Cautionary Statement

Cautionary Statement Regarding Forward Looking Statements, Including 2012 Outlook:

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by those sections and other applicable laws. Those forward-looking statements include (without limitation) estimates and expectations of, and statements regarding: (i) the Company’s strategy and plans, including without limitation re-sequencing of our portfolio, optimization of current operations, overhead cost reductions and outlook; (ii) future equity gold and equity copper production; (iii) future operating, sales and other costs; (iv) future capital expenditures; (v) project returns; (vi) project start dates, ramp up, life, pipeline timelines, including commencement of mining, drilling and stage gate advancement and expansion opportunities; (vii) potential ounces or tons of reserves, NRM and potential resources; (viii) exploration pipeline, potential or upside, opportunities, growth and growth potential; (ix) dividend payments and increases; (x) future liquidity, cash and balance sheet expectations; and (xi) other financial outlook indicators relation to the Company’s operations and projects. Those forward-looking statements include (without limitation) statements that use forward-looking terminology such as “may”, “will”, “expect”, “predict”, “anticipate”, “believe”, “continue”, “potential”, “target”, “goal”, “opportunity”, “outlook”, or the negative or other variations of those terms or comparable terminology. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Those assumptions include (without limitation): (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political, social and legal developments in any jurisdiction in which the Company conducts business being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as the other exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels and such supplies otherwise being available on bases consistent with the Company’s current expectations; and (vii) the accuracy of our current mineral reserve and mineral resource estimates and exploration information. Where the Company expresses or implies an expectation or belief as to future events or results, that expectation or belief is expressed in good faith and is believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Those risks, uncertainties and other factors include (without limitation): (i) gold and other metals price volatility; (ii) currency fluctuations; (iii) increased capital and operating costs, and scarcity of and competition for required labor and supplies; (iv) variances in oregrade or recovery rates from those assumed in mining plans; (v) operating or technical difficulties; (vi) political and operational risks; (vii) community relations, conflict resolution and outcome of projects or oppositions; and (viii) governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2011 Annual Report on Form 10-K, filed on February 24, 2012, with the Securities and Exchange Commission (“SEC”), as well as the Company’s other SEC filings. These forward-looking statements are not guarantees of future performance, given that they involve risks and uncertainties. The Company does not undertake any obligation to release publicly revisions to any forward-looking statement except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued forward-looking statement constitutes a reaffirmation of that statement. Continued reliance on forward-looking statements is at investors' own risk. In addition, some of the statements in this presentation are based on assumptions or methodologies (such as commodity prices) or subject to cautionary statements that are discussed in the notes found at the end of this presentation.

Enhancing Value – Stable Operating Portfolio with Profitable Growth, Reducing Total Costs, and Maintaining Leading Dividends

	Attributable Basis
Profitable Growth	▪ Profitable gold production potential of ~6-7Moz by 2017[1]
Disciplined Returns	▪ Disciplined risk-adjusted returns in excess of the Company's average cost of capital
Exploration Potential	▪ Option to add ~90 Moz Au and ~9 Blb Cu reserves between 2011-2020[2]
Balance Sheet Strength	▪ Access to capital with an investment grade balance sheet and strong operating cash flows to support profitable growth
Industry-Leading Dividend	▪ Committed to returning capital to shareholders

