th>FY15 (est.)</th>
<th>FY16 (est.)</th>
<th>FY17 (est.)</th>
<th>FY18 (est.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) total waste generated</td>
<td>metric tonnes</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b) total waste used/recycled/sold</td>
<td>metric tonnes</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>TOTAL WASTE DISPOSED (A - B)</td>
<td>metric tonnes</td>
<td>121 met. ton.</td>
<td>115 met. ton.</td>
<td>105 met. ton.</td>
<td>8,774 met. ton.</td>
</tr>
<tr>
<td>Data coverage (as % of denominator)</td>
<td>Percentage of global operations</td>
<td>14%</td>
<td>14%</td>
<td>14%</td>
<td>100%</td>
</tr>
</tbody>
</table>

FY15-17 reflects legacy Jacobs U.K. operations only, whereas FY18 reflects data associated with our new global business.

Waste disposal is not monitored/Measured as disposal is not regarded as significant in terms of the EMS. In addition, very little data is available as waste disposal is included within landlord service charges. For our total GHG calculation, waste disposal is estimated using employee headcount data provided by HR. Waste disposal for office use is estimated using the number of employees and reported as tCO2e in our CDP disclosure (as Scope 3 GHG emissions).

E7. Hazardous Waste
The following table summarizes our company’s hazardous waste generation.

<table>
<thead>
<tr>
<th>Hazardous Waste Generated</th>
<th>Unit</th>
<th>FY15 (est.)</th>
<th>FY16 (est.)</th>
<th>FY17 (est.)</th>
<th>FY18 (est.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous Waste Generated</td>
<td>metric tonnes</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Data coverage (as % of denominator)</td>
<td>Percentage of global operations</td>
<td>14%</td>
<td>14%</td>
<td>14%</td>
<td>100%</td>
</tr>
</tbody>
</table>

CH2M was acquired by Jacobs Engineering Group Inc. in December 2017. FY15-17 reflects legacy Jacobs U.K. operations only, whereas FY18 reflects data associated with our new global business. Hazardous waste was not recorded pre-FY17.
E8. Environmental Reporting

We report on environmental issues and provide coverage for some environmental data/indicators in our public reporting. The three environmental indicators where we have the highest available coverage are:

<table>
<thead>
<tr>
<th>Environmental Indicator</th>
<th>Coverage of Indicator (% of revenues or business operations)</th>
<th>Weblink and page number where the coverage for the environmental indicator is reported</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tons of carbon eliminated</td>
<td>60%</td>
<td>2018 Annual Report Pages 8-9</td>
</tr>
<tr>
<td>Tons of material recycled</td>
<td>60%</td>
<td>2018 Annual Report Pages 8-9</td>
</tr>
<tr>
<td>Gallons of wastewater saved for clients</td>
<td>60%</td>
<td>2018 Annual Report Pages 8-9</td>
</tr>
</tbody>
</table>

All environmental performance indicators reported in the Annual Report cover business locations certified to ISO 14001 and project data entered in Jacobs Sustainability+ carbon savings tool. External assurance of our environmental reporting is provided at ISO 14001 certified locations.

Our company reports on environmental Key Performance Indicators (KPIs) in the public domain and provides targets linked to these indicators. Relevant information is available in our Annual Report and Sustainability Strategy.

<table>
<thead>
<tr>
<th>KPI 1</th>
<th>KPI: 37M Tons of carbon eliminated</th>
</tr>
</thead>
<tbody>
<tr>
<td>KPI 2</td>
<td>KPI: 499k Tons of material recycled</td>
</tr>
<tr>
<td>KPI 3</td>
<td>KPI: 23B gallons of wastewater saved for clients</td>
</tr>
</tbody>
</table>

Globally, we have established a target to reduce travel related carbon emissions by 20% by 2022 (based on our FY19 baseline data), and to reduce the usage of single use plastic in all our offices. Through our project delivery we have a target to incorporate United Nations Sustainable Development Goals (UN SDGs) reporting into our project reporting, which will capture measures to reduce resource consumption including materials/waste and water/wastewater.

In 2020, as part of our developing Climate Action Plan, we are setting a Net-Zero Carbon target.

