

ASANKO GOLD ANNOUNCES PRELIMINARY Q1 2020 RESULTS

Vancouver, British Columbia, April 16, 2020 – Asanko Gold Inc. (“Asanko” or the “Company”) (TSX, NYSE American: AKG) is pleased to announce results for the first quarter (“Q1”) from the Asanko Gold Mine (“AGM”), located in Ghana, West Africa. The AGM is a 50:50 joint venture (“JV”) with Gold Fields Ltd (JSE, NYSE: GFI) which is managed and operated by Asanko. The Company expects to release its full financial and operational results before the market opens on May 7, 2020.

AGM Q1 Highlights (100% basis):

- Record proceeds of \$104.6 million generated from gold sales of 67,820 ounces at an average realized price of \$1,542 per ounce
- Record gold production of 66,333 ounces
- Mined 1.91 million tonnes (“Mt”) of ore, including 0.59Mt of ore from Esaase
- Processed 1.40Mt of ore with an average gold grade of 1.6 grams per tonne (“g/t”)
- Preliminary all-in sustaining costs¹ (“AISC”) of \$805/oz

“The Asanko Gold Mine had its best quarter since commercial production began four years ago,” said Greg McCunn, Chief Executive Officer. “The mine continued its strong operational performance with record quarterly gold production and gold sales proceeds. In addition, the continued focus on capital spending discipline also resulted in the AGM posting its lowest quarterly AISC performance. The operational team has done a fantastic job in implementing strict health and safety protocols and supply chain management processes required for COVID-19, while still delivering an outstanding quarter. The strong performance of the operations enabled the joint venture to distribute \$45m to the joint venture partners during Q1.

“As a result of receiving \$22.5m in distributions from the AGM, the Company’s financial position continued to strengthen with our corporate cash and receivables balance increasing to approximately \$54 million at quarter-end with no debt. During the quarter, the Company used \$2 million to repurchase shares under its Normal Course Issuer Bid, and we are currently continuing with this program.”

COVID-19 Update

Further to the Company’s update on COVID-19 on March 31, 2020, there continue to be no known or presumptive cases of COVID-19 with employees of Asanko or at the AGM. The Company’s offices in Vancouver, Johannesburg and Accra all remain closed with employees working from home and observing local regulations. The AGM has been operating with strict hygiene, monitoring and social distancing protocols in place in accordance with the Ghanaian Ministry of Health guidelines. The AGM has continued to build its supply chain and now holds 8-9 months of key reagents, consumables and critical spares and three months of diesel supply. Doré produced from the AGM has continued to be refined with the AGM’s primary precious metal refiner in South Africa.

Health and Safety

During the quarter, the Company aligned its health and safety reporting standards with those of the International Council on Mining & Metals (“ICMM”). During the quarter, there was one lost time injury (“LTI”) and four total recordable injuries (“TRI”) reported resulting in a LTI frequency rate (“LTIFR”) of 0.51 per million employee hours worked and a TRI frequency rate (“TRIFR”) of 2.02 per million employee hours worked.

Production

In Q1, the AGM sourced ore from the Nkran, Akwasiso and Esaase pits as well as run of mine stockpiles. During the quarter, 1.73Mt of waste and 1.29Mt of ore at an average gold grade of 1.65 g/t were mined from the Nkran pit. The Esaase pits collectively delivered 0.59Mt of ore at an average gold grade of 1.35 g/t with 3.69Mt of waste mined.

The AGM also re-commenced mining of the Akwasiso pit with 1.62Mt of waste mined and 0.04Mt of ore mined with an average grade of 1.29 g/t. The AGM is expected to ramp-up ore mining from Akwasiso in Q2.

The processing plant milled 1.40Mt at a gold grade of 1.6 g/t during the quarter with metallurgical recovery averaging 94%. With gold production of 66,333 ounces in Q1, the AGM is on track to deliver its annual guidance of 225,000 to 245,000 ounces for 2020.

Preliminary Costs

Preliminary operating cost estimates for the AGM during the quarter are provided below, with final operating costs to be released in conjunction with the Q1 2020 Interim Financial Statements and Management Discussion & Analysis on May 7, 2020. Preliminary operating cash costs per ounce¹ for Q1 were \$599, preliminary total cash costs per ounce¹ were \$676, and preliminary AISC per ounce were \$805. The strong AISC performance reflected positive sales volume variance as well as planned lower sustaining capital expenditures. During Q2 and Q3, construction of the next lift on the Tailings Storage Facility is expected to be completed, which is expected to increase AISC in-line with the AGM’s annual guidance of \$1,000 to \$1,100/oz for 2020.

