Q3 2016 Results

27 October 2016

Cautionary statement

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs applicable to sales and All-in sustaining costs; (iii) estimates of future capital expenditures; (iv) estimates of future cost reductions and efficiencies; (v) expectations regarding the development, growth and potential of the Company’s operations, projects and investment, including, without limitation, returns, IRR, schedule, commercial start and first production and upside; (vi) expectations regarding future debt repayments and reductions; (vii) expectations regarding future free cash flow generation, liquidity and balance sheet strength; and (viii) expectations regarding the completion of the sale the Company’s interest in PTNNT, including, without limitation, the timing of closing, anticipated receipt of sale consideration and contingent payments, expected use of proceeds, expected accounting impacts resulting from the proposed transaction, future operation and transition of Batu Hijau (including Phase 7) and future development of Elang. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s operations and projects being consistent with current expectations and mine plans, including without limitation receipt of export approvals; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineralized material estimates; (viii) the acceptable outcome of negotiation of the amendment to the Contract of Work and/or resolution of export issues in Indonesia; and (ix) other assumptions noted herein. Investors are cautioned that no assurances can be made with respect to the closing of the pending sale of the Company’s interest in PTNNT, which remains contingent on the conditions precedent, including, without limitation, maintenance of valid export license at closing, the concurrent closing of the PTMDB sale of its 24 percent stake to the buyer, and no occurrence of material adverse events that would substantially impact the future value of Batu Hijau. Potential additional risks include other political, regulatory or legal challenges and community and labor issues. The amount of contingent payment will also remain subject to risks and uncertainties, including copper prices and future production and development at Batu Hijau and Elang. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Other risks relating to forward looking statements in regard to the Company’s business and future performance may include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks, community relations, conflict resolution and outcome of projects or oppositions and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2015 Annual Report on Form 10-K, filed on February 17, 2016, with the Securities and Exchange Commission (SEC), and the Company’s Form 10-Q for the quarter ended September 30, 2016, filed with the SEC on October 26, 2016, as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors' own risk. Investors are reminded that this presentation should be read in conjunction with Newmont’s Form 10-Q which has been filed on October 26, 2016 with the SEC (also available at www.newmont.com).

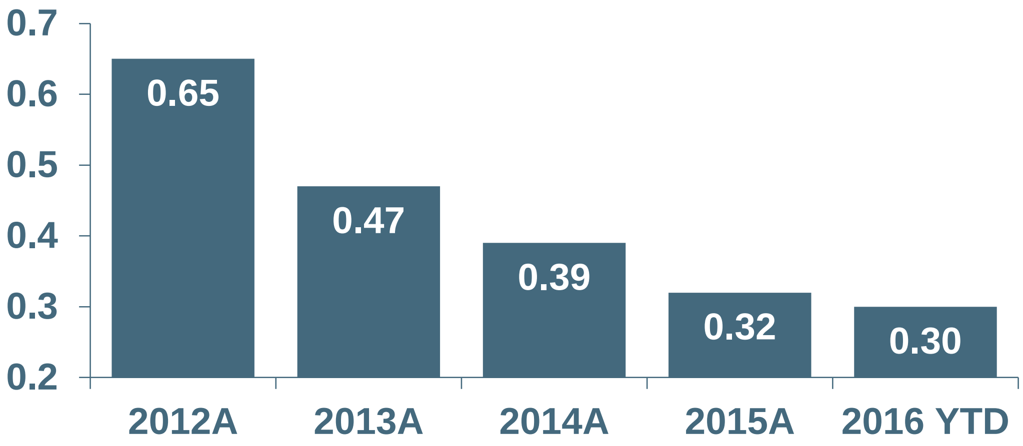
Continuing to improve performance and portfolio

Improve the underlying business	**12% reduction in total injury rates** from prior year quarter
	$925/oz AISC[1] remains within guidance
	1.25 Moz of attributable gold production up 3% from prior year quarter
Strengthen the portfolio	**Merian reached commercial production** safely, on time and $150M below budget
	Long Canyon to begin producing gold next month, two months ahead of schedule
	$2.8B in non-core asset sales pending completion of PTNNT sale
Create value for shareholders	**$240M free cash flow**[2] **up 51%; $666M adj EBITDA**[3] **up 30%** from prior year quarter
	13% reduction in net debt from prior year quarter
	Dividend doubled in Q4; **2017 policy higher across the cycle**

Cripple Creek & Victor

Sustainability performance supports long-term value

Injury rates (total recordable injuries per 200,000 hours worked)



Down ~54% since 2012

Dow Jones Sustainability Indexes

- Overall sustainability
- Health and safety
- Climate strategy
- Water management
- Corporate citizenship
- Risk and crisis management
- Asset closure management
- Environmental management systems

Mining industry leader for second year running

Merian delivered on schedule, $150M under budget

- Optimized approach improves returns and risk profile
- Achieved commercial production on schedule and $150M below budget
- Expected to deliver more than a decade of profitable production

First gold pour at Merian

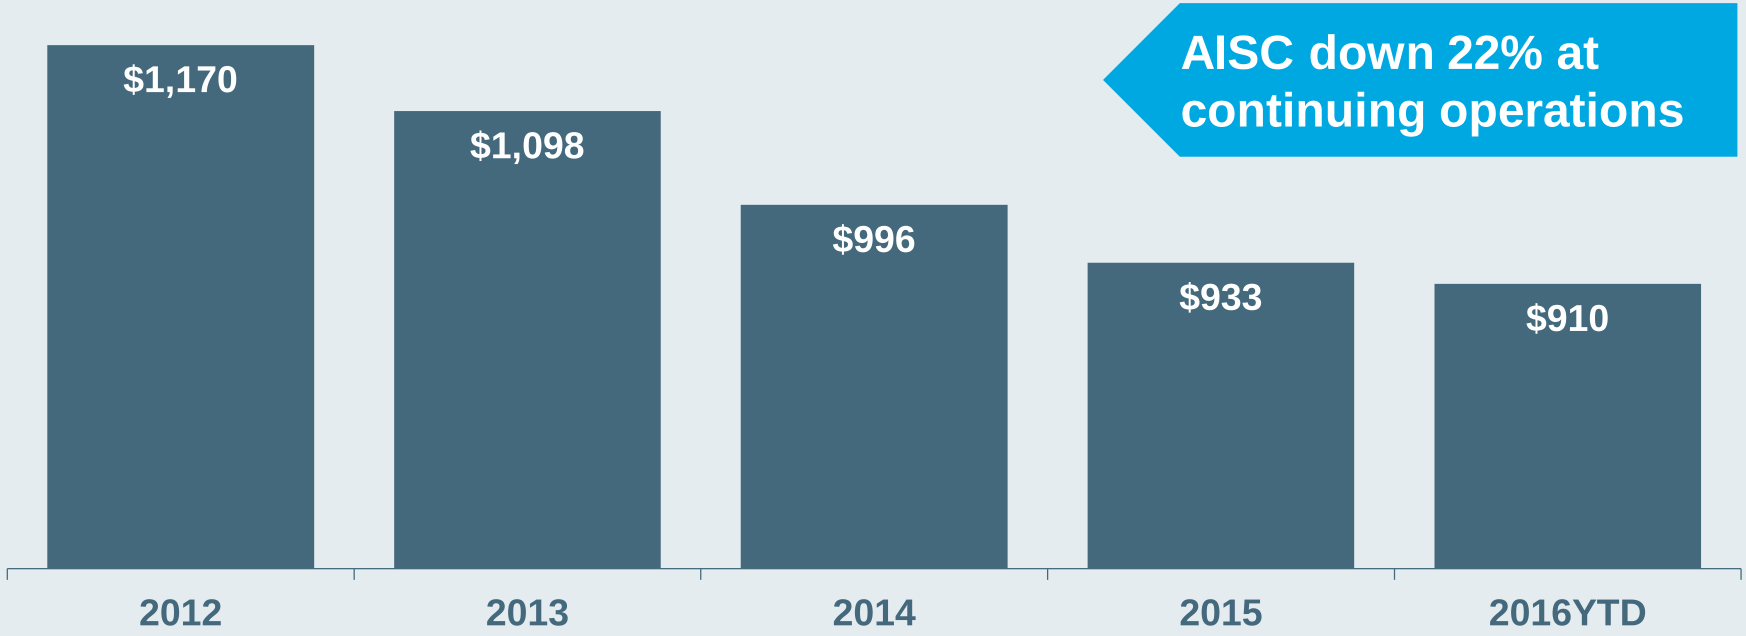
Long Canyon to reach commercial production in 2016