E9. Environmental Management System (EMS)

Our Environmental Management System (EMS) is integrated in our HSE Management System (HSEMS) and conforms to ISO 14001:2015. While the HSEMS applies to all locations, select office and project locations are certified to ISO 14001 as necessary to meet contract or local requirements. Jacobs is currently certified in Australia, Canada, Hong Kong, Indonesia, Italy, Malaysia, Qatar and U.K., among others. Our environmental management policy is integrated in our HSE Policy.

E10. Climate Change

E10a. Climate Change Strategy

Our company’s processes for identifying, assessing, and managing climate-related issues are integrated into our multi-disciplinary company-wide risk management processes. The Enterprise Risk (ER) process sits under the Business Resilience Steering Group (BRSG) Guidance note which sets simple strategic questions, designed to be
inputted into the ER Software package. These inputs are linked to every area of the business. The result represents the top ten scenarios which could impact our people, client relationships and consolidated operating profit. The Enterprise Risk team monitors the building of the overall heat map and provides indicative types of risk for the business to consider which include financial, operational, regulatory, compliance, hazards, and social and strategic risks. At the line of business level this is updated and tested quarterly. Management protocols include control effectiveness, with ownership and accountability clearly identified. Oversight for responsibility to mitigate is provided by the BRSG and tested through Business Continuity planning and drills provided by Global Security and Resilience.

As per our ERM Annual Business Plan, climate change risks are embedded within our five key risk categories, for example Sustainable Development, Natural Disasters, Emissions and Waste, and Geopolitical Conditions (that could be exacerbated as a result of climate stresses).

**E10b. Financial Risks of Climate Change**

Our business continuity risk assessment process identifies significant risks to our operations, this includes extreme weather events caused by climate change. We have several offices that have had operations interrupted in the past from hurricanes and flooding, so we now have mitigation measures in place. For example, emergency management plans to minimize interruptions and ensure business continuity. Our risk assessments determine that we do not currently anticipate climate change risk substantively changing our business operations, revenue or expenditure.

**E10c. Financial Opportunities Arising from Climate Change**

We have identified opportunities and markets arising from addressing the threat of climate change impact around the world, in the form of water and natural resource scarcity, urbanization, cities and infrastructure, digital proliferation and innovation, and sustainability.

This information is highlighted via our website, Jacobs.com, and was also covered in our Investor Day Presentation (see page 18 of 119) in February that is available on our website.

**E10d. Climate-Related Targets**

We have a business target to reduce our travel related carbon emissions by 20% by 2022. The target is part of our Places pillar detailed in our PlanBeyond™ 2018-2020 Sustainability Strategy.

**E10e. Climate Strategy Impacts**

For our combined emissions reduction activities that were active in FY2018, our estimated annual CO₂e savings from these initiatives is 38200000 met. ton. CO₂e

Total estimated annual CO₂ savings calculated based on total client approved savings for FY18 as recorded in our Sustainability+ program. Sustainability+ is a tool that allows us to quantify potential emissions reduction initiatives as applied on our projects through design changes. We do not provide information on investment and pay-back to our clients as this is assumed to be captured as part of project delivery.

**E11. Low-Carbon Products**

We have over 50 full-time employees delivering carbon and energy related consulting work globally. Our estimates indicate that we generate around $6.5M USD per year from carbon/climate products annually. Additionally, our Solutions and Technology experts have indirect influence to incorporate low or no carbon products and solutions into consulting and capital projects worldwide, especially in municipal water, transportation, and waste systems.
SOCIAL

S1. Management Incentives

Our CEO, CFO, Presidents, Executive Vice Presidents and all Senior Vice Presidents have at least one Inclusion & Diversity goal tied to their executive compensation.

S2. Human Rights

We respect the human rights and dignity of people in our operations, supply chain, and communities where we work. Our approach is guided by international principles, including the United Nations Principles on Business and Human Rights. We are publishing an updated Human Rights Policy in early 2020. For further detail on our human rights commitments and activities, please see our 2019 Modern Slavery Statement.