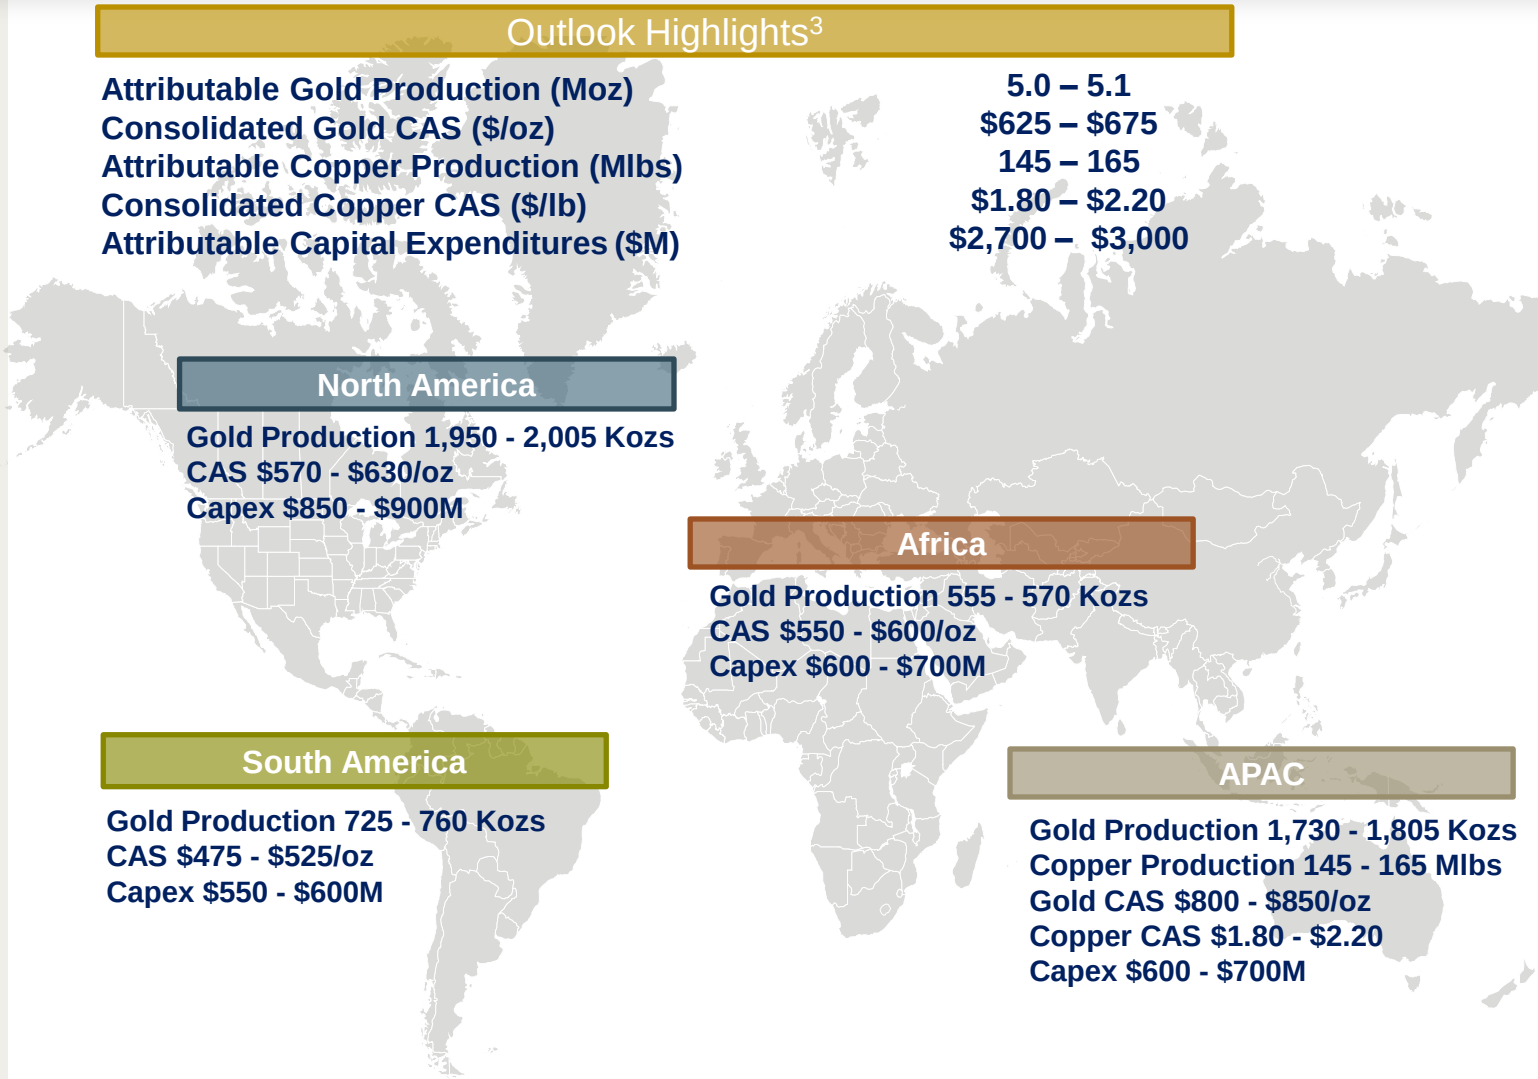

Delivering on Our Promise

Maintaining a Stable Operating Portfolio

Newmont has *met* or *exceeded* its operating outlook for the last **4** years… and we will build on this success.

