

Forward-Looking Statements and Non-GAAP Financial Measures

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” to encourage companies to provide prospective information, so long as those informational statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. The company desires to take advantage of these provisions. This document contains cautionary statements identifying important factors that could cause actual results to differ materially from those projected herein, and in any other statements made by company officials in communications with the financial community and contained in documents filed with the Securities and Exchange Commission (SEC). Forward-looking statements are not based on historical information and relate to future operations, strategies, financial results or other developments. Furthermore, forward-looking information is subject to numerous assumptions, risks and uncertainties. In particular, statements containing words such as “expect,” “anticipate,” “believe,” “goal,” “objective,” “may,” “should,” “estimate,” “intends,” “projects,” “will,” “assumes,” “potential,” “target,” “outlook” or similar words as well as specific projections of future results, generally qualify as forward-looking. Aflac undertakes no obligation to update such forward-looking statements.

The company cautions readers that the following factors, in addition to other factors mentioned from time to time, could cause actual results to differ materially from those contemplated by the forward-looking statements:

- *difficult conditions in global capital markets and the economy, including those caused by COVID-19*
- *defaults and credit downgrades of investments*
- *exposure to significant interest rate risk*
- *concentration of business in Japan*
- *limited availability of acceptable yen-denominated investments*
- *foreign currency fluctuations in the yen/dollar exchange rate*
- *differing judgments applied to investment valuations*
- *significant valuation judgments in determination of expected credit losses recorded on the Company's investments*
- *decreases in the Company's financial strength or debt ratings*
- *decline in creditworthiness of other financial institutions*
- *concentration of the Company's investments in any particular single-issuer or sector*
- *the effects of COVID-19 and its variants (both known and emerging), and any resulting economic effects and government interventions, on the Company's business and financial results*
- *the Company's ability to attract and retain qualified sales associates, brokers, employees, and distribution partners*
- *deviations in actual experience from pricing and reserving assumptions*
- *ability to continue to develop and implement improvements in information technology systems*
- *interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems*
- *subsidiaries' ability to pay dividends to the Parent Company*
- *inherent limitations to risk management policies and procedures*
- *the level of sales of Aflac Japan products in the Japan Post channel*
- *tax rates applicable to the Company may change*
- *failure to comply with restrictions on policyholder privacy and information security*
- *extensive regulation and changes in law or regulation by governmental authorities*
- *competitive environment and ability to anticipate and respond to market trends*
- *catastrophic events, including, but not limited to, as a result of climate change, epidemics, pandemics (such as the coronavirus COVID-19), tornadoes, hurricanes, earthquakes, tsunamis, war or other military action, terrorism or other acts of violence, and damage incidental to such events*
- *ability to protect the Aflac brand and the Company's reputation*
- *ability to effectively manage key executive succession*
- *changes in accounting standards*
- *level and outcome of litigation*
- *allegations or determinations of worker misclassification in the United States*

Non-U.S. GAAP Financial Measures and Reconciliations

This document includes references to the Company's financial performance measures which are not calculated in accordance with United States generally accepted accounting principles (U.S. GAAP) (non-U.S. GAAP). The financial measures exclude items that the Company believes may obscure the underlying fundamentals and trends in insurance operations because they tend to be driven by general economic conditions and events or related to infrequent activities not directly associated with insurance operations.

Definitions of the Company's non-U.S. GAAP financial measures and applicable reconciliations to the most comparable U.S. GAAP measures are provided as appropriate.

Due to the size of Aflac Japan, where the functional currency is the Japanese yen, fluctuations in the yen/dollar exchange rate can have a significant effect on reported results. In periods when the yen weakens, translating yen into dollars results in fewer dollars being reported. When the yen strengthens, translating yen into dollars results in more dollars being reported. Consequently, yen weakening has the effect of suppressing current period results in relation to the comparable prior period, while yen strengthening has the effect of magnifying current period results in relation to the comparable prior period. A significant portion of the Company's business is conducted in yen and never converted into dollars but translated into dollars for U.S. GAAP reporting purposes, which results in foreign currency impact to earnings, cash flows and book value on a U.S. GAAP basis. Management evaluates the Company's financial performance both including and excluding the impact of foreign currency translation to monitor, respectively, cumulative currency impacts and the currency-neutral operating performance over time. The average yen/dollar exchange rate is based on the published MUFG Bank, Ltd. telegraphic transfer middle rate (TTM).

