# Cautionary statement

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs applicable to sales and all-in sustaining costs; (iii) estimates of future capital expenditures; (iv) estimates of future cost reductions and efficiencies; (v) expectations regarding the development, growth and potential of the Company’s operations, projects and investment, including, without limitation, returns, IRR, schedule, commercial start and first production and upside; (vi) expectations regarding future debt repayments and reductions; (vii) expectations regarding future free cash flow generation, liquidity and balance sheet strength; and (viii) expectations regarding the completion of the sale of the Company’s interest in PTNNT, including, without limitation, the timing of closing, expected use of proceeds, anticipated receipt of sale consideration and contingent payments, expected accounting impacts resulting from the proposed transaction, future operation and transition of Batu Hijau (including Phase 7) and future development of Elang. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s operations and projects being consistent with current expectations and mine plans, including without limitation receipt of export approvals; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineralized material estimates; (viii) the acceptable outcome of negotiation of the amendment to the Contract of Work and/or resolution of export issues in Indonesia; and (ix) other assumptions noted herein. Investors are cautioned that no assurances can be made with respect to the closing of the pending sale of the Company’s interest in PTNNT, which remains contingent on the receipt of regulatory approvals, buyer shareholder approval, and satisfaction of other conditions precedent, including, without limitation, government approval of the PTNNT share transfer, maintenance of valid export license at closing, the concurrent closing of the PTMDB sale of its 24 percent stake to the buyer, resolution of certain tax matters, and no occurrence of material adverse events that would substantially impact the future value of Batu Hijau. Potential additional risks include other political, regulatory or legal challenges and community and labor issues. The amount of contingent payment will also remain subject to risks and uncertainties, including copper prices and future production and development at Batu Hijau and Elang. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Other risks relating to forward looking statements in regard to the Company’s business and future performance may include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks, community relations, conflict resolution and outcome of projects or oppositions and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2015 Annual Report on Form 10-K, filed on February 17, 2016, with the Securities and Exchange Commission (SEC), as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors’ own risk. Investors are reminded that this presentation should be read in conjunction with Newmont’s Form 10-Q expected to be filed on or about July 20, 2016 with the SEC (also available at [www.newmont.com](http://www.newmont.com)).