Outlook Highlights[3]

Attributable Gold Production (Moz)	5.0 – 5.1
Consolidated Gold CAS ($/oz)	$625 – $675
Attributable Copper Production (Mlbs)	145 – 165
Consolidated Copper CAS ($/lb)	$1.80 – $2.20
Attributable Capital Expenditures ($M)	$2,700 – $3,000

North America

Gold Production 1,950 - 2,005 Kozs
CAS $570 - $630/oz
Capex $850 - $900M

Africa

Gold Production 555 - 570 Kozs
CAS $550 - $600/oz
Capex $600 - $700M

South America

Gold Production 725 - 760 Kozs
CAS $475 - $525/oz
Capex $550 - $600M

APAC

Gold Production 1,730 - 1,805 Kozs
Copper Production 145 - 165 Mlbs
Gold CAS $800 - $850/oz
Copper CAS $1.80 - $2.20
Capex $600 - $700M

North America

Consistent Operating Portfolio

~50 Years of Production and Going Strong

- **~1.9Moz base production profile**
- **Cornerstone assets have *delivered >55Moz* of gold from the region since 1965**
- ***Sustainable reserve base* developed through acquisitions and organic conversion**
- **Development of Long Canyon and Leeville/Turf projects for *moderate growth* over the next five years**
- **La Herradura JV delivers profitable gold production each year**
- **~37Moz of Gold Reserves and ~14Moz of Gold NRM with exploration upside**

