

CONTRACT DISCLOSURES

As a founding member of the Extractive Industries Transparency Initiative (EITI), we believe that greater transparency and accountability is important to building trust and encouraging sustainable business practices.

Newmont intends to disclose investment agreements and mineral development contracts signed with host governments relating to large, well-progressed operations and projects, which justify having specific contracting arrangements, provided such disclosure is not prohibited by law or regulation or subject to confidentiality restrictions.

The below is as of December 31, 2022. Newmont will continue to add to the table below of contracts with governments relating to mineral development over time as we enter into new contracts.

It is noted that contracts with a minimal or indirect connection to mineral development or for properties for which Newmont is not the operator have not been included. Additionally, the below does not include permits, licenses and legislation which are generally applicable to other companies, or which are considered to be incident to the ordinary course of business.