The Jacobs Supplier Code of Conduct prohibits the use of any form of child or forced labor, slavery, or trafficking of persons. Additionally, within the Human Rights section, our Supplier Code of Conduct emphasizes our commitment to respecting the rights of those who work for and with us, and instructs Jacobs suppliers to:

1. Treat all workers with dignity and respect;
2. Support and respect human rights and avoid any involvement in human rights abuses;
3. Conduct all operations in a socially responsible, harassment-free and nondiscriminatory manner;
4. Comply with applicable laws concerning equal opportunities, child labor, forced labor, human trafficking, working hours, freedom of association, and fair wages; and
5. Ensure that the confidentiality of supplier and employee whistleblowers is maintained and that they are protected against retaliation.

S3. Performance Appraisal

The table below summarizes the type and employee coverage of the individual performance appraisals we use for individual performance-related compensation. The data represents our FY17 coverage; the last time we supported performance appraisals via an online system. Due to the acquisition of CH2M and divestiture of our ECR line of business in recent years, we have conducted employee appraisals offline while we transition to a new online system.

<table>
<thead>
<tr>
<th>Type of Performance Appraisal</th>
<th>% of all employees</th>

</thead>
<tbody>
<tr>
<td>Management by objectives: systematic use of agreed measurable targets by line superior</td>
<td>100%</td>
</tr>
<tr>
<td>Multidimensional performance appraisal</td>
<td>100%</td>
</tr>
</tbody>
</table>

S4. Philanthropic Activities

Committed to giving back, engaging with communities and building enduring partnerships, Jacobs donated more than $2.7 million this year as part of our global giving program.

For example, we are helping to advance Water for People’s mission of promoting the development of high-quality drinking water and sanitation services, accessible to all, and sustained by strong communities, businesses
and governments. Through 2019’s Employee Giving Campaign, more than $200,000 was raised to support Water for People, with Jacobs contributing an additional $50,000.

This year, we recognized 19 teams and individuals who went above and beyond in safety, ethics, sales, inclusion, innovation, and solutions delivery. To build on the positive impact our people make every day, each winner chose a non-profit organization to receive a donation in their name, enabling more than $100,000 to be donated to worthwhile causes around the world.

We are currently designing and building a global giving and volunteering program that will enable all employees to donate, track and report their philanthropic activity through a cloud-based platform.

S5. OHS Governance Oversight

Our company ensures effective management of health risks/issues via the following elements:

- Prioritization and action plans with quantified targets for business unit managers;
- Discussion of health issues/risks' documentation between human resources and managers' business units on a regular basis, and between OHS department and the executive management/board of directors on at least a quarterly basis;
- Evaluation of progress in reducing/preventing health issues/risks against targets;
- Internal inspections, consultations by OHS specialists;
- Independent external verification of health, safety and well-being: OHSAS18001 certification is done regionally by select parts of the business;
- Targets embedded in performance appraisal.

S6. Fatalities

In FY18 we continued to demonstrate safety excellence with another year of zero employee fatalities at work.

S7. Lost-Time Injury Frequency Rate (LTIFR)

S7a. Lost-Time Injury Frequency Rate (LTIFR) - Employees

The following table summarizes our company’s lost-time injury frequency rate for employees (per one million hours worked).

<table>

GOVERNANCE

Jacobs has a strong track record of integrity and corporate governance practices that promote thoughtful leadership by its officers and Board of Directors to facilitate profitable growth, while strategically balancing risk to maximize long-term shareholder value. For a detailed discussion of our corporate governance best practices, see our 2019 Proxy Statement.

G1. Board Structure

Our board consists of 10 directors. In addition to our Chair and CEO, the other nine directors are independent. Although the role of our Chair and CEO is joint, an independent lead director has been appointed.

Our definition of independent is detailed under “Guidelines for Determining Director Independence,” page 1 of Jacobs Corporate Governance Guidelines. Definition begins as: It is expected the Board members (in that role) will exercise diligently and in good faith their independent judgment in the best interests of the Company and its shareholders as a whole, notwithstanding their other activities or affiliations. No director qualifies as “independent” unless the Board affirmatively determines that the director has no material relationship with the Company (either directly or as a partner, shareholder or officer of an organization that has a relationship with the Company).