AGM Key Production Statistics (100% basis)	Units	Q1 2020	Q4 2019	Q3 2019	Q2 2019	Q1 2019
Total Tonnes Mined	000 t	8,962	6,361	7,477	8,864	8,089
Waste Tonnes Mined	000 t	7,051	4,956	6,372	7,808	6,584
Ore Tonnes Mined	000 t	1,911	1,405	1,105	1,056	1,505
Strip Ratio	W:O	3.7:1	3.5:1	5.8:1	7.4:1	4.4:1
Average Gold Grade Mined	g/t	1.6	1.6	1.5	1.6	1.4
Ore Treated	000 t	1,400	1,460	1,439	1,375	1,224
Gold Feed Grade	g/t	1.6	1.5	1.4	1.5	1.6
Gold Recovery	%	94	94	94	93	93
Gold Produced	oz	66,333	66,112	62,440	62,067	60,425

Sales and Liquidity

Gold production for the quarter totalled 66,333 ounces with gold sales of 67,820 ounces at an average realized price of US\$1,542 per ounce, generating record gold sales proceeds of \$104.6 million for the JV. During the quarter, the joint venture undertook the proactive step to drawdown its \$30 million revolving

credit facility in light of the current economic uncertainty surrounding the COVID-19 pandemic. While the JV's healthy liquidity position did not necessitate the utilization of the credit facility, the Company determined that this was a prudent step to take to further strengthen the robust financial position during these uncertain times. As a result, at the end of the quarter, the JV held approximately \$55.6 million in unaudited cash including the fully drawn revolving line of credit, \$9.6 million in gold receivables and \$0.5 million in dore. Distributions from the joint venture to the joint venture partners during the quarter totalled \$45 million.

The Company held approximately \$54 million in unaudited cash and receivables at the quarter-end following receipt of the \$22.5 million in distributions from the JV and the use of \$2 million in buying back shares under its Normal Course Issuer Bid. The Company has no debt.

Notes:

¹ Non-GAAP Performance Measures

The Company has included certain non-GAAP performance measures in this press release. These non-GAAP performance measures do not have any standardized meaning. Accordingly, these performance measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. For a description of the methodology used to calculate these non-GAAP performance measures, see the Non-GAAP Measures section of Asanko's previously filed FY2019 Management Discussion and Analysis; reconciliations of these measures to the Company's financial results will be reported in accordance with IFRS in the Q1 2020 MD&A to be filed in the coming weeks.

- **Operating Cash Costs per ounce and Total Cash Costs per ounce**

Operating cash costs are reflective of the cost of production, adjusted for share-based payments and by-product revenue per ounce of gold sold. Total cash costs include production royalties of 5%.

- **All-in Sustaining Costs Per Gold Ounce**

The Company has adopted the reporting of AISC as per the World Gold Council's guidance. AISC include total cash costs, corporate overhead expenses, sustaining capital expenditure, capitalized stripping costs and reclamation cost accretion per ounce of gold sold.

Cautionary Note Regarding Forward-Looking Statements

Certain statements and information contained in this news release constitute "forward-looking statements" within the meaning of applicable U.S. securities laws and "forward-looking information" within the meaning of applicable Canadian securities laws, which we refer to collectively as "forward-looking statements". Forward-looking statements are statements and information regarding possible events, conditions or results of operations that are based upon assumptions about future conditions and courses of action. All statements and information other than statements of historical fact may be forward looking statements. In some cases, forward-looking statements can be identified by the use of words such as "seek", "expect", "anticipate", "budget", "plan", "estimate", "continue", "forecast", "intend", "believe", "predict", "potential", "target", "may", "could", "would", "might", "will" and similar words or phrases

(including negative variations) suggesting future outcomes or statements regarding an outlook.