- Optimized approach improves returns and payback period
- Expected to reach commercial production ahead of schedule
- High grade oxide deposit with mineralization open in all directions

Improving underlying business and outlook

- YTD gold production of 3.6 Moz – on track to meet guidance of 4.8 – 5.0Moz
- YTD AISC of $910/oz – on track to meet guidance of $870 – $930/oz
- YTD CapEx of $832M – on track to meet guidance of $970 – $1,150M

Gold all-in sustaining costs ($/oz) – without Batu Hijau



All projects provide more than 15% IRR

Project	**Capital** ($M)	**Cost** (AISC/oz)	**Gold** (Koz/yr)	First production
Merian (75%)	**~$525**	**$650 – $750**	**300 – 375 Koz**	**October 2016**
Long Canyon	**$250 – $300**	**$500 – $600**	**100 – 150 Koz**	**Q4 2016**
Tanami expansion	**$100 – $120**	**$700 – $750**	**~ 80 Koz**	**Mid-2017**
CC&V expansion	**~$185**	**$600 – $650**	**350 – 400 Koz**	**July 2016**
Northwest Exodus	**$50 – $75**	**~$25 lower**	**50 – 75 Koz**	**August 2016**

AISC/oz and Koz/year represent first 5-year averages except for Long Canyon (LOM average) and CC&V expansion (2016 production) – see Endnotes 1 and 4

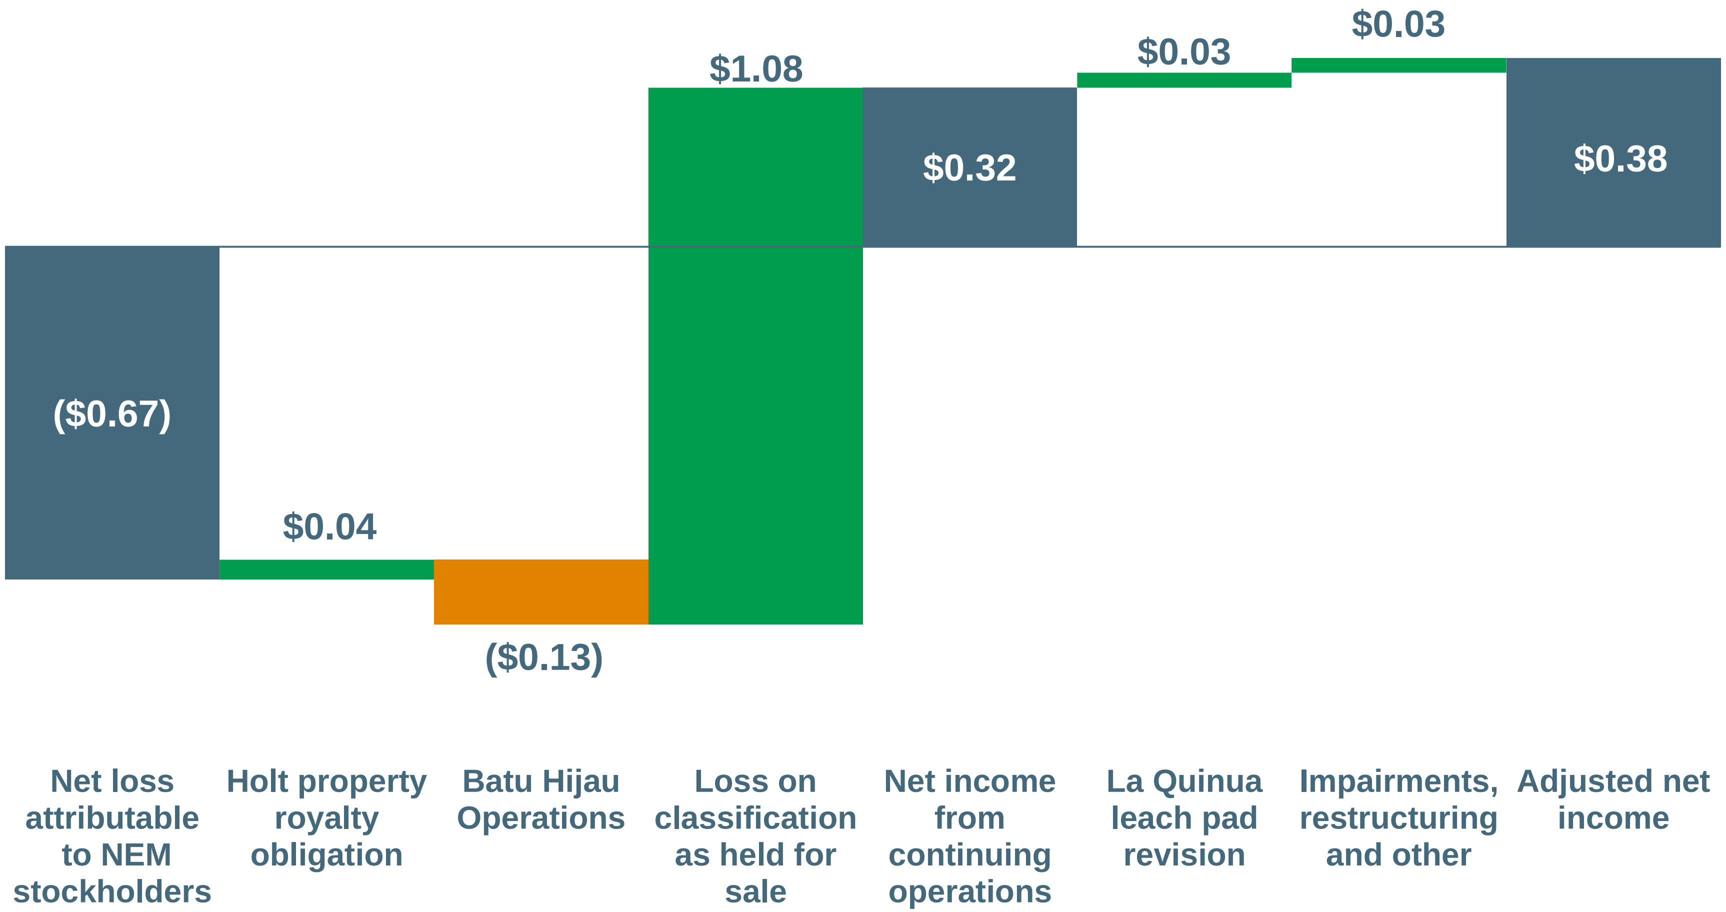
Merian

PTNNT sale proceeding on course

- Transaction expected to close in Q4
- Aligns with strategic goals; monetizes cash flow
- Total consideration of $1.3B = $920M gross cash proceeds + $403M contingent payments
- Post-close position – 92% of reserve base is gold[5]

Strong Q3 adjusted net income

GAAP to adjusted net income ($/share)[6]



Exceptional financial performance

Financial metric	Q3 2016	Q3 2015	Change
Revenue ($M)	$1,791	$1,560	+15%
Attributable Gold Sales (Koz)	1,230	1,218	+1%
Average Realized Gold Price, Net ($/oz)	$1,329	$1,112	+20%

