African Mining INDABA 2012

John Seaberg, Vice President, Investor Relations

February 8, 2012

Cautionary Statement

Cautionary Statement Regarding 2011 Preliminary Results and Operating Highlights:

We caution you that, whether or not expressly stated, all measures of the Company's fourth quarter and 2011 financial results and condition contained in this news release, including production, sales, average realized price, costs applicable to sales and capital expenditures, are preliminary and reflect our expected 2011 results as of the date of this news release. Actual reported fourth quarter and 2011 results are subject to management's final review as well as audit by the Company's independent registered accounting firm and may vary significantly from those expectations because of a number of factors, including, without limitation, additional or revised information and changes in accounting standards or policies or in how those standards are applied. For a discussion of factors that may adversely affect our financial results and condition, see the Company's 2010 Annual Report on Form 10-K, filed on February 24, 2011, with the Securities and Exchange Commission ("SEC"), as well as the Company's other SEC filings, available on the SEC's website at www.sec.gov. The Company will provide additional discussion and analysis and other important information about its fourth quarter and 2011 financial results and condition when it reports actual results on February 24, 2012.

Cautionary Statement Regarding Forward Looking Statements, Including 2012 Outlook and 2017 Goals and Growth Plan:

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by those sections and other applicable laws. Those forward-looking statements include (without limitation) estimates and expectations of, and statements regarding: (i) the Company's strategy, outlook and plans; (ii) future equity gold and equity copper production; (iii) future operating, sales and other costs; (iv) future capital expenditures; (v) project returns; (vi) project start dates, ramp up, life, pipeline timelines, including commencement of mining, drilling and stage gate advancement and expansion opportunities; (vii) potential ounces or tons of reserves, NRM and potential resources; (viii) exploration pipeline, potential or upside, opportunities, growth and growth potential; (ix) dividend payments and increases; (x) future liquidity, cash and balance sheet expectancy; and (xi) other financial outlook for the Company's operations and projects including without limitation, Ahafo and Akyem. Those forward-looking statements include (without limitation) statements that use forward-looking terminology such as "may", "will", "expect", "predict", "anticipate", "believe", "continue", "potential", "target", "goal", "opportunity", "outlook", or the negative or other variations of those terms or comparable terminology. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Those assumptions include (without limitation): (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company conducts business being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as the other exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels and such supplies otherwise being available on bases consistent with the Company's current expectations; and (vii) the accuracy of our current mineral reserve and mineral resource estimates and exploration information. Where the Company expresses or implies an expectation or belief as to future events or results, that expectation or belief is expressed in good faith and is believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements". Those risks, uncertainties and other factors include (without limitation): (i) gold and other metals price volatility; (ii) currency fluctuations; (iii) increased capital and operating costs, and scarcity of and competition for required labor and supplies; (iv) variances in ore grade or recovery rates from those assumed in mining plans; (v) operating or technical difficulties; (vi) political and operational risks; (vii) community relations, conflict resolution and outcome of projects or oppositions; and (viii) governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company's 2010 Annual Report on Form 10-K, filed on February 24, 2011, as well as the Company's other SEC filings. These forward-looking statements are not guarantees of future performance, given that they involve risks and uncertainties. The Company does not undertake any obligation to release publicly revisions to any forward-looking statement except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued forward-looking statement constitutes a reaffirmation of that statement. Continued reliance on forward-looking statements is at investors' own risk. In addition, some of the statements in this presentation are based on assumptions or methodologies (such as commodity prices) or subject to cautionary statements that are discussed in the notes found at the end of this presentation.

