NEWMONT

Bank of Montreal Metals and Mining Conference

Richard O'Brien, President & CEO

February 28, 2011

WORLD GOLD COUNCIL MEMBER

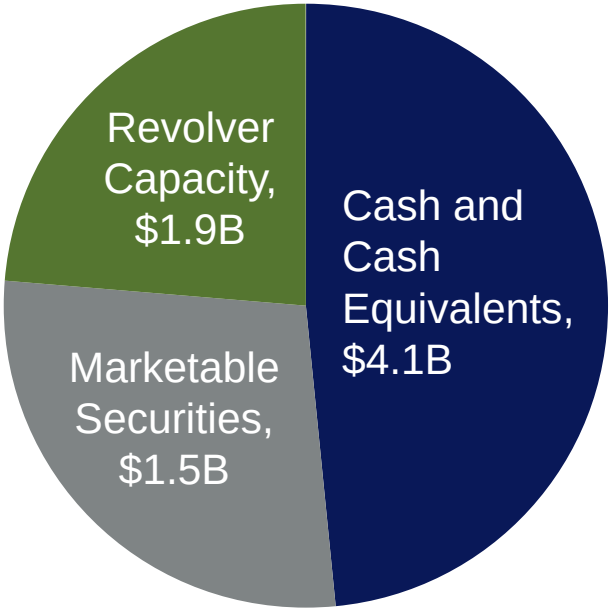

Cautionary Statement

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements include, without limitation: (i) estimates of future equity gold and equity copper production; (ii) estimates of future costs applicable to sales; (iii) estimates of future capital expenditures; (iv) statements regarding potential ounces or tons, reserves, resources and NRM; and (v) expectations regarding the exploration potential, development opportunity, ramp-up, growth, mine life, estimate of first production, potential average annual production, estimated average CAS, expected initial CapEx and other financial outlook of the Company’s operations and projects, including, without limitation, Akyem, Conga, Hope Bay, Elang, as applicable. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks in the countries in which we operate, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2010 Annual Report on Form 10-K, filed on February 24, 2011, with the Securities and Exchange Commission, as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, financial outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors' own risk.

Investing in Newmont

Strong Balance Sheet and Cash Flow to Build our Business

Over $5.6B in Cash and Marketable Securities

Record Revenue of $9.4B

Record Cash from Continuing Operations $3.2B

Record Net Income Attributable to Newmont $2.3B

Building Our Business

Internal Project Portfolio

~$1.1B in 2011 in Development Capital for Conga, Akyem and Hope Bay and Other

Exploration

~$360M in 2011[1]

Opportunistic M&A

Fronteer Gold Acquisition[2]

Return of Capital

Dividend increased 50% on July 28, 2010

[1]Includes both expense and capital.
[2]Pending closing expected in early April.

2010 Operating and Financial Highlights

Record Revenue, Cash from Continuing Operations and Net Income

	2010	2009	2010 vs. 2009
Revenue ($M)	$9,540	$7,705	▲ 24%
Cash from Continuing Operations ($M)	$3,180	$2,914	▲ 9%
Attributable Gold Production (Moz)	5.4	5.2	▲ 4%
Attributable Copper Production (Mlbs)	327	227	▲ 44%
Adj. Net Income[1] ($M)	$1,893	$1,359	▲ 39%
Adj. Net Income per share[2] ($)	$3.85	$2.79	▲ 38%

[1,2]Refer to slide 21 for reconciliation to GAAP net income attributable to Newmont stockholders.

2010 Operating and Financial Highlights Continued

Continuing to Demonstrate Leverage to Gold through Margin Expansion

	2010	2009	2010 vs. 2009
Average Realized Gold Price ($/oz)	$1,222	$977	25%
Gold CAS ($/oz)	$485	$411	18%
Average Realized Copper Price ($/lb)	$3.43	$2.60	32%
Copper CAS ($/lb)	$0.80	$0.64	25%
Gold Operating Margin[1] ($/oz)	$737	$566	30%
Copper Operating Margin[2] ($/lb)	$2.63	$1.96	34%

[1]Gold operating margin calculated as average realized gold price per ounce, less gold cost applicable to sales per ounce.
[2]Copper operating margin calculated as average realized copper price per pound, less copper cost applicable to sales per pound.

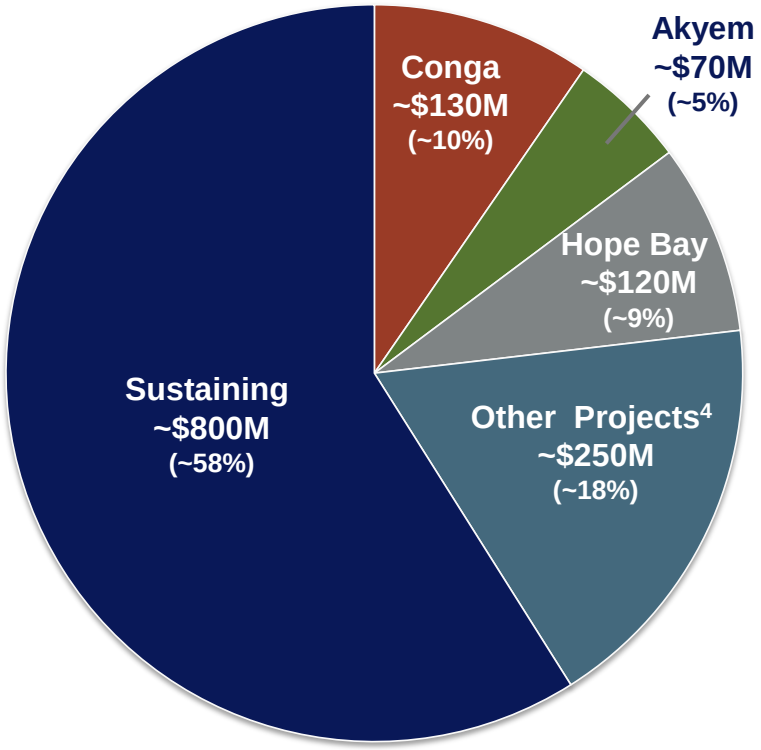

2011 Outlook[1]

Highlights	2011 Outlook	2010 Actual
Attributable Gold Production (Moz)	5.1 – 5.3	5.4
Gold CAS ($/oz)	$560 – $590	$485
Attributable Copper Production (Mlbs)	190 – 220	327
Copper CAS ($/lb)	$1.25 – $1.50	$0.80
Consolidated Capex[2] ($M)	$2,700 – $3,000	$1,400