## Overview – Gary Goldberg

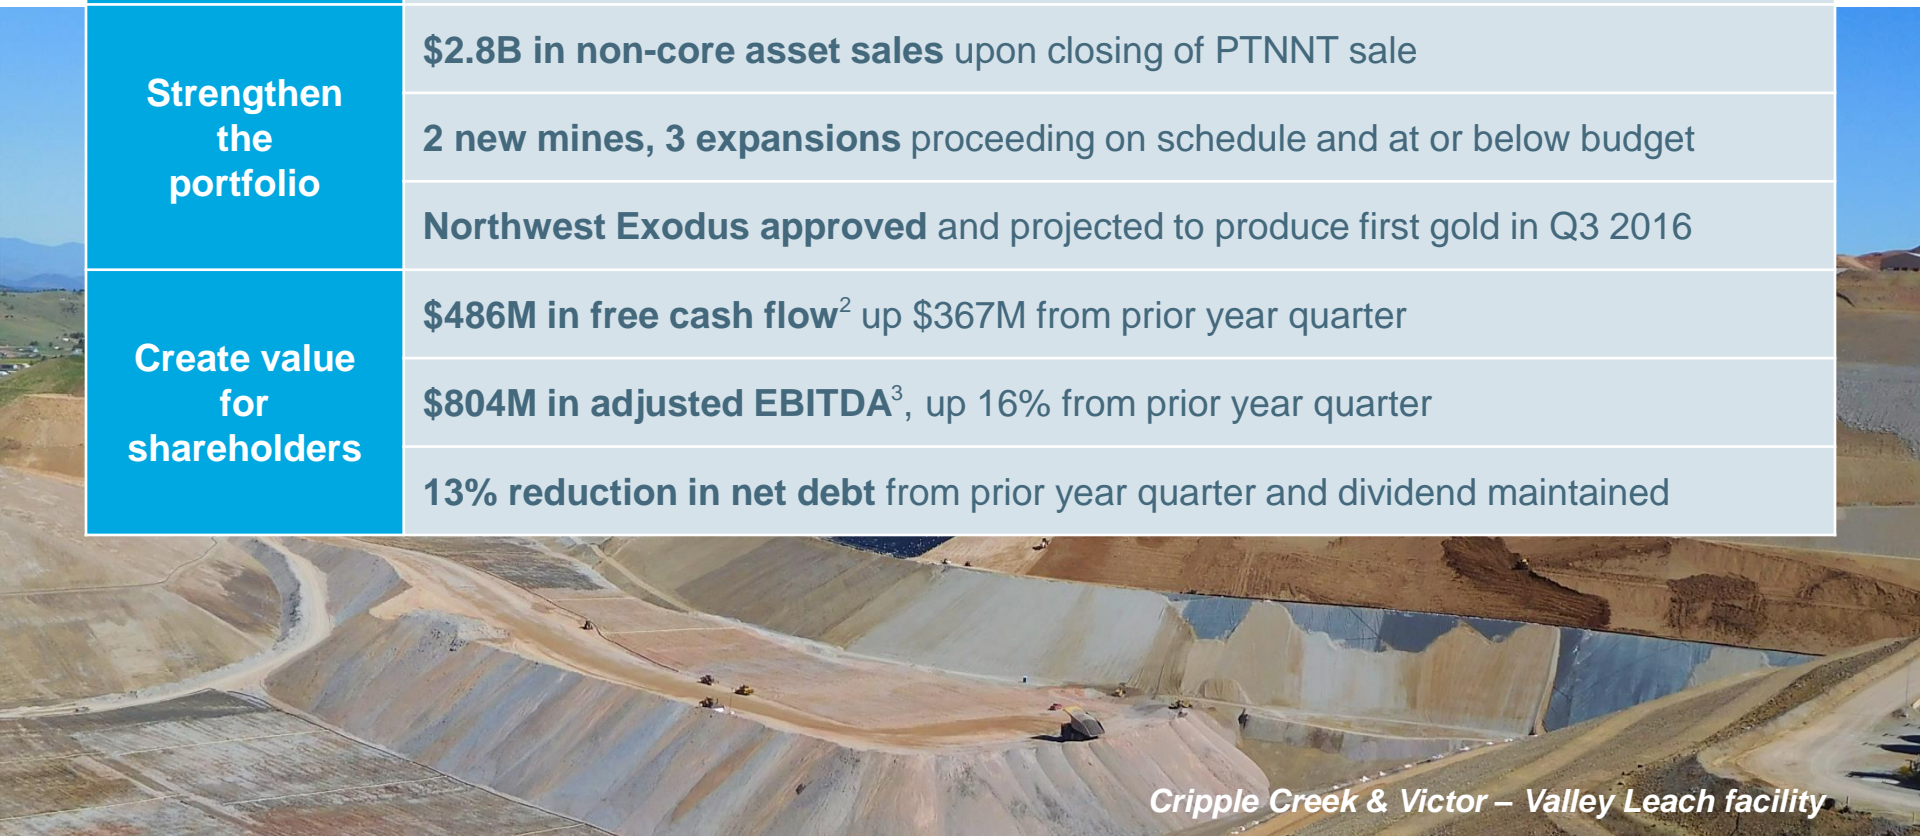

---

# Continuing to improve performance and portfolio

Improve the underlying business	6% reduction in total injury rates from prior year quarter
	\$876/oz AISC <sup>1</sup> down 4% from prior year quarter; 2016 outlook lowered \$10/oz
	1.3 Moz of attributable gold production up 7% from prior year quarter
Strengthen the portfolio	\$2.8B in non-core asset sales upon closing of PTNNT sale
	2 new mines, 3 expansions proceeding on schedule and at or below budget
	Northwest Exodus approved and projected to produce first gold in Q3 2016
Create value for shareholders	\$486M in free cash flow <sup>2</sup> up \$367M from prior year quarter
	\$804M in adjusted EBITDA <sup>3</sup> , up 16% from prior year quarter
	13% reduction in net debt from prior year quarter and dividend maintained

*Cripple Creek & Victor – Valley Leach facility*

# Recognized leaders in safety and sustainability

**Injury rates** (total recordable injuries per 200,000 hours worked)

**Phoenix maintenance crew reaches 3 years working without injury**

# Steady trajectory of cost improvement continues

Gold all-in sustaining cost (\$/ounce)<sup>1</sup>

**AISC down 28% since 2012**

# Higher production at Tanami, KCGM and Ahafo

Q2 attributable gold production\* (Moz)

\* Includes Batu Hijau production

2016 outlook – initial and w/o Batu Hijau

See Endnote 5

**Steady gold production over last 3 years with 27% fewer people**

# Sale of PTNNT aligns with strategic goals<sup>4</sup>

- Monetizes future cash flow
- Total consideration of \$1.3B = \$920M gross cash proceeds + \$403M contingent payments
- Transaction anticipated to close in Q3 2016 subject to conditions precedent
- Post-close position – 92% of reserve base is gold<sup>6</sup>

**Proceeds earmarked to repay debt and fund highest margin projects**

# Adding profitable production from two new mines

## Merian ~ 90% complete

<b>Production</b>	<b>400 – 500 Koz (100%)</b>
<b>AISC</b>	<b>\$650 – \$700/oz</b>
<b>Commercial start</b>	<b>H2 2016</b>

*Expected average for first five years of production. See Endnote 5.*

## Long Canyon ~ 80% complete

<b>Production</b>	<b>100 – 150 Koz</b>
<b>AISC</b>	<b>\$500 – \$600/oz</b>
<b>Commercial start</b>	<b>H1 2017</b>

*Expected life of mine average. See Endnote 5.*

# Extending life of lower cost operations

## Cripple Creek & Victor ~ 50% complete

<b>Production</b>	<b>350 – 400Koz</b>
<b>AISC</b>	<b>\$600 – \$650/oz</b>
<b>First production</b>	<b>March 2016 (leach pad)</b>

*Expected 2016. See Endnote 5.*

## Tanami Expansion ~ 35% complete

<b>Production</b>	<b>80 Koz incremental</b>
<b>AISC</b>	<b>\$50/oz reduction</b>
<b>First production</b>	<b>Mid-2017</b>