Building on Strong Operating Performance

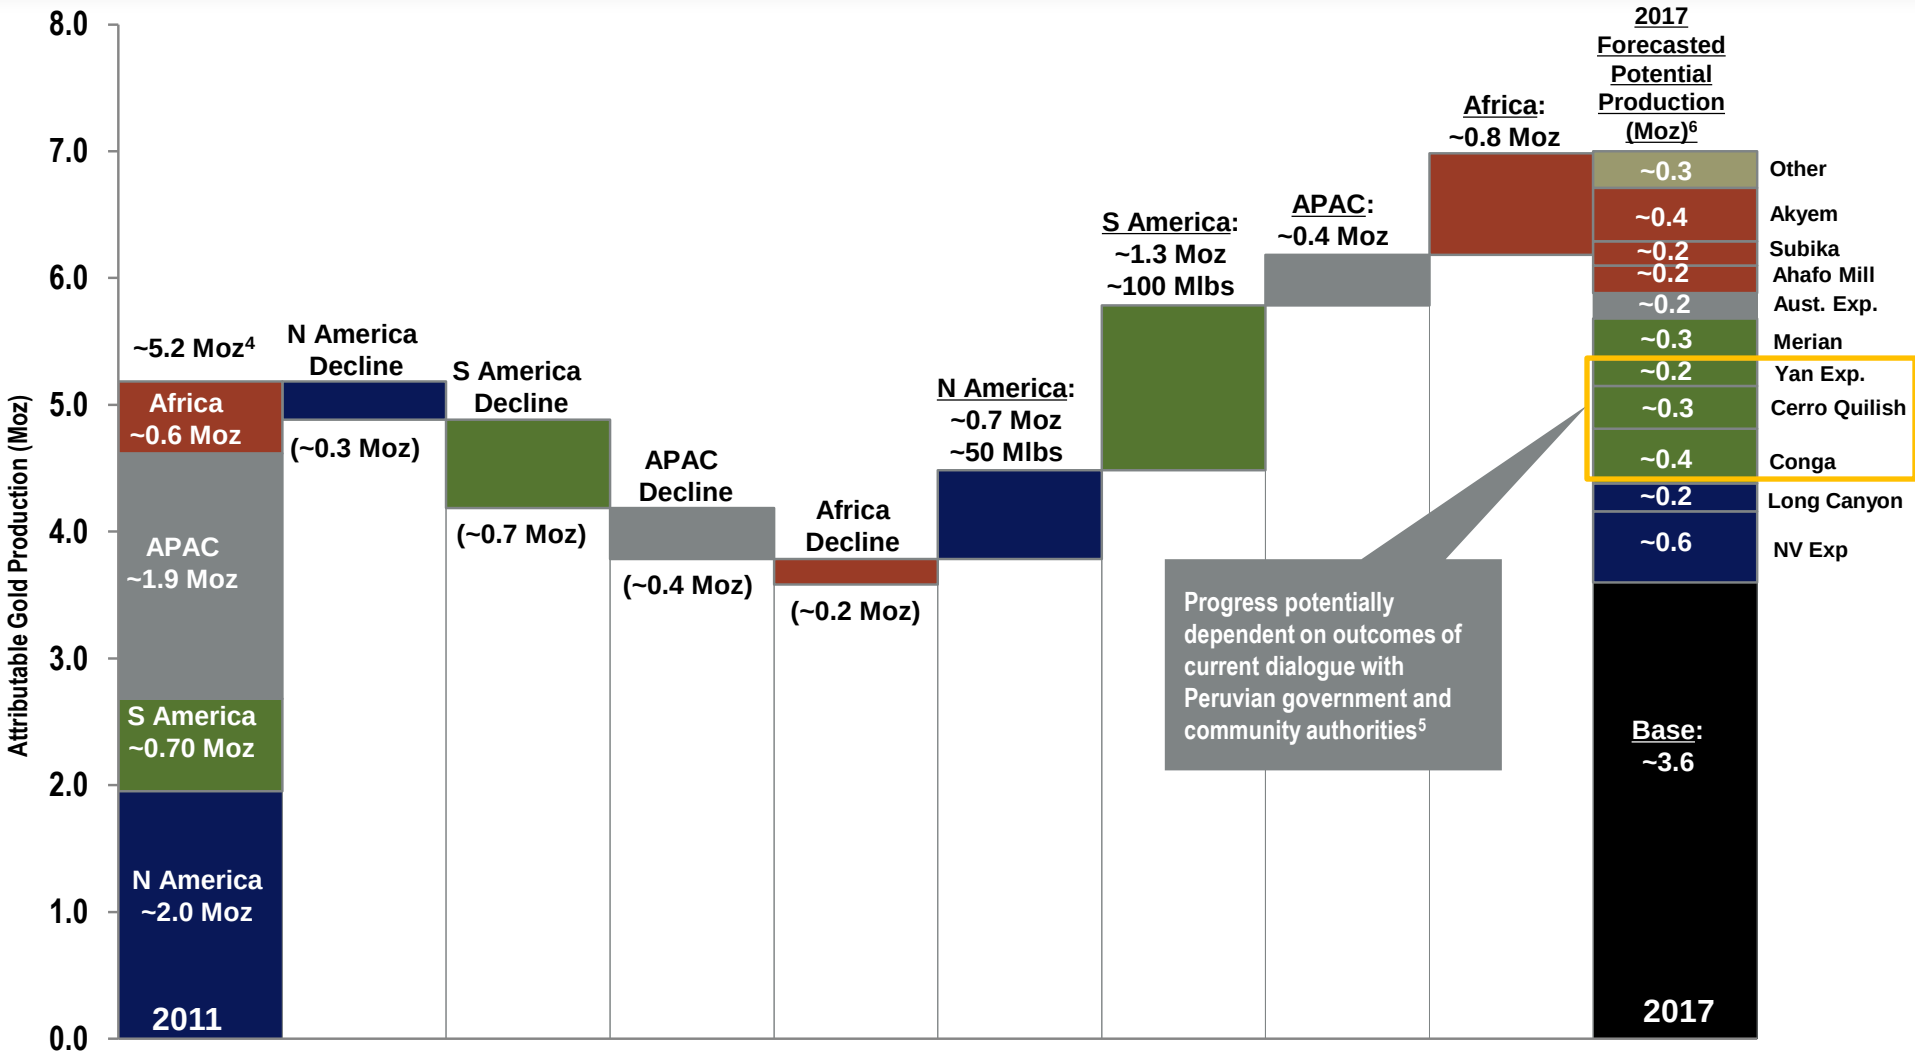

Compelling Combination of Growth, Returns and Exploration Upside

Growth	• Gold production growth potential to ~7 Moz by 2017 (~35%)[1] • Copper production to double over same period to 400 Mlbs
Project Returns	• Competitive returns across the pipeline
Exploration Upside	• Potential to add equivalent of current Au and Cu reserves (93.5 Moz gold and 9.4 Blbs copper) over the next decade[2]
Balance Sheet Strength	• Substantial liquidity and operating cash flow to fund growth and return capital to shareholders
Gold Price-Linked Dividend[3]	• Industry leading dividend yield • Dividend enhanced to increase payout at higher gold prices

End Notes for this presentation begin on slide 22

Newmont

2011-2017 Attributable Projected Pipeline Growth, Net of Decline

2012 Outlook and 2011 Preliminary Operating Results

Outlook Highlights	2011 Outlook	2011 Actual[8]	2012 Outlook[9]
Attributable Gold Production (Moz)	5.1 – 5.3	5.2	5.0 – 5.2
Consolidated Gold CAS ($/oz)	$560 – $590	$592	$625 – $675
Attributable Copper Production (Mlbs)	190 – 220	206	150 – 170
Consolidated Copper CAS ($/lb)	$1.25 – $1.50	$1.26	$1.80 – $2.20
Capital Expenditures[7] ($M)	$2,700 – $3,300	$2,963	$3,000 – $3,300

Preliminary Operating Results

- Q4'11 gold production of 1.3Moz at $606/oz
- Q4'11 copper production of 48Mlbs at $1.58/lb
- 2011 average realized gold and copper price of $1,563/oz and $3.54/lb,
- Q4'11 average realized gold and copper price of $1,670 and $3.41/lb
  - Translates to an expected quarterly dividend payment of $0.35/sh in March 2012[10]

