

Elkhart Plastics, a Myers Industries Company, Adds E-Series to TUFF Line, Expanding Solutions for Secure Liquid Handling

2025-05-21

AKRON, Ohio--(BUSINESS WIRE)-- Elkhart Plastics, a leading rotational molder, has expanded its TUFF line with the new E-Series—a durable, sustainable, and cost-effective IBC (Intermediate Bulk Container) engineered specifically to protect liquids during storage, transport, and dispensing.

Elkhart Plastics, a leading rotational molder, has expanded its TUFF line with the new E-Series—a durable, sustainable, and cost-effective IBC (Intermediate Bulk Container) engineered specifically to protect liquids during storage, transport, and dispensing.

Manufactured at the company's Middlebury, Indiana, facility, the TUFF E-Series™ helps businesses safeguard both regulated and

non-regulated liquid materials across a range of commercial and industrial operations, from chemical manufacturing to waste management to water treatment.

Unlike traditional limited-use IBCs that generate excess packaging waste and recurring costs, the E-Series is a reusable alternative that delivers long-term performance and features:

- Rotomolded Base—Tough, impact-resistant base delivers protection against rigorous use and reduces replacement costs.
- Optimized Drainage—Sloped-bottom design yields 99.9% drainage, reducing product loss and waste.
- Superior Valve Connection—TUFF LinQ® Outlet Valve Connection is 30% stronger when tested against a comparable brand and features an integrated male cam-lock fitting with dust cap to protect against leaks and

downtime.

“The new E-Series builds on the proven strengths of our TUFF line and gives customers a smarter way to protect, handle, and store liquid materials,” said Cullen Jones, VP of Sales at Myers Industries. “It also reflects our commitment to innovation and quality. Reusable, environmentally responsible, and economically viable, the E-Series cuts waste, lowers costs, and delivers long-term value—setting a new standard for IBC performance in liquid handling.”

The E-Series is available for purchase directly from Elkhart or through the company's dealer network.

About Elkhart Plastics

Founded in 1988, Elkhart Plastics LLC is a recognized leader in rotational molding. The company engineers and manufactures a wide array of custom and proprietary products across its North American facilities, including the TUFF Series line of intermediate bulk containers and Connect-A-Dock, a versatile line of floating docks and marine accessories. In 2020, Elkhart became part of Myers Industries, joining a family of companies with expanded manufacturing capabilities and strengthening Elkhart's ability to offer customers greater value, resources, and expertise.
