Forward Looking Statements and Use of Non-GAAP Financial Measures

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements reflect, among other things, the Company's current expectations and anticipated results of operations, all of which are subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements, market trends or industry results to differ materially from those expressed or implied by such forward-looking statements. Therefore, any statements contained herein that are not statements of historical fact may be forward-looking statements and should be evaluated as such. Without limiting the foregoing, the words "anticipates," "believes," "estimates," "expects," "intends," "may," "plans," "projects," "should," "guidance," "targets," "will" and the negative thereof and similar words and expressions are intended to identify forward-looking statements. Actual results may differ materially from the Company's expectations due to a number of factors, including, but not limited to, that most of the Company's contracts may be terminated on short notice, and that the Company may be unable to maintain large customer contracts or to enter into new contracts; the Company may under-price its contracts, overrun its cost estimates, or fail to receive approval for or experience delays in documenting change orders; the historical indications of the relationship of backlog to revenues may not be indicative of their future relationship; the Company may be unable to maintain information systems or effectively update them; customer or therapeutic concentration could harm the Company's business; the Company's business is subject to risks associated with international operations, including economic, political and other risks such as compliance with a myriad of laws and regulations, complications from conducting clinical trials in multiple countries simultaneously and changes in exchange rates; the Company may be unable to successfully identify, acquire and integrate businesses, services and technologies; the Company's effective income tax rate may fluctuate, which may adversely affect our operations, earnings, and earnings per share; the Company relies on exemptions for "controlled companies" from certain corporate governance requirements during a one year transition period; certain of the Company's corporate governance documents could make an acquisition of the Company more difficult; and the Company has substantial indebtedness and may incur additional indebtedness in the future, which could adversely affect the Company's financial condition. For a further discussion of the risks relating to the Company's business, see the "Risk Factors" in Quintiles' annual report on Form 10-K for the fiscal year ended December 31, 2014, filed with the SEC, as such factors may be amended or updated from time to time in Quintiles' subsequent periodic filings with the SEC, which are accessible on the SEC's website at www.sec.gov. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this release and in Quintiles' filings with the SEC. The Company assumes no obligation to update any such forward-looking statement after the date of this release, whether as a result of new information, future developments or otherwise.

This presentation includes financial measures not prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). Management believes that these non-GAAP financial measures provide useful supplemental information to management and investors regarding the underlying performance of the Company's business operations and are more indicative of core operating results as they exclude certain items whose fluctuations from period-to-period do not necessarily correspond to changes in the core operations of the Company's business. Investors and potential investors are encouraged to review the reconciliations of the non-GAAP financial measures to their most directly comparable GAAP measures attached to this presentation.

¹ EPS is represented in dollars.

² Reflects the portion of Q² Solutions' after-tax non-GAAP adjustments attributable to the minority interest partner.

³ The tax effect of adjustments was based on the income tax rate of the respective transactions, which was 38.5%, with the exception of i) restructuring costs which were tax effected at 29.2% and 39.3% during the three months ended September 30, 2015 and 2014, respectively, and 30.3% and 34.6% during the nine months ended September 30, 2015 and 2014, respectively and ii) contingent consideration which is not tax effected as it represents a permanent difference between book and tax income.

⁴ Diluted shares are represented in thousands.

Note: Totals may not sum due to rounding; percentages are calculated from the actual results rounded to the nearest thousand.