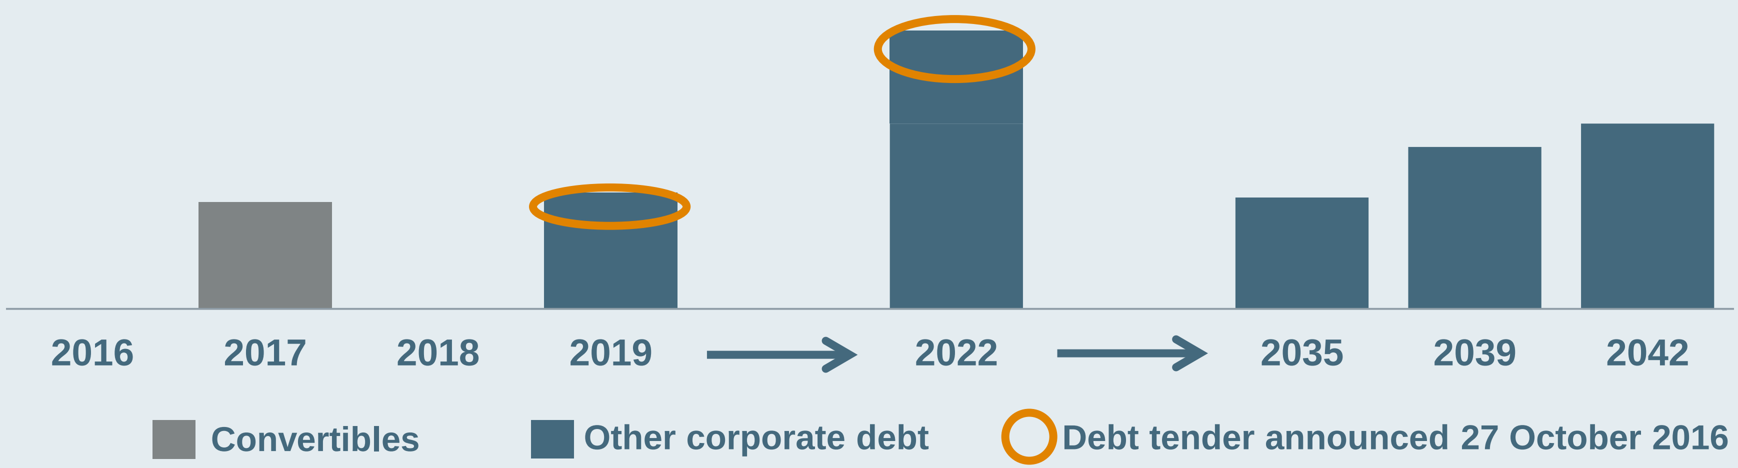
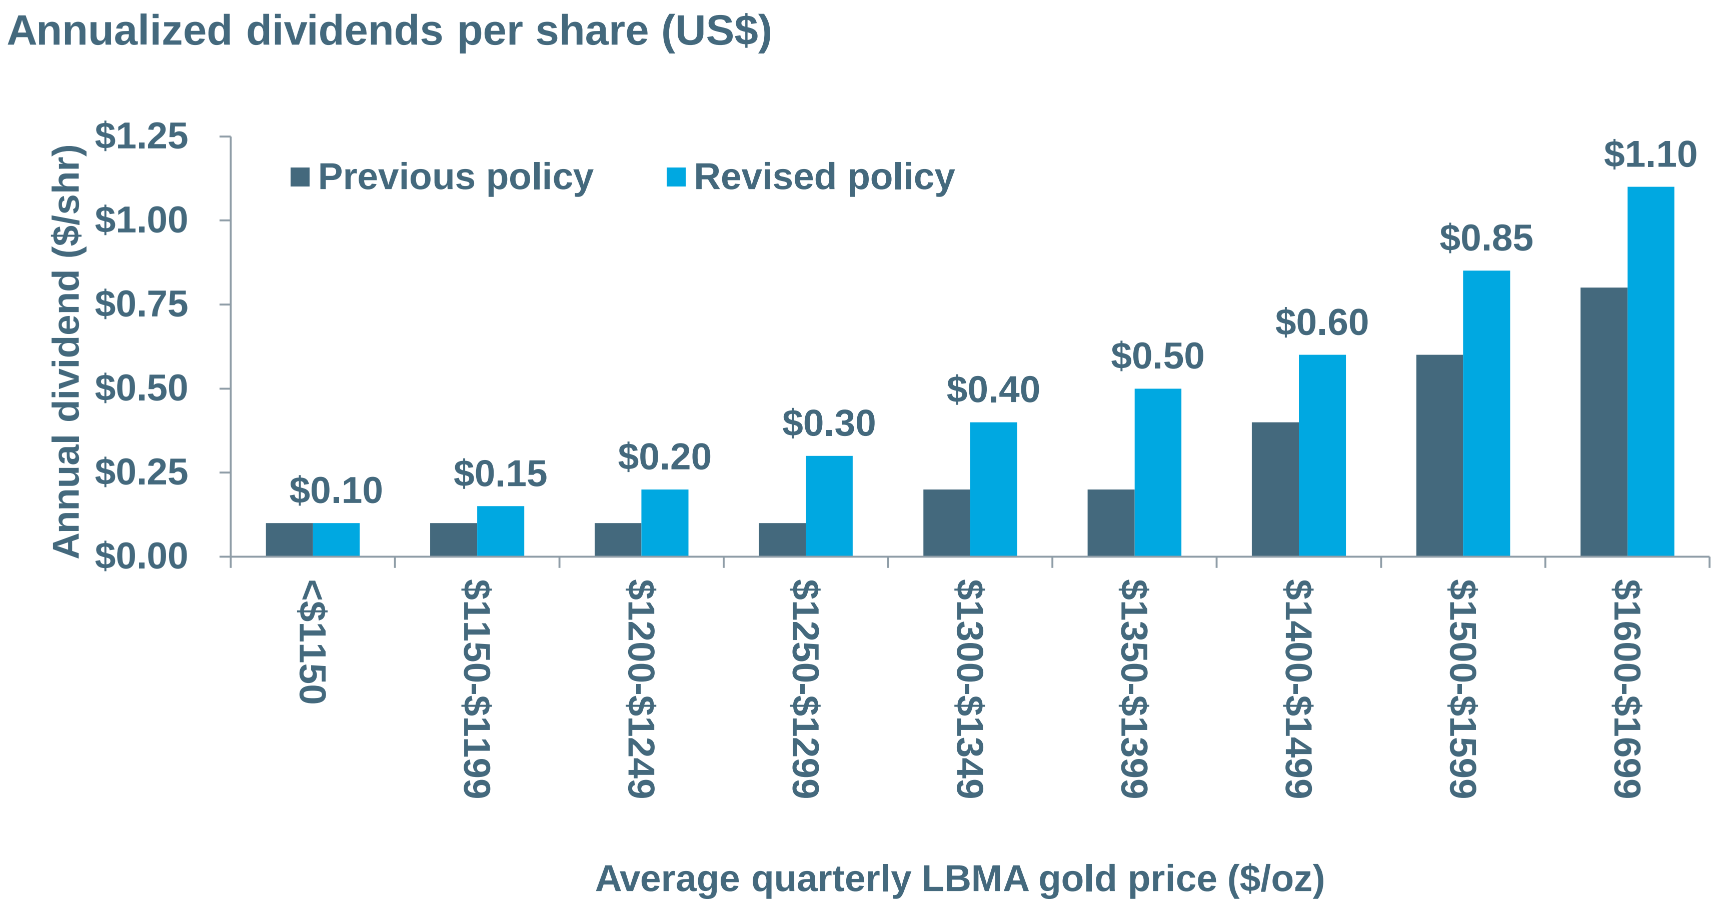
$226M	6.25% Senior Notes due 2039
$275M	Term Loan due 2019
$330M	PTNNT Revolver
$1.1B	Debt Repayments YTD

Debt Schedule as of September 30, 2016



** Pro forma net debt is calculated as total debt less cash and equivalents at 30 September 2016 less anticipated cash proceeds from the sale of PTNNT; see Endnote 7.*
*** Competitor average represents the enterprise value weighted average for Agnico Eagle, AngloGold Ashanti, Barrick, Goldcorp, Gold Fields, Kinross, Newcrest, and Yamana; sourced from Thomson Reuters; enterprise value weighted as of 30 September 2016.*