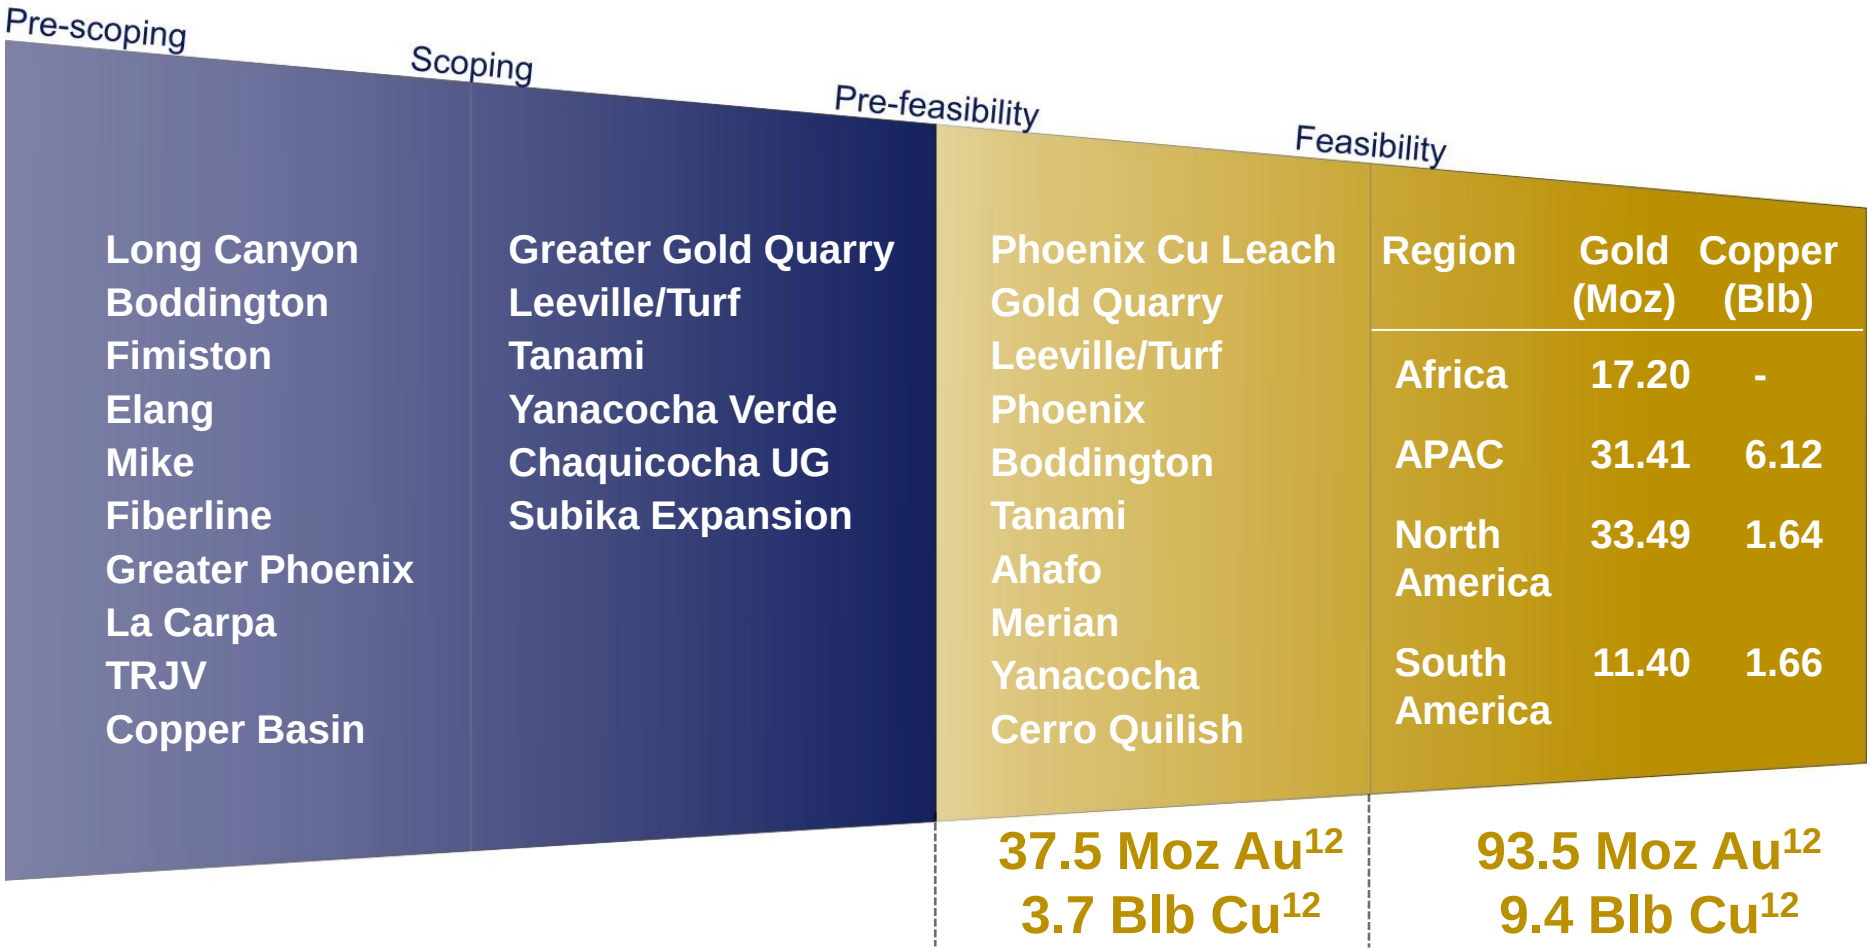

Exploration Upside

Strong Pipeline to Support the Reserve Base in the Growth Plan

Potential to add more than equivalent of current Gold and Copper reserves over the next decade

Non Reserve Mineralization[11]

Reserves

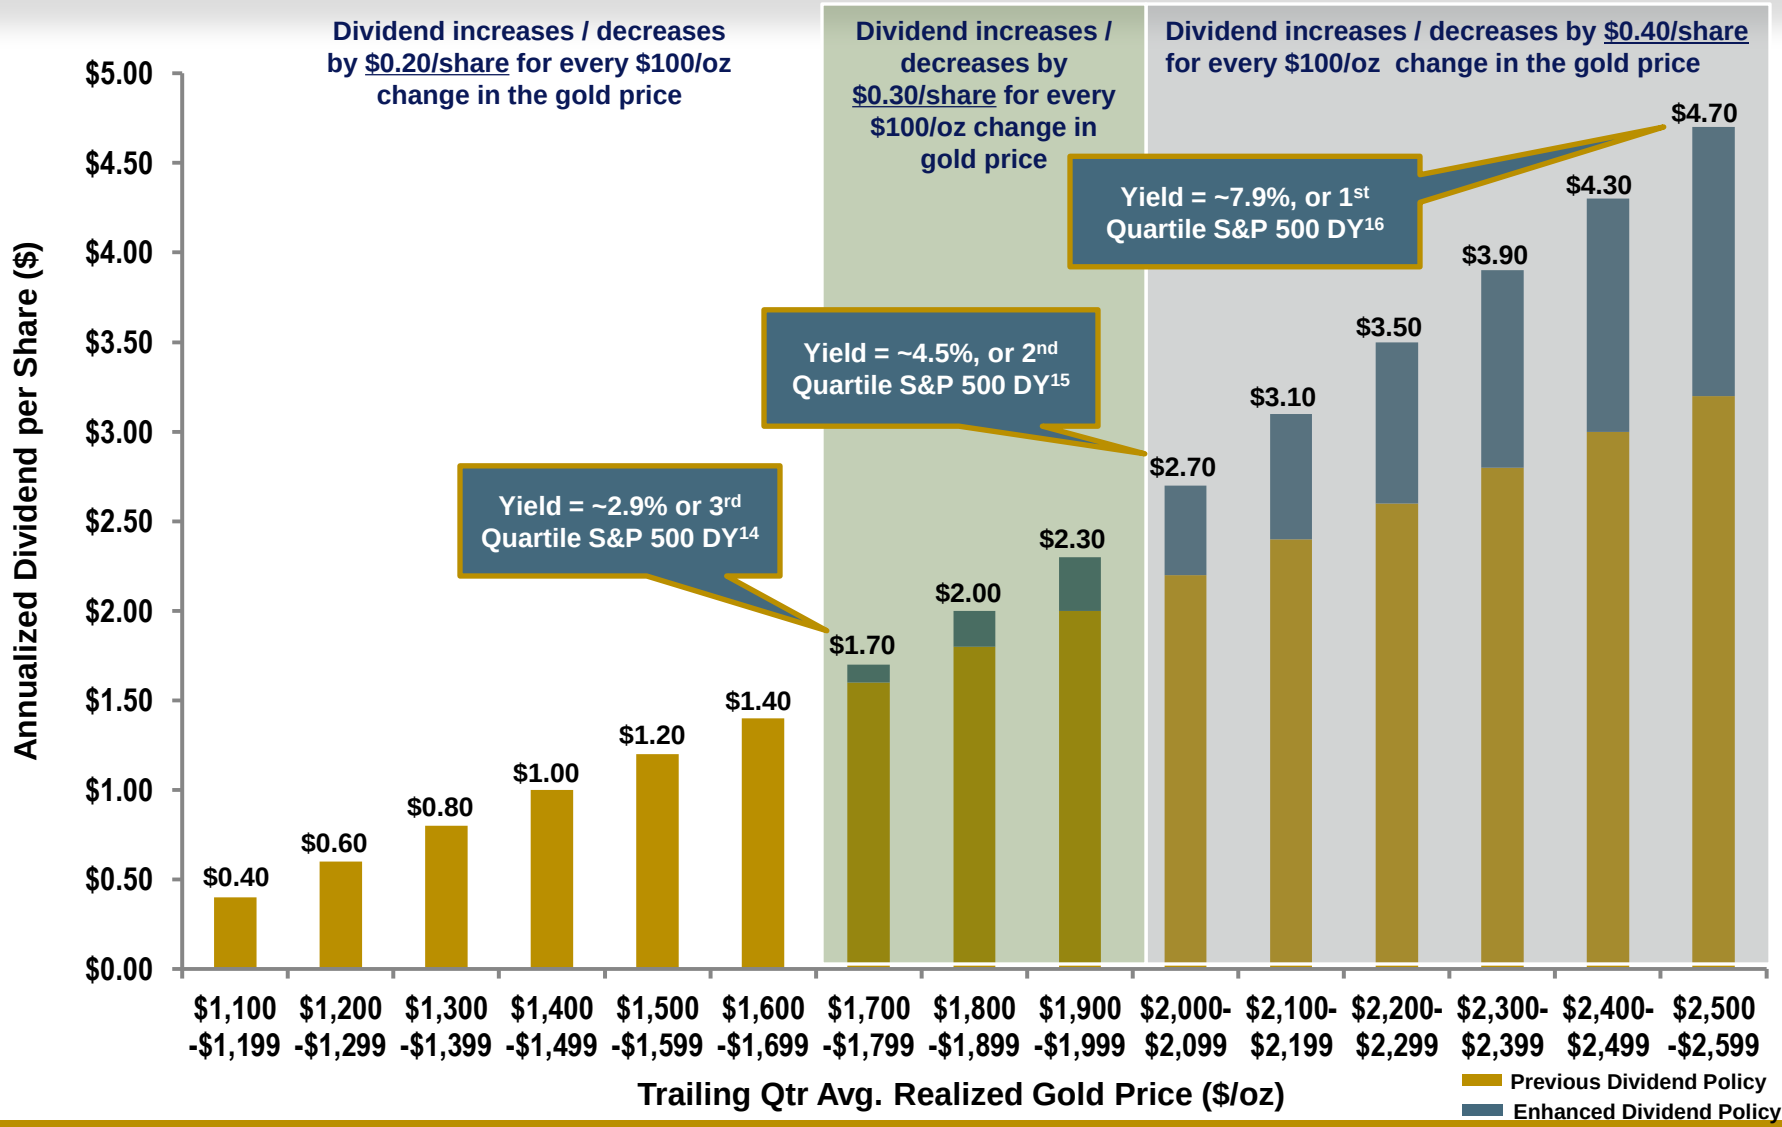

Region	Gold (Moz)	Copper (Blb)
Africa	17.20	-
APAC	31.41	6.12
North America	33.49	1.64
South America	11.40	1.66