Forward-looking statements in this news release include, but are not limited to: estimates regarding the AGM's consumption of key reagents, consumables, critical spares and diesel fuel; the ability of the AGM to maintain current inventory levels; expected gold production; cost estimates; and statements with respect to the Company's share buy-back program. Such forward-looking statements are based on a number of material factors and assumptions, including, but not limited to: the ability of the AGM to continue to operate during the COVID-19 pandemic; that gold production and other activities will not be curtailed as a result of the COVID-19 pandemic; that the AGM will be able to continue to ship doré from the AGM site to be refined; that the doré produced by the AGM will continue to be able to be refined at similar rates and costs to the AGM, or at all; that the other current or potential future effects of the COVID-19 pandemic on the Company's business, operations and financial position, including restrictions on the movement of persons (and in particular, the AGM's workforce), restrictions on business activities, including access to the AGM, restrictions on the transport of goods, trade restrictions, increases in the cost of necessary inputs, reductions in the availability of necessary inputs and productivity and operational constraints, will not impact its 2020 production and cost guidance; that the Company's and the AGM's responses to the COVID-19 pandemic will be effective in continuing its operations in the ordinary course; the accuracy of the estimates and assumptions underlying the Mineral Resource and Mineral Reserve estimates, including future gold prices, cut-off grades and production and processing estimates; the successful completion of development and exploration projects, planned expansions or other projects within the timelines anticipated and at anticipated production levels; that mineral resources can be developed as planned; that the Company's relationship with joint venture partners will continue to be positive and beneficial to the Company; interest and exchange rates; that required financing and permits will be obtained; general economic conditions; that labour disputes or disruptions, flooding, ground instability, geotechnical failure, fire, failure of plant, equipment or processes to operate are as anticipated and other risks of the mining industry will not be encountered; that contracted parties provide goods or services in a timely manner; that there is no material adverse change in the price of gold or other metals; competitive conditions in the mining industry; title to mineral properties; costs; taxes; the retention of the Company's key personnel; and changes in laws, rules and regulations applicable to Asanko.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to differ materially from those anticipated in such forward-looking statements. The Company believes the expectations reflected in such forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and you are cautioned not to place undue reliance on forward-looking statements contained herein. Some of the risks and other factors which could cause actual results to differ materially from those expressed in the forward-looking statements contained in this news release, include, but are not limited to: the Company's and/or the AGM's operations may be curtailed or halted entirely as a result of the COVID-19 pandemic, whether as a result of governmental or regulatory law or pronouncement, or otherwise; that the doré produced at the AGM may not be able to be refined at expected levels, on expected terms or at all; that the Company and/or the AGM will experience increased operating costs as a result of the COVID-19 pandemic; that the AGM may not be able to source necessary inputs on commercially reasonable terms, or at all; the Company's and the AGM's responses to the COVID-19 pandemic may not be successful in continuing its operations in the ordinary course; mineral reserve and resource estimates may change and may prove to be inaccurate; life of mine estimates are based on a number of factors and assumptions and may prove to be incorrect; AGM has a limited operating history and is subject to risks associated with establishing new mining operations; sustained increases in costs, or decreases in the availability, of commodities consumed or otherwise used by the Company may adversely affect the Company; actual production, costs, returns and other economic and financial performance may vary from the Company's estimates in response to a variety of factors, many of which are not within the Company's control; adverse geotechnical and geological conditions (including geotechnical failures) may result in operating delays and lower throughput or recovery, closures or damage to mine infrastructure; the ability of the Company to treat the number of tonnes planned, recover valuable materials, remove deleterious materials and process ore, concentrate and tailings as planned is dependent on a number of factors and assumptions which may not be present or occur as expected; the Company's operations may encounter delays in or losses of production due to equipment delays or the availability of equipment; the Company's operations are subject to continuously evolving legislation, compliance with which may be difficult, uneconomic or require significant expenditures; the Company may be unsuccessful in attracting and retaining key personnel; labour disruptions could adversely affect the Company's operations; the Company's business is subject to risks associated with operating in a foreign country; risks related to the Company's use of contractors; the hazards and risks normally encountered in the exploration, development and production of gold; the Company's operations are subject to environmental hazards and compliance with applicable environmental laws and regulations; the Company's operations and workforce are exposed to health and safety risks; unexpected costs and delays related to, or the failure of the Company to obtain, necessary permits could impede the Company's operations; the Company's title to exploration, development and mining interests can be uncertain and may be contested; the Company's properties may be subject to claims by various community

stakeholders; risks related to limited access to infrastructure and water; the Company's exploration programs may not successfully expand its current mineral reserves or replace them with new reserves; the Company's common shares may experience price and trading volume volatility; the Company's revenues are dependent on the market prices for gold, which have experienced significant recent fluctuations; the Company may not be able to secure additional financing when needed or on acceptable terms; Company shareholders may be subject to future dilution; risks related to changes in interest rates and foreign currency exchange rates; changes to taxation laws applicable to the Company may affect the Company's profitability and ability to repatriate funds; the Company's primary asset is held through a joint venture, which exposes the Company to risks inherent to joint ventures, including disagreements with joint venture partners and similar risks; risks related to the Company's internal controls over financial reporting and compliance with applicable accounting regulations and securities laws; the carrying value of the Company's assets may change and these assets may be subject to impairment charges; the Company may be liable for uninsured or partially insured losses; the Company may be subject to litigation; the Company may be unsuccessful in identifying targets for acquisition or completing suitable corporate transactions, and any such transactions may not be beneficial to the Company or its shareholders; the Company must compete with other mining companies and individuals for mining interests; and risks related to information systems security threats.

Although the Company has attempted to identify important factors that could cause actual results or events to differ materially from those described in the forward-looking statements, you are cautioned that this list is not exhaustive and there may be other factors that the Company has not identified. Furthermore, the Company undertakes no obligation to update or revise any forward-looking statements included in, or incorporated by reference in, this news release if these beliefs, estimates and opinions or other circumstances should change, except as otherwise required by applicable law.