*Expected average for first five years of production. See Endnote 5.*

## Financial results – Laurie Brlas

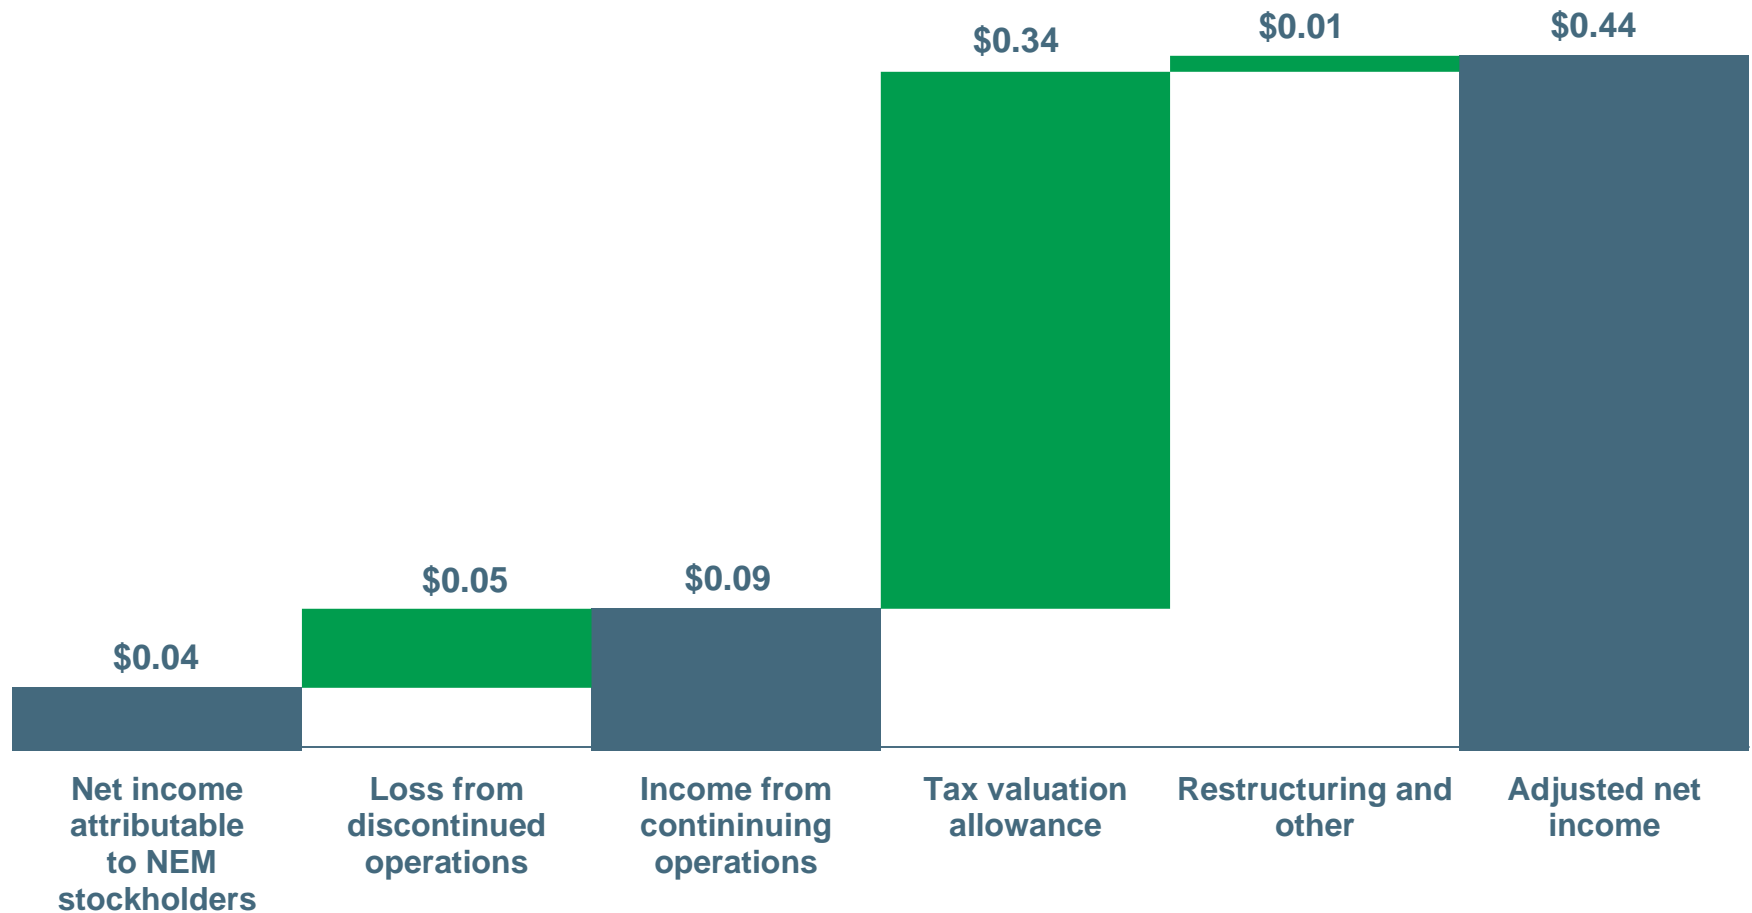

---

# Strong Q2 adjusted net income

GAAP to adjusted net income (\$/share)<sup>7</sup>

# Operations continue to outperform

	Q2 2016	Q2 2015	Change
Average Realized Gold Price, Net (\$/oz)	\$1,260	\$1,179	+7%
Attributable Gold Production (Koz)	1,285	1,203	+7%
Attributable Gold Sales (Koz)	1,279	1,157	+11%
Gold CAS (\$/oz)	\$637	\$642	-1%
Gold AISC (\$/oz)	\$876	\$909	-4%

# Exceptional financial performance

	Q2 2016	Q2 2015	Change
Revenue (\$M)	\$2,038	\$1,908	+7%
Adjusted Net Income (\$M)	\$231	\$131	+76%
Adjusted Net Income (\$ per share)	\$0.44	\$0.26	+69%
Adjusted EBITDA (\$M)	\$804	\$692	+16%
Cash from Continuing Operations (\$M)	\$780	\$441	+77%
Free Cash Flow (\$M)	\$486	\$119	+308%
Dividend Per Share	\$0.025	\$0.025	Maintain

# Executing capital priorities

Year to date change in ending consolidated cash balance (\$M)

# PTNNT sale close expected to improve liquidity

## Cash balance post PTNNT transaction<sup>4</sup> (\$M)

# Leading balance sheet

## Debt Schedule as of June 30, 2016

\*Competitor average represents the enterprise value weighted average for Agnico Eagle, AngloGold Ashanti, Barrick, Goldcorp, Gold Fields, Kinross, Newcrest, and Yamana; sourced from Thomson Reuters; enterprise values as of 06/30/2016.

# Leading free cash flow generation

## Cumulative free cash flow 2013 to 2015<sup>2</sup> (\$M)

\*Competitors represent enterprise value weighted averages for Agnico Eagle, Anglogold Ashanti, Barrick, Goldcorp, Gold Fields, Kinross, Newcrest, Randgold and Yamana; sourced from Bloomberg; enterprise values as of 06/30/2016. See Endnotes 2, 8.

## Outlook – Gary Goldberg

---

# Cost improvements are sustained

Consolidated gold all-in sustaining costs – outlook without Batu Hijau (\$/oz)<sup>4,5</sup>