G2. Board Diversity

The representation of board members who are ethnically diverse or female is 40%. Three of our 10 directors are female.

Additionally, we have a formal, publicly available board diversity policy that clearly requires diversity factors such as gender, race, ethnicity, country of origin, nationality or cultural background in the board nomination process. As stated in our Annual Meeting of Shareholders and Proxy Statement 2019 under “Board Composition – Diversity” – "Diversity: The Board believes it should encompass individuals with diverse backgrounds and perspectives. In accordance with this guideline, the Nominating and Corporate Governance Committee considers the diversity of viewpoints, backgrounds, experience and other demographics in evaluating and considering potential director candidates. Diversity is an important consideration in the director nomination process because the Board believes that people of different genders, experiences, ages, races and ethnic backgrounds can contribute different, useful perspectives, while collaborating effectively to further the Company’s mission. This policy is included in the Company’s Corporate Governance Guidelines.”

G3. Code of Conduct

Our company Code of Conduct is publicly available and addresses elements including but not limited to:

- Corruption and bribery
- Discrimination
- Confidentiality of information
- Conflicts of interest
- Antitrust/anti-competitive practices
- Money-laundering and/or insider trading/dealing
- Environment, health and safety
- Whistleblowing

99% of our employees have completed our online Code of Conduct training which includes a written acknowledgement of completion.
G4. Supplier Code of Conduct

Our company has a Supplier Code of Conduct, and it is publicly available. The Code covers topics including:

- Health, safety, and environment
- Quality
- Competition and anti-trust
- Bribery and corruption
- Inclusion and diversity
- Human rights
- Business ethics

G5. Risk Governance

<table>

<td>Steve Demetriou, Chair and Chief Executive Officer</td>
</tr>
</tbody>
</table>

The Board of Directors receives regular briefings and presentations on specific risk areas and, at least annually, reviews the Company's enterprise risk management analysis and mitigation strategies. For all aspects discussed with the Board there are briefing notes providing awareness and training on the issues being raised. For the ER's identified there is training and awareness provided by subject matter experts who present their approach to mitigate, manage or eliminate the risk. Oversight is provided by the Jacobs Business Resilience Steering Group which has developed a charter, guidance and provided a software-based toolkit to support training and a generic organizational approach to ER. In addition, the Board is privy to all Internal Audit findings and, in those discussions, there are also briefing notes prepared to provide appropriate training and awareness of the issues being discussed.

G6. Company-wide Sustainability Strategy

Our company has a group-wide sustainability strategy that provides guidance to our corporate citizenship/philanthropic activities. PlanBeyond™ is the name given to Jacobs' refreshed approach to sustainability. Following a comprehensive Materiality Assessment over the course of 2018, encompassing detailed stakeholder consultation with employees, clients, and investors, our priority focus areas have emerged in the strategy and are aligned to key goals/targets within the United Nations Sustainable Development Goals (UN SDGs). There is a dedicated Sustainability Center of Excellence leading on implementation of the focus areas and achievement of our 2020 goals, reporting into our Senior Vice President and Global Head of Sustainability. A clear governance structure has been defined for each focus area, with a dedicated Working Group and Executive Sponsor from across the organization, tasked with delivering on our 2020 goals and developing longer term stretch goals. In addition, a dedicated Board member for sustainability has been named. Sustainability is a core part of our corporate strategy and was presented as such as part of our Investor Day in February 2019.
Graphic below shows Jacobs Sustainability Governance Structure:
The three main priorities as outlined in our group-wide corporate citizenship/philanthropy strategy are summarized in the tables below.