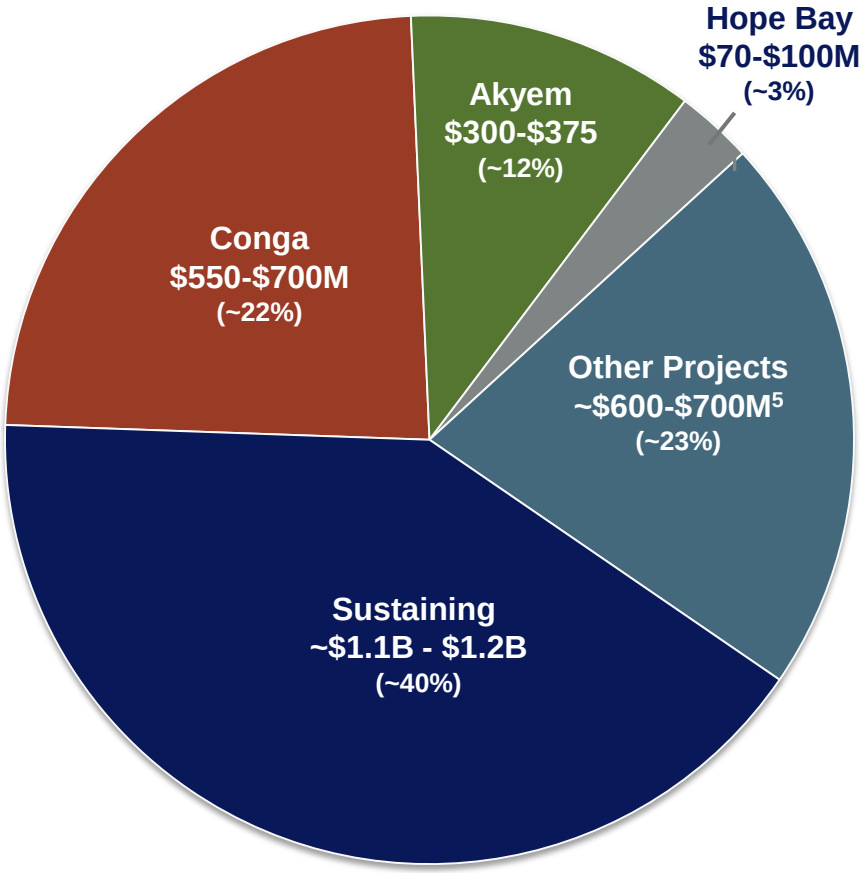

[1]See cautionary statement on slide 23.
[2]Attributable CapEx range of $2,100-$2,500M reflects Newmont's equity ownership in Yanacocha, Conga and Batu Hijau.

Consolidated Capital Expenditure[1]

2010 Consolidated Capital[2] : ~$1,400M

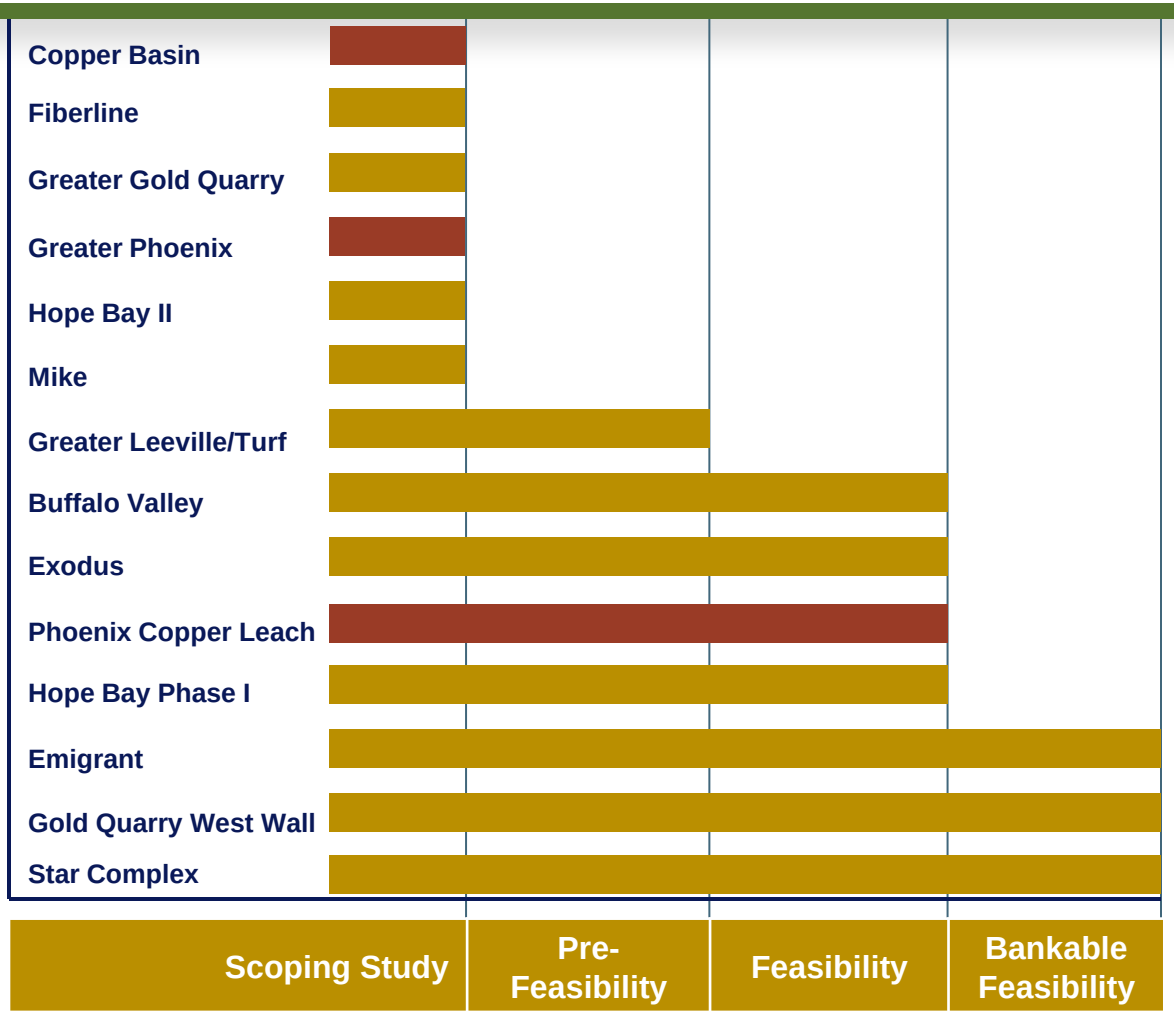

2011 Consolidated Capital Outlook[3]: ~$2,700 - $3,000M

[1]See cautionary statement on slide 23.
[2]2010 Attributable Capital Spend was $1,193M.
[3]2011 Attributable Capital Outlook range is $2,100 to $2,500M.
[4]Of $250M, North America (~38%), South America (~4%), APAC (40%), Africa (~18%)
[5]North America (~49%), South America (~10%), APAC (~28%), Africa (~12%)

