

CONTRACT DISCLOSURES

As a founding member of the Extractive Industries Transparency Initiative (“EITI”), Newmont Corporation (“Newmont”) believes that greater transparency and accountability is important to building trust and encouraging sustainable business practices. Newmont intends to disclose investment agreements and mineral development contracts signed with host governments relating to large, well-progressed operations and projects, which justify having specific contracting arrangements, provided such disclosure is not prohibited by law or regulation or subject to confidentiality restrictions.

The below is as of December 31, 2024. Newmont will continue to update this table of contracts with governments related to mineral development as we enter into new contracts.

Please note that contracts with minimal or indirect connections to mineral development, or for properties for which Newmont is not the operator, have not been included. Additionally, this table does not include permits, licenses and legislation that are generally applicable to other companies or considered part of the ordinary course of business.

Country/Region	Parties