Twin Creeks

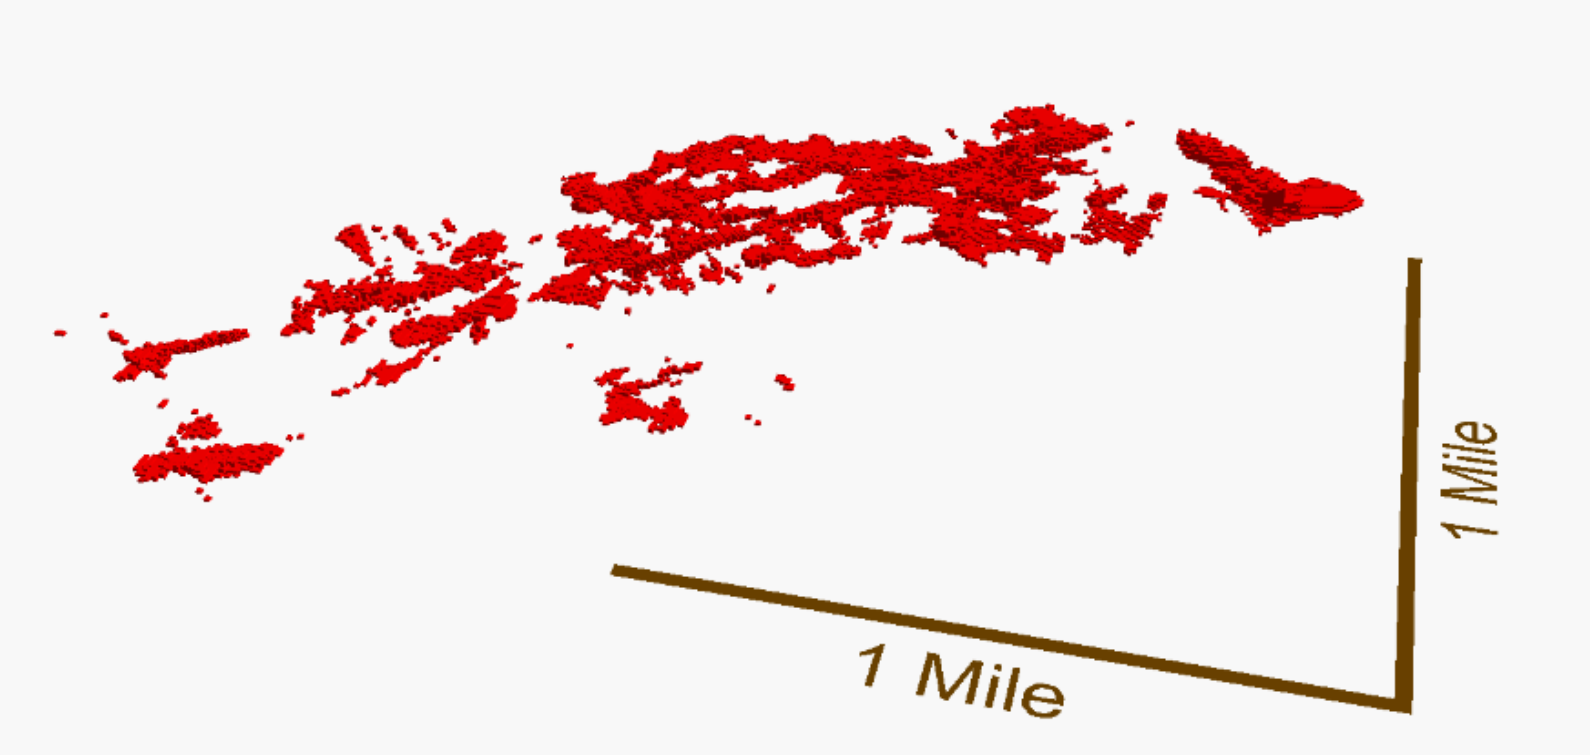

Leeville Underground

North America

Long Canyon Significant Potential Continues to be Discovered

***Trend Potential of* >3-4X Fronteer's Stated Resource Estimate[4]**

(1.4Moz M&I + 0.8Moz Inferred; No ounces currently in reserves or NRM; Expect to declare first NRM with 2012 year-end report)

South America

Consistent Operating Portfolio

~20 Years of Gold Production at Competitive Costs

- **~0.75Moz base production profile**
- ***Consistent* operating performance from Yanacocha at ~$500/oz costs**
- **Demonstrated *commitment to communities* through employment opportunities and investments in additional water capacity**
- **Merian project in Suriname opportunity for ~350 – 400koz of production per year[5]**
- **~11Moz of Gold Reserves and ~7Moz of Gold NRM with additional exploration opportunity at Merian and Yanacocha**

Yanacocha, Peru

Merian, Suriname

South America

Conga development contingent on generating acceptable project returns; community and government support key to progressing the project

Continuing on our "Water First" Development Approach

- **Construction status**
  - Engineering ~96% complete
  - Procurement ~66% complete
  - Downsizing Owner's team
  - Reviewing development cost reduction opportunities for Conga
- **2012-2013 attributable spending (~2/3 less than originally planned) of $440 million contains**
  - ~$90 million engineering
  - ~$270 million equipment and owner costs
  - ~$60 million reservoir construction
  - ~$20 million camp construction

Water Treatment Platform

Road Preparation

APAC

Consistent Operating Portfolio

A Stable Platform

- **~1.7Moz base production profile – gold and copper**
- **On track to deliver *consistent production* over the next five years**
- **Boddington on budget at mid-year for both gold and copper production**
- **Batu Hijau divestiture ongoing; expected to reach Phase 6 ore in the last half of 2013**
- **~32Moz of Gold Reserves and ~14Moz of Gold NRM with potential to extend life of mines**

Boddington

Batu Hijau

Africa

Consistent Operating Portfolio

Cornerstone Region in the Making

- **~0.6Moz base production profile**
- **Newmont's *growth focus* with potential to double current production by 2017**
- **Akyem *on budget* and *on schedule* for end of 2013 start date**
- **Ahafo Mill expansion opportunity to increase district production while maintaining costs**
- **~20Moz of Gold Reserves and ~7Moz of Gold NRM with exploration potential at Ahafo North**
- **Strategic iron ore development opportunity at Nimba**

Akyem Resettlement Area

Ahafo Mill

Africa

Akyem Making Significant Progress

Construction On-Track and On-Budget

- **Construction is ~60% complete**
- **First production expected late 2013**
- **Gold production: 350 - 450 koz (average, first 5 years)**
- **CAS: $500 - $650/oz (average, first 5 years)**
- **Initial Capital: $850 - $1,100 million**
- **Reserves: 7.4 Moz**
- **Mine life: ~16 years**