Newmont Potential: North America

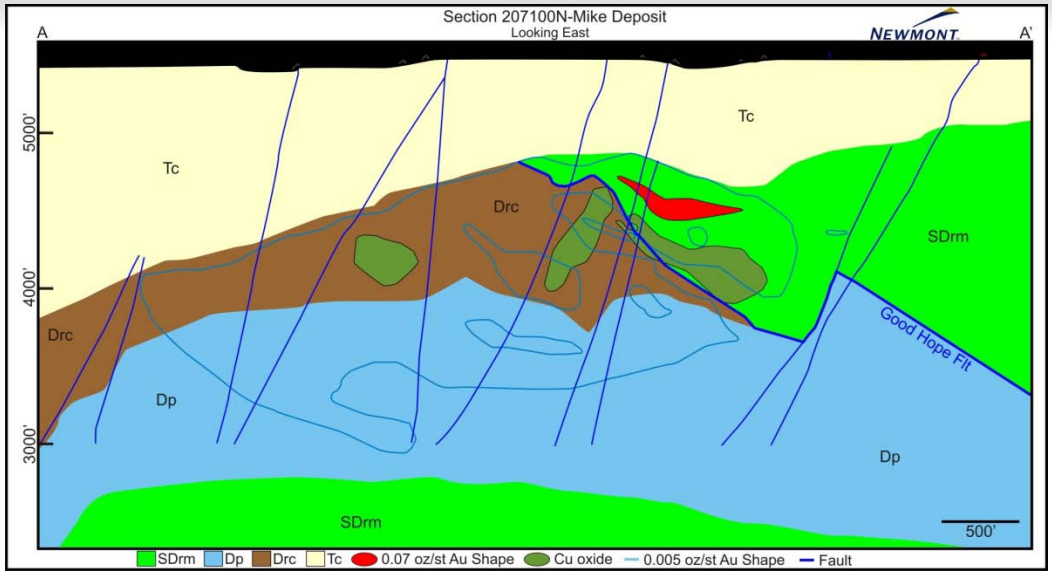

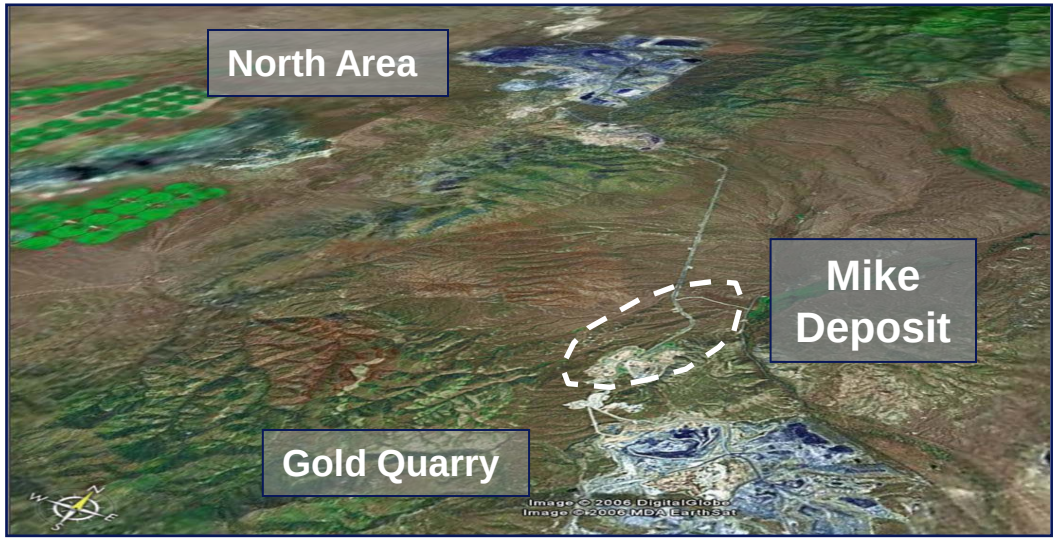

Gold project

Gold/copper or copper project

Newmont's Sleeping Giants
Early Stage Growth Opportunities in Nevada: Mike

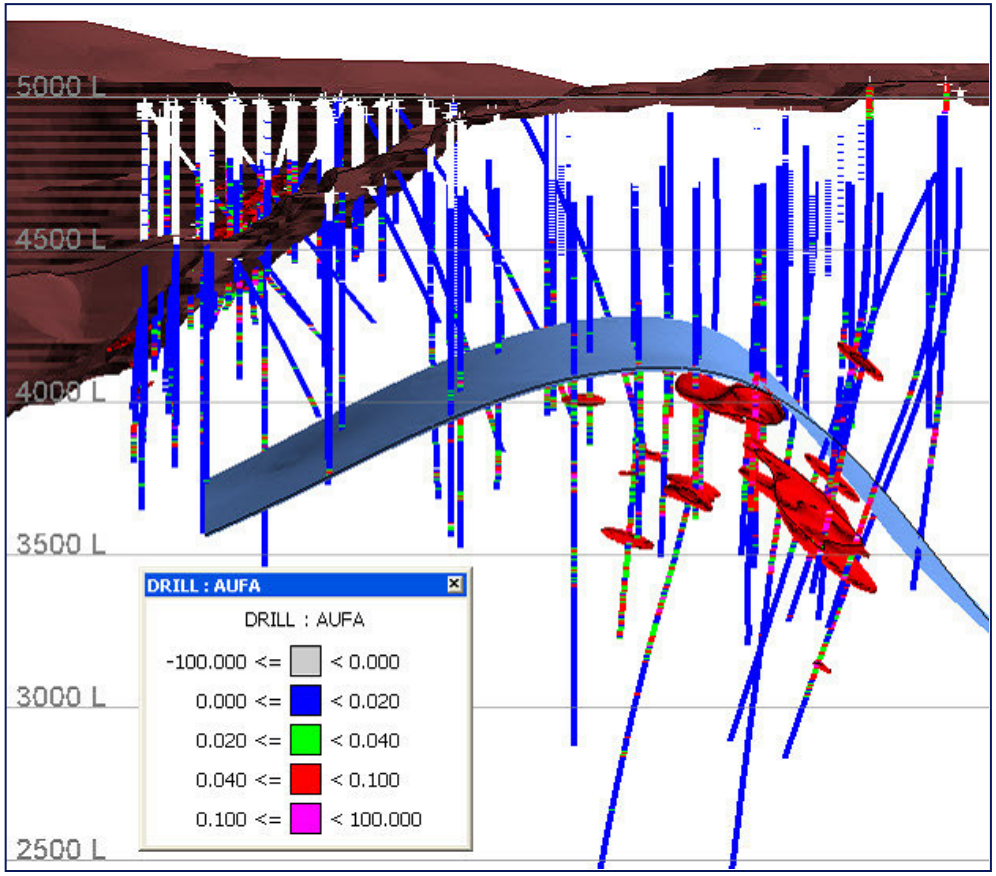

Mike Deposit Highlights:

- Prospective gold-copper-zinc deposit
- Located in the Carlin South area, northeast of Gold Quarry
- Drilling program to commence H2 2011
- Scoping study underway

Newmont's Sleeping Giants
Early Stage Growth Opportunities in Nevada: Fiberline

Fiberline Highlights:

- Deposit adjacent to and below Twin Creeks
- Extends life of Twin Creeks and leverages existing infrastructure
- Potential for combined open pit/underground operation
- Scoping study underway

Newmont's Sleeping Giants
Early Stage Growth Opportunities in Nevada: Copper Basin

Copper Basin Highlights:

- Stand alone ROM copper dump leach pad
- Potential to add significant copper reserves
- Scoping study underway
- Pre-Feasibility decision ~H2 2011

Newmont Potential: South America

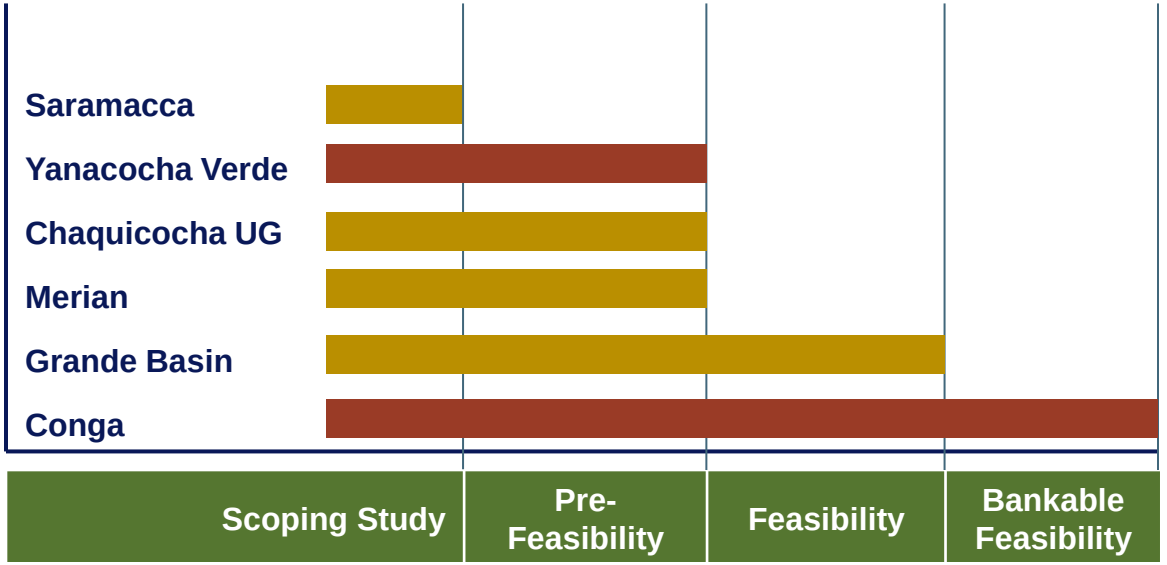

South America Highlights:

Conga

- Full funds approval 2011
- Drilling programs, project engineering and procurement of long lead items underway

Merian

- Successfully converted 1.8Moz into NRM[1]
- Minerals agreement being negotiated

Gold project

Gold/copper or copper project

[1]*None currently in reserves. For more information on NRM and reserves see slides 25-29.*

Conga

Potential for 15 – 20 Moz of Gold and 4 - 6 Blbs of Copper[1]

2011

- Complete 2010 Geotech Drilling Program
- 2011 Geotech Drilling program
- Award and mobilize Earthworks
- Start Sediment Control Structures
- Preparing for full funds approval
- Mining Permit Approval
- EIA 1st Modification
- Start Concentrator Construction program

[1]All figures based on a 100% equity interest; Newmont's current interest is 51.35% . Gold reserves and NRM are 11.8Moz and 3.1Moz respectively. Copper reserves and NRM are 3.2Blbs and 0.94 Blbs respectively. See slides 25-29 for more information.

Newmont Potential: Africa

Africa Highlights:

Akyem

- Full funds approval ~H1 2011
- Detailed engineering, procurement of equipment ongoing