Enhanced gold price linked dividend

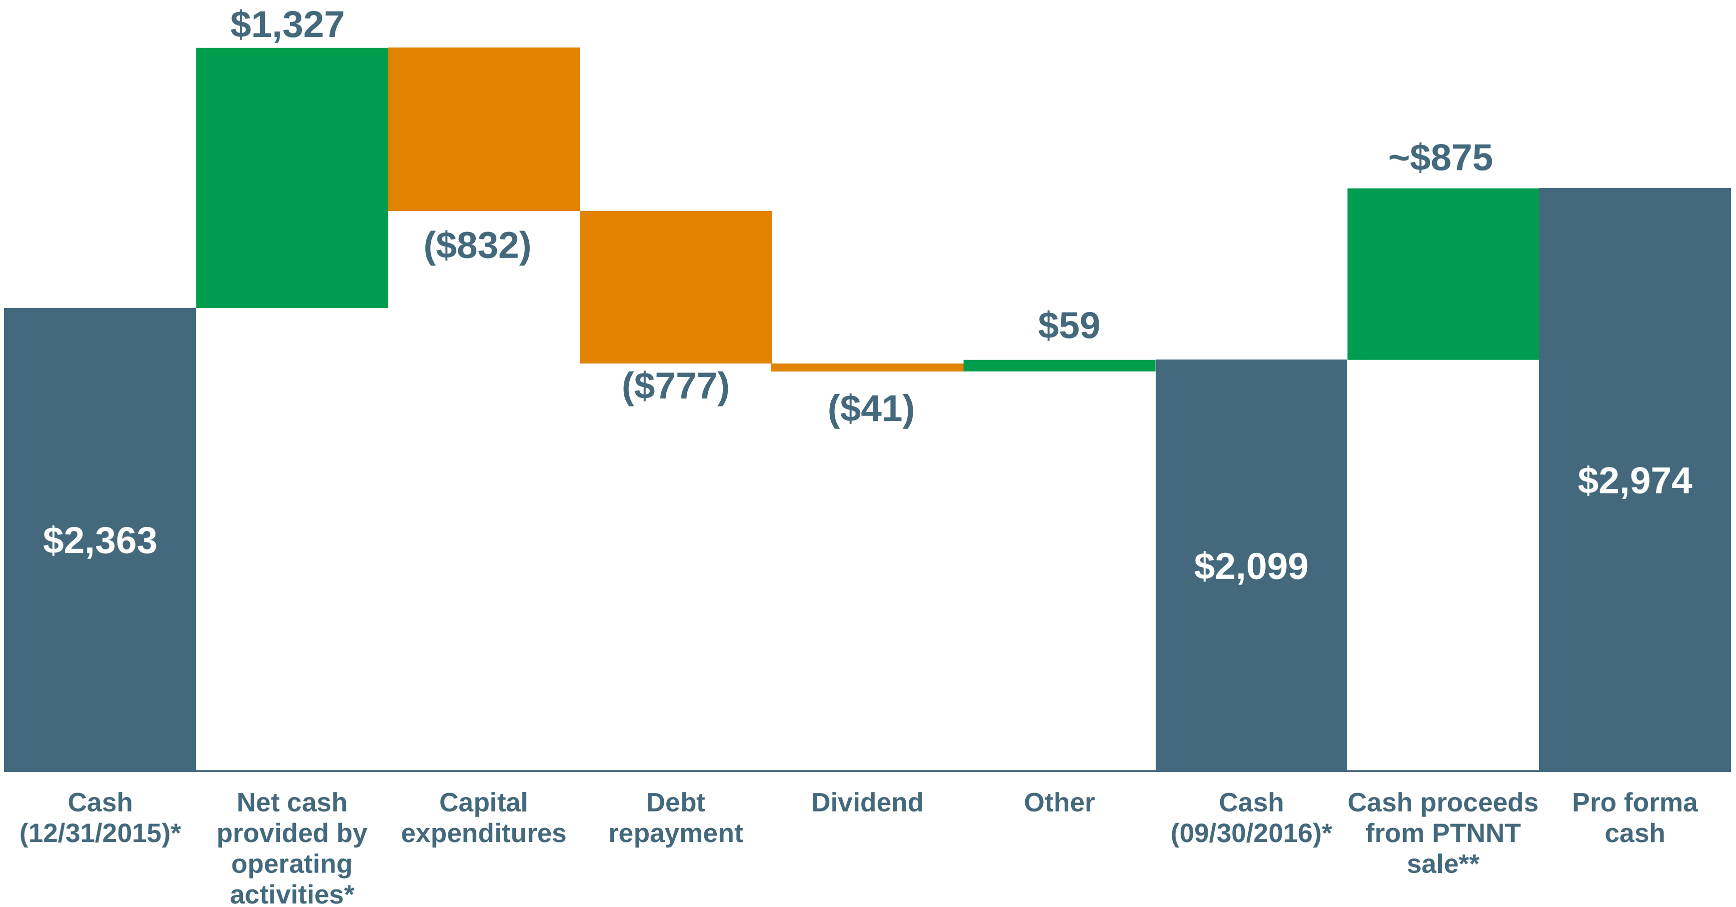


Dividend triples at current gold price

**The declaration and payment of dividends remains at the discretion of the Board of Directors*

Executing capital priorities

Year to date change in ending consolidated cash balance ($M)



** From continuing operations*
*** Expected cash proceeds to Newmont excluding deposits received as of 30 September 2016. Excludes transaction costs.*

Operations continue strong performance

Metric	Q3 2016	Q3 2015	Change
Injury rates (per 200,000 hours worked)	0.30	0.34	-12%
Attributable gold production (Koz)	1,246	1,205	+3%
Gold CAS ($/oz)	$706	$645	+9%
Gold AISC ($/oz)	$925	$879	+5%
Consolidated sustaining capex ($M)	$147	$146	+1%
Total capex ($M)	$832	$889	-6%

North America delivering profitable growth

- Long Canyon ahead of schedule; studies to advance Phase 2 underway
- CC&V expansion complete and operation meeting investment case
- Progressing incremental growth at Carlin and addressing geotechnical constraints

Leach pads at Long Canyon

South America opens prospective new district

- Smooth transition from construction to operation at Merian
- Advancing Yanacocha sulfides through Chaquicocha exploration drilling, autoclave tests
- Yanacocha water treatment plant completed under budget

Ore stockpiles at Merian

Full potential delivering positive results in Australia

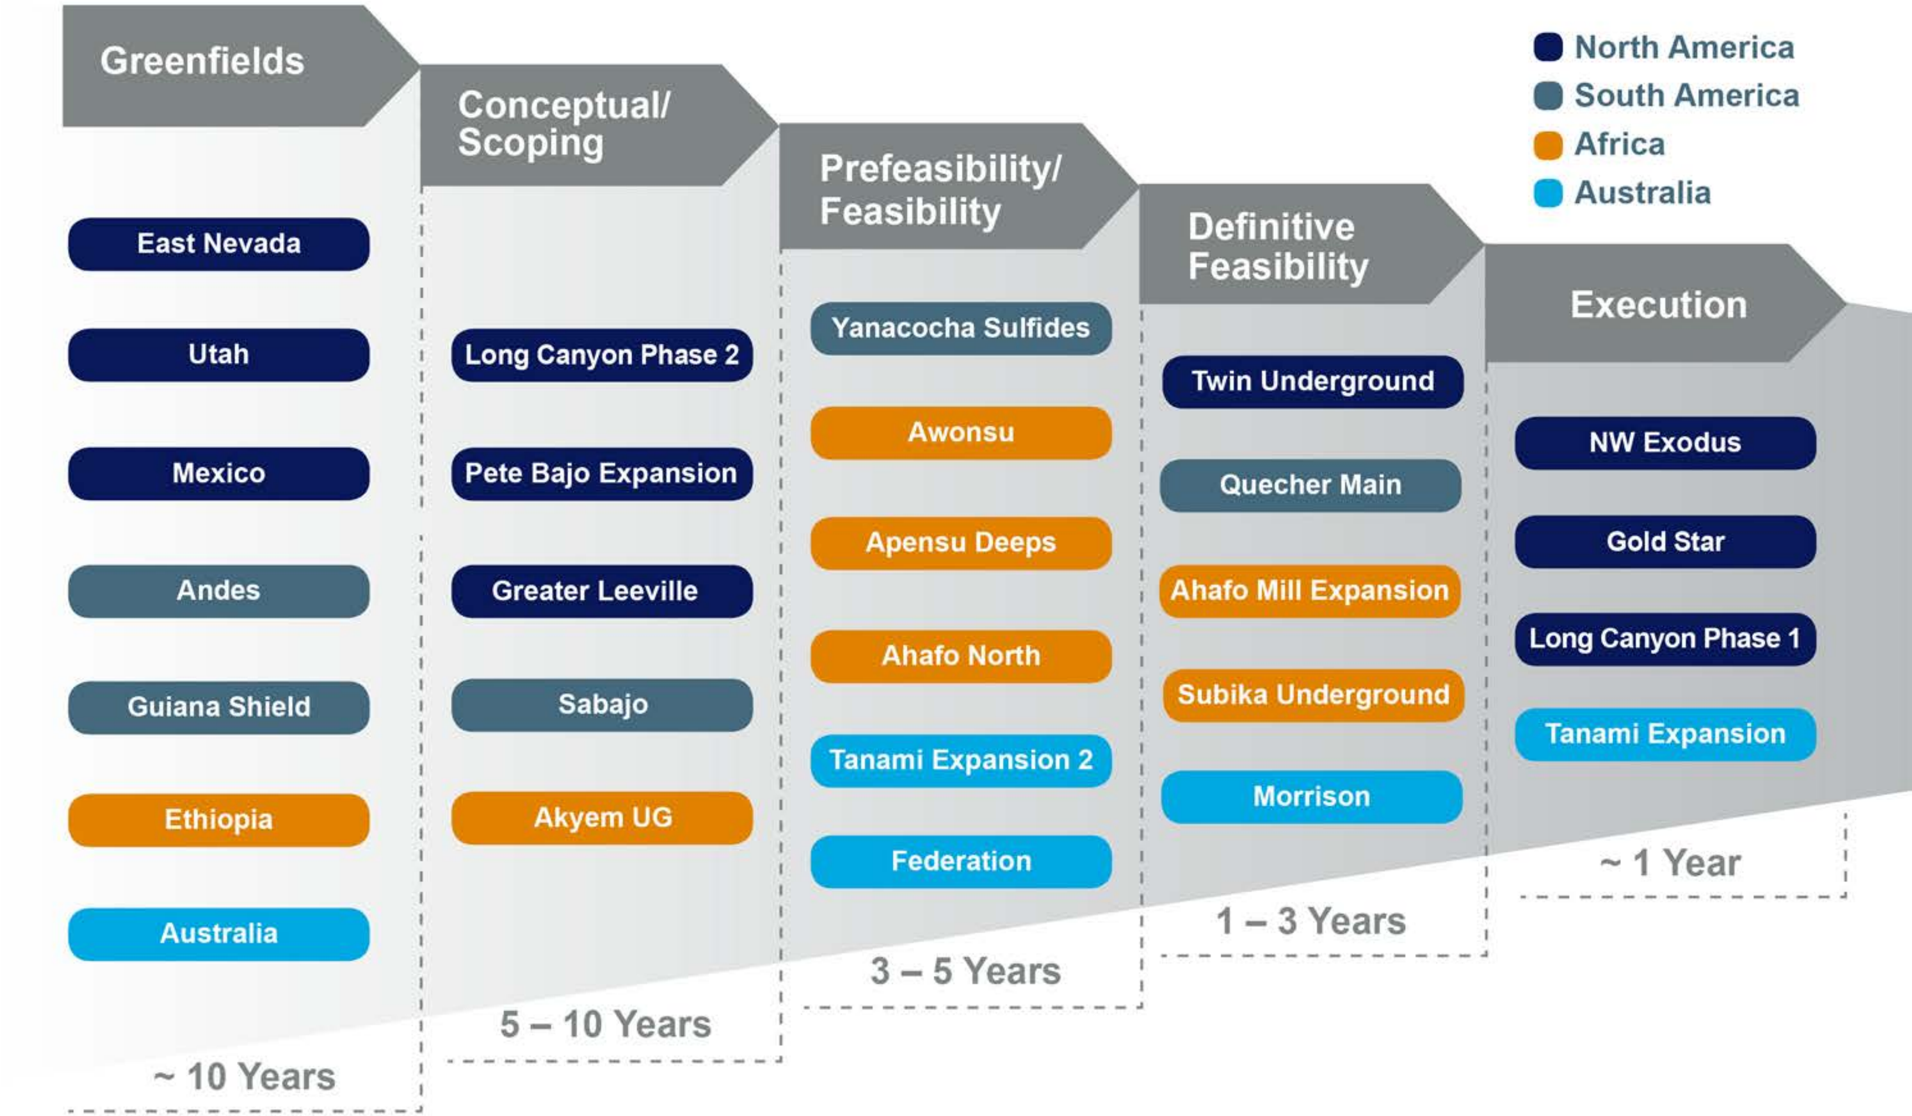
- Boddington and KCGM achieve record milling rates in September
- Strong safety, cost and production performance at KCGM under Newmont leadership
- Dual decline in use and mill expansion on track at Tanami