# Steady attributable gold production maintained

Attributable gold production – outlook without Batu Hijau (Moz)<sup>4,5</sup>

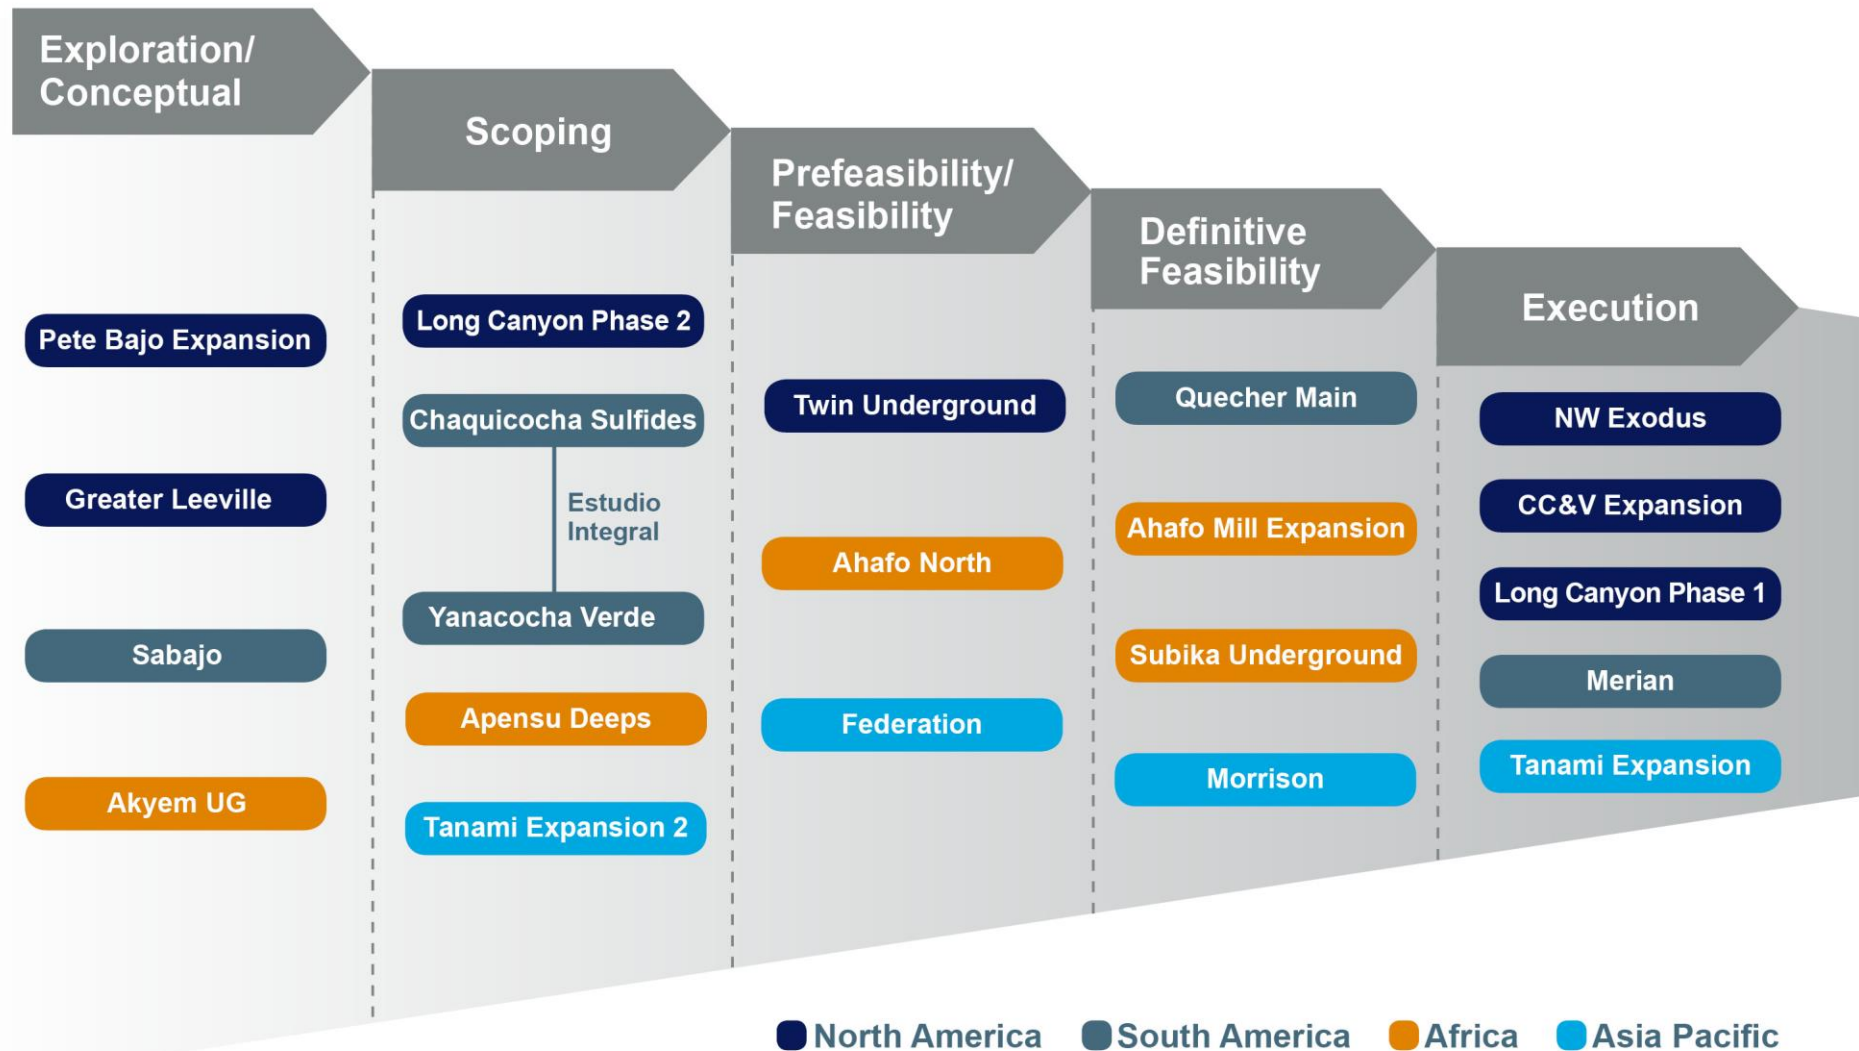

# Disciplined capital expenditure continues

## Consolidated capital expenditure – outlook without Batu Hijau (\$M)<sup>4,5</sup>

# Project pipeline represents near term upside

# Northwest Exodus extends life and access

- Extends mine life by 7 years, produces 700Koz, lowers Carlin AISC by \$25/oz
- IRR of >30% at flat \$1,200/oz gold price
- Creates platform for future growth in highly prospective Carlin underground

# Ahafo projects offset harder ore and lower grades

## Ahafo Mill Expansion

Production	75 – 100Koz
AISC	First quartile
Decision	H2 2016

*Expected average for first five years of production. See Endnote 5.*

## Subika Underground

Production	150 – 200Koz
AISC	First quartile
Decision	H2 2016

*Expected life of mine average. See Endnote 5.*

# Assessing options to profitably extend Yanacocha

- Quecher Main oxides extend life to 2024 with ~200Koz average annual production
- Prefeasibility studies underway to further optimize sulfide development (Estudio Integral)
- Potential to extend profitable production starting in 2022 (pending IRR of +15%)

# Inflation outpacing interest rate hikes by US Fed

- Negative real interest rates lower opportunity costs for holding gold
- Inflation likely to outpace US interest rate hikes
- US inflation low but increasing on strong consumer demand and rising wages

Real interest rates\* (%)

US Inflation rates (%)

\* US short-term real interest rates (Fed Funds rate less inflation (Headline CPI); Source: MacroBond

