

ResMed’s Raj Sodhi to Speak at Patient Engagement Conference

SAN DIEGO - October 24, 2017 - Raj Sodhi, ResMed’s president of Software-as-a-Service (SaaS) and Healthcare Informatics, the world’s leading tech-driven medical device company, is speaking today at MedCity ENGAGE conference.

The conference brings together the leading thinkers in healthcare to share their insights and experiences in patient and consumer engagement and to discuss innovations in care delivery and wellness.

Sodhi will speak on the panel, “Data and Infrastructure: The Backbone of Patient Engagement,” today from 11:15am–noon PT. The panel will focus on the three keys to significantly improving patients’ health outcomes: data fluidity, interoperability and a robust network infrastructure to support it.

Sodhi will be joined by:

- **Moderator:** Angela Minardi, Manager, Digital Transformation, Accenture
- Kal Patel, M.D., Sr. Vice President of Digital Health, Flex
- Omid Toloui, Vice President of Digital Health Strategy & Alliances, CareMore
- Robert Nauman, Sr. VP, Business Development, Practice Fusion

More than seven million patients worldwide are remotely monitored on at least one medical device, a 45 percent increase from 2015, according to tech analyst Berg Insight. ResMed leads the world with [more than three million cloud-connected devices](#) – PAP machines and ventilators for patients with sleep apnea, COPD and other respiratory conditions.

“Remote monitoring and automated coaching have dramatic impact on patients’ health,” Sodhi said in a [recent announcement about the benefits of connected care](#). “These results show great promise for the role remote monitoring and coaching can play in helping treat a range of chronic diseases.”
