Investor Presentation

Safe Harbor Statement

This presentation contains statements that are forward-looking, as that term is defined by the Securities and Exchange Commission in its rules, regulations and releases. Applied intends that such forward-looking statements be subject to the safe harbors created thereby. Forward-looking statements are often identified by qualifiers such as “believe,” “expect,” “outlook,” “project” “guidance,” “target,” “objectives,” “will” and derivative or similar expressions. All forward-looking statements are based on current expectations regarding important risk factors including trends in the industrial sector of the economy (such as the inflationary environment and supply chain strains), the effects of the health crisis associated with the COVID-19 pandemic on our business operations, results of operations, and financial condition, and other risk factors identified in Applied's most recent periodic report and other filings made with the Securities and Exchange Commission, many of which risks are amplified by circumstances arising out of the COVID-19 pandemic. Accordingly, actual results may differ materially from those expressed in the forward-looking statements, and the making of such statements should not be regarded as a representation by Applied or any other person that the results expressed therein will be achieved. Applied assumes no obligation to update publicly or revise any forward-looking statements, whether due to new information, or events, or otherwise.

Non-GAAP Financial Measures

This presentation sets forth certain non-GAAP financial measures - Adjusted Gross Margin; EBITDA; Adjusted EBITDA; Adjusted EBITDA Margin; Free Cash Flow; Net Leverage Ratio - which are presented as supplemental disclosures to Net Income; Cash from Operations; Total Debt Outstanding; and reported results. Management believes these measures are useful indicators for normalizing earnings for non-routine items and facilitating effective evaluation of operating performance. A presentation of the most directly comparable GAAP measure and reconciliations of Adjusted Gross Margin, EBITDA, Adjusted EBITDA, Adjusted EBITDA Margin, Free Cash Flow, and Net Leverage Ratio are set forth in the appendix to this presentation.

Investor Discussion Points – Q4 FY22

Discussion Point	Update	Detail
1. Underlying Demand	• *Demand remains favorable and strengthened during F4Q22; order rates and backlog continue to increase with little sign of slowing to date despite incremental macro uncertainty*	• *F4Q22 YoY organic sales growth of ~19% represented the highest quarterly sales growth during FY22; underlying volume growth accelerated during the quarter with trends strongest in June*
2. End-Market Trends	• *Breadth of positive growth remains wide across core end markets with sequential momentum building within most verticals, including incremental growth contribution from heavy industrial verticals*	• *25 of top 30 industry verticals up YoY in F4Q22; strongest growth across metals, aggregates, pulp & paper, energy, mining, chemicals, refineries, lumber & wood, and machinery*
3. Inflation & Pricing	• *Inflationary pressures persisting with ongoing supplier price increases and greater LIFO expense; price actions, channel execution, and other countermeasures continue to provide support*	• *LIFO expense of $10.8M in F4Q22 vs. LIFO income of $3.7M in F4Q21 represented a 136 bps headwind on margins during the quarter; price contributed ~500 bps to YoY sales growth in F4Q22*
4. Supply Chain	• *Supply chain challenges remain with little sign of improvement to date; greater customer supply chain requirements and investments continue to position Applied well over the medium to long term*	• *Industry position, service capabilities, and complementary technical solutions driving incremental growth opportunities; component lead times and shipment delays created some headwind to FP & FC segment sales growth during F4Q22*
5. Operating Costs	• *Seeing sustained cost leverage despite inflationary headwinds reflecting enhanced internal processes and operational efficiencies from system investments and our shared services model*	• *F4Q22 incremental EBIT margins at ~17% including a significant YoY LIFO expense headwind during the quarter; SD&A expense as a percent of sales remains at record lows*
6. FY23 Outlook	• *Mindful of increased economic uncertainty, but remain constructive given structural demand tailwinds across core end markets and channels, self-help growth opportunities, and sustained pricing contribution near-term*	• *Sales F1Q23 to date up by a mid-teens percent YoY; FY23 sales guidance of 3% to 7% assumes slowing underlying sales trends as the year progresses given current macro uncertainty*
7. Capital Deployment	• *Balance sheet in solid position to support growth initiatives and shareholder returns going forward; M&A pipeline remains active across Automation, Flow Control, and Fluid Power*	• *Deployed $213M in FY22 toward M&A, debt pay down, dividends, and share buybacks; includes $140M of debt pay down; announced new 1.5M share repurchase program*