# Investors turning to bonds and gold as safe havens

- Higher bond prices and lower yields can be bullish for gold
- Global ETF holdings have increased by more than 17 Moz in 2016 YTD (nearly 40%)

US bond yields (%)

Source: MacroBond, Bloomberg

Gold ETF holdings (Moz) and gold price (\$/oz)

Source: Bloomberg

# Positioned for long-term value creation

	Where are we today?	Where are we heading?
<b>Safety</b>	Industry leading performance	Zero injuries and illnesses
<b>Sustainability</b>	Industry leading performance	Improved country risk profile
<b>Costs</b>	AISC down 28% since 2012	Ongoing savings to offset inflation
<b>Portfolio</b>	\$2.8B in asset sales since 2013*	Superior value and risk profile
<b>Production</b>	Profitable growth	Highest value ounces
<b>Free Cash Flow</b>	\$486M in Q2 while funding 5 projects	Self-fund projects and dividends
<b>Returns</b>	Maximize risk-adjusted returns	Maintain first quartile TSR
<b>Balance sheet</b>	Net debt down 49% since 2013	Superior financial flexibility

\* Includes expected cash proceeds upon close of PTNNT divestiture. See Endnote 4.

# Appendix

---

# 2016 Outlook<sup>a</sup>

	Consolidated Production (Koz, Kt)	Attributable Production (Koz, Kt)	Consolidated CAS (\$/oz, \$/lb)	Consolidated All- in Sustaining Costs <sup>b</sup> (\$/oz, \$/lb)	Consolidated Total Capital Expenditures (\$M)
<b>North America</b>					
Carlin	1,040 – 1,100	1,040 – 1,100	\$750 – \$800	\$950 – \$980	\$190 – \$210
Phoenix <sup>c</sup>	180 – 200	180 – 200	\$825 – \$875	\$975 – \$1,025	\$20 – \$30
Twin Creeks <sup>d</sup>	400 – 430	400 – 430	\$550 – \$600	\$650 – \$700	\$25 – \$35
CC&V	350 – 400	350 – 400	\$500 – \$550	\$600 – \$650	\$80 – \$90
Long Canyon					\$140 – \$160
Other North America					\$5 – \$15
<b>Total</b>	<b>1,970 – 2,130</b>	<b>1,970 – 2,130</b>	<b>\$650 – \$700</b>	<b>\$825 – \$900</b>	<b>\$460 – \$540</b>
<b>South America</b>

Batu Hijau <sup>h</sup>	170 – 190	80 – 100	\$1.00 – \$1.20	\$1.40 – \$1.60	
<b>Total Copper with Batu</b>	<b>210 – 250</b>	<b>120 – 160</b>	<b>\$1.20 – \$1.40</b>	<b>\$1.50 – \$1.70</b>	

## Consolidated Expense Outlook<sup>i</sup>

General & Administrative	\$ 225 – \$ 275
Interest Expense	\$ 260 – \$ 280
DD&A	\$ 1,100 – \$ 1,175
Exploration and Projects	\$ 275 – \$ 300
Sustaining Capital	\$ 650 – \$ 700
Tax Rate	33% – 37%

<sup>a</sup>2016 Outlook in the table above are considered “forward-looking statements” and are based upon certain assumptions, including, but not limited to, metal prices, oil prices, certain exchange rates and other assumptions. For example, 2016 Outlook assumes \$1,300/oz Au, \$2.00/lb Cu, \$0.75 USD/AUD exchange rate and \$50/barrel WTI; AISC and CAS cost estimates do not include inflation, for the remainder of the year. Production, AISC and capital estimates exclude projects that have not yet been approved (Twin Underground, Batu Phase 7, Ahafo Mill Expansion and Subika Underground). The potential impact on inventory valuation as a result of lower prices, input costs, and project decisions are not included as part of this Outlook. Such assumptions may prove to be incorrect and actual results may differ materially from those anticipated. See cautionary note at the end of the release.

<sup>b</sup>All-in sustaining costs as used in the Company’s Outlook is a non-GAAP metric defined as the sum of cost applicable to sales (including all direct and indirect costs related to current gold production incurred to execute on the current mine plan), remediation costs (including operating accretion and amortization of asset retirement costs), G&A, exploration expense, advanced projects and R&D, treatment and refining costs, other expense, net of one-time adjustments and sustaining capital.

<sup>c</sup>Includes Lone Tree operations.

<sup>d</sup>Includes TRJV operations.

<sup>e</sup>Consolidated production for Yanacocha is presented on a total production basis for the mine site; attributable production represents a 51.35% interest.

<sup>f</sup>Both consolidated and attributable production are shown on a pro-rata basis with a 50% ownership for Kalgoorlie.

<sup>g</sup>Production outlook does not include equity production from stakes in TMAC (29.4%) or La Zanja (46.94%).

<sup>h</sup>Consolidated production for Batu Hijau is presented on a total production basis for the mine site; whereas attributable production represents a 48.5% ownership interest in 2016 outlook. Outlook for Batu Hijau remains subject to various factors, including, without limitation, renegotiation of the CoW, issuance of future export approvals, negotiations with the labor union, future in-country smelting availability and regulations relating to export quotas, and certain other factors.

<sup>i</sup>Consolidated expense outlook is adjusted to exclude extraordinary items. For example, the tax rate outlook above is a consolidated adjusted rate, which assumes the exclusion of certain tax valuation allowance adjustments. Beginning in 2016, regional general and administrative expense is included in total general and administrative expense (G&A) and community development cost is included in CAS.