Installation of ball mill and sag mill

Carbon in Leach (CIL) tanks

Africa

Akyem Making Significant Progress

Construction On-Track and On-Budget

- **First mining occurred in late August, slightly ahead of schedule**

Protecting Our Margins

Improved Cost Control; Focus on Efficiencies in Operations, Projects, G&A

Total Costs of Production[6]
~$1200/oz

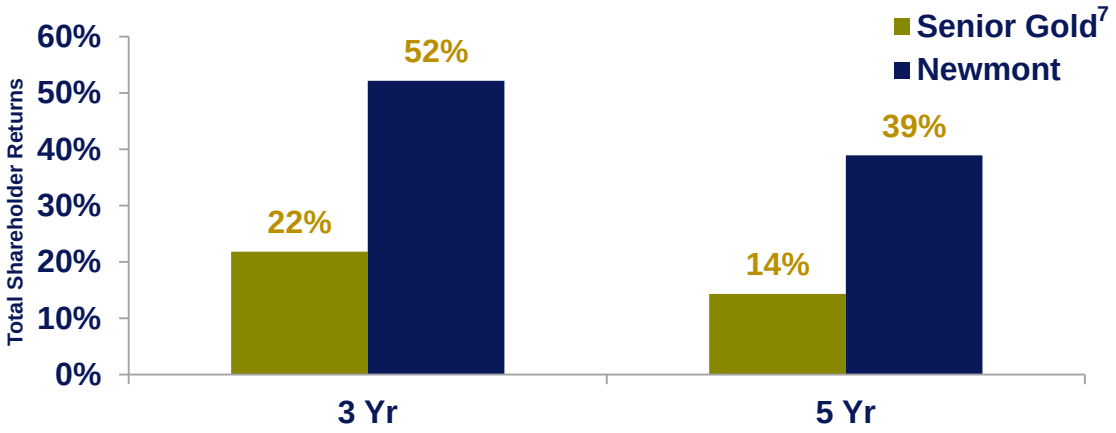

2012 Guidance ($/oz)

Re-sequencing our Portfolio; Only Progressing Projects with Acceptable Returns

Optimizing Current Operations

~$100M Overhead Cost Reduction for 2012; Additional Reductions Under Evaluation

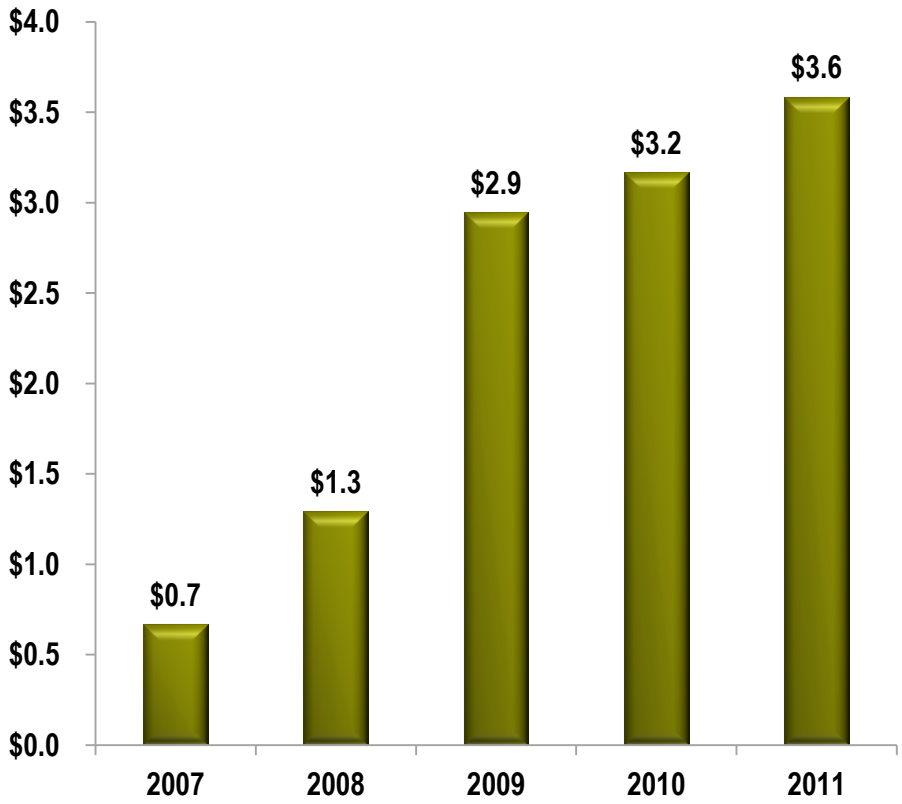

Consistency in Operations Delivers ***Leading*** Total Shareholder Returns[7]

Balance Sheet Strength

Financial Flexibility and Stability

Cash Flow from Operations ($B)

