Financial Analysts Briefing Supplement
Third Quarter 2018

This document is a statistical supplement to the Financial Analysts Briefing book. Throughout the presentation, amounts presented may not foot due to rounding. As you review the supplement, please note:

The following discussion includes references to Aflac's non-U.S. GAAP performance measures, adjusted earnings, adjusted earnings per diluted share, amortized hedge costs, and adjusted book value. These measures are not calculated in accordance with U.S. GAAP. The measures exclude items that the company believes may obscure the underlying fundamentals and trends in insurance operations because they tend to be driven by general economic conditions and events or related to infrequent activities not directly associated with insurance operations. Management uses adjusted earnings and adjusted earnings per diluted share to evaluate the financial performance of Aflac's insurance operations on a consolidated basis and believes that a presentation of these measures is vitally important to an understanding of the underlying profitability drivers and trends of Aflac's insurance business. The company believes that amortized hedge costs, which are a component of adjusted earnings, measure the periodic currency risk management costs associated with hedging a portion of Aflac Japan's U.S. dollar-denominated investments and are an important component of net investment income. The company considers adjusted book value important as it excludes accumulated other comprehensive income (AOCI), which fluctuates due to market movements that are outside management's control.

Aflac defines these non-U.S.GAAP financial measures as follows:

- Adjusted earnings are adjusted revenues less benefits and adjusted expenses. The adjustments to both revenues and expenses account for certain items that cannot be predicted or that are outside management's control. Adjusted revenues are US GAAP total revenues excluding realized investment gains and losses, except for amortized hedge costs related to foreign currency exposure management strategies and net interest cash flows from derivatives associated with certain investment strategies. Adjusted expenses are US GAAP total acquisition and operating expenses including the impact of interest cash flows from derivatives associated with notes payable but excluding any nonrecurring or other items not associated with the normal course of the company's insurance operations and that do not reflect Aflac's underlying business performance. A reconciliation of net earnings to adjusted earnings is on page 2.
- Adjusted earnings per share (basic or diluted) are the adjusted earnings for the period divided by the weighted average outstanding shares (basic or diluted) for the period presented.
- Amortized hedge costs represent costs incurred in using foreign currency forward contracts to hedge the foreign exchange risk of a portion of U.S. dollar-denominated assets in the company's Japan segment investment portfolio. These amortized hedge costs are derived from the difference between the foreign currency spot rate at time of trade inception and the contractual foreign currency forward rate, recognized on a straight line basis over the term of the hedge. There is no comparable U.S. GAAP financial measure for amortized hedge costs.
- Adjusted book value is the U.S. GAAP book value (representing total shareholders' equity), less Accumulated Other Comprehensive Income ("AOCI") as recorded on the U.S. GAAP balance sheet.

Because a significant portion of the company's business is conducted in Japan and foreign exchange rates are outside of management's control, Aflac believes it is important to understand the impact of translating Japanese yen into U.S. dollars. Adjusted earnings per diluted share "excluding foreign currency impact" are computed using the average yen/dollar exchange rate for the comparable prior year period, which eliminates fluctuations driven solely by yen-to-dollar currency rate changes.

On January 1, 2016, the company retrospectively adopted revised accounting guidance for Accounting for Costs Associated with Debt Issuance, which resulted in an immaterial decrease to other assets and notes payable.

On January 1, 2016, the company revised its definition of purchases to include the reinvestment of proceeds related to unplanned sale activity. New purchases include all purchases related to fixed maturities and perpetuals, loan receivables, and equities. Securities lending/repurchase agreement activity and capital contributions to alternatives are excluded. The definition of new money yield has also been revised to reflect this change. Yields for equities are based on assumed dividend yield at time of purchase. Historical amounts have been revised to reflect the new definitions.

Effective January 1, 2017, adjusted earnings includes the impact of amortized hedge costs incurred in using foreign currency forward contracts to hedge a portion of the foreign currency exchange risk on the U.S. dollar-denominated assets in Aflac Japan's investment portfolio. Prior period adjusted earnings have been revised to conform to this change.

On January 1, 2017, the company adopted a policy to classify all foreign currency gains (losses) as components of the Realized investment gains (losses) line item of the income statement. Amounts have been reclassified from Other income for all prior periods to be consistent.

On March 16, 2018 the company executed a two-for-one stock split. All equity balances, share and per-share amounts in the report have been adjusted to reflect this split.

[1] See definition of adjusted earnings on cover page. All prior period adjusted earnings have been revised for the reclassification of amortized hedge costs for consistency with current period presentation.

[2] Foreign currency gains (losses) for all periods have been reclassified from Other and non-recurring income (loss) to Realized investment gains (losses).

[3] This estimated impact of Tax Reform is a preliminary estimate and may be adjusted, possibly materially, due to, among other things, further refinement of the company's calculations, changes in interpretations and assumptions the company has made, tax guidance that may be issued and actions the company may take as a result of Tax Reform. An adjustment of $11 million was made in the three-month period ended September 30, 2018, as a result of return-to-provision adjustments and various amended returns filed by the company.

[1] Invested assets, including cash and short term investments, are stated at amortized cost; except for equities, which are at fair value.

[2] Net of investment expenses and amortized hedge costs, year-to-date number reflected on a quarterly average basis

[3] Includes fixed maturity securities, loan receivables, equity securities, and excludes alternative investments in limited partnerships

[4] Reported on a gross yield basis; excludes investment expenses, external management fees, and amortized hedge costs

[5] See definition of amortized hedge costs on cover page. Further, the metrics in this table relate to the hedging of the market value of a portion of the USD investments in Japan Segment's "USD Program" in the "Japan Segment Portfolio Allocation by Currency" table on page 11 of this supplement. These figures exclude corporate hedge

[6] Notional is reported net of any offsetting positions

[7] Tenor based on derivative's original execution date to settlement date

[8] Tenor based on period reporting date to settlement date

[9] Based on annualized amortized hedge costs divided by average FX forward notional for the period

[1] The debt amount is the sum of the gross notes payable and has been adjusted for 50% of our subordinated debentures.
The debt was also adjusted between 2nd quarter of 2013 and 2nd quarter of 2014 for the portion of senior notes designated as pre-funding of 2014 maturities.
[2] Adjusted capitalization is the sum of the adjusted debt plus shareholders' equity, excluding the unrealized gains and losses on investment securities and derivatives
[3] Revised adjusted capitalization is the sum of debt, excluding pre-funding amounts, plus shareholders' equity excluding AOCI
[4] Debt maturity amounts do not include discounts, premiums, deferred charges, or capital lease obligations.