Glossary of Non-U.S. GAAP Measures

The Company defines these non-U.S. GAAP financial measures as follows:

- **Adjusted earnings** are adjusted revenues less benefits and adjusted expenses. Adjusted earnings per share (basic or diluted) are the adjusted earnings for the period divided by the weighted average outstanding shares (basic or diluted) for the period presented. The adjustments to both revenues and expenses account for certain items that cannot be predicted or that are outside management's control. Adjusted revenues are U.S. GAAP total revenues excluding adjusted net investment gains and losses. Adjusted expenses are U.S. GAAP total acquisition and operating expenses including the impact of interest cash flows from derivatives associated with notes payable but excluding any nonrecurring or other items not associated with the normal course of the Company's insurance operations and that do not reflect the Company's underlying business performance. Management uses adjusted earnings and adjusted earnings per diluted share to evaluate the financial performance of the Company's insurance operations on a consolidated basis and believes that a presentation of these financial measures is vitally important to an understanding of the underlying profitability drivers and trends of the Company's insurance business. The most comparable U.S. GAAP financial measures for adjusted earnings and adjusted earnings per share (basic or diluted) are net earnings and net earnings per share, respectively.
- **Adjusted earnings excluding current period foreign currency impact** are computed using the average foreign currency exchange rate for the comparable prior-year period, which eliminates fluctuations driven solely by foreign currency exchange rate changes. Adjusted earnings per diluted share excluding current period foreign currency impact is adjusted earnings excluding current period foreign currency impact divided by the weighted average outstanding diluted shares for the period presented. The Company considers adjusted earnings excluding current period foreign currency impact and adjusted earnings per diluted share excluding current period foreign currency impact important because a significant portion of the Company's business is conducted in Japan and foreign exchange rates are outside management's control; therefore, the Company believes it is important to understand the impact of translating foreign currency (primarily Japanese yen) into U.S. dollars. The most comparable U.S. GAAP financial measures for adjusted earnings excluding current period foreign currency impact and adjusted earnings per diluted share excluding current period foreign currency impact are net earnings and net earnings per share, respectively.
- **Adjusted book value including unrealized foreign currency translation gains and losses** is adjusted book value plus unrealized foreign currency translation gains and losses. Adjusted book value including unrealized foreign currency translation gains and losses per common share is adjusted book value plus unrealized foreign currency translation gains and losses at the period end divided by the ending outstanding common shares for the period presented. The Company considers adjusted book value including unrealized foreign currency translation gains and losses, and its related per share financial measure, important as they exclude certain components of AOCI, which fluctuate due to market movements that are outside management's control; however, it includes the impact of foreign currency as a result of the significance of Aflac's Japan operation. The most comparable U.S. GAAP financial measures for adjusted book value including unrealized foreign currency translation gains and losses and adjusted book value including unrealized foreign currency translation gains and losses per common share are total book value and total book value per common share, respectively.
- **Adjusted return on equity** is adjusted earnings divided by average shareholders' equity, excluding accumulated other comprehensive income (AOCI). Management uses adjusted return on equity to evaluate the financial performance of the Company's insurance operations on a consolidated basis and believes that a presentation of this financial measure is vitally important to an understanding of the underlying profitability drivers and trends of the Company's insurance business. The Company considers adjusted return on equity important as it excludes components of AOCI, which fluctuate due to market movements that are outside management's control. The most comparable U.S. GAAP financial measure for adjusted return on equity is return on average equity (ROE) as determined using net earnings and average total shareholders' equity.
- **Adjusted return on equity excluding foreign currency impact** is adjusted earnings excluding the current period foreign currency impact divided by average shareholders' equity, excluding AOCI. The Company considers adjusted return on equity excluding foreign currency impact important as it excludes changes in foreign currency and components of AOCI, which fluctuate due to market movements that are outside management's control. The most comparable U.S. GAAP financial measure for adjusted return on equity excluding foreign currency impact is ROE as determined using net earnings and average total shareholders' equity.

