

Silicon Labs International Celebrates 10 Years of Growth and Innovation

Singapore Is Key to Company's Broad-Based Portfolio and Momentum in Internet of Things Market

SINGAPORE--(BUSINESS WIRE)-- [Silicon Labs](#) (NASDAQ: SLAB), a leader in high-performance, analog-intensive, mixed-signal ICs, today celebrates the ten-year anniversary of Silicon Laboratories International Pte. Ltd. in Singapore. Serving as the company's international headquarters for the Asia-Pacific and Europe regions, the Silicon Labs International operation performs a wide range of manufacturing and business-critical functions including global supply chain management, integrated circuit research and development, international finance, product testing, order fulfillment, and international sales and support.

Silicon Labs International opened in Singapore in 2004, eight years after Silicon Labs was founded and four years after the company went public. In 2008, Silicon Labs International moved to its current location at 6 Serangoon North Avenue 5 in Singapore to provide ample space for expanding its operations and employee base. Over the years, Silicon Labs International has grown to more than 150 employees, making it the largest Silicon Labs site outside of the company's corporate headquarters in Austin, Texas (USA). The facility features nearly 40,000 square feet of office space and engineering labs including a test floor and a logistics hub.

Silicon Labs International is strategic to Silicon Labs' competitiveness and success in the global semiconductor industry and the rapidly growing [Internet of Things \(IoT\) market](#). A centerpiece of the Singapore operation is an advanced mixed-signal IC design center where the company's circuit design and applications engineering teams are developing the next generation of energy-friendly [8-bit](#) and [ARM®-based 32-bit microcontrollers](#) (MCUs) for a wide array of IoT applications including smart home, security, wearable, smart energy and industrial designs.

The Silicon Labs International operations team manages all phases of the company's global manufacturing and order fulfillment capabilities, ranging from fab to final test. As a fabless semiconductor supplier, Silicon Labs outsources manufacturing to a number of wafer foundries primarily in Asia and works closely with leading assembly and test suppliers in the region.

Silicon Labs International's streamlined supply-chain management processes are critical to reducing product lead times and accelerating time-to-market for customers around the world. Augmenting the capabilities of Silicon Labs' outsourced test suppliers, the operation's Singapore Test Center uses state-of-the-art equipment to test Silicon Labs' Broad-based products ranging from [mixed-signal MCUs](#) to [quartz- and CMEMS®-based oscillators](#).

Silicon Labs' Singapore operation also houses international finance, sales and customer support, human resources and information technology (IT) teams.

"Singapore is proud to be Silicon Labs International's home over the last 10 years," said Terence Gan, director for electronics, Singapore Economic Development Board (EDB). "Silicon Labs International has been one of the fastest growing, most important members of Singapore's semiconductor industry. We are committed to continuing our symbiotic relationship and creating many good job opportunities in business and engineering."

"Silicon Labs International's 10-year anniversary is a proud milestone in our company's history and an exciting success story highlighting Silicon Labs' expansion and steady growth in Singapore," said Jennifer Teong, vice president of manufacturing and general manager of Silicon Labs International. "Silicon Labs is growing and thriving in the vibrant Singapore economy, and we look forward to many more anniversaries to come."

Silicon Labs

Silicon Labs is an industry leader in the innovation of high-performance, analog-intensive, mixed-signal ICs. Developed by a world-class engineering team with unsurpassed expertise in mixed-signal design, Silicon Labs' diverse portfolio of patented semiconductor solutions offers customers significant advantages in performance, size and power consumption.