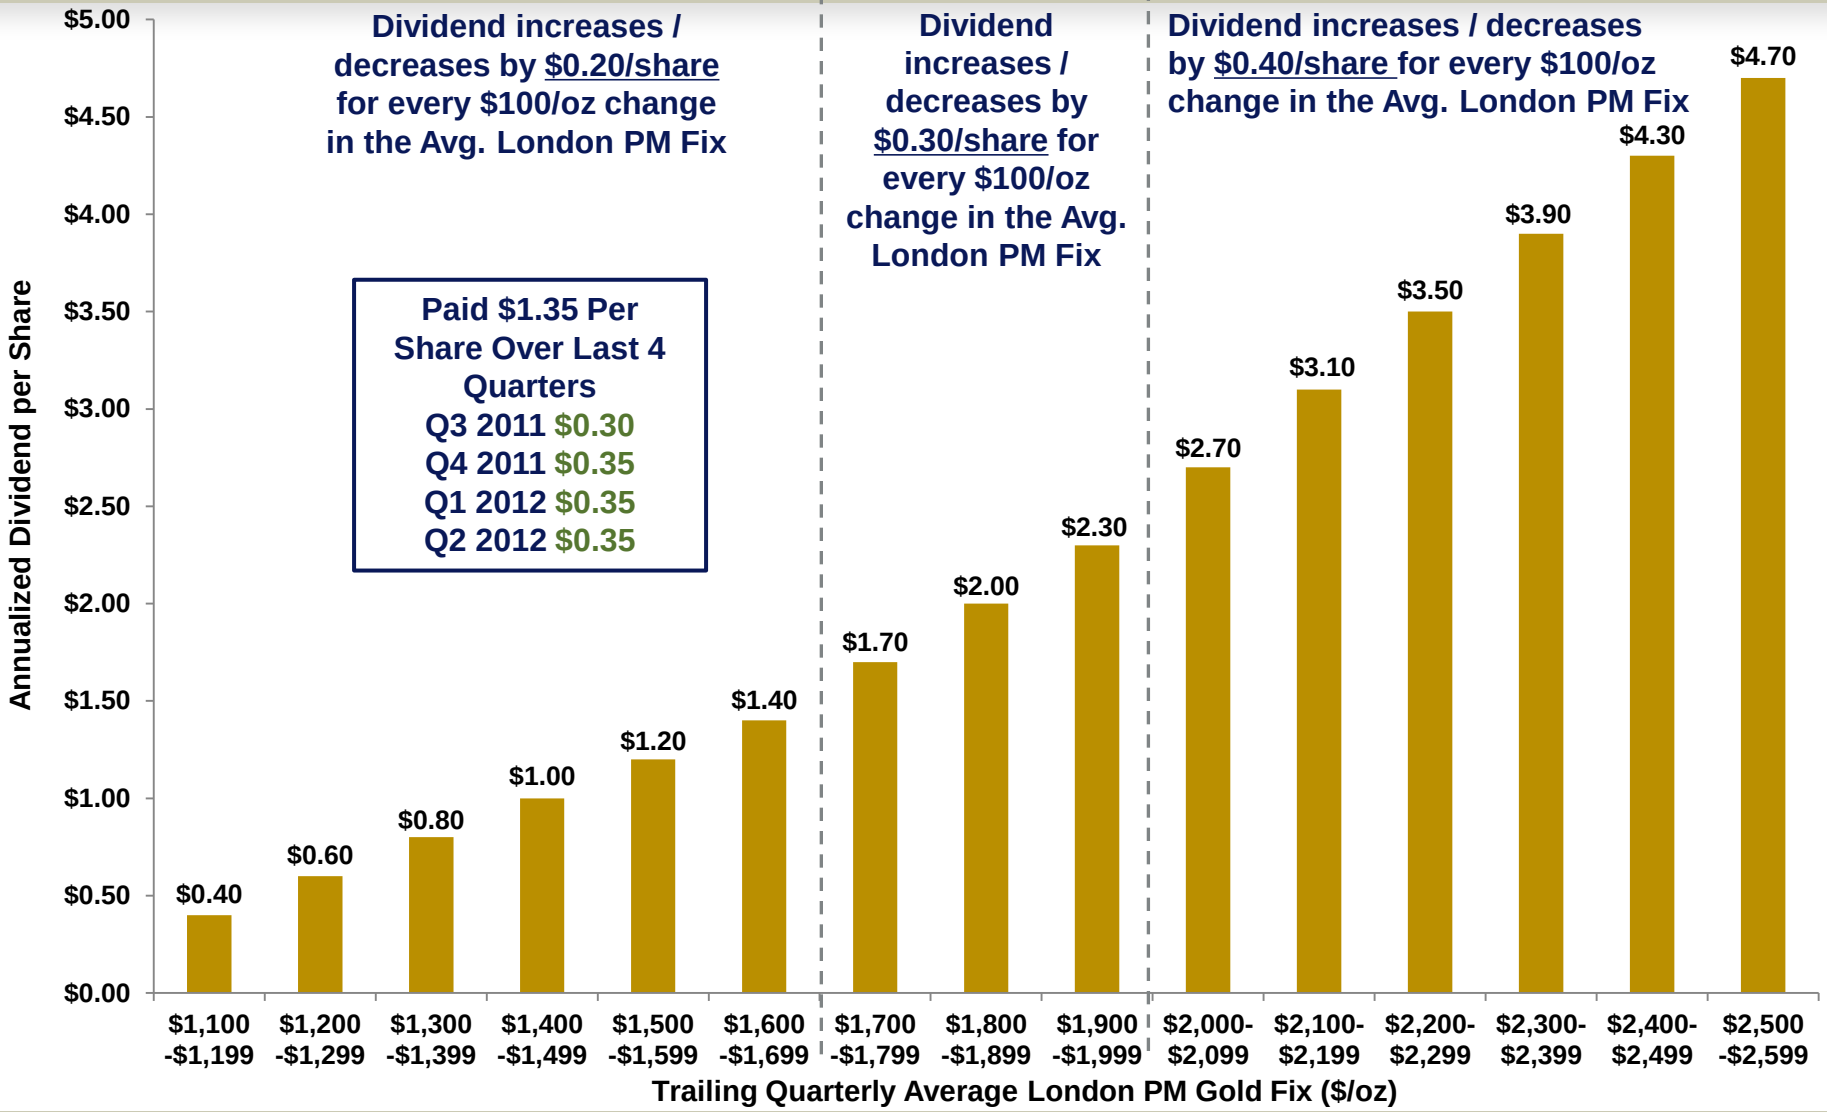

Cash and Cash Equivalents	$1.9B
Investments	$1.3B

Reconciliation – Adjusted Net Income to GAAP Net Income

Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by Generally Accepted Accounting Principles ("GAAP"). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Reconciliation of Adjusted Net Income to GAAP Net Income

Management uses the non-GAAP financial measure Adjusted net income to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income allows investors and analysts to compare the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals to similar operating results of other mining companies, by excluding exceptional or unusual items, income or loss from discontinued operations and the permanent impairment of assets, including marketable securities and goodwill. Management's determination of the components of Adjusted net income are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts.

Net income attributable to Newmont stockholders is reconciled to Adjusted net income as follows:

	Three months ended June 30,		Six months ended June 30,	
(in millions except per share, after-tax)	**2012**	**2011**	**2012**	**2011**

Adjusted net income per share, diluted	**$ 0.59**	**$ 0.89**	**$ 1.74**	**$ 1.91**

Attributable and Net Attributable CAS

Costs Applicable to Sales per Ounce/Pound

Costs applicable to sales per ounce/pound are non-GAAP financial measures. These measures are calculated by dividing the costs applicable to sales of gold and copper by gold ounces or copper pounds sold, respectively. These measures are calculated on a consistent basis for the periods presented on both a consolidated and attributable to Newmont basis. Attributable costs applicable to sales are based on our economic interest in production from our mines. For operations where we hold less than a 100% economic share in the production, we exclude the share of gold or copper production attributable to the non-controlling interest. We include attributable costs applicable to sales per ounce/pound to provide management, investors and analysts with information with which to compare our performance to other gold producers. Costs applicable to sales per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently.

Net attributable costs applicable to sales per ounce measures the benefit of copper produced in conjunction with gold, as a credit against the cost of producing gold. A number of other gold producers present their costs net of the contribution from copper and other non-gold sales. We believe that including a measure of this basis provides management, investors and analysts with information with which to compare our performance to other gold producers, and to better assess the overall performance of our business. In addition, this measure provides information to enable investors and analysts to understand the importance of non-gold revenues to our cost structure.

Costs applicable to sales per ounce

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Costs applicable to sales:				
Consolidated	$ 894	$ 811	$ 1,796	$ 1,634

Endnotes

Investors are encouraged to read the information contained in this presentation in conjunction with the following notes footnotes, the Cautionary Statement on slide 2 and the factors described under the "Risk Factors" section of the Company's most recent Form 10-K, filed with the SEC on February 24, 2012.

