RESTON, Va.--(BUSINESS WIRE)--MAXIMUS, a leading provider of government services, announced today that its TIENET® special education program was once again recognized by District Administration magazine as among its Readers' Choice Top 100 Products of 2015 for the fifth year running.

TIENET is a single program providing five applications for special education case management, response to intervention (also called multi-tiered support systems), service capture to record all clinical services, instructional data management, and assessment. The program delivers customizability, interoperability, security and scalability by blending a robust solution with leading-edge technology. TIENET also provides guided workflow, support and staff development, translations, communication and integrated reporting to assist school systems.

"We are delighted to be recognized by District Administration for the fifth year based on the positive comments from users of our TIENET solution," commented MAXIMUS President Bruce Caswell. "TIENET is used by school districts throughout North America and we appreciate their feedback on its quality, ease of use, scalability and the capability to personalize each implementation."

District Administration provides K-12 leaders with news and information for school district management. Its annual Reader's Choice Top 100 Products awards program is based on nominations from thousands of the magazine's readers. These include superintendents and other senior school district leaders from around the country who share their experiences about the products they use to help their districts excel in a variety of areas, such as technology, sustainability and curriculum instruction.

"It was inspiring to learn about the products being used in today's schools and classrooms that are helping districts succeed," said JD Solomon, District Administration's editorial director. "All of our 2015 honorees should be very proud of this achievement."

About MAXIMUS

Since 1975, MAXIMUS has operated under its founding mission of Helping Government Serve the People®, enabling citizens around the globe to successfully engage with their governments at all levels and across a variety of health and human services programs. MAXIMUS delivers innovative business process management and technology solutions that contribute to improved outcomes for citizens and higher levels of productivity, accuracy, accountability and efficiency of government-sponsored programs.