37.5 Moz Au[12]
3.7 Blb Cu[12]

93.5 Moz Au[12]
9.4 Blb Cu[12]

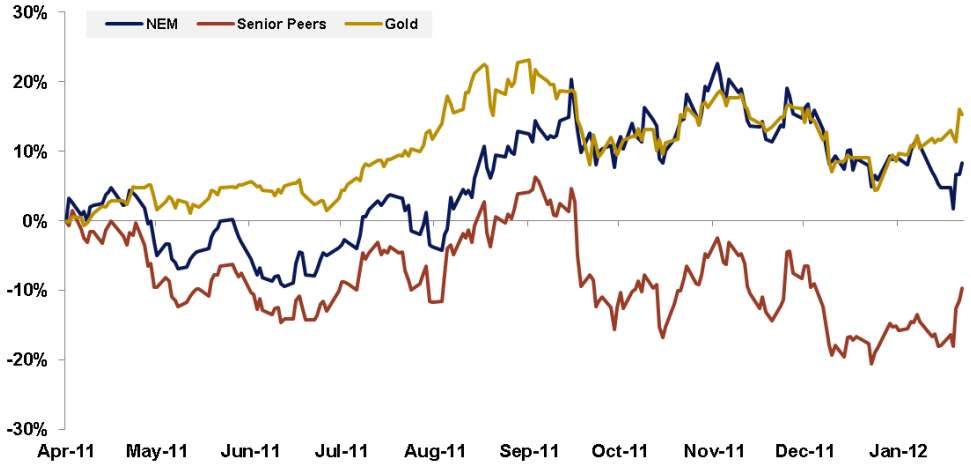

Gold Price-Linked Dividend[13]

Committed to Returning Capital to Shareholders

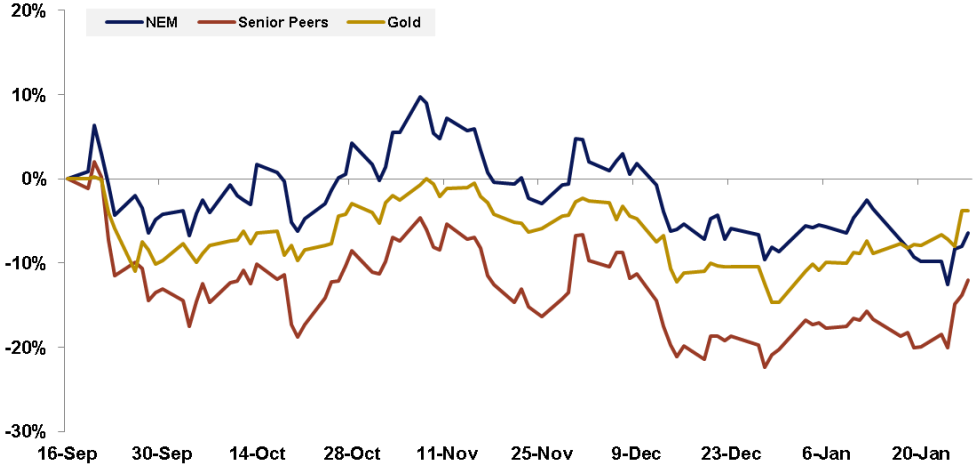

Leadership
Committed to Total Shareholder Returns

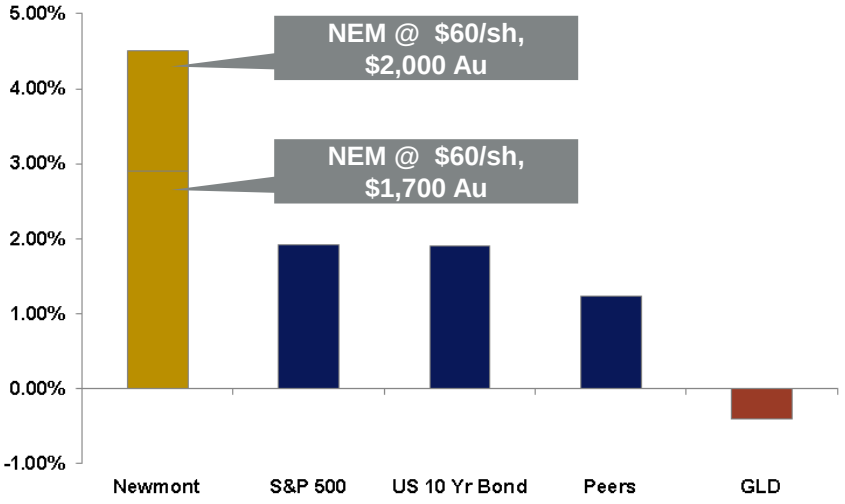

Newmont vs. Peers and Gold, April 7, 2011 – Present[17]

Newmont vs. Peers and Gold, Sept 19, 2011 – Present[17]

NEM Yield vs. Peers, US 10 Year Bond and S&P 500[18]

- Newmont paid a $0.35/share dividend in Q4'11, vs. a peer average dividend of ~$0.11/share[19]
- In absolute terms, Newmont paid ~$170M in dividends in Q4'11, vs. a peer average of ~$90M[20]