Construction at Tanami

Strong performance at Akyem and Ahafo

- Meeting or exceeding production, cost and Full Potential targets
- Throughput improvements driving production increases
- Optimizing and advancing Ahafo Mill Expansion and Subika underground projects

Project pipeline represents near term upside



Ahafo projects unlock major underground resource

Ahafo Mill Expansion	
Production	75 – 100Koz
Capital	$140 – $180M
Decision	Q4 2016

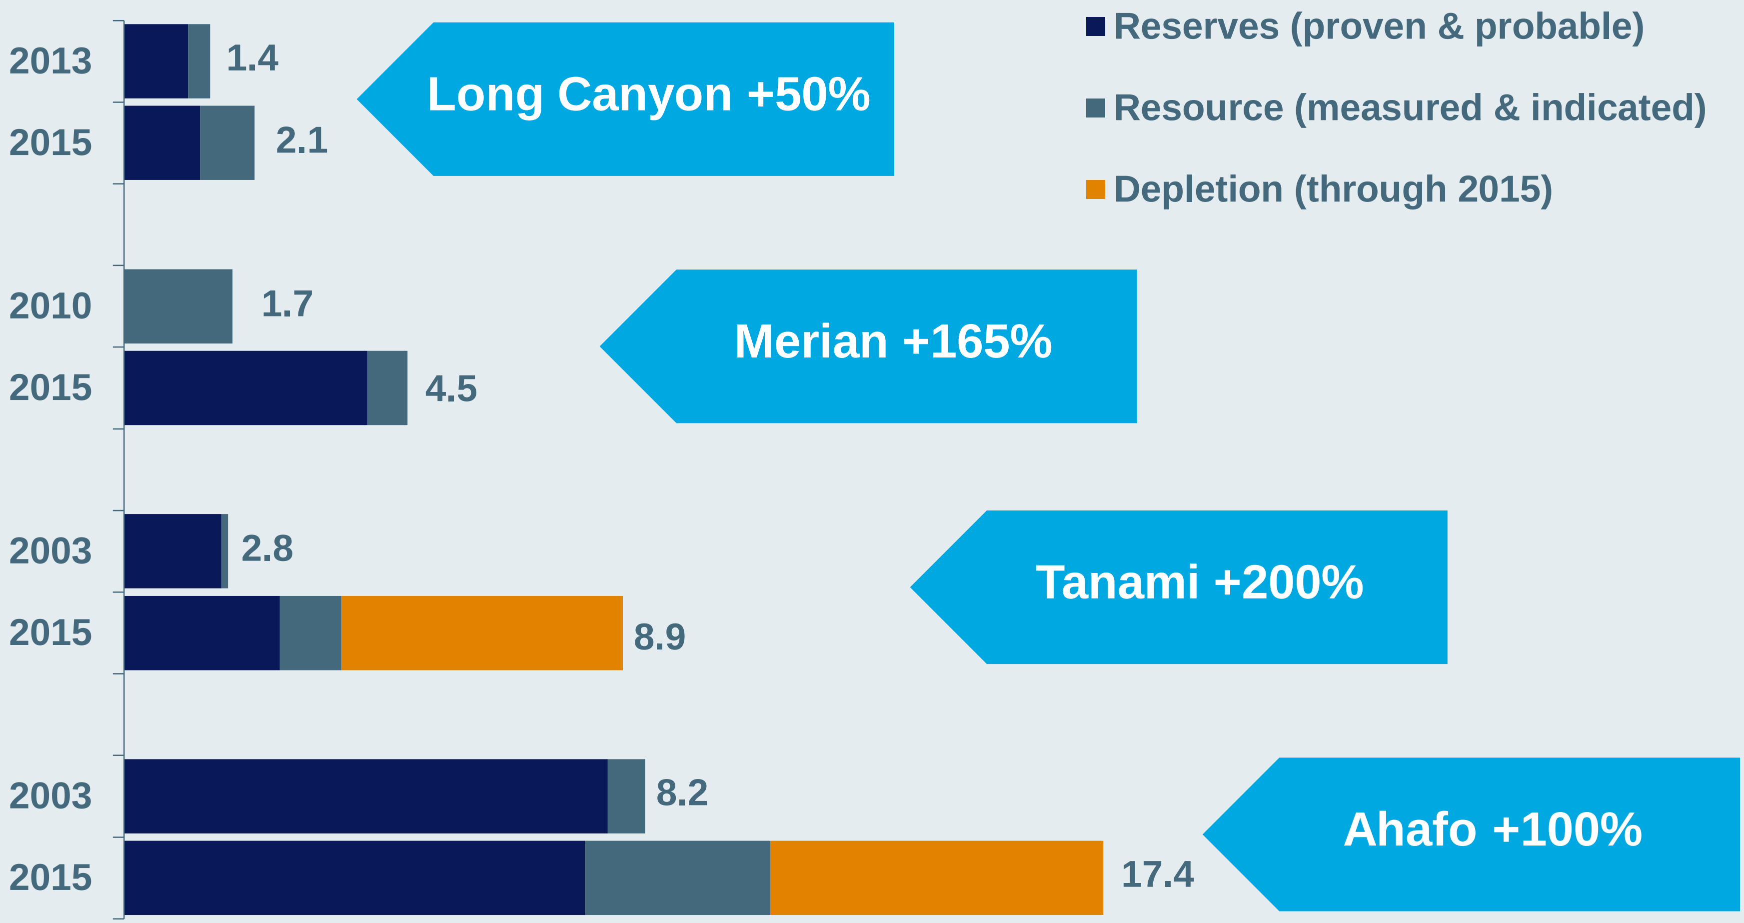
Expected average for first five years of production. See Endnote 4.