Ahafo North

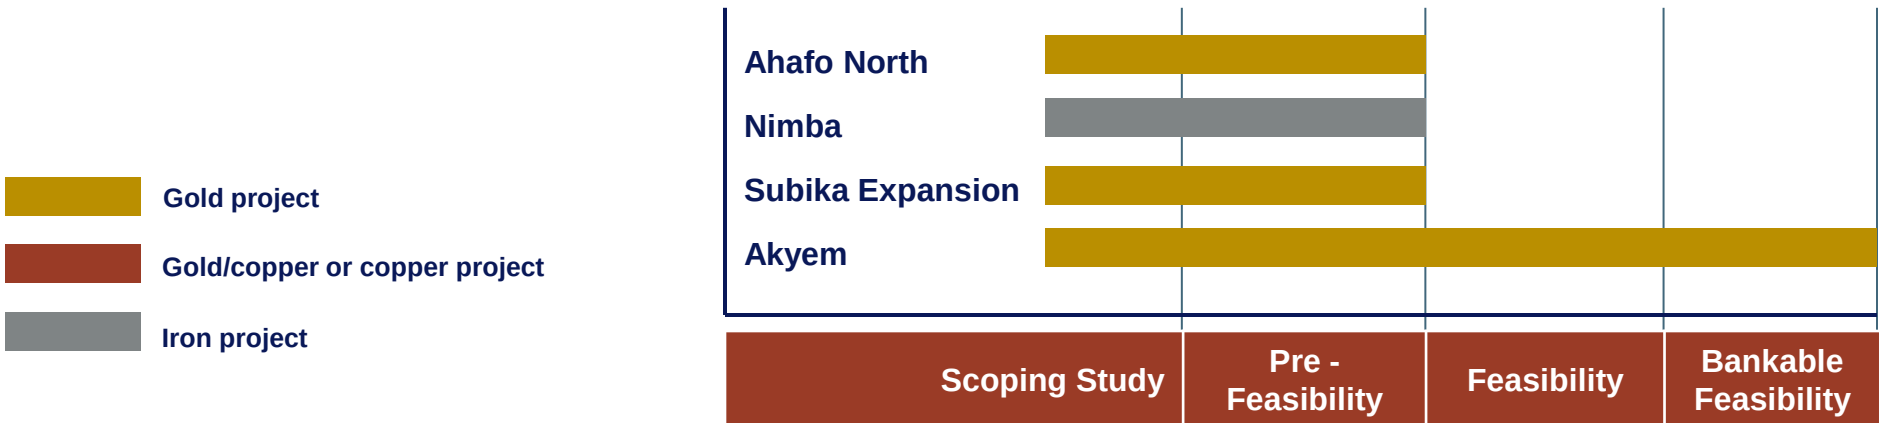

- ~30km drilling in 2011 to test UG and OP targets

Subika Expansion

- 2010 pit expansion converted ~1Moz to reserve

Nimba

- Negotiating transportation options

Akyem

Potential for 8 – 9 Moz of Gold[1]

2011

- Water Resources application submission/ approval
- Bankable feasibility review
- Bulk earthworks award
- Local apprentice program starts
- Complete Detailed Engineering
- EPC mobilizes to site
- General construction commences
- Preparing for full funds approval
- Start CIL soft raft foundation
- Start power line construction
- Start bulk earthworks
- General construction complete
- Complete bulk earthworks plant site

[1]Gold reserves and NRM are 7.8Moz and 0.4Moz respectively. See slides 25-29 for more information.

Newmont Potential: Asia Pacific

Asia Pacific Highlights:

Elang

- Exploration permit received 2010
- Scoping study reactivated
- Infrastructure development underway
- Exploration and definition drilling in ~H2 2011

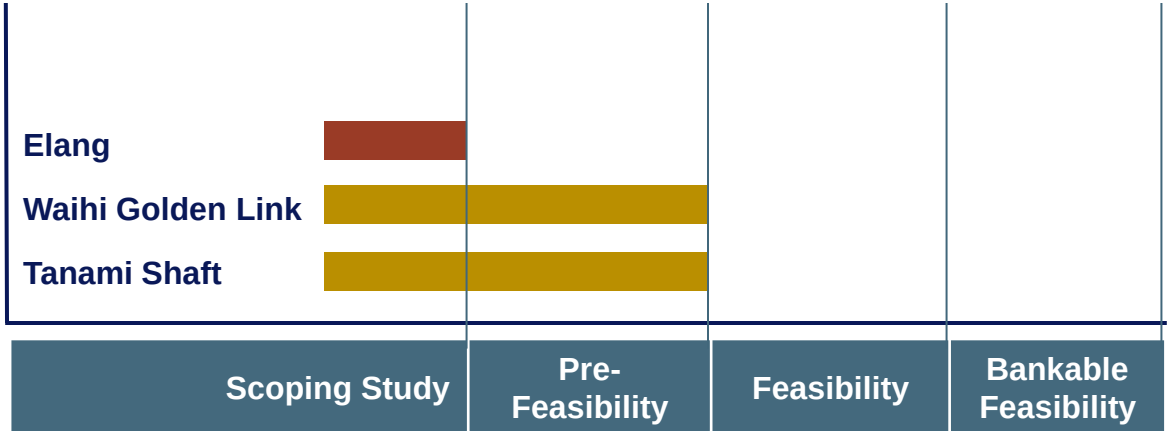

Tanami

- Auron ore body expansion

Gold project

Gold/copper or copper project

Iron project

Elang

Potential ~25Moz and ~16Blbs Copper/Gold Opportunity[1]