Africa Region

2011 Preliminary Results and 2012 Outlook[21]

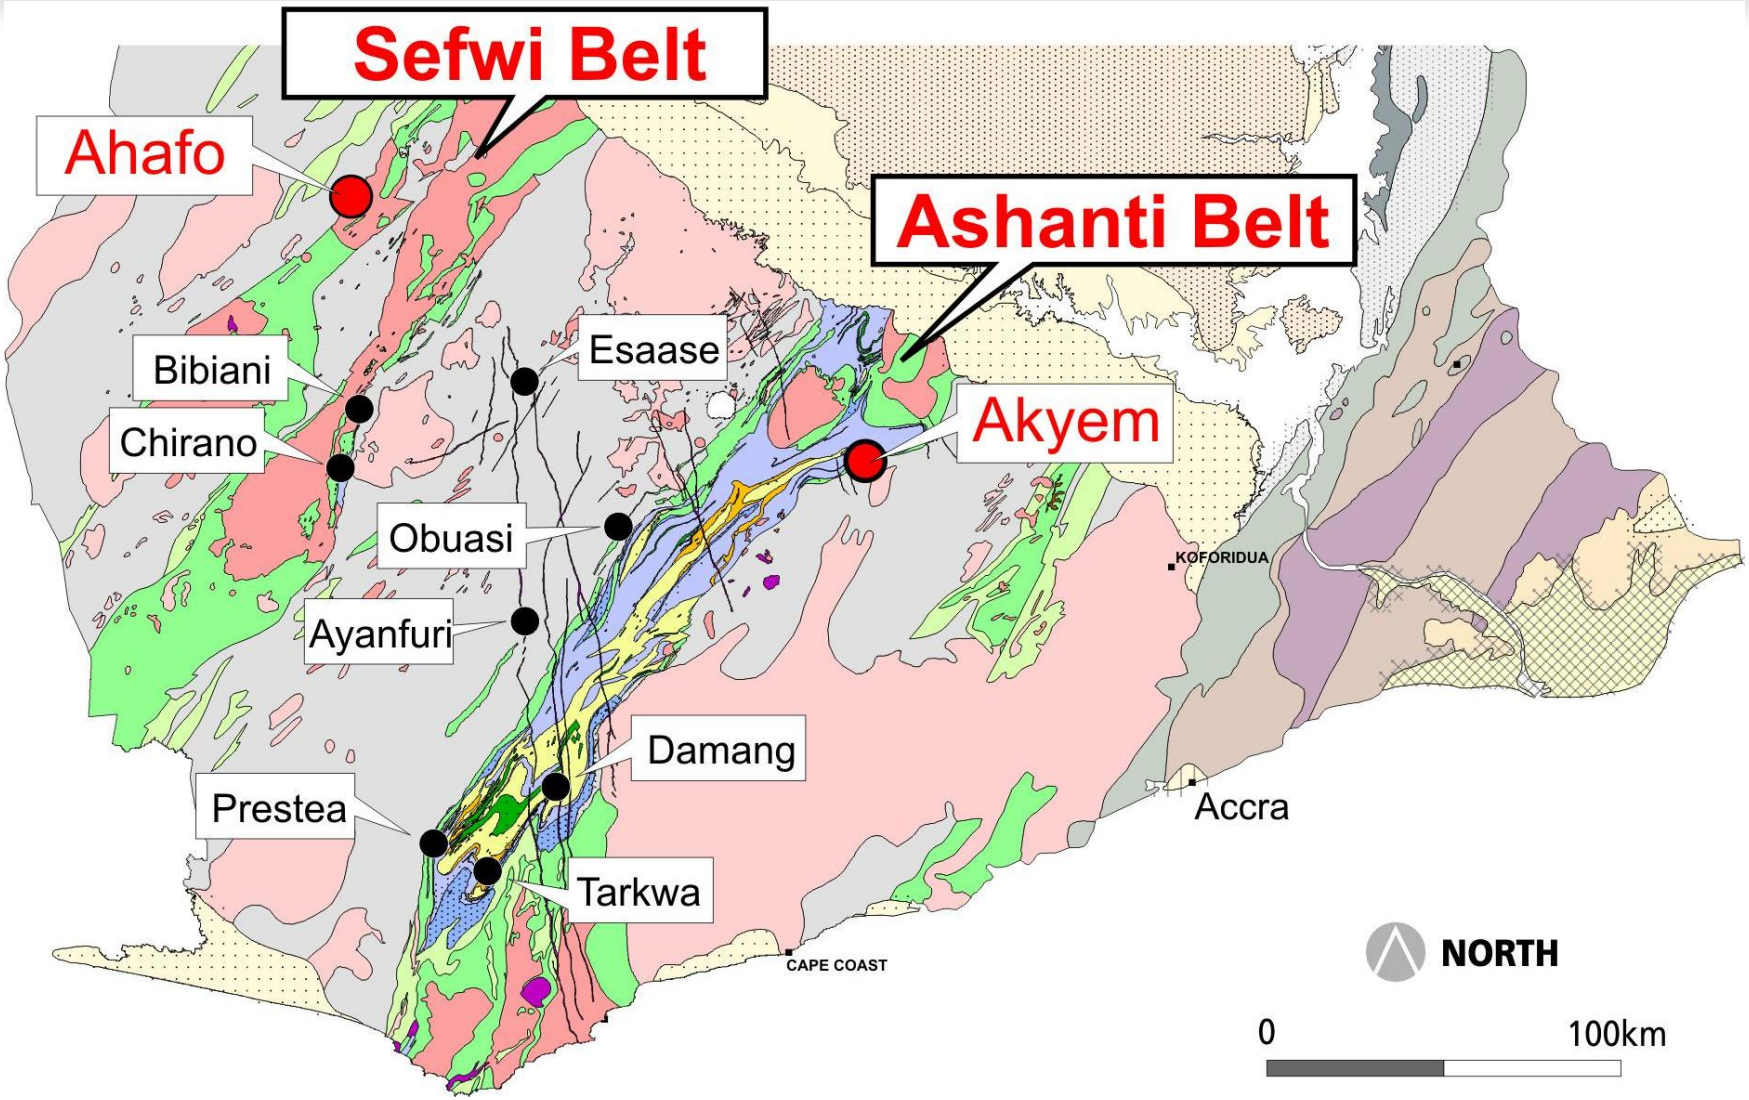

Key Statistics	
Ahafo Gold Reserves (Moz)	10.0
Ahafo Reserve Grade (gpt)	2.1
Akyem Gold Reserves (Moz)	7.2
Akyem Reserve Grade (gpt)	1.8
Africa Gold Reserves (Moz)	**17.2**
Africa Reserve Grade (gpt)	**2.0**

Reserves as of December 31, 2010

	2010 Actual	2011 Preliminary Results	Change	2012 Outlook
Ahafo Attributable Gold Production (Koz)	545	566	+ 4%	570 - 600
Ahafo Gold Consolidated CAS ($/oz)	$450	$474	+ 5%	$500 - $550
Ahafo Consolidated CapEx ($M)	$109	$116	+ 7%	$240 - $270
Akyem Capital Expenditures[22] ($M)	$70	$248	+ 254%	$370 - $420

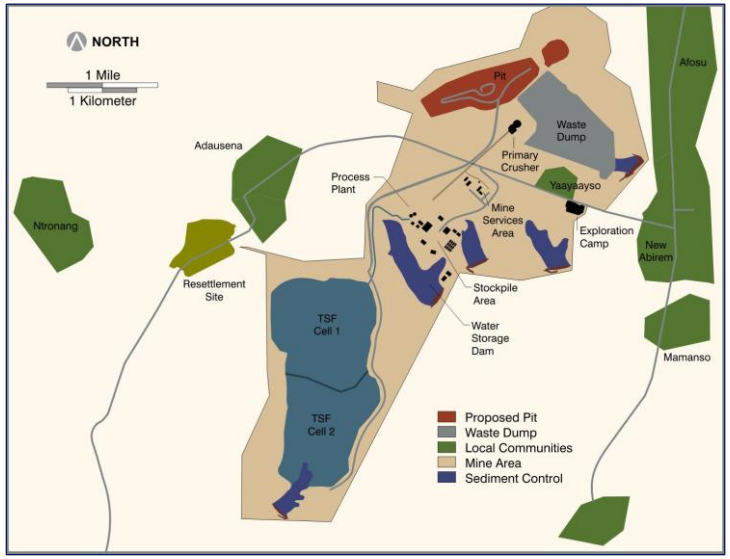

Ghana

Newmont Strategically Located on Main Gold Belts

Africa
Akyem

Africa
Akyem

Project Description

A project that doubles Ghanaian gold production and offers future upside exploration upside

Key Statistics Estimates
(Attributable to NEM)

Annual Production (Koz)[23]:	350 - 450 Koz
CAS ($/oz)[23]:	$450 - $550
Anticipated Start Date:	~2013 - 2014
Initial Capex ($B):	$0.9 - $1.1