Subika Underground	
Production	150 – 200Koz
Capital	$150 – $200M
Decision	Q4 2016

Expected life of mine average. See Endnote 4.

Exploration delivers 123 Moz @ $23/oz since 2001

Recent development trends (Moz)[5]



See Endnote 5 for disclosure on Reserves and Resource figures. Merian 2010 reserves are shown on an attributable 75% basis for comparison purposes.

Interest Expense	$ 260 – $ 280
DD&A	$ 1,200 – $ 1,275
Exploration and Projects	$ 275 – $ 300
Sustaining Capital	$ 550 – $ 600
Tax Rate	30% – 34%

[a] Outlook projections used in this presentation are considered "forward-looking statements" and represent management's good faith estimates or expectations of future production results as of October 26, 2016. Outlook is based upon certain assumptions including, but not limited to, metal prices, oil prices, certain exchange rates and other assumptions. For example, 2016 Outlook assumes $1,300/oz Au, $2.00/lb Cu, $0.75 USD/AUD exchange rate and $50/barrel WTI; AISC and CAS cost estimates do not include inflation, for the remainder of the year. Production, AISC and capital estimates exclude any results from Batu Hijau and projects that have not yet been approved, (Twin Underground, Ahafo Mill Expansion and Subika Underground). The potential impact on inventory valuation as a result of lower prices, input costs, and project decisions are not included as part of this Outlook. Such assumptions may prove to be incorrect and actual results may differ materially from those anticipated. See cautionary note on slide 2.

[b]All-in sustaining costs as used in the Company's Outlook is a non-GAAP metric defined as the sum of cost applicable to sales (including all direct and indirect costs related to current gold production incurred to execute on the current mine plan), remediation costs (including operating accretion and amortization of asset retirement costs), G&A, exploration expense, advanced projects and R&D, treatment and refining costs, other expense, net of one-time adjustments and sustaining capital. See reconciliation on slide 36.

[c]Includes Lone Tree operations.

[d]Includes TRJV operations.

[e]Consolidated production for Yanacocha is presented on a total production basis for the mine site; attributable production represents a 51.35% interest.

[f]Both consolidated and attributable production are shown on a pro-rata basis with a 50% ownership for Kalgoorlie.

[g]Production outlook does not include equity production from stakes in TMAC (29.2%) or La Zanja (46.94%).

[h]Consolidated expense outlook is adjusted to exclude extraordinary items. For example, the tax rate outlook above is a consolidated adjusted rate, which assumes the exclusion of certain tax valuation allowance adjustments. Beginning in 2016, regional general and administrative expense is included in total general and administrative expense (G&A) and community development cost is included in CAS.

Free cash flow

Management uses Free Cash Flow as a non-GAAP measure to analyze cash flows generated from operations. Free Cash Flow is Net cash provided by operating activities plus Net cash used in operating activities of discontinued operations less Additions to property, plant and mine development as presented on the Condensed Consolidated Statements of Cash Flow. The Company believes Free Cash Flow is also useful as one of the bases for comparing the Company's performance with its competitors. Although Free Cash Flow and similar measures are frequently used as measures of cash flows generated from operations by other companies, the Company's calculation of Free Cash Flow is not necessarily comparable to such other similarly titled captions of other companies. The presentation of non-GAAP Free Cash Flow is not meant to be considered in isolation or as an alternative to net income as an indicator of the Company's performance, or as an alternative to cash flows from operating activities as a measure of liquidity as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. The Company's definition of Free Cash Flow is limited in that it does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, the Company believes it is important to view Free Cash Flow as a measure that provides supplemental information to the Company's Condensed Consolidated Statements of Cash Flow. The following table sets forth a reconciliation of Free Cash Flow, a non-GAAP financial measure, to Net cash provided by operating activities, which the Company believes to be the GAAP financial measure most directly comparable to Free Cash Flow, as well as information regarding Net cash used in investing activities and Net cash (used in) provided by financing activities.

	Three Months Ended September 30,		**Nine Months Ended September 30,**	
	2016	**2015**	**2016**	**2015**
Net cash provided by operating activities	$ 857	$ 810	$ 2,153	$ 1,873
Plus: Net cash provided by operating activities of discontinued operations	(348)	(335)	(826)	(569)
Net cash provided by operating activities of continuing operations	509	475	1,327	1,304
Less: Additions to property, plant and mine development	(269)	(316)	(832)	(889)
Free Cash Flow	$ 240	$ 159	$ 495	$ 415
Net cash used in investing activities (1)	$ (297)	$ (1,113)	$ (702)	$ (1,652)
Net cash (used in) provided by financing activities	$ (467)	$ (37)	$ (1,245)	$ 361

(1) Net cash used in investing activities includes Additions to property, plant and mine development, which is included in the Company's computation of Free Cash Flow.

EBITDA and Adjusted EBITDA

Management uses Earnings before interest, taxes and depreciation and amortization ("EBITDA") and EBITDA adjusted for non-core or certain items that have a disproportionate impact on our results for a particular period ("Adjusted EBITDA") as non-GAAP measures to evaluate the Company's operating performance. EBITDA and Adjusted EBITDA do not represent, and should not be considered an alternative to, net earnings (loss), operating earnings (loss), or cash flow from operations as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements by other companies, our calculation of Adjusted EBITDA is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. Management's determination of the components of Adjusted EBITDA are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to EBITDA and Adjusted EBITDA as follows:

	Three Months Ended September 30, 2016	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	Nine Months Ended September 30, 2015
Net income (loss) attributable to Newmont stockholders	$ (358)	$ 219	$ (283)	$ 474
Net income (loss) attributable to noncontrolling interests, net of tax				
Continuing operations	(34)	—	(62)	11
Batu Hijau operations	79	66	229	177
	45	66	167	188
Loss (income) from discontinued operations, net of tax (1)				
Holt property royalty obligation	19	(17)	72	(34)
Batu Hijau operations	(148)	(109)	(424)	(342)
Loss on classification as held for sale	577	—	577	—
	448	(126)	225	(376)
Equity loss (income) of affiliates	(2)	18	8	34
Income and mining tax expense (benefit)	90	61	555	302
Depreciation and amortization	335	292	892	792
Interest expense, net	64	74	204	226
EBITDA	$ 622	$ 604	$ 1,768	$ 1,640
Adjustments:				
Impairment of investments (2)	$ —	$ 29	$ —	$ 102
Impairment of long-lived assets (3)	—	3	4	6
Restructuring and other (4)	7	12	26	26
Acquisition costs (5)	9	7	11	15
Gain on deconsolidation of TMAC (6)	—	(76)	—	(76)
Loss on debt repayment (7)	1	—	4	—
La Quinua leach pad revision (8)	32	—	32	—
Loss (gain) on asset and investment sales (9)	(5)	(66)	(109)	(109)
Adjusted EBITDA	$ 666	$ 513	$ 1,736	$ 1,604

(1) Loss (income) from discontinued operations relates to (i) adjustments in our Holt property royalty, presented net of tax expense (benefit) of $(9), $7, $(32) and $15, respectively, (ii) the operations of Batu Hijau, presented net of tax expense (benefit) of $90, $90, $258 and $194, respectively, and (iii) the loss on classification as held for sale, which has been recorded on an attributable basis. For additional information regarding our discontinued operations, see Note 3 to our Condensed Consolidated Financial Statements.

(2) Impairment of investments, included in Other income, net, represents other-than-temporary impairments on equity and cost method investments and does not relate to our core operations.

(3) Impairment of long-lived assets, included in Other expense, net, represents non-cash write-downs that do no impact our core operations.

(4) Restructuring and other, included in Other expense, net, represents certain costs associated with the Full Potential initiative announced in 2013, accrued legal costs in our Africa region during 2016 as well as system integration costs related to our acquisition of CC&V.

(5) Acquisition costs, included in Other expense, net represents adjustments made in 2016 to the contingent consideration liability from the acquisition of Boddington, and costs associated with the acquisition of CC&V in 2015.

(6) Gain on deconsolidation of TMAC, included in Other income, net, resulted from the determination that TMAC should no longer be considered a variable interest entity during the third quarter of 2015.

(7) Loss on debt repayment, included in Other income, net, represents the impact of the debt tender offer on our 2019 Notes and 2039 Notes during the first quarter of 2016 and our Term Loan paydown in the third quarter of 2016.

(8) La Quinua leach pad revision, included in Costs applicable to sales, represents a significant write off of the estimated recoverable ounces in our South America segment during the third quarter of 2016.