Reconciliation of Net Earnings Per Diluted Share to Adjusted Earnings per Diluted Share

Three Months Ended September 30

	<u>2022</u>	<u>2021</u>	<u>%Change</u>
Net Earnings per diluted share	\$2.53	\$1.32	91.7%
Items impacting net earnings			
Adjusted net investment (gains) losses	(0.35)	0.26	
Other and non-recurring (income) loss	—	0.01	
Income tax (benefit) expense on items excluded from adjusted earnings	<u>(1.03)</u>	<u>(0.06)</u>	
Adjusted earnings per diluted share	1.15	1.53	(24.8)%
Current period foreign currency impact ¹	<u>0.08</u>	<u>N/A</u>	
Adjusted earnings per diluted share excluding current period foreign currency impact ²	<u><u>\$1.23</u></u>	<u><u>\$1.53</u></u>	(19.6)%

¹Prior period foreign currency impact reflected as "N/A" to isolate change for current period only

² Amounts excluding current period foreign currency impacts are computed using the average foreign currency exchange rate for the comparable prior year period, which eliminates fluctuations driven solely by foreign currency exchange rate changes.

Reconciliation of Net Earnings to Adjusted Earnings¹

Three Months Ended September 30, in millions of Dollars

	<u>2022</u>	<u>2021</u>	<u>%Change</u>
Net Earnings	\$1,596	\$888	79.7%
Items impacting net earnings			
Adjusted net investment (gains) losses	(222)	172	
Other and non-recurring (income) loss	(1)	8	
Income tax (benefit) expense on items excluded from adjusted earnings	<u>(648)</u>	<u>(37)</u>	
Adjusted earnings	725	1,031	(29.7)%
Current period foreign currency impact ¹	<u>53</u>	<u>N/A</u>	
Adjusted earnings			
excluding current period foreign currency impact ²	<u><u>\$778</u></u>	<u><u>\$1,031</u></u>	(24.5)%

¹Prior period foreign currency impact reflected as "N/A" to isolate change for current period only

²Amounts excluding current period foreign currency impacts are computed using the average foreign currency exchange rate for the comparable prior year period, which eliminates fluctuations driven solely by foreign currency exchange rate changes.

Reconciliation of U.S. GAAP Return on Equity to Adjusted ROE¹

Three Months Ended September 30, in millions of Dollars

	<u>2022</u>	<u>2021</u>
U.S. GAAP ROE - Net earnings ²	25.3%	10.6%
Impact of excluding unrealized foreign currency translation gains (losses)	(3.6)	(0.7)
Impact of excluding unrealized gains (losses) on securities and derivatives	1.9	4.0
Impact of excluding pension liability adjustment	(0.1)	(0.1)
Impact of excluding AOCI	(1.9)	3.2
U.S. GAAP ROE - less AOCI	23.4	13.8
Differences between adjusted earnings and net earnings ³	(12.8)	2.2
Adjusted ROE - reported	10.6	16.0
Less: Impact of foreign currency ⁴	(0.8)	N/A
Adjusted ROE, excluding impact of foreign currency	11.4	16.0

¹Amounts presented may not foot due to rounding

²U.S. GAAP ROE is calculated by dividing net earnings (annualized) by average shareholders' equity

³See separate reconciliation of net income to adjusted earnings

⁴Impact of foreign currency is calculated by restating all foreign currency components of the income statement to the weighted average foreign currency exchange rate for the comparable prior year period. The impact is the difference of the restated adjusted earnings compared to reported adjusted earnings. For comparative purposes, only current period income is restated using the weighted average prior period exchange rate, which eliminates the foreign currency impact for the current period. This allows for equal comparison of this financial measure

Reconciliation of U.S. GAAP Book Value per Share¹

Three Months Ended September 30, in millions of Dollars

	<u>2022</u>	<u>2021</u>	<u>%Change</u>
U.S. GAAP book value per common share	\$38.71	\$50.62	(23.5)%
Less:			
Unrealized foreign currency translation gains (losses) per common share	(7.14)	(2.66)	
Unrealized gains (losses) on securities and derivatives per common share	1.77	14.63	
Pension liability adjustment per common share	<u>(0.25)</u>	<u>(0.42)</u>	
Total AOCI per common share	<u>(5.63)</u>	<u>11.56</u>	
Adjusted book value per common share ²	\$44.34	\$39.06	13.5%
Add:			
Unrealized foreign currency translation gains (losses) per common share	(7.14)	(2.66)	
Adjusted book value including unrealized foreign currency			
translation gains (losses) per common share ³	<u><u>\$37.20</u></u>	<u><u>\$36.41</u></u>	2.2%

¹Amounts may not foot due to rounding

²Adjusted book value in the U.S. GAAP book value (representing total shareholder's equity), excluding AOCI (as recorded on the U.S. GAAP balance sheet).

³Adjusted book value including unrealized foreign currency translation gains (losses) is adjusted book value plus unrealized foreign currency translation gains (losses).
