General
This presentation is property of Docebo Inc. (the “Company”, “Docebo”, “us” or “we”). It cannot be circulated or forwarded without our consent.

Any graphs, tables or other information demonstrating our historical performance or that of any other entity contained in this presentation are intended only to illustrate past performance and are not necessarily indicative of our or such entities’ future performance. The information contained in this presentation is accurate only as of the date of this presentation or the date indicated. No securities regulatory authority has expressed an opinion about the securities described herein and it is an offence to claim otherwise.

This presentation also contains statistical data and estimates made by independent parties and by us relating to market size, opportunity and growth, as well as other data about our industry, business and customers. These data involve a number of assumptions and limitations, and we have not independently verified the accuracy or completeness of these data. Whether we or any other person makes any representation as to the accuracy or completeness of such data or undertakes any obligation to update such data after the date of this presentation. In addition, projections, assumptions and estimates of our future performance and the future performance of the markets in which we operate are necessarily subject to high degrees of uncertainty and risk.

All service marks, trademarks and trade names appearing in this presentation are the property of their respective owners. Solely for convenience, the trademarks and tradenames referred to in this presentation appear without the ® and ™ symbols, but those references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights in these trademarks and tradenames.

This presentation shall not constitute an offer to sell or the solicitation of an offer to buy securities, nor shall there be any sale of these securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction. All references in this presentation to dollars or “USD” or “$” are to United States dollars unless otherwise noted. All references to “C$” are to Canadian dollars.

Cautionary Note Regarding Forward-Looking Information
This presentation contains “forward-looking information” and “forward-looking statements” (collectively, “forward-looking information”) within the meaning of applicable securities laws. Forward-looking information may relate to our financial outlook and anticipated events or results and may include information regarding our strategic position, business strategy, growth strategies, addressable markets, budgets, operations, financial results, taxes, dividend policy, plans and objectives. Particularly, information regarding our expectations of future results, performance, achievements, prospects or opportunities or the markets in which we operate is forward-looking information. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as “plans”, “targets”, “expect”, “to expect”, “an opportunity exists”, “budget”, “scheduled”, “estimates”, “outlook”, “forecasts”, “projection”, “prospects”, “strategy”, “intends”, “anticipates”, “believes”, or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might”, “will”, “occurs”, “be achieved”, and similar words or the negative of these terms and similar terminology. In addition, any statements that refer to expectations, intentions, projections or other characterizations of future events or circumstances contain forward-looking information. Statements containing forward-looking information are not historical facts but instead projections regarding future events or circumstances. This forward-looking information includes, but is not limited to, industry trends; our growth rates and growth strategies; addressable markets for our solutions; growth rates of or markets, including compared to similar markets; the achievement of advances in and expansion of our platform; expectations regarding our revenue and the revenue generation potential of our platform and other products; expectations regarding future profitability, our business plans and strategies; our ability to attract and retain customers; our competitive position in our industry. This forward-looking information is based on our expectations, estimates and assumptions that, while considered by the Company to be appropriate and reasonable as of the date of this presentation, are subject to known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information, including but not limited to (i) the Company’s ability to execute on its growth strategies; (ii) the impact of changing conditions in the global corporate e-learning market; (iii) increasing competition in the global corporate e-learning market in which the Company operates; (iv) fluctuations in currency exchange rates and volatility in financial markets; (v) changes in the attitudes, financial condition and demand of our target market; (vi) developments and changes in applicable laws and regulations; and such other factors discussed in greater under the “Risk Factors” sections of our reports available under our profile on SEDAR at sedar.com and www.sec.gov.

If any of these risks or uncertainties materialize, or if the opinions, estimates or assumptions underlying the forward-looking information prove incorrect, actual results or future events might vary materially from those anticipated in the forward-looking information. Although we have attempted to identify important risk factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other risk factors not presently known to us or that we presently believe are not material that could also cause actual results or future events to differ materially from those expressed or implied in such forward-looking information. You should realize that any forward-looking statement speaks only as of the date of this presentation. The Company cannot provide any assurance that forward-looking statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such forward-looking information. No forward-looking statement is a guarantee of future results. Accordingly, you should not place undue reliance on forward-looking information.