(9) Loss (gain) on asset and investment sales, included in Other income, net, primarily represents the sale of our holdings in Regis Resources Ltd. in the first quarter of 2016, income recorded in the third quarter of 2016 associated with contingent consideration from the sale of certain properties in our North America segment during 2015, land sales of Hemlo mineral rights in Canada and the Relief Canyon mine in Nevada during the first quarter of 2015 and a gain related to the sale of our holdings in EGR in the third quarter of 2015.

Adjusted net income

Management uses Adjusted net income (loss) to evaluate the Company's operating performance and for planning and forecasting future business operations. The Company believes the use of Adjusted net income (loss) allows investors and analysts to understand the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals, by excluding certain items that have a disproportionate impact on our results for a particular period. The net income (loss) adjustments are generally presented net of tax at the Company's statutory effective tax rate of 35% and net of our partners' noncontrolling interests when applicable. The impact of the adjustments through the Company's valuation allowance is included in Tax adjustments. The Tax adjustment also includes items such as foreign tax credits, alternative minimum tax credits, capital losses and disallowed foreign losses. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Adjusted net income (loss) as follows on the next slide:

Adjusted net income

	Three Months Ended September 30, 2016	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	Nine Months Ended September 30, 2015
Net income (loss) attributable to Newmont stockholders	$ (358)	$ 219	$ (283)	$ 474
Loss (income) attributable to Newmont stockholders from discontinued operations [(1)]				
Holt property royalty obligation	19	(17)	72	(34)
Batu Hijau operations	(69)	(43)	(195)	(165)
Loss on classification as held for sale	577	—	577	—

(1) Loss (income) from discontinued operations relates to (i) adjustments in our Holt property royalty, presented net of tax expense (benefit) of $(9), $7, $(32) and $15, respectively, (ii) the operations of Batu Hijau, presented net of tax expense (benefit) of $90, $90, $258 and $194, respectively, and amounts attributed to noncontrolling interest income (expense) of $(79), $(66), $(229) and $(177), respectively, and (iii) the loss on classification as held for sale, which has been recorded on an attributable basis. For additional information regarding our discontinued operations, see Note 3 to our Condensed Consolidated Financial Statements.
(2) Impairment of investments, included in Other income, net, represents other-than-temporary impairments on equity and cost method investments and does not relate to our core operations. Amounts are presented net of tax expense (benefit) of $-, $(10), $- and $(36), respectively.
(3) Impairment of long-lived assets, included in Other expense, net, represents non-cash write-downs that do not impact our core operations. Amounts are presented net of tax expense (benefit) of $-, $(1), $(1) and $(2), respectively, and amounts attributed to noncontrolling interest income (expense) of $-, $-, $(1) and $-, respectively.
(4) Restructuring and other, included in Other expense, net, represents certain costs associated with the Full Potential initiative announced in 2013, accrued legal costs in our Africa region during 2016 as well as system integration costs related to our acquisition of CC&V. Amounts are presented net of tax expense (benefit) of $(1), $(4), $(10) and $(9), respectively, and amounts attributed to noncontrolling interest income (expense) of $-, $(1), $(2) and $(3), respectively.
(5) Acquisition costs, included in Other expense, net, represents adjustments made in 2016 to the contingent consideration liability from the acquisition of Boddington and costs associated with the acquisition of CC&V in 2015. Amounts are presented net of tax expense (benefit) of $(3), $(2), $(4) and $(5), respectively.
(6) Loss (gain) on asset and investment sales, included in Other income, net, primarily represents the sale of our holdings in Regis Resources Ltd. in the first quarter of 2016, income recorded in the third quarter of 2016 associated with contingent consideration from the sale of certain properties in our North America segment during 2015, land sales of Hemlo mineral rights in Canada and the Relief Canyon mine in Nevada during the first quarter of 2015 and a gain related to the sale of our holdings in EGR in the third quarter of 2015. Amounts are presented net of tax expense (benefit) of $1, $30, $1 and $46, respectively.
(7) Gain on deconsolidation of TMAC, included in Other income, net, resulted from the determination that TMAC should no longer be considered a variable interest entity during the third quarter of 2015. Amounts are presented net of tax expense (benefit) of $-, $27, $-, $27 expense (benefit), respectively.
(8) Loss on debt repayment, included in Other income, net, represents the impact of the debt tender offer on our 2019 Notes and 2039 Notes during the first quarter of 2016 and our Term Loan paydown in the third quarter of 2016. Amounts are presented net of tax expense (benefit) of $-, $-, $(1) and $-, respectively.
(9) La Quinua leach pad revision, included in Costs applicable to sales and Depreciation and amortization, represents a significant write off of the estimated recoverable ounces in our South America segment during the third quarter of 2016. Amounts are presented net of tax expense (benefit) of $(9), $-, $(9) and $-, respectively, and amounts attributed to noncontrolling interest income (expense) of $(25), $-, $(25) and $-, respectively.
(10) Tax adjustments include movements in tax valuation allowance and tax adjustments not related to core operations. Second quarter and year to date tax adjustments were primarily the result of a tax restructuring and a loss carryback, both of which resulted in an increase in the Company's valuation allowance on credits.

All-in sustaining costs

Newmont has worked to develop a metric that expands on GAAP measures such as cost of goods sold and non-GAAP measures, such as Costs applicable to sales per ounce, to provide visibility into the economics of our mining operations related to expenditures, operating performance and the ability to generate cash flow from our continuing operations.

Current GAAP-measures used in the mining industry, such as cost of goods sold, do not capture all of the expenditures incurred to discover, develop, and sustain gold production. Therefore, we believe that all-in sustaining costs is a non-GAAP measure that provides additional information to management, investors, and analysts that aid in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production.

All-in sustaining cost ("AISC") amounts are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks such as in International Financial Reporting Standards ("IFRS"), or by reflecting the benefit from selling non-gold metals as a reduction to AISC. Differences may also arise related to definitional differences of sustaining versus development capital activities based upon each company's internal policies.

The following disclosure provides information regarding the adjustments made in determining the all-in sustaining costs measure:

Costs Applicable to Sales - Includes all direct and indirect costs related to current gold production incurred to execute the current mine plan. We exclude certain exceptional or unusual amounts from Costs applicable to sales ("CAS"), such as significant revisions to recovery amounts. CAS includes by-product credits from certain metals obtained during the process of extracting and processing the primary ore-body. CAS is accounted for on an accrual basis and excludes Depreciation and amortization and Reclamation and remediation, which is consistent with our presentation of CAS on the Condensed Consolidated Statements of Operations. In determining AISC, only the CAS associated with producing and selling an ounce of gold is included in the measure. Therefore, the amount of gold CAS included in AISC is derived from the CAS presented in the Company's Condensed Consolidated Statements of Operations less the amount of CAS attributable to the production of copper at our Phoenix and Boddington mines. The copper CAS at those mine sites is disclosed in Note 5 to the Condensed Consolidated Financial Statements. The allocation of CAS between gold and copper at the Phoenix and Boddington mines is based upon the relative sales value of copper and gold produced during the period.

Reclamation Costs - Includes accretion expense related to Asset Retirement Obligation ("ARO") and the amortization of the related Asset Retirement Cost ("ARC") for the Company's operating properties. Accretion related to the ARO and the amortization of the ARC assets for reclamation does not reflect annual cash outflows but are calculated in accordance with GAAP. The accretion and amortization reflect the periodic costs of reclamation associated with current gold production and are therefore included in the measure. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

Advanced Projects and Exploration - Includes incurred expenses related to projects that are designed to increase or enhance current gold production and gold exploration. We note that as current resources are depleted, exploration and advanced projects are necessary for us to replace the depleting reserves or enhance the recovery and processing of the current reserves. As this relates to sustaining our gold production, and is considered a continuing cost of a mining company, these costs are included in the AISC measure. These costs are derived from the Advanced projects, research and development and Exploration amounts presented in the Condensed Consolidated Statements of Operations less the amount attributable to the production of copper at our Phoenix and Boddington mines. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

General and Administrative - Includes costs related to administrative tasks not directly related to current gold production, but rather related to supporting our corporate structure and fulfilling our obligations to operate as a public company. Including these expenses in the AISC metric provides visibility of the impact that general and administrative activities have on current operations and profitability on a per ounce basis.

Other expense, net - Includes administrative costs to support current gold production. We exclude certain exceptional or unusual expenses from Other expense, net, such as restructuring, as these are not indicative to sustaining our current gold operations. Furthermore, this adjustment to Other expense, net is also consistent with the nature of the adjustments made to Net income (loss) attributable to Newmont stockholders as disclosed in the Company's non-GAAP financial measure Adjusted net income (loss). The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

Treatment and Refining Costs - Includes costs paid to smelters for treatment and refining of our concentrates to produce the salable metal. These costs are presented net as a reduction of Sales.