1. 2017 potential production metrics are targets and should be considered forward-looking statements. When used in this presentation, the phrase "production potential" represents the sum for all projects of the estimated average annual production targets for 2017 based upon the Company's business plan as of 6-30-2012 for each such project anticipated to be commissioned by 2017. Additionally, unless otherwise indicated, references to potential production used in this presentation mean that portion that is attributable to Newmont's ownership or economic interest. Such estimates are subject to change after such date based upon risks, future events and modifications to the business plan or the Company's growth strategy. Unless otherwise indicated, references to potential production indicate the portion attributable to Newmont's interest.
2. See the cautionary statement on slide 2 of this presentation and footnote 3 below. Estimated mineralization "potential" and "exploration upside" refer to mineralization that are additional to current Reserves and Non-Reserve Mineralization ("NRM"). Conversion of such mineralization to Reserves or NRM is subject to substantive risks inherent in the mining industry, and no assurance can be given that such inventory will be converted to Reserves or NRM or of the timing or terms of any such conversion. Even if significant mineralization is discovered and converted to Reserves, it will likely take many years from the initial phases of exploration to development and to production, during which time the economic feasibility of production may change. As a result, there is greater uncertainty of the conversion of such inventory to production than in the case of Reserves or NRM. For additional information on Newmont's Reserves and NRM, see our Year-End Reserve Report (as of 12/31/11) available at www.newmont.com/our-investors/reserves-and-resources. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineralized material, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, metals prices or other relevant factors, please see Newmont's Form 10-K.
3. 2012 Outlook projections used in this presentation ("Outlook") are considered "forward-looking statements" and represent management's good faith estimates or expectations of future production results as of July 27, 2012 and is based upon certain assumptions. Such assumptions, include gold price of $1,500/ounce, copper price of $3.50/pound, oil price of $90/barrel and Australian dollar exchange rate of 1.00. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook. Note that regional guidance figures provided are attributable production, consolidated CAS and attributable capital expenditures.
4. In January 2011, Fronteer Gold released an interim resource estimate for Long Canyon, which reported Measured and Indicated resources of approximately 0.071 and 1.324 million gold ounces, respectively, and an additional Inferred resource of approximately 0.8 million gold ounces. U.S. investors are cautioned that Fronteer Gold provided its public disclosures at the time of acquisition in the terms of "Measured resources", "Indicated resources" and "Inferred resource." While these terms are recognized and required by Canadian regulations, these terms are not defined terms under the SEC's Industry Guide 7. U.S. Investors are cautioned not to assume that any part or all of mineral deposits in the "Measured resources" and "Indicated resources" categories will ever be converted into Reserves. Additionally, "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred resources may not form the basis of a feasibility study or prefeasibility studies, except in rare cases. Accordingly, U.S. Investors are cautioned not to assume that any part or all of an Inferred resource exists or is economically or legally minable. No ounces are currently in the Company's Reserves or NRM for Long Canyon.
5. Merian figures shown are representative of Newmont's 100% ownership interest subject to ongoing negotiations with the Surinamese government.
6. The figures shown in the 2012 bar chart are the median of 2012 Outlook projections. See Note 3 above.
7. Total shareholder return time periods calculated as of 2011 fiscal year-end; Senior Gold includes: KGC, ABX, AEM, GG, ANG, & GFI.
8. Total debt to capitalization as of June 30, 2012.
9. Debt to EBITDA is a twelve-trailing month average as of August 1, 2012 sourced from Bloomberg.
10. Newmont has established a gold price-linked dividend policy that serves as a non-binding guideline for Newmont's Board of Directors (the "Board"). The Board reserves all powers related to the declaration and payment of dividends. In addition, the declaration and payment of future dividends remain at the discretion of the Board and will be determined based on Newmont's financial results, cash and liquidity requirements, future prospects and other factors deemed relevant by the Board. In determining the dividend to be declared and paid on the common stock of the Company, the Board may revise or terminate such policy at any time without prior notice.
11. NEM dividend yield as of 8/30/2012. Senior gold dividend yield average as of 8/30/2012 & includes: KGC, ABX, AEM, GG, ANG, & GFI. DJIA average as of 8/30/2012. S&P 500 & S&P 500 Sub-Indices as of July 2012; GLD management fee.
12. Calculated as sum of total dividends paid from 2009 – 2011 divided by the sum of positive operating cash flow as of fiscal year ends 2009-2011.
13. Source Capital IQ; return on invested capital calculated as (EBIT*(1-37.5%))/Average Total Capital. Peer average includes KGC, ABX, AEM, GG, NCM, ANG, GFI, IMG, ELD, & YRI.
14. Source Dundee Wealth.
15. 2012 Outlook projections used in this presentation are considered "forward-looking statements" and represent management's good faith estimates or expectations of future production results as of July 27, 2012 and are based upon certain assumptions. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook.