All of the forward-looking information contained in this presentation is expressly qualified by the foregoing cautionary statements.

Non-IFRS Measures and Industry Metrics
This presentation makes reference to non-IFRS measures, including “Free Cash Flow” and other key performance indicators used by management and typically used by our competitors in the software-as-a-service (“SaaS”) Industry, such as “Annual Recurring Revenue” or “ARR”, “Recurring Revenue”, “Net Dollar Retention”, “Cash Burn” and “Average Contract Value”. These measures are not recognized measures under IFRS and do not have a standardized meaning prescribed by IFRS and are therefore not necessarily comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those IFRS measures by providing further understanding of our results of operations from management’s perspective. Accordingly, these measures should not be considered in isolation nor as a substitute for analysis of our financial information reported under IFRS. These non-IFRS measures and SaaS metrics are used to provide investors with supplemental measures of our operating performance and liquidity and thus highlight trends in our business that may not otherwise be apparent when relying solely on IFRS measures. We also believe that securities analysts, investors and other interested parties frequently use non-IFRS measures, including SaaS industry metrics, in the evaluation of companies in the SaaS Industry. Management also uses non-IFRS measures and SaaS industry metrics in order to facilitate operating performance comparisons from period to period, the preparation of annual operating budgets and forecasts and to determine components of executive compensation. Refer to the Appendices to this presentation for reconciliations of certain non-IFRS measures to the most comparable IFRS measure.

Bringing AI innovation to enterprise learning

- Large global addressable market
- Customer momentum and leading innovation
- Strong KPI’s capital efficient business model
Appendix: Key Performance Indicators

**Annual Recurring Revenue:** We define Annual Recurring Revenue as the annualized equivalent value of the subscription revenue of all existing contracts (including Original Equipment Manufacturer (“OEM”) contracts) as at the date being measured, excluding non-recurring implementation, support and maintenance fees. Our customers generally enter into one to three year contracts and are non cancelable or cancellable with penalty. All the customer contracts, including those for one-year terms, automatically renew unless cancelled by our customers. Accordingly, our calculation of Annual Recurring Revenue assumes that customers will renew the contractual commitments on a periodic basis as those commitments come up for renewal. Subscription agreements are subject to price increases upon renewal reflecting both inflationary increases and the additional value provided by our solutions. In addition to the expected increase in subscription revenue from price increases over time, existing customers may subscribe for additional features, learners or services during the term. We believe that this measure provides a fair real-time measure of performance in a subscription-based environment. Annual Recurring Revenue provides us with visibility for consistent and predictable growth to our cash flows. Our strong total revenue growth coupled with increasing Annual Recurring Revenue indicates the continued strength in the expansion of our business and will continue to be our target on a go-forward basis.

Net Dollar Retention Rate: We believe that our ability to retain and expand a customer relationship is an indicator of the stability of our revenue base and long-term value of our customers. We assess our performance in this area using a metric we refer to as Net Dollar Retention Rate. We compare the aggregate subscription fees contractually committed for a full month under all customer agreements (the “Total Contractual Monthly Subscription Revenue”) of our total customer base (excluding OEM partners) as of the beginning of each month to the Total Contractual Monthly Subscription Revenue of the same group at the end of the month. Net Dollar Retention Rate is calculated on a weighted average annual basis by first dividing the Total Contractual Monthly Subscription Revenue at the end of the month by the Total Contractual Monthly Subscription Revenue at the start of the month for the same group of customers.
# Appendix: Key Performance Indicators

**Free Cash Flow:** Free Cash Flow is defined as cash used in operating activities less additions to property and equipment and non-current assets. The following table reconciles our cash flow used in operating activities to Free Cash Flow for the periods 2016 to 2021.