2011

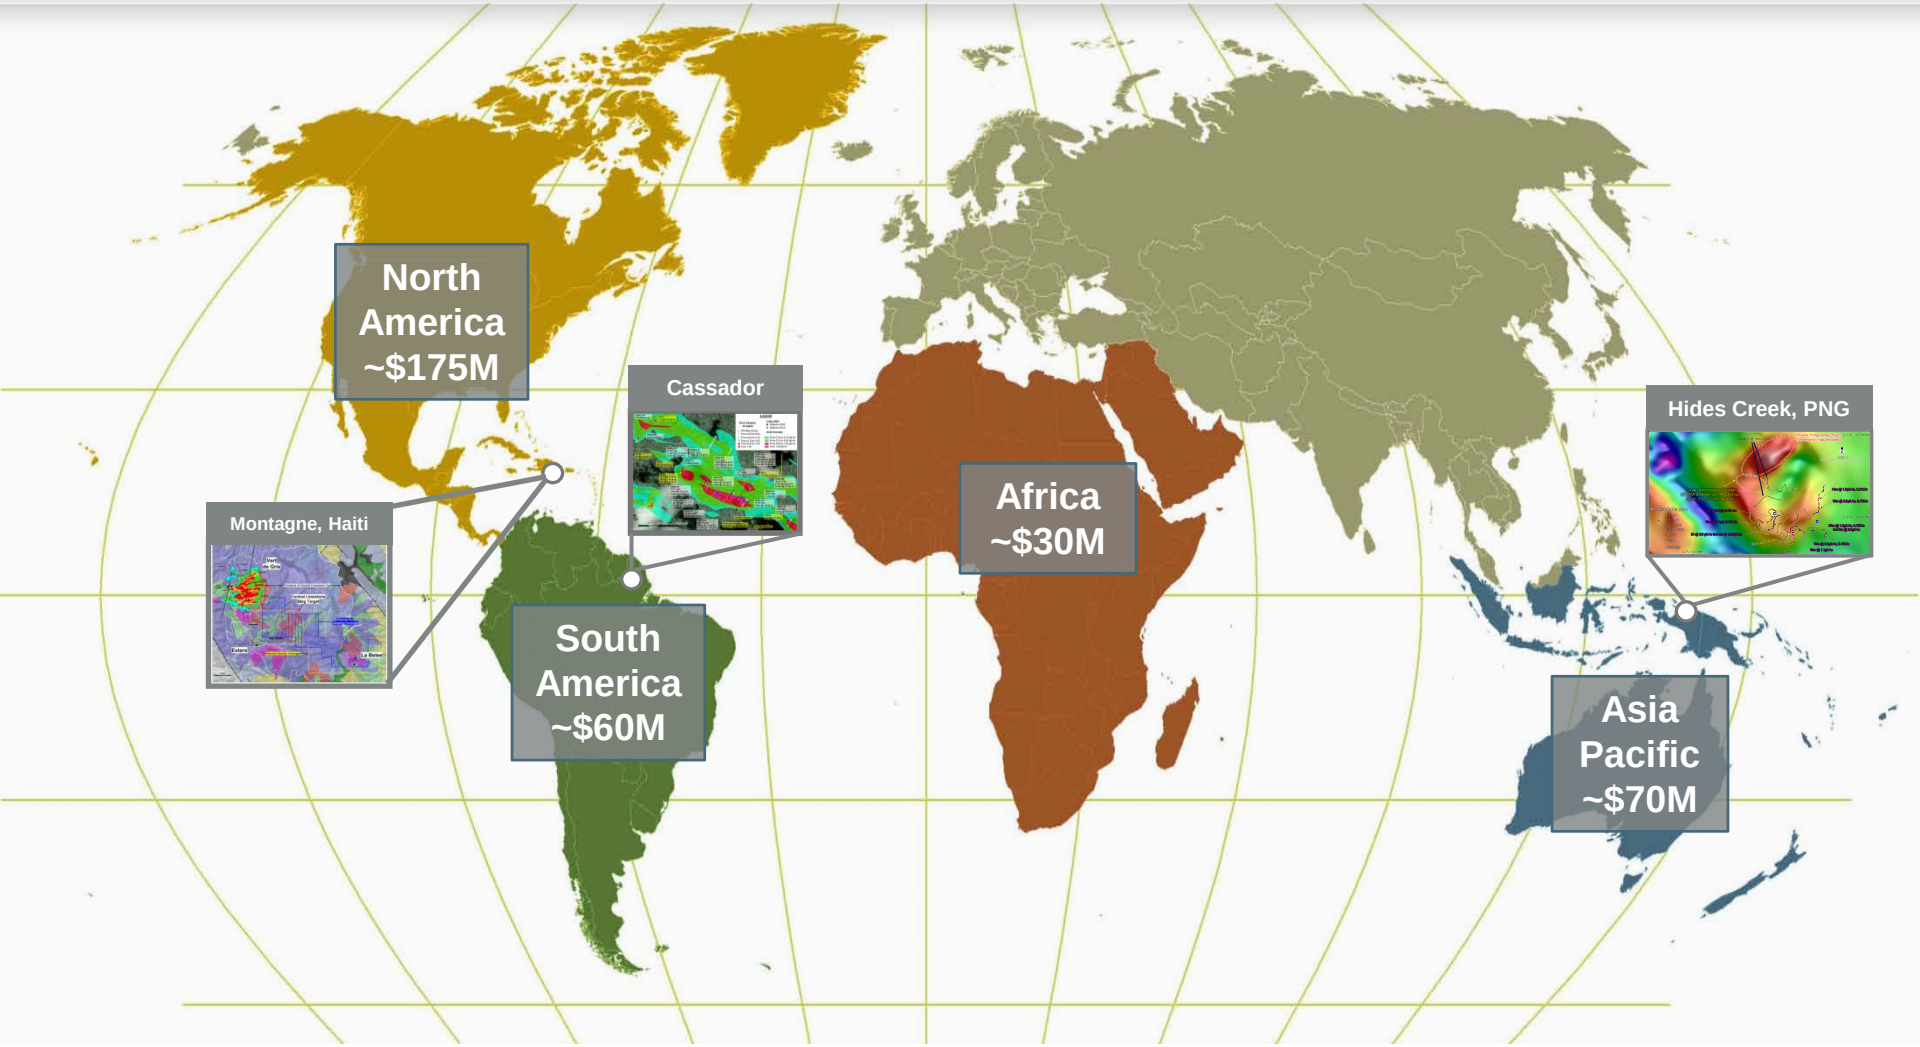

- Assemble Scoping study team
- Initiate Social Impact Assessment
- Environmental baseline testing
- Initiate permitting
- Rebuild staging and field camps
- Reestablish camp facilities/services
- Initiate contracts for consumables, labor and equipment
- Drill site preparations

[1] Estimates from AMEC Scoping Study, July 2010. Inputs and criteria used in the resource estimates at Elang were based on Batu Hijau data which is considered to be at a scoping study level of accuracy and detail when applied to Elang. The competent person responsible for the Elang resource estimates is Tomasz Postolski, P.Eng. Resource estimates are JORC, and not Industry Guide 7, compliant. The above resource figures are not ore reserves as defined by the SEC or JORC. See Cautionary Statement on page 23 for additional information.