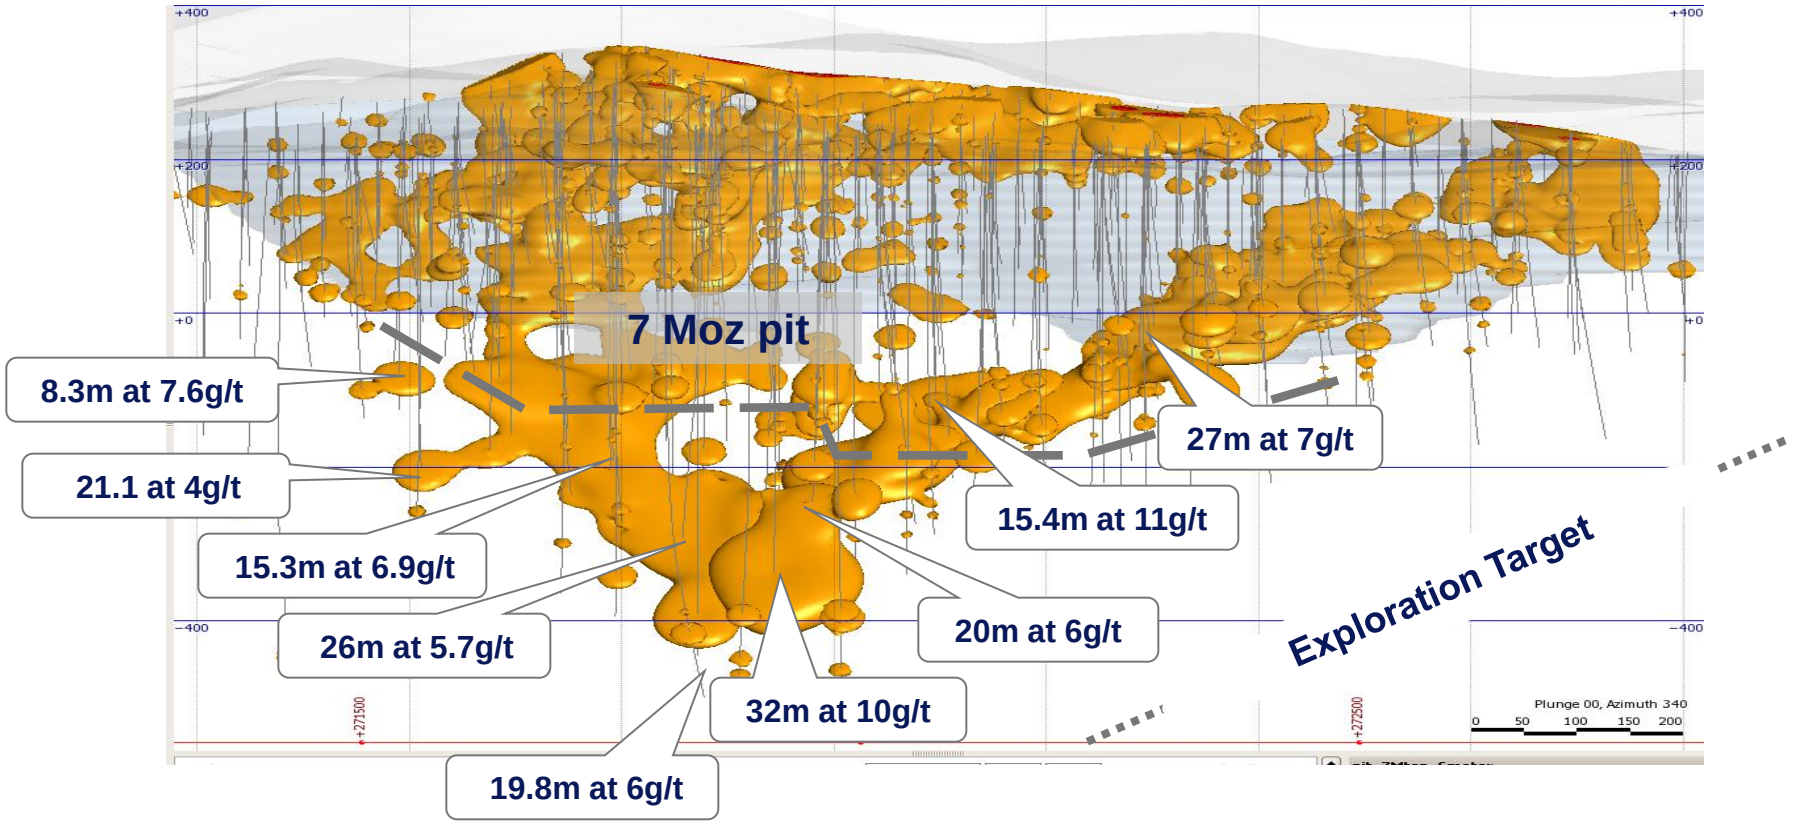

Current Status

- H2 2011: Mechanical (CIL Tanks) & concrete work associated with the primary crusher and mill foundations commenced
- H2 2012: Construction progress > 50%
- H2 2012: Mining activities commence

Significant Underground Potential

- Exploring for parallel structures and district targets
- Preliminary modeling and evaluation of deep resource

Africa

Ahafo Mill Expansion

Project Description

A project that increases Ahafo gold production through expansion of existing mill facilities

Key Statistics Estimates

- Mill expansion could increase capacity by 50% (from 7.5 to ~12.5 Mtpa 1st Phase)
- Adds flexibility to current operations

Current Status

- Evaluating optimum increase in mill throughput and the ability to process multiple ore blends
- H2 2012: Advance scoping and pre-feasibility studies

Africa
Subika Underground

Project Description

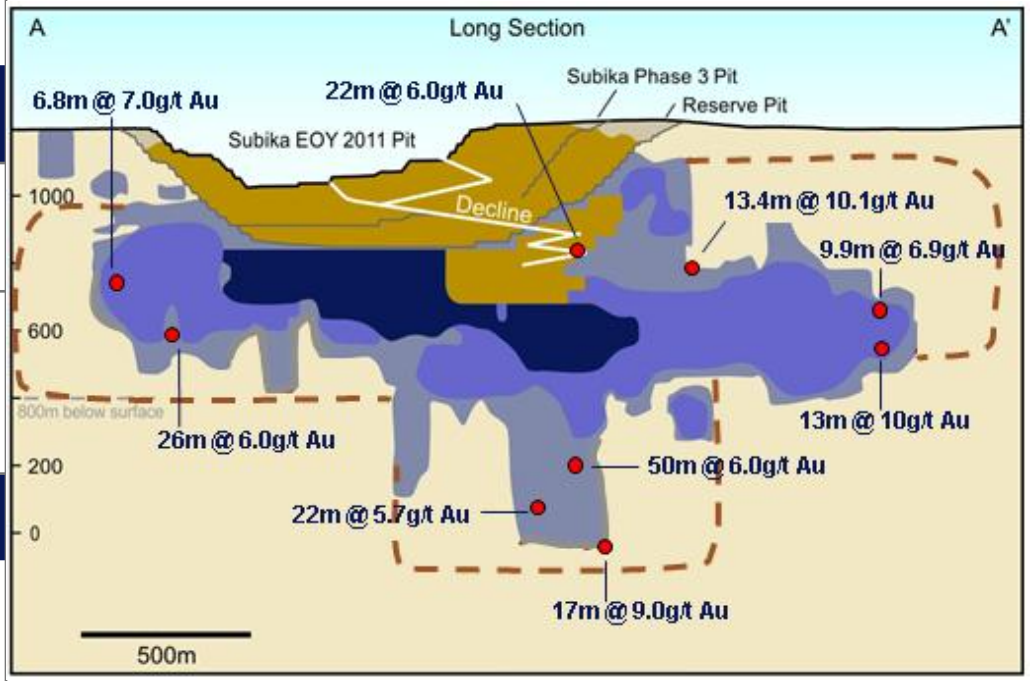

A project that extends Ahafo's operating life and provides a stepping stone to other potential underground projects in Ghana

Key Statistics Estimates

- Current resource of approximately 5Moz
- Advanced development project, planned production of 2Mtpa, yielding 250-300koz gold by 2017

