Forward Looking Statements and Use of Non-GAAP Financial Measures

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements reflect, among other things, the Company's current expectations and anticipated results of operations, all of which are subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements, market trends or industry results to differ materially from those expressed or implied by such forward-looking statements. Therefore, any statements contained herein that are not statements of historical fact may be forward-looking statements and should be evaluated as such. Without limiting the foregoing, the words "anticipates," "believes," "estimates," "expects," "intends," "may," "plans," "projects," "should," "guidance," "targets," "will" and the negative thereof and similar words and expressions are intended to identify forward-looking statements. Actual results may differ materially from the Company's expectations due to a number of factors, including that most of the Company's contracts may be terminated on short notice, the Company may be unable to maintain large customer contracts or to enter into new contracts, the Company may under-price its contracts, overrun its cost estimates, or fail to receive approval for or experience delays in documenting change orders, the historical indications of the relationship of backlog to revenues may not be indicative of their future relationship, the Company is subject to the complex and changing regulatory and international environments in which the Company operates, the Company may be unable to successfully identify, acquire and integrate businesses, the Company's substantial indebtedness, and other risks more fully set forth in the Company's filings with the SEC, including the Company's annual report on Form 10-K for the fiscal year ended December 31, 2013, filed with the SEC on February 13, 2014, as such factors may be amended or updated from time to time in the Company's periodic filings with the SEC, which are accessible on the SEC's website at www.sec.gov. The Company assumes no obligation to update any forward-looking statement after the date of this presentation, whether as a result of new information, future developments or otherwise.

This presentation includes financial measures not prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). Management believes that these non-GAAP financial measures provide useful supplemental information to management and investors regarding the underlying performance of the Company's business operations and are more indicative of core operating results as they exclude certain items whose fluctuations from period-to-period do not necessarily correspond to changes in the core operations of the Company's business. Investors and potential investors are encouraged to review the reconciliations of the non-GAAP financial measures to their most directly comparable GAAP measures attached to this presentation.

Evolving Biopharma Landscape

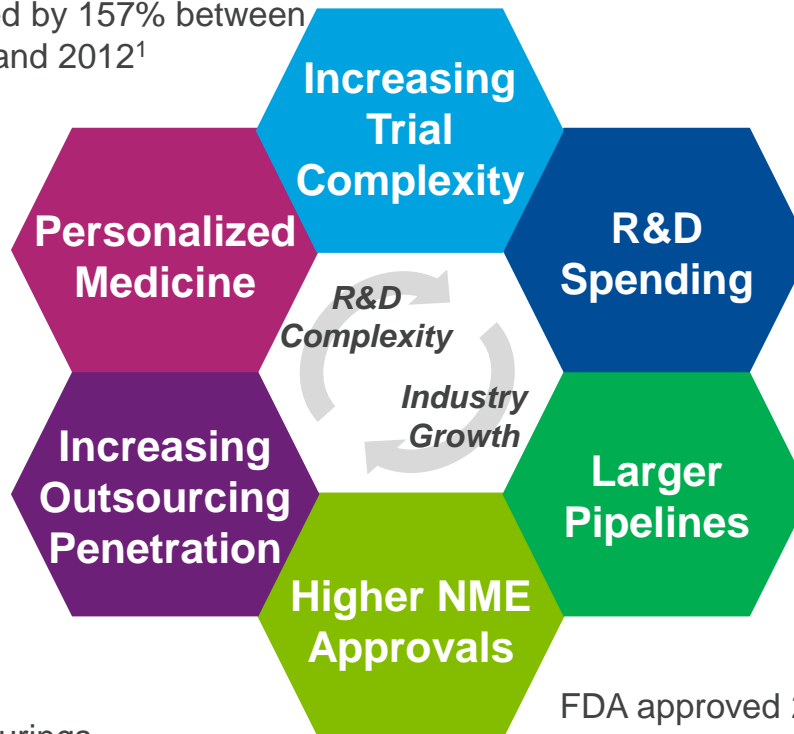

Growth, inefficiency and complexity play to Quintiles' strength

The median number of procedures per trial increased by 157% between 2002 and 2012¹

Over 3,000 ongoing clinical trials involve a biomarker or predictive diagnostic²

Outsourcing is increasing by ~2 percentage points each year³

Biopharma restructurings

R&D spending grew ~1.5%⁴ in 2013 and is forecasted to grow 0%-2% through 2016³

4,060⁶ drugs in the Phase I-III pipeline in 2013, a 19% increase over 2008

FDA approved 27 NMEs in 2013, 39 in 2012, and 30 in 2011. From 2006-2010, the average number of approvals was 22⁵

The Leader in BioPharma Services

Why We Win = Enhanced Value for Customers

- **Clearly differentiated service offerings**
 - > Improving probability of success
 - > Provided services to develop or commercialize top 50 best selling biopharmaceutical and biologic products from 2013
- **Deepest medical and therapeutic, statistical, and quantitative expertise in the industry**
 - > 950 medical doctors and 900 Ph.D.'s
 - > 13 therapeutic centers of excellence
- **Personalized medicine**
 - > Solutions include the integration of biomarkers and genomics, with novel genomic pre-profiling
- **Focused on real-world cost effectiveness**
 - > Portfolio prioritization and market access consulting capabilities

Leader of innovative models

- > Depth and breadth of service offerings enabled the win of 3 sole provider deals over the last 18 months

Leader in remote (risk-based) monitoring

- > 95+ risk-based monitoring trials across 20,000+ sites and 250,000+ patients
- > ~3,200 employees in Global Delivery Network
- > Award winning technology

Leader in real-world data

- > Implemented > 350 patient registries and post approval programs

Leader in adaptive trial design

Product Development

Accelerating pipelines using science, technology and global delivery

- **Core Segment** representing 75% of Consolidated Service Revenues and 92% of Segment Income from Operations⁽¹⁾
- **Market leader in Product Development services**
 - › #1 in Clinical Development / #2 in Central Lab
- **Diversified** customer portfolio across BioPharma segments with tailored segment solutions
- **Integrated** offerings across services and platforms
- **Proactive Business Development**
 - › 1.35¹ book-to-bill ratio - 1.32 trailing twelve month book-to-bill
 - › Strong RFP volumes
 - › Evolution of integrated end to end partnership models

²During the third quarter of 2014, the Company began excluding changes from adjustments to estimated contingent consideration from business combinations from adjusted net income and diluted adjusted earnings per share. Consistent with the other adjustments to adjusted net income and diluted adjusted net income per share, management believes that changes to the estimated value of contingent consideration are not indicative of its core operating results as the fluctuations from period-to-period do not necessarily correspond to changes in the core operations of the business. To conform to the current period presentation, all the periods for fiscal year 2013 in the table above reflect the inclusion of this adjustment.

³ Footnotes for each respective items is included in the press release for the third quarter of 2014.

⁴ Diluted shares are represented in thousands.