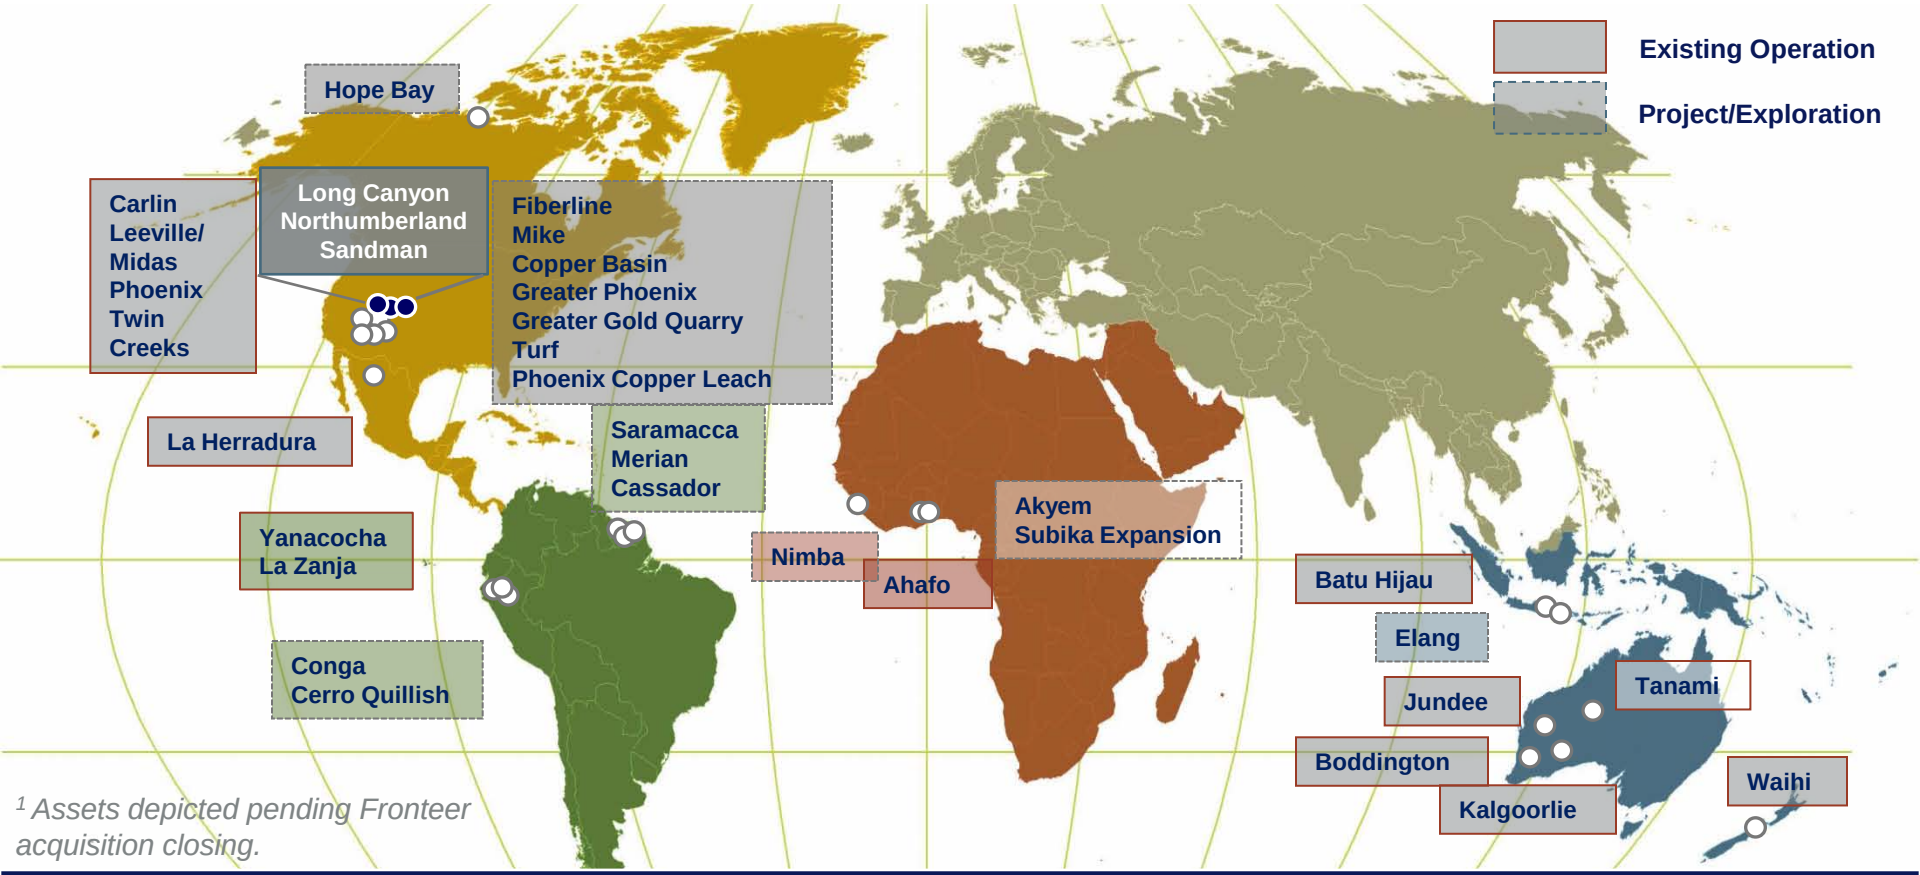

[2] No ounces or pounds currently in reserves or NRM. Additional exploration is required to determine whether Newmont will be able to define such a reserve or NRM.

2011 Generative Exploration and Near Mine Spend[1]
~44% Increase from 2010

[1]*Includes capital and expense. Not depicted is Corporate and Other spend of ~$30M.*

Expanding Our Global Portfolio[1]

[1] *Assets depicted pending Fronteer acquisition closing.*

Total Land Position of Approximately 27,000 Square Miles			
N.A. Land Position = 12,326 sq. m.	S.A. Land Position = 4,053 sq. m.	Africa Land Position = 3,023 sq. m.	APAC Land Position = 8,056 sq. m.

Appendix

Reconciliation - Adjusted Net Income to GAAP Net Income

Management of the Company uses the non-GAAP financial measure Adjusted net income to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income allows investors and analysts to compare the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals to similar operating results of other mining companies, by excluding exceptional or unusual items, income or loss from discontinued operations and the permanent impairment of assets, including marketable securities and goodwill. Management's determination of the components of Adjusted net income are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts.

The table below sets forth a reconciliation of adjusted net income to GAAP net income, the directly comparable GAAP financial measure.

	Three months ended December 31,		Years ended December 31,	
(in millions except per share, after-tax)	**2010**	**2009**	**2010**	**2009**
GAAP Net income (1)	**$ 812**	**$ 558**	**$ 2,277**	**$ 1,297**
Income tax planning and other, net	(264)	-	(391)	-
Net gain on asset sales	(4)	(14)	(39)	(16)
PTNNT community contribution	-	-	13	-
Impairment of assets	1	-	4	8
Boddington acquisition costs	-	-	-	44
Boddington contingent consideration	1	15	1	15
Loss from discontinued operations (1)	28	2	28	11
Adjusted net income	**$ 574**	**$ 561**	**$ 1,893**	**$ 1,359**
Adjusted net income per share, basic	**$ 1.16**	**$ 1.14**	**$ 3.85**	**$ 2.79**

(1) Attributable to Newmont stockholders.