Current Status

- Test stoping, infrastructure development and diamond drilling on-going on site

Ahafo North
Optimizing Wingspan

Project Description

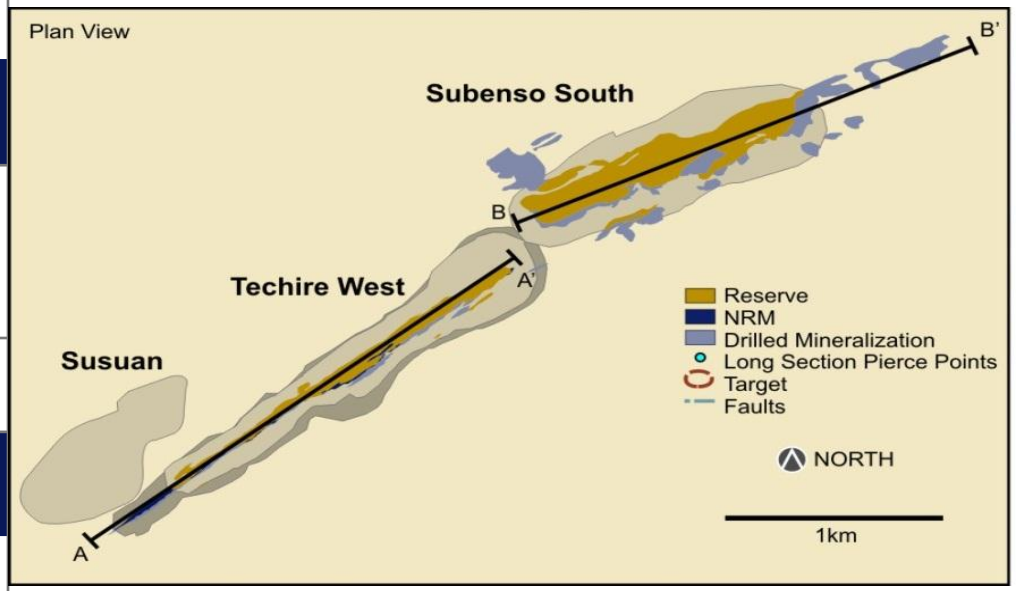

A longer term project that could provide a significant contribution to long term regional production

Key Statistics Estimates

- Currently 3.2Moz of gold reserves concentrated in three core, contiguous deposits
- Potential to significantly expand NRM

Current Status

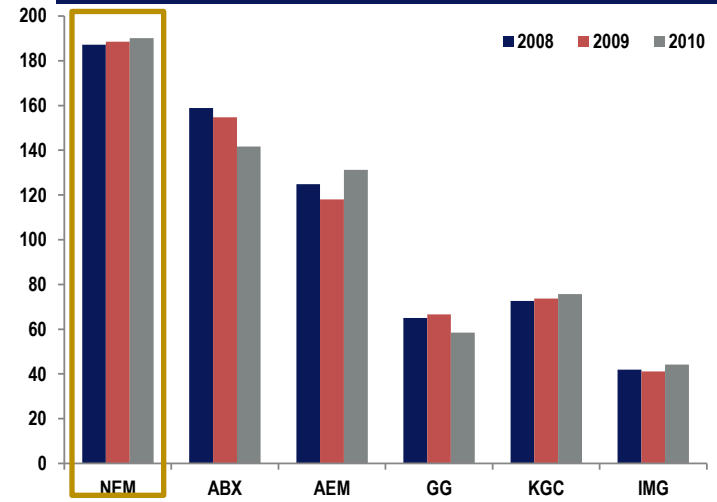

- Infill and exploration drilling underway
- Confirm reserves, conduct study to advance metallurgy, geotechnical hydrological understanding

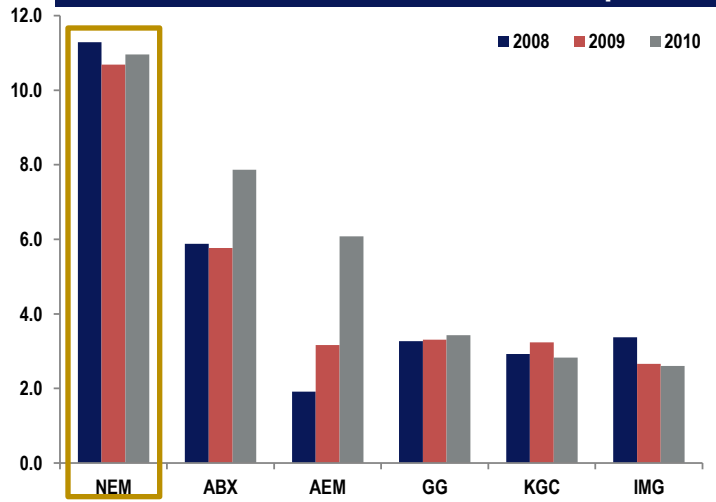

Financial Strength and Flexibility

Delivering Per Share Leadership[24]

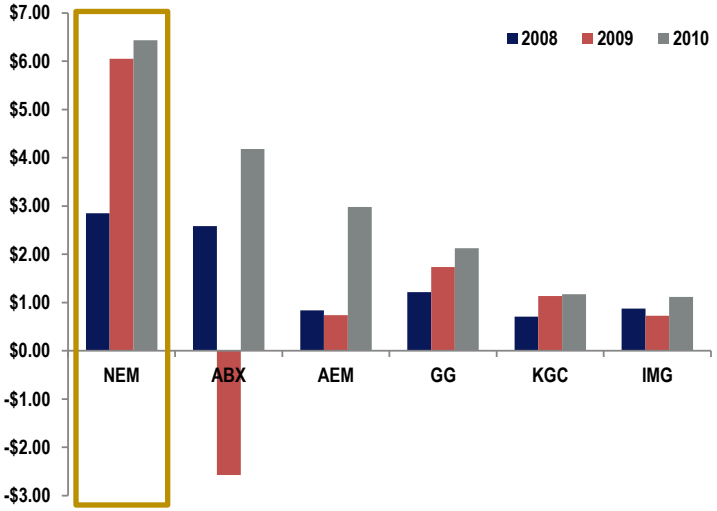

Gold Reserves per Share

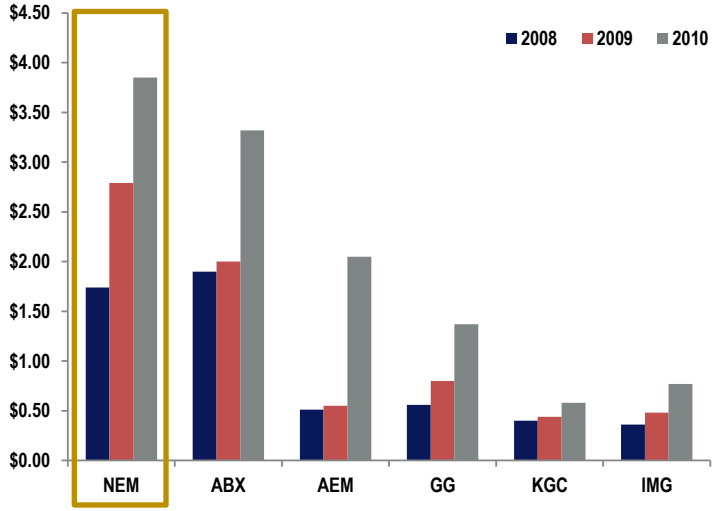

Attributable Gold Production per Share

Consolidated OCF per Share

Adjusted Earnings per Share

Newmont: Summary/Conclusion

- ✓ ~35% Potential increase in attributable gold production by 2017
  - ✓ African region expected to double production by 2017
- ✓ Industry-leading returns on invested capital
- ✓ Exploration upside as large as current reserve base
- ✓ Strong balance sheet with significant financial flexibility
- ✓ Industry-leading dividend yield