# Free cash flow

Management uses Free Cash Flow as a non-GAAP measure to analyze cash flows generated from operations. Free Cash Flow is Net cash provided by operating activities plus Net cash used in discontinued operations less Additions to property, plant and mine development as presented on the Condensed Consolidated Statements of Cash Flow. The Company believes Free Cash Flow is also useful as one of the bases for comparing the Company's performance with its competitors. Although Free Cash Flow and similar measures are frequently used as measures of cash flows generated from operations by other companies, the Company's calculation of Free Cash Flow is not necessarily comparable to such other similarly titled captions of other companies. The presentation of non-GAAP Free Cash Flow is not meant to be considered in isolation or as an alternative to net income as an indicator of the Company's performance, or as an alternative to cash flows from operating activities as a measure of liquidity as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. The Company's definition of Free Cash Flow is limited in that it does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, the Company believes it is important to view Free Cash Flow as a measure that provides supplemental information to the Company's Condensed Consolidated Statements of Cash Flow. The following table sets forth a reconciliation of Free Cash Flow, a non-GAAP financial measure, to Net cash provided by operating activities, which the Company believes to be the GAAP financial measure most directly comparable to Free Cash Flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>June 30,</u>		<u>June 30,</u>	
	<u>2016</u>	<u>2015</u>	<u>2016</u>	<u>2015</u>
Net cash provided by operating activities	\$ 777	\$ 438	\$ 1,299	\$ 1,063
Plus: Net cash used in discontinued operations	3	3	5	6
Net cash provided by continuing operating activities	780	441	1,304	1,069
Less: Additions to property, plant and mine development	(294)	(322)	(591)	(606)
Free Cash Flow	<u>\$ 486</u>	<u>\$ 119</u>	<u>\$ 713</u>	<u>\$ 463</u>
Net cash (used in) investing activities <sup>(1)</sup>	\$ (294)	\$ (325)	\$ (405)	\$ (539)
Net cash (used in) provided by financing activities	\$ (40)	\$ 596	\$ (778)	\$ 400

(1) Net cash used in investing activities includes Additions to property, plant and mine development, which is included in the Company's computation of Free Cash Flow.

# Free cash flow

## Free cash flow per share; 12-month trailing

	Three Months Ended			
	6/30/2016	3/31/2016	12/31/2015	9/30/2015
Net cash provided by operating activities	\$ 777	\$ 522	\$ 272	\$ 810
Plus: Net cash used in discontinued operations	3	2	3	3
Net cash provided by continuing operations	780	524	275	813
Less: Additions to property, plant and mine development	(294)	(297)	(460)	(335)
Free Cash Flow	\$ 486	\$ 227	\$ (185)	\$ 478
Free cash flow 12-month trailing	\$ 1,006			
Shares outstanding (Diluted)	533			
Free cash flow per share; 12-month trailing average	\$ 1.89			

## Cumulative free cash flow; 2013 to 2015

	Year Ended		
	12/31/2015	12/31/2014	12/31/2013
Net cash provided by operating activities	\$ 2,145	\$ 1,438	\$ 1,543
Plus: Net cash used in discontinued operations	12	13	18
Net cash provided by continuing operations	\$ 2,157	\$ 1,451	\$ 1,561
Less: Additions to property, plant and mine development	(1,401)	(1,110)	(1,900)
Free Cash Flow	\$ 756	\$ 341	\$ (339)
Cumulative free cash flow (2013 to 2015)	\$ 758		

# EBITDA and Adjusted EBITDA

Management uses Earnings before interest, taxes and depreciation and amortization (“EBITDA”) and EBITDA adjusted for non-core or certain items that have a disproportionate impact on our results for a particular period (“Adjusted EBITDA”) as non-GAAP measures to evaluate the Company’s operating performance. EBITDA and Adjusted EBITDA do not represent, and should not be considered an alternative to, net earnings (loss), operating earnings (loss), or cash flow from operations as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements by other companies, our calculation of Adjusted EBITDA is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. Management’s determination of the components of Adjusted EBITDA are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to EBITDA and Adjusted EBITDA as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Net income (loss) attributable to Newmont stockholders	\$ 23	\$ 72	\$ 75	\$ 255
Net income (loss) attributable to noncontrolling interests	39	76	122	122
Loss (income) from discontinued operations	27	(9)	53	(17)
Equity loss (income) of affiliates	5	7	10	16
Income and mining tax expense (benefit)	310	152	634	345
Depreciation and amortization	314	276	636	565
Interest expense, net	71	82	150	167
EBITDA	\$ 789	\$ 656	\$ 1,680	\$ 1,453
Adjustments:				
Impairment of investments <sup>(1)</sup>	\$ —	\$ 16	\$ —	\$ 73
Impairment of long-lived assets <sup>(2)</sup>	4	2	4	3
Restructuring and other <sup>(3)</sup>	9	9	22	14
Acquisitions costs <sup>(4)</sup>	2	8	2	8
Loss on debt repayment <sup>(5)</sup>	—	—	3	—
Loss (gain) on asset and investment sales <sup>(6)</sup>	—	1	(104)	(43)
Adjusted EBITDA	\$ 804	\$ 692	\$ 1,607	\$ 1,508

(1) Impairment of investments, included in *Other income, net*, represents other-than-temporary impairments on equity and cost method investments and does not relate to our core operations.

(2) Impairment of long-lived assets, included in *Other expense, net*, represents non-cash write-downs that do no impact our core operations.

(3) Restructuring and other, included in *Other expense, net*, represents certain costs associated with the Full Potential initiative announced in 2013, a one-time payment to PT Freeport Indonesia for engineering studies related to their smelter project in the second quarter of 2016, accrued legal costs in our Africa region during 2016 as well as system integration costs related to our acquisition of CC&V.

(4) Acquisition costs, included in *Other expense, net* represents adjustments made in the second quarter of 2016 to the contingent consideration liability from the acquisition of Boddington, and costs associated with the acquisition of CC&V in 2015.

(5) Loss on debt repayment, included in *Other income, net* and *Interest expense, net*, represents the impact of the debt tender offer on our 2019 Notes and 2039 Notes during the first quarter of 2016.

(6) Loss (gain) on asset and investment sales, included in *Other income, net*, represents primarily the sale of our holdings in Regis Resources Ltd. in the first quarter of 2016 and land sales of Hemlo mineral rights in Canada and the Relief Canyon mine in Nevada during the first quarter of 2015.

# Return on Capital Employed (ROCE)

---

Management uses Return on Capital Employed (“ROCE”) as a non-GAAP measure to evaluate the Company’s operating performance. ROCE does not represent, and should not be considered an alternative to, net earnings (loss), operating earnings (loss), or cash flow from operations as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although ROCE and similar measures are frequently used as measures of operations by other companies, our calculation of ROCE is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that ROCE provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. Management’s determination of the components of ROCE are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to ROCE as follows on the next slide.

# Return on Capital Employed (ROCE)

# Adjusted net income

---

## Adjusted net income (loss)

Management of the Company uses Adjusted net income (loss) to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income (loss) allows investors and analysts to understand the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals, by excluding certain items that have a disproportionate impact on our results for a particular period. The net income (loss) adjustments are presented net of tax generally at Company's statutory effective tax rate of 35% and net of our partners' noncontrolling interests when applicable. The corollary impact of the adjustments through the Company's Valuation allowance is shown separately. The tax valuation allowance adjustment includes items such as foreign tax credits, alternative minimum tax credits, capital losses and disallowed foreign losses. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts.