Co-Product Costs Applicable to Sales to By-Product Costs Applicable to Sales

Sales and Costs applicable to sales for Boddington are presented in the Condensed Consolidated Financial Statements for both gold and copper due to the significant portion of copper production (approximately 15-20% of total sales based on the latest life-of-mine plan and metal price assumptions). The co-product method allocates costs applicable to sales to each metal based on specifically identifiable costs where applicable and on a relative proportion of sales values for other costs. Management also assesses the performance of the Boddington mine on a by-product basis due to the majority of sales being derived from gold and to determine contingent consideration payments to AngloGold. The by-product method deducts copper sales from costs applicable to sales as shown in the following table:

	Three months ended December 31, 2010		Twelve months ended December 31, 2010	
	Boddington	**Consolidated**	**Boddington**	**Consolidated**
($ millions)				
Co-product costs applicable to sales - gold	$ 117	$ 777	$ 400	$ 3,055
Less copper margin:				
Sales - copper	45	475	162	1,848
Costs applicable to sales - copper	(24)	(100)	(93)	(429)
Copper margin	21	375	69	1,419
By-product costs applicable to sales - gold	$ 96	$ 402	$ 331	$ 1,636
Costs applicable to sales - gold (per ounce)				
Co-product	$ 624	$ 512	$ 590	$ 485
By-product	$ 512	$ 265	$ 487	$ 260
Gold ounces sold (thousands)	187	1,518	679	6,296

Cautionary Statement Regarding 2011 Outlook

2011 Outlook projections contained in this presentation ("Outlook") are considered "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended which are intended to be covered by the safe harbor created by such sections and other applicable laws. Outlook represents management's good faith estimates or expectations of future results as of February 24, 2011 and is based upon certain assumptions. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates, being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. However, Outlook is subject to risks, uncertainties and other factors, including that such assumptions may prove to be incorrect and other factor referred to on slide, which could cause actual results to differ materially from Outlook. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook. Continued reliance on Outlook after the date it is first issued is at investors' own risk.

(1) Reserves are calculated at a gold price of US$950, A$1100, or NZ$1,350 per ounce unless otherwise noted. 2009 reserves were calculated at a gold price of US$800, A$1000, or NZ$1,200 per ounce unless otherwise noted. Tonnage amounts have been rounded to the nearest 100,000 unless they are less than 50,000, and gold ounces have been rounded to the nearest

(2) Includes undeveloped reserves at the Emigrant deposits for combined total undeveloped reserves of 1.2 million ounces.

(3) Also contains reserves of 2.8 million ounces of silver with a metallurgical recovery of 88%.

(4) Reserve estimates provided by Barrick, the operator of the Turquoise Ridge Joint Venture.

(5) In-process material is the material on leach pads at the end of each year from which gold remains to be recovered. In-process material reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater than 100,000.

(6) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans. Stockpile reserves are reported separately where tonnage or contained ounces are greater than 5% of the total site-reported reserves and contained ounces are greater

(7) Includes undeveloped reserves at Noche Buena totaling 0.3 million attributable ounces.

(8) Deposit is currently undeveloped.

(9) Reserves include the currently undeveloped deposit at La Quinua Sur, which contains reserves of 0.8 million attributable ounces.

(10) Reserves estimates were provided by Buenaventura, the operator of the La Zanja project.

(11) Percentage reflects Newmont's economic interest at December 31, 2010. In April 2010 our economic interest decreased from 52.44% to 48.50% as a result of the divestiture required under the Contract of Work

(12) Reserve estimates provided by Regis Resources Ltd, in which Newmont holds a 16.2% interest.

(13) Includes undeveloped reserves at Yamfo South, Yamfo Central, Techire West, Subenso South, Subenso North, Yamfo Northeast, and Susuan totaling 3.2 million ounces.

(14) Deposit is undeveloped.

(1) Reserves are calculated at US$2.50 or A$2.95 per pound copper price unless otherwise noted. 2009 reserves were calculated at US$2.00 or A$2.40 per pound copper price unless otherwise noted. Tonnage amounts have been rounded to the nearest 100,000 and pounds have been rounded to the nearest 10 million.

(2) Project is undeveloped. Leach reserves are within Phoenix Reserve Pit.

(3) Deposit is undeveloped. Reserve estimates will be recalculated in 2011 upon completion of Feasibility Study Update.

(4) Percentage reflects Newmont's economic interest at December 31, 2010. In April 2010 our economic interest decreased from 52.44% to 48.50% as a result of the divestiture required under the Contract of Work.

(5) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material. Stockpiles increase or decrease depending on current mine plans. Stockpiles are reported separately where tonnage or contained metal are greater than 5% of the total site reported reserves.

(6) Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

(1) Mineralized material is reported exclusive of reserves.

(2) Mineralized material calculated at a copper price of US$3.00 or A$3.50 per pound unless otherwise noted. 2009 mineralized material was calculated at a copper price of US$2.50 or A$3.00 per pound. Tonnage amounts have been rounded to the nearest 100,000.

(3) Percentage reflects Newmont's economic interest at December 31, 2010. In April 2010 our economic interest decreased from 52.44% to 48.50% as a result of the divestiture required under the Contract of Work.

Non-Reserve Mineralization Definitions Supplemental Information (continued)

Defined terms and Statement Regarding Reserves and NRM:
Ian Douglas, Newmont's Group Executive of Reserves and Geostatistics, is the qualified person responsible for the preparation of the reserve and NRM estimates in this presentation. The reserves disclosed in this presentation have been prepared in compliance with Industry Guide 7 published by the SEC. Investors are encouraged to read the footnotes to the tables included on slides 26-28, as well as the definitions and cautionary statements included herein.

As used in this presentation, the term "reserve" means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term "economically," as used in this definition, means that profitable extraction or production has been established or analytically demonstrated in a full feasibility study to be viable and justifiable under reasonable investment and market assumptions. The term "legally," as used in this definition, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Newmont must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Newmont's current mine plans. Reserves in this presentation may be aggregated from the Proven and Probable classes.

As used in this presentation, the term "non-reserve mineralization" or "NRM" refers to Measured, Indicated and/or Inferred materials, which are exclusive of reserves. Newmont has determined that such NRM would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration and defined as Resources. Estimates of NRM and potential are subject to further exploration and development, are subject to additional risks, and no assurance can be given that they will eventually convert to future mineral reserves of the Company. In addition, our current or future reserves and exploration and development projects may not result in new mineral producing operations. Even if significant mineralization is discovered and converted to reserves, it will likely take many years from the initial phases of exploration to development and ultimately to production, during which time the economic feasibility of production may change.

The term "potential" or "potential resource" refers to the aggregate of potential ore-grade material, including Proven and Probable reserves, Measured, Indicated and Inferred non-reserve mineralization, in addition to other potential ore-grade materials that have less certainty of conversion to reserves

Additionally, references to "attributable ounces," "attributable pounds" and "attributable mineralization" in this presentation are intended to mean that portion of gold or copper produced, sold or included in Proven and Probable reserves or NRM that is attributable to our ownership or economic interest.

For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineralized material, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see Newmont's most recent Annual Report on Form 10-K, filed on February 24, 2011, and other SEC filings.