<table>
<thead>
<tr>
<th>Priorities and UN SDG Alignment</th>
<th>Description of alignment between priority and business drivers.</th>
<th>Business Benefit KPI</th>
<th>Social/Environmental Benefit KPI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Priority 1: Optimizing our Footprint (Climate Action)</td>
<td>Our company vision is to provide solutions for a more connected, sustainable world; and one of our core values states that clients are our valued partners. PlanBeyond™ is how we define our approach to sustainability, and Jacobs Sustainability+ is our way of capturing and quantifying the added value we provide to our clients in reducing their carbon footprint and supporting them to make a positive contribution towards the UN SDGs. Jacobs Sustainability+ is a simple database tool that facilitates a conversation with our clients about the most efficient, least resource intensive, most sustainable solution that will offer economic, environmental and social benefits. Jacobs Sustainability+ can track how we are providing more with less, using metrics such as tCO2 avoided, reduction in energy and water consumption, reduction in waste generated, social value such as job creation, economic savings and green building certification.</td>
<td>The benefit to our business is measured in carbon emissions related to our travel as part of our 2022 PlanBeyond™ goal, as clearly indicated in our strategy document. <a href="#">Sustainability Strategy 2018-2020</a></td>
<td>KPI set for measuring our travel reduction commitment is in emissions related to our travel – 20% reduction by 2022.</td>
</tr>

</tr>
<tr>
<td>------------------------------</td>
<td>---------------------------------------------------------------</td>
<td>----------------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td>Priority 2: Our Health and Wellbeing</td>
<td>“We live inclusion” is a core value for Jacobs and as such we recognize that we can only be as strong as our employees, business partners, clients, families and neighbors. We strive to create mentally healthy working environments that: •Promote positive mental health •Raise awareness of risks to mental health •Mitigate the risks to mental health through positive behaviors, open discussion, support and advice •Protect against, and mitigates risks, to mental illness •Support all employees, through peers, management and trained Positive Mental Health (PMH) champions. Our commitment to positive mental health is a manifestation of BeyondZero™, our culture of caring. With sensitivity to our global cultures, we develop programs and practices that help keep our people healthy, active and supported. We believe this is good for our people, our communities and our business.</td>
<td>Our goal for 2020 was to train 1,500 PMH Champions and grow the coverage of our network of PMH champions, including a target to train 50% of our Senior Management Team. A dedicated working group was established in line with the governance structure in our Sustainability Strategy 2018-2020 to ensure systematic progress towards achievement of our goals. We have a longer-term target to conduct a baseline analysis of our employee wellbeing. At the end of 2019, we had exceeded our goal with more than 1700 PMH Champions trained in how to guide staff who have mental health concerns or crises to the appropriate level of help; support fellow employees; and encourage positive mental health and wellbeing throughout the workplace. We also trained 90% of our global senior leadership team as PMH Champions, helping efforts to normalize the conversation across Jacobs.</td>

<tr>
<td>Priority 3: Leading Through Innovation (Industry, Innovation and Infrastructure)</td>
<td>PlanBeyond™ helps us to look beyond our company, to how we contribute as a global corporate citizen. Our sustainability activities touch many stakeholders such as our clients, our people and wider communities, supply chain partners and investors. Through PlanBeyond™ we promote knowledge sharing internally and externally and create a project delivery environment where we push beyond what is accepted, to what is possible. To provide solutions that look beyond the immediate quickest solution and take lifecycle impact into consideration, economically, environmentally and socially. At the center of what we currently do is our award-winning Sustainability+ approach to carbon savings. It is unique to Jacobs and provides an excellent opportunity to record our sustainable solutions. The most innovative, replicable and achievable ideas are awarded with a quarterly award sponsored by our CFO Kevin Berryman. Each winner is then entitled to nominate a charity to receive a $1,000 donation from Jacobs.</td>
<td>Our PlanBeyond™ Sustainability Strategy 2018-2020 aims to integrate sustainability planning into the delivery of the Jacobs Innovation Hubs. Our six Innovation Hubs focus on promoting innovation across thematic areas: Cybersecurity; Internet of Things; Predictive Data Analytics; Applied Geospatial Science; Automated Design; Internal Innovation. All of which represent client priorities in the present and for the future and form part of our Innovation Strategy. We have two 2020 goals written into our PlanBeyond™ strategy that help integrate sustainability and innovation to provide our clients with cutting-edge lifecycle solutions: 1. Incorporate UN SDG reporting into Jacobs project reporting tools; 2. Integrate sustainability planning into the delivery of the Jacobs Innovation Hubs.</td>