Sustaining Capital - We determined sustaining capital as those capital expenditures that are necessary to maintain current gold production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance gold production or reserves, are considered development. We determined the classification of sustaining and development capital projects based on a systematic review of our project portfolio in light of the nature of each project. Sustaining capital costs are relevant to the AISC metric as these are needed to maintain the Company's current gold operations and provide improved transparency related to our ability to finance these expenditures from current operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) Includes by-product credits of $13.

(3) Includes stockpile and leach pad inventory adjustments of $8 at Carlin, $1 at Twin Creeks, $17 at Yanacocha and $34 at Ahafo. Total stockpile and leach pad inventory adjustments at Yanacocha of $49 were adjusted above by $32 related to a significant write off of recoverable ounces at the La Quinua Leach Pad.

(4) Reclamation costs include operating accretion of $19 and amortization of asset retirement costs of $9.

(5) Other expense, net is adjusted for restructuring and other costs of $7 and acquisition costs of $9.

(6) Excludes development capital expenditures, capitalized interest and the increase in accrued capital of $122. The following are major development projects: Merian, Long Canyon, and the CC&V and the Tanami expansion.

Boddington	101	1	—	—	—	10	8	120	57	2.11
Total Copper	$ 170	$ 3	$ 1	$ 1	$ —	$ 12	$ 15	$ 202	93	$ 2.17
Consolidated	$ 2,609	$ 113	$ 202	$ 180	$ 26	$ 38	$ 434	$ 3,602		

(1) Excludes Depreciation and amortization and Reclamation and remediation.
(2) Includes by-product credits of $36.
(3) Includes stockpile and leach pad inventory adjustments of $86 at Carlin, $42 at Yanacocha, $19 at Boddington and $12 at Twin Creeks.
(4) Reclamation costs include operating accretion of $55 and amortization of asset retirement costs of $58.
(5) Other expense, net is adjusted for restructuring and other costs of $26, acquisition costs of $15 and write-downs of $6.
(6) Excludes development capital expenditures, capitalized interest and the increase in accrued capital of $455. The following are major development projects: Merian, Turf Vent Shaft, Long Canyon, and the CC&V expansion project.
(7) On October 29, 2015, the Company sold the Waihi mine.

All-in sustaining costs – 2016 outlook

Similar to the historical AISC amounts presented above, AISC outlook is also a non-GAAP financial measure. A reconciliation of the 2016 Gold AISC outlook range to the 2016 CAS outlook range is provided below. The estimates in the table below are considered “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. See the Cautionary Statement on slide 2 for additional information.

2016 Outlook - Gold	**Outlook range**	
	Low	**High**
Costs Applicable to Sales [1,2]	$ 3,275	$ 3,540
Reclamation Costs [3]	90	110
Advanced Projects and Exploration	275	300
General and Administrative	225	275
Other Expense	10	25
Treatment and Refining Costs	25	50
Sustaining Capital [4]	550	600
All-in Sustaining Costs	$ 4,525	$ 4,840
Ounces (000) Sold	5,100	5,350
All-in Sustaining Costs per oz	$ 870	$ 930

(1) Excludes Depreciation and amortization and Reclamation and remediation.
(2) Includes stockpile and leach pad inventory adjustments.
(3) Remediation costs include operating accretion and amortization of asset retirement costs.
(4) Excludes development capital expenditures, capitalized interest and increase in accrued capital.

Endnotes

Investors are encouraged to read the information contained in this presentation in conjunction with the following notes, the Cautionary Statement on slide 2 and the factors described under the "Risk Factors" section of the Company's Form 10-K, filed with the SEC on or about February 17, 2016, and Form 10-Q filed with the SEC on October 26, 2016, and disclosure in the Company's other recent SEC filings.

1. Historical AISC or All-in sustaining cost is a non-GAAP metric. See slides 31 to 36 for more information and a reconciliation to the nearest GAAP metric. All-in sustaining cost ("AISC") as used in the Company's Outlook is a non-GAAP metric defined as the sum of cost applicable to sales (including all direct and indirect costs related to current gold production incurred to execute on the current mine plan), remediation costs (including operating accretion and amortization of asset retirement costs), G&A, exploration expense, advanced projects and R&D, treatment and refining costs, other expense, net of one-time adjustments and sustaining capital. See also note 6 below.

2. Free cash flow is a non-GAAP metric and is generated from *Net cash provided from continuing operations* less *Additions to property, plant and mine development. See slide 27 for more information and for a reconciliation to the nearest GAAP metric. Newmont's Free Cash Flow Per Share is calculated using company disclosures and competitors' Free Cash Flow Per Share is calculated using Cash From Operations less Capital Expenditures as sourced from Thomson Reuters.*

3. EBITDA is a non-GAAP financial measure calculated as Earnings before interest, taxes and depreciation and amortization. The EBITDA figures for competitors used in this presentation were calculated by Thomson Reuters. For management's EBITDA calculations and reconciliation to the nearest GAAP metric, please see slide 28 for more information. Adjusted EBITDA is also a non-GAAP metric. Please refer also to slide 28 for a reconciliation of Adjusted EBITDA to the nearest GAAP metric.

4. Outlook projections used in this presentation are considered ―forward-looking statements‖ and represent management's good faith estimates or expectations of future production results as of October 26, 2016. Outlook is based upon certain assumptions, including, but not limited to, metal prices, oil prices, certain exchange rates and other assumptions. For example, 2016 Outlook assumes $1,300/oz Au, $2.00/lb Cu, $0.75 USD/AUD exchange rate and $50/barrel WTI; AISC and CAS cost estimates do not include inflation, for the remainder of the year. Production, AISC and capital estimates exclude projects that have not yet been approved (Twin Underground, Ahafo Mill Expansion and Subika Underground). The potential impact on inventory valuation as a result of lower prices, input costs, and project decisions are not included as part of this Outlook. Unless otherwise indicated, Outlook also does not include Batu Hijau, the sale of which remains pending. Assumptions used for purposes of Outlook may prove to be incorrect and actual results may differ materially from those anticipated. Consequently, Outlook cannot be guaranteed. As such, investors are cautioned not to place undue reliance upon Outlook and forward-looking statements as there can be no assurance that the plans, assumptions or expectations upon which they are placed will occur

5. U.S. investors are reminded that reserves were prepared in compliance with Industry Guide 7 published by the SEC. Whereas, the term resource, measured resource, indicated resources and inferred resources are not SEC recognized terms. Newmont has determined that such resources would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration and defined as Mineral Resource. Estimates of resources are subject to further exploration and development, are subject to additional risks, and no assurance can be given that they will eventually convert to future reserves. Inferred resources, in particular, have a great amount of uncertainty as to their existence and their economic and legal feasibility. Investors are cautioned not to assume that any part or all of the inferred resource exists, or is economically or legally mineable. Inventory and upside potential have a greater amount of uncertainty. Investors are cautioned that drill results illustrated in certain graphics in this presentation are not necessarily indicative of future results or future production. Even if significant mineralization is discovered and converted to reserves, during the time necessary to ultimately move such mineralization to production the economic and legal feasibility of production may change. As such, investors are cautioned against relying upon those estimates. For more information regarding the Company's reserves, see the Company's Annual Report filed with the SEC on February 17, 2016 for the Proven and Probable Reserve tables prepared in compliance with the SEC's Industry Guide 7, which is available at www.sec.gov or on the Company's website. Investors are further reminded that the reserve and resource estimates used in this presentation are estimates as of December 31, 2015.

6. Adjusted Net Income is a non-GAAP metric. See slides 29 and 30 for more information and reconciliation to the nearest GAAP metric.

7. Investors are cautioned that no assurances can be made with respect to the closing of the pending sale of the Company's interest in PTNNT, which remains contingent on conditions precedent – certain of which are outside of the control of the Company. Conditions precedent include maintenance of a valid export licensing at closing, closing of PTMDB's sale of its stake in PTNNT, the absence of any material adverse events, and the satisfaction or waiver of the conditions precedent in other transaction and finance-related agreements. See the Company's Form 10-Q for additional information. The amount of contingent payment will also remain subject to risks and uncertainties, including copper prices and future production and development at Batu Hijau and Elang. Gross cash proceeds to Newmont from PTNNT represents total cash to be received upon closing of the transaction and is not intended to represent cash proceeds net of closing costs. See also slide 2 for the cautionary note regarding forward-looking statements.