Appendix

Akyem
Community Development

- Identifying opportunities and building Local Business capacity to maximize procurement from local Akyem businesses
- Ensuring decision-making and sustainable development through engagement with the Akyem Social Responsibility Forum (SRF)
  - Created long term vision for communities
  - Completed local employment agreement
  - Identified development initiatives for 2011
- Ongoing stakeholder engagement programs
  - Schools: building understanding with key change agents
  - Regional Minister, Departments and District Assemblies: monthly updates
  - Media: quarterly updates
  - Local stakeholder groups (farmers, churches etc.): quarterly updates
  - Paramountcy, Chiefs, Queen Mothers, Sub-chiefs: monthly/weekly meetings
- Community development through construction of infrastructure and capacity building initiatives

2012 Outlook as of January 17, 2012[8]

Region	Attributable Production[a] *(Kozs, MIbs)*	Consolidated CAS *($/oz, $/lb)*	Consolidated Capital Expenditures *($M)*	Attributable Capital Expenditures *($M)*

[a] *On a payable basis.*

[b] *The future development of the Conga project remains subject to risks and uncertainties as disclosed on the Company's cautionary statement. Development of the Conga project has been temporarily suspended as disclosed on November 30, 2011. Should the Company be unable to continue with the current development plan at Conga, Newmont may in the future reprioritize and reallocate capital to development alternatives in Nevada, Australia, Ghana, and Indonesia.*

[c] *2012 Attributable CAS Outlook is $640 - $690 per ounce.*

[d] *2012 Net Attributable CAS Outlook (by-product basis) is $600 - $650 per ounce.*

[e] *Includes capitalized interest of approximately $140 million.*

[f] *Assumes Batu Hijau economic interest of 44.5625% for 2012, subject to final divestiture obligations.*

Endnotes

Investors are encouraged to read the information contained in this presentation in conjunction with the following notes footnotes, the Cautionary Statement on slide 2 and the factors described under the "Risk Factors" section of the Company's most recent Form 10-K, filed with the SEC on February 24, 2011.

1. When used in this presentation, the phrase "growth potential" represents the sum for all projects of the current estimated average annual production targets for the first five years of production for each such project anticipated to be commissioned between 2011 and 2017. Additionally, unless otherwise indicated, references to potential production used in this presentation mean that portion that is attributable to Newmont's ownership or economic interest.
2. Estimated reserve "exploration upside potential" refers to mineralization that are additional to current Reserves and Non-Reserve Mineralization ("NRM"). Estimates of such mineralization are provided on an "order of magnitude" basis for informational purposes only. Conversion of such mineralization to Reserves is subject to substantive risks inherent in the mining industry, and no assurance can be given that such inventory will be converted to Reserves or of the timing or terms of any such conversion. Even if significant mineralization is discovered and converted to Reserves, it will likely take many years from the initial phases of exploration to development and to production, during which time the economic feasibility of production may change. As a result, there is greater uncertainty of the conversion of such inventory to production than in the case of Reserves or NRM. For additional information on Newmont's Reserves and NRM, see our Year-End Reserve Report (as of 12/31/10) available at www.newmont.com/our-investors/reserves-and-resources. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineralized material, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see Newmont's most recent Annual Report on Form 10-K, filed on February 24, 2011, and other SEC filings.
3. Newmont has established a gold price-linked dividend policy that serves as a non-binding guideline for Newmont's Board of Directors (the "Board"). The Board reserves all powers related to the declaration and payment of dividends. In addition, the declaration and payment of future dividends remain at the discretion of the Board and will be determined based on Newmont's financial results, cash and liquidity requirements, future prospects and other factors deemed relevant by the Board. In determining the dividend to be declared and paid on the common stock of the Company, the Board may revise or terminate such policy at any time without prior notice.
4. Newmont's preliminary 2011 attributable gold production was 5,184Koz. Preliminary 2011 attributable copper production was 206 Mlbs.
5. The future development of the Conga project remains subject to risks and uncertainties as disclosed on page 2 – "Cautionary Statement." Development of the Conga project has been temporarily suspended as disclosed on November 30, 2011. Should the Company be unable to continue with the current development plan at Conga, Newmont may in the future reprioritize and reallocate capital to development alternatives in Nevada, Australia, Ghana, and Indonesia. See Cautionary Note on page 2 and the Company's related news release dated 11/30/11 and the Cautionary Statement on slide 2 of this presentation.
6. When used in this presentation, the phrase "forecasted potential production" represents the sum for all projects of the current estimated average annual production targets for 2017 for each such project anticipated to be commissioned by 2017. Additionally, unless otherwise indicated, references to potential production used in this presentation mean that portion that is attributable to Newmont's ownership or economic interest. Such estimates are subject to change based upon risks, future events and potential modifications to the business plan as indicated on slide 2. Newmont currently forecasts 2017 attributable gold and copper production of approximately 7Moz and 400 Mlbs, respectively.
7. 2011 outlook and 2011 actual capital expenditures are shown on a consolidated basis; 2012 outlook is shown on an attributable basis.
8. We caution you that, whether or not expressly stated, all measures of the Company's fourth quarter and 2011 financial results and condition contained in this news release, including production, average realized price, costs applicable to sales and capital expenditures, are preliminary and reflect our expected 2011 results as of the date of this news release. Actual reported fourth quarter and 2011 results are subject to management's final review as well as audit by the Company's independent registered accounting firm and may vary significantly from those expectations because of a number of factors, including, without limitation, additional or revised information and changes in accounting standards or policies or in how those standards are applied. For a discussion of factors that may adversely affect our financial results and condition, see the Company's 2010 Annual Report on Form 10-K, filed on February 24, 2011, with the SEC, as well as the Company's other SEC filings, available on the SEC's website at www.sec.gov. The Company will provide additional discussion and analysis and other important information about its fourth quarter and 2011 financial results and condition when it reports actual results on February 24, 2012.
9. 2012 Outlook projections used in this presentation ("Outlook") are considered "forward-looking statements" and represents management's good faith estimates or expectations of future production results as of January 17, 2012 and is based upon certain assumptions. Such assumptions, include, but are not limited to those set forth on slides 3, 5 and 21, including gold price of $1,500/ounce, copper price of $3.50/pound, oil price of $90/barrel and Australian dollar exchange rate of 1.00. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook.
10. Dividend awarded subject to Board approval.
11. "NRM" used in this presentation refers to Measured, Indicated and/or Inferred materials that would be additional to Reserves. Newmont has determined that such NRM would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration and defined as Resources. The conversion of NRM to Reserves is subject to substantive risks inherent in the mining industry, and no assurance can be given that NRM will be converted to Reserves or of the timing or terms of any such conversion. Even if significant mineralization is discovered and converted to reserves, it will likely take many years from the initial phases of exploration to development and to production, during which time the economic feasibility of production may change. As a result, there is greater uncertainty of the conversion of NRM to production than in the case of Reserves.
12. As of 12/31/2010.
13. Newmont has established a gold price-linked dividend policy that serves as a non-binding guideline for Newmont's Board of Directors (the "Board"). The Board reserves all powers related to the declaration and payment of dividends. In addition, the declaration and payment of future dividends remain at the discretion of the Board and will be determined based on Newmont's financial results, cash and liquidity requirements, future prospects and other factors deemed relevant by the Board. In determining the dividend to be declared and paid on the common stock of the Company, the Board may revise or terminate such policy at any time without prior notice.
14. Yield based on gold price of $1,700 and NEM closing price of $60. S&P 500 yield quartiles developed from yield range of 0-14%. Data provided by Capital IQ.
15. Yield based on gold price of $2,000 and NEM closing price of $60. S&P 500 yield quartiles developed from yield range of 0-14%. Data provided by Capital IQ.
16. Yield based on gold price of $2,500 and NEM closing price of $60. S&P 500 yield quartiles developed from yield range of 0-14%. Data provided by Capital IQ.