(1) Loss (income) from discontinued operations relates to adjustments in our Holt property royalty and is presented net of tax expense (benefit) of \$(12), \$4, \$(23) and \$8, respectively.

(2) Impairment of investments, included in Other income, net, represents other-than-temporary impairments on equity and cost method investments and does not relate to our core operations. Amounts are presented net of tax expense (benefit) of \$-, \$(6), \$- and \$(26), respectively.

(3) Impairment of long-lived assets, included in Other expense, net, represents non-cash write-downs that do not impact our core operations. Amounts are presented net of tax expense (benefit) of \$(1), \$-, \$(1) and \$(1), respectively, and amounts attributed to noncontrolling interest income (expense) of \$(1), \$-, \$(1) and \$-, respectively.

(4) Restructuring and other, included in Other expense, net, represents certain costs associated with the Full Potential initiative announced in 2013, a one-time payment to PT Freeport Indonesia for engineering studies related to their smelter project in the second quarter of 2016, accrued legal costs in our Africa region during 2016 as well as system integration costs related to our acquisition of CC&V. Amounts are presented net of tax expense (benefit) of \$(3), \$(3), \$(8) and \$(5), respectively, and amounts attributed to noncontrolling interest income (expense) of \$(2), \$(1), \$(3) and \$(2), respectively.

(5) Acquisition costs, included in Other expense, net, represents adjustments made in the second quarter of 2016 to the contingent consideration liability from the acquisition of Boddington and costs associated with the acquisition of CC&V in 2015. Amounts are presented net of tax expense (benefit) of \$(1), \$(3), \$(1) and \$(3), respectively.

(6) Loss (gain) on asset and investment sales, included in Other income, net, primarily represents the sale of our holdings in Regis Resources Ltd. in the first quarter of 2016 and land sales of Hemlo mineral rights in Canada and the Relief Canyon mine in Nevada during the first quarter of 2015. Amounts are presented net of tax expense (benefit) of \$-, \$-, \$- and \$16, respectively.

(7) Loss on debt repayment, included in Other income, net and Interest expense, net, represents the impact of the debt tender offer on our 2019 Notes and 2039 Notes during the first quarter of 2016. Amounts are presented net of tax expense (benefit) of \$-, \$-, \$(1) and \$-, respectively.

(8) Tax adjustments include movements in tax valuation allowance and tax adjustments not related to core operations. Second quarter and year to date tax adjustments were primarily the result of a tax restructuring and a loss carryback, both of which resulted in an increase in the Company's valuation allowance on credits.

# All-in sustaining costs

Newmont has worked to develop a metric that expands on GAAP measures such as cost of goods sold and non-GAAP measures, such as costs applicable to sales per ounce, to provide visibility into the economics of our mining operations related to expenditures, operating performance and the ability to generate cash flow from operations.

Current GAAP-measures used in the mining industry, such as cost of goods sold, do not capture all of the expenditures incurred to discover, develop, and sustain gold production. Therefore, we believe that all-in sustaining costs is a non-GAAP measure that provides additional information to management, investors, and analysts that aid in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production.

All-in sustaining cost (AISC) amounts are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks such as in International Financial Reporting Standards (IFRS), or by reflecting the benefit from selling non-gold metals as a reduction to AISC. Differences may also arise related to definitional differences of sustaining versus development capital activities based upon each company's internal policies.

The following disclosure provides information regarding the adjustments made in determining the all-in sustaining costs measure:

**Cost Applicable to Sales** - Includes all direct and indirect costs related to current gold production incurred to execute the current mine plan. Costs Applicable to Sales (CAS) includes by-product credits from certain metals obtained during the process of extracting and processing the primary ore-body. CAS is accounted for on an accrual basis and excludes Amortization and Reclamation and remediation, which is consistent with our presentation of CAS on the Statement of Consolidated Income. In determining AISC, only the CAS associated with producing and selling an ounce of gold is included in the measure. Therefore, the amount of gold CAS included in AISC is derived from the CAS presented in the Company's Statement of Consolidated Income less the amount of CAS attributable to the production of copper at our Phoenix, Boddington and Batu Hijau mines. The copper CAS at those mine sites is disclosed in Note 3 – Segments that accompanies the Consolidated Financial Statements. The allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines is based upon the relative sales percentage of copper and gold sold during the period.

**Reclamation Costs** - Includes accretion expense related to Asset Retirement Obligations (ARO) and the amortization of the related Asset Retirement Cost (ARC) for the Company's operating properties. Accretion related to ARO and the amortization of the ARC assets for reclamation does not reflect annual cash outflows but are calculated in accordance with GAAP. The accretion and amortization reflect the periodic costs of reclamation and remediation associated with current gold production and are therefore included in the measure. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines.

**Advanced Projects and Exploration** - Includes incurred expenses related to projects that are designed to increase or enhance current gold production and gold exploration. We note that as current resources are depleted, exploration and advance projects are necessary for us to replace the depleting reserves or enhance the recovery and processing of the current reserves. As this relates to sustaining our gold production, and is considered a continuing cost of a mining company, these costs are included in the AISC measure. These costs are derived from the Advanced projects, research and development and Exploration amounts presented in the Company's Statement of Consolidated Income less the amount attributable to the production of copper at our Phoenix, Boddington and Batu Hijau mines. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Batu Hijau, Boddington and Phoenix mines.

**General and Administrative** - Includes cost related to administrative tasks not directly related to current gold production, but rather related to support our corporate structure and fulfilling our obligations to operate as a public company. Including these expenses in the AISC metric provides visibility of the impact that general and administrative activities have on current operations and profitability on a per ounce basis.

**Other Expense, net** - Includes costs related to regional administration and community development to support current gold production. We exclude certain exceptional or unusual expenses from Other expense, net, such as restructuring, as these are not indicative to sustaining our current gold operations. Furthermore, this adjustment to Other expense, net is also consistent with the nature of the adjustments made to Net income (loss) as disclosed in the Company's non-GAAP financial measure Adjusted net income (loss). The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines.

**Treatment and Refining Costs** - Includes costs paid to smelters for treatment and refining of our concentrates to produce the salable metal. These costs are presented net as a reduction of Sales.

**Sustaining Capital** - We determined sustaining capital as those capital expenditures that are necessary to maintain current gold production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance gold production or reserves, are considered development. We determined the breakout of sustaining and development capital costs based on a systematic review of our project portfolio in light of the nature of each project. Sustaining capital costs are relevant to the AISC metric as these are needed to maintain the Company's current gold operations and provide improved transparency related to our ability to finance these expenditures from current operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Batu Hijau, Boddington and Phoenix mines.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) Includes by-product credits of \$37.

(3) Includes stockpile and leach pad inventory adjustments of \$51 at Carlin, \$5 at Twin Creeks, \$22 at Yanacocha and \$18 at Boddington.

(4) Reclamation costs include operating accretion of \$42 and amortization of asset retirement costs of \$46.

(5) Other expense, net is adjusted for restructuring costs of \$14, acquisition costs of \$8 and write-downs of \$3.

(6) Excludes development capital expenditures, capitalized interest and the increase in accrued capital of \$280. The following are major development projects: Turf Vent Shaft, Conga, Long Canyon and Merian.

(7) On October 29, 2015, the Company sold the Waihi mine.

# Endnotes

*Investors are encouraged to read the information contained in this presentation in conjunction with the following notes, the Cautionary Statement on slide 2 and the factors described under the "Risk Factors" section of the Company's Form 10-K, filed with the SEC on or about February 17, 2016, and disclosure in the Company's recent SEC filings.*

1. Historical AISC or All-in sustaining cost is a non-GAAP metric. See slides 39 to 43 for more information and a reconciliation to the nearest GAAP metric. All-in sustaining cost ("AISC") as used in the Company's Outlook is a non-GAAP metric defined as the sum of cost applicable to sales (including all direct and indirect costs related to current gold production incurred to execute on the current mine plan), remediation costs (including operating accretion and amortization of asset retirement costs), G&A, exploration expense, advanced projects and R&D, treatment and refining costs, other expense, net of one-time adjustments and sustaining capital. See also note 6 below.
2. Free cash flow is a non-GAAP metric and is generated from *Net cash provided from continuing operations less Additions to property, plant and mine development*. See slide 32 and 33 for more information and for a reconciliation to the nearest GAAP metric. *Newmont's Free Cash Flow Per Share is calculated using company disclosures and competitors' Free Cash Flow Per Share is calculated using Cash From Operations less Capital Expenditures as sourced from Thomson Reuters.*
3. EBITDA is a non-GAAP financial measure calculated as Earnings before interest, taxes and depreciation and amortization. The EBITDA figures for competitors used in this presentation were calculated by Thomson Reuters. For management's EBITDA calculations and reconciliation to the nearest GAAP metric, please see slide 34 for more information. Adjusted EBITDA is also a non-GAAP metric. Please refer also to slide 34 for a reconciliation of Adjusted EBITDA to the nearest GAAP metric.
4. Investors are cautioned that no assurances can be made with respect to the closing of the pending sale of the Company's interest in PTNNT, which remains contingent on conditions precedent – certain of which are outside of the control of the Company. Conditions precedent include the receipt of regulatory approvals, buyer shareholder approval, government approval of the PTNNT share transfer, maintenance of valid export license at closing, the concurrent closing of the PTMDB sale of its 24 percent stake to the buyer, resolution of certain tax matters, and no occurrence of material adverse events that would substantially impact the future value of Batu Hijau. Potential additional risks include other political, regulatory or legal challenges and community and labor issues. The amount of contingent payment will also remain subject to risks and uncertainties, including copper prices and future production and development at Batu Hijau and Elang. Gross cash proceeds to Newmont from PTNNT represents total cash to be received upon closing of the transaction and is not intended to represent cash proceeds net of closing costs. See also slide 2 for the cautionary note regarding forward-looking statements.
5. Outlook projections used in this presentation are considered "forward-looking statements" and represent management's good faith estimates or expectations of future production results as of July 20, 2016. Outlook is based upon certain assumptions, including, but not limited to, metal prices, oil prices, certain exchange rates and other assumptions. For example, 2016 Outlook assumes \$1,300/oz Au, \$2.00/lb Cu, \$0.75 USD/AUD exchange rate and \$50/barrel WTI; AISC and CAS cost estimates do not include inflation, for the remainder of the year. Production, AISC and capital estimates exclude projects that have not yet been approved (NW Exodus, Twin Underground, Batu Phase 7, Ahafo Mill Expansion and Subika Underground). The potential impact on inventory valuation as a result of lower prices, input costs, and project decisions are not included as part of this Outlook. Such assumptions may prove to be incorrect and actual results may differ materially from those anticipated. Consequently, Outlook cannot be guaranteed. As such, investors are cautioned not to place undue reliance upon Outlook and forward-looking statements as there can be no assurance that the plans, assumptions or expectations upon which they are placed will occur.
6. U.S. investors are reminded that reserves were prepared in compliance with Industry Guide 7 published by the SEC. Whereas, the term resource, measured resource, indicated resources and inferred resources are not SEC recognized terms. Newmont has determined that such resources would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration and defined as Mineral Resource. Estimates of resources are subject to further exploration and development, are subject to additional risks, and no assurance can be given that they will eventually convert to future reserves. Inferred resources, in particular, have a great amount of uncertainty as to their existence and their economic and legal feasibility. Investors are cautioned not to assume that any part or all of the inferred resource exists, or is economically or legally mineable. Inventory and upside potential have a greater amount of uncertainty. Investors are cautioned that drill results illustrated in certain graphics in this presentation are not necessarily indicative of future results or future production. Even if significant mineralization is discovered and converted to reserves, during the time necessary to ultimately move such mineralization to production the economic and legal feasibility of production may change. As such, investors are cautioned against relying upon those estimates. For more information regarding the Company's reserves, see the Company's Annual Report filed with the SEC on February 17, 2016 for the Proven and Probable Reserve tables prepared in compliance with the SEC's Industry Guide 7, which is available at [www.sec.gov](http://www.sec.gov) or on the Company's website. Investors are further reminded that the reserve and resource estimates used in this presentation are estimates as of December 31, 2015.
7. Adjusted Net Income is a non-GAAP metric. See slides 37 and 38 for more information and reconciliation to the nearest GAAP metric.
8. ROCE is a non-GAAP metric and utilizes rolling 12 month adjusted earnings before interest and taxes (Adjusted EBIT) over average total capital less average cash & equivalents. Competitor average is weighted based on total enterprise value (June 30, 2016). Newmont's ROCE is calculated as shown on slides 35 and 36 and competitor's Adjusted EBIT, Total Capital and Cash & Equivalents are sourced from Bloomberg.
