

Rapid Prototyping

INNOVATE SMARTER. FASTER. TOGETHER.

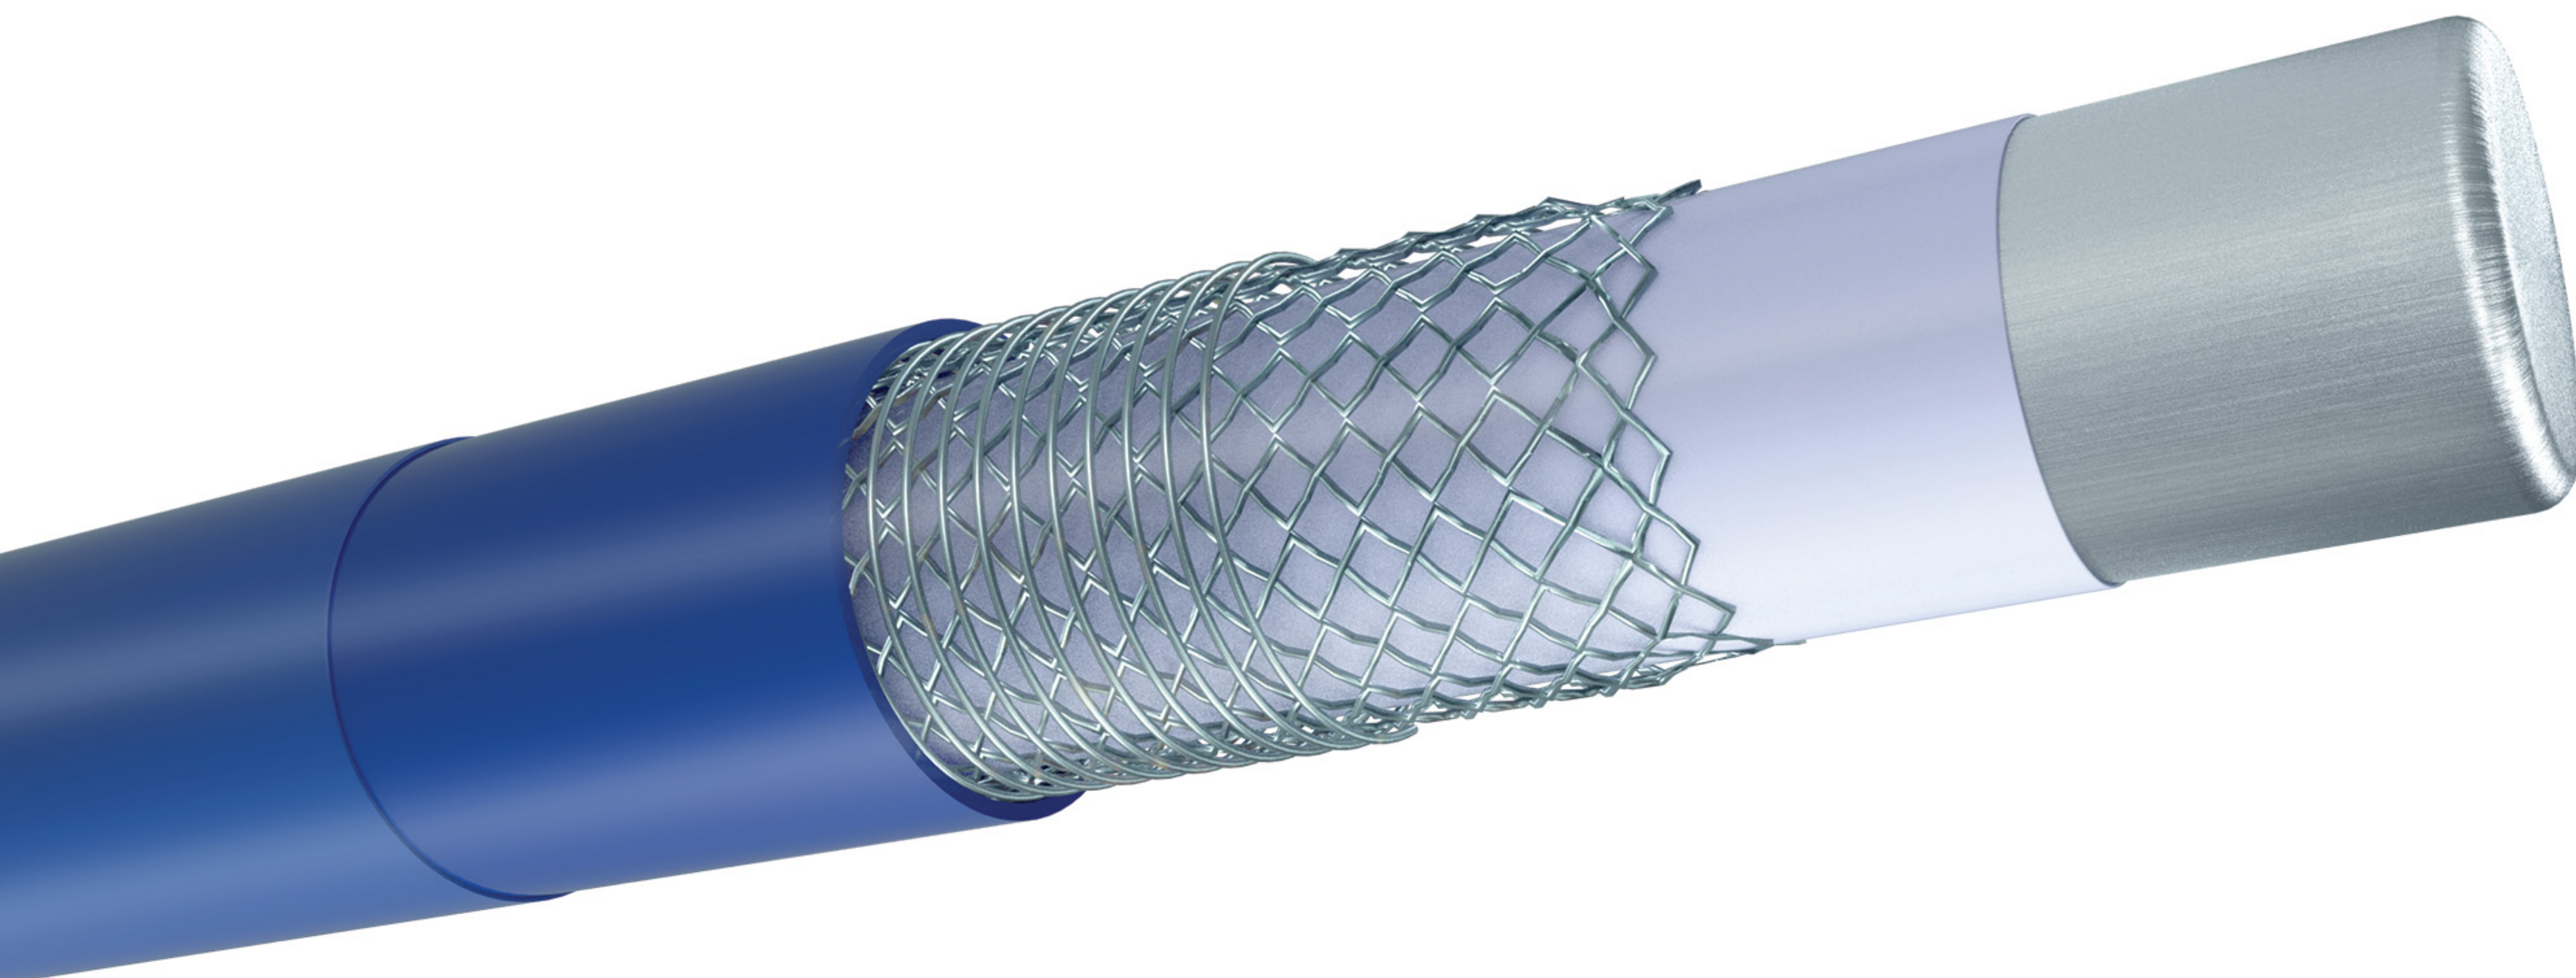

Your Team Extended

Collaborative Solutions for Engineers

Integer engineers co-create solutions tailored to your challenges.
From concept to production, we're with you at every step.

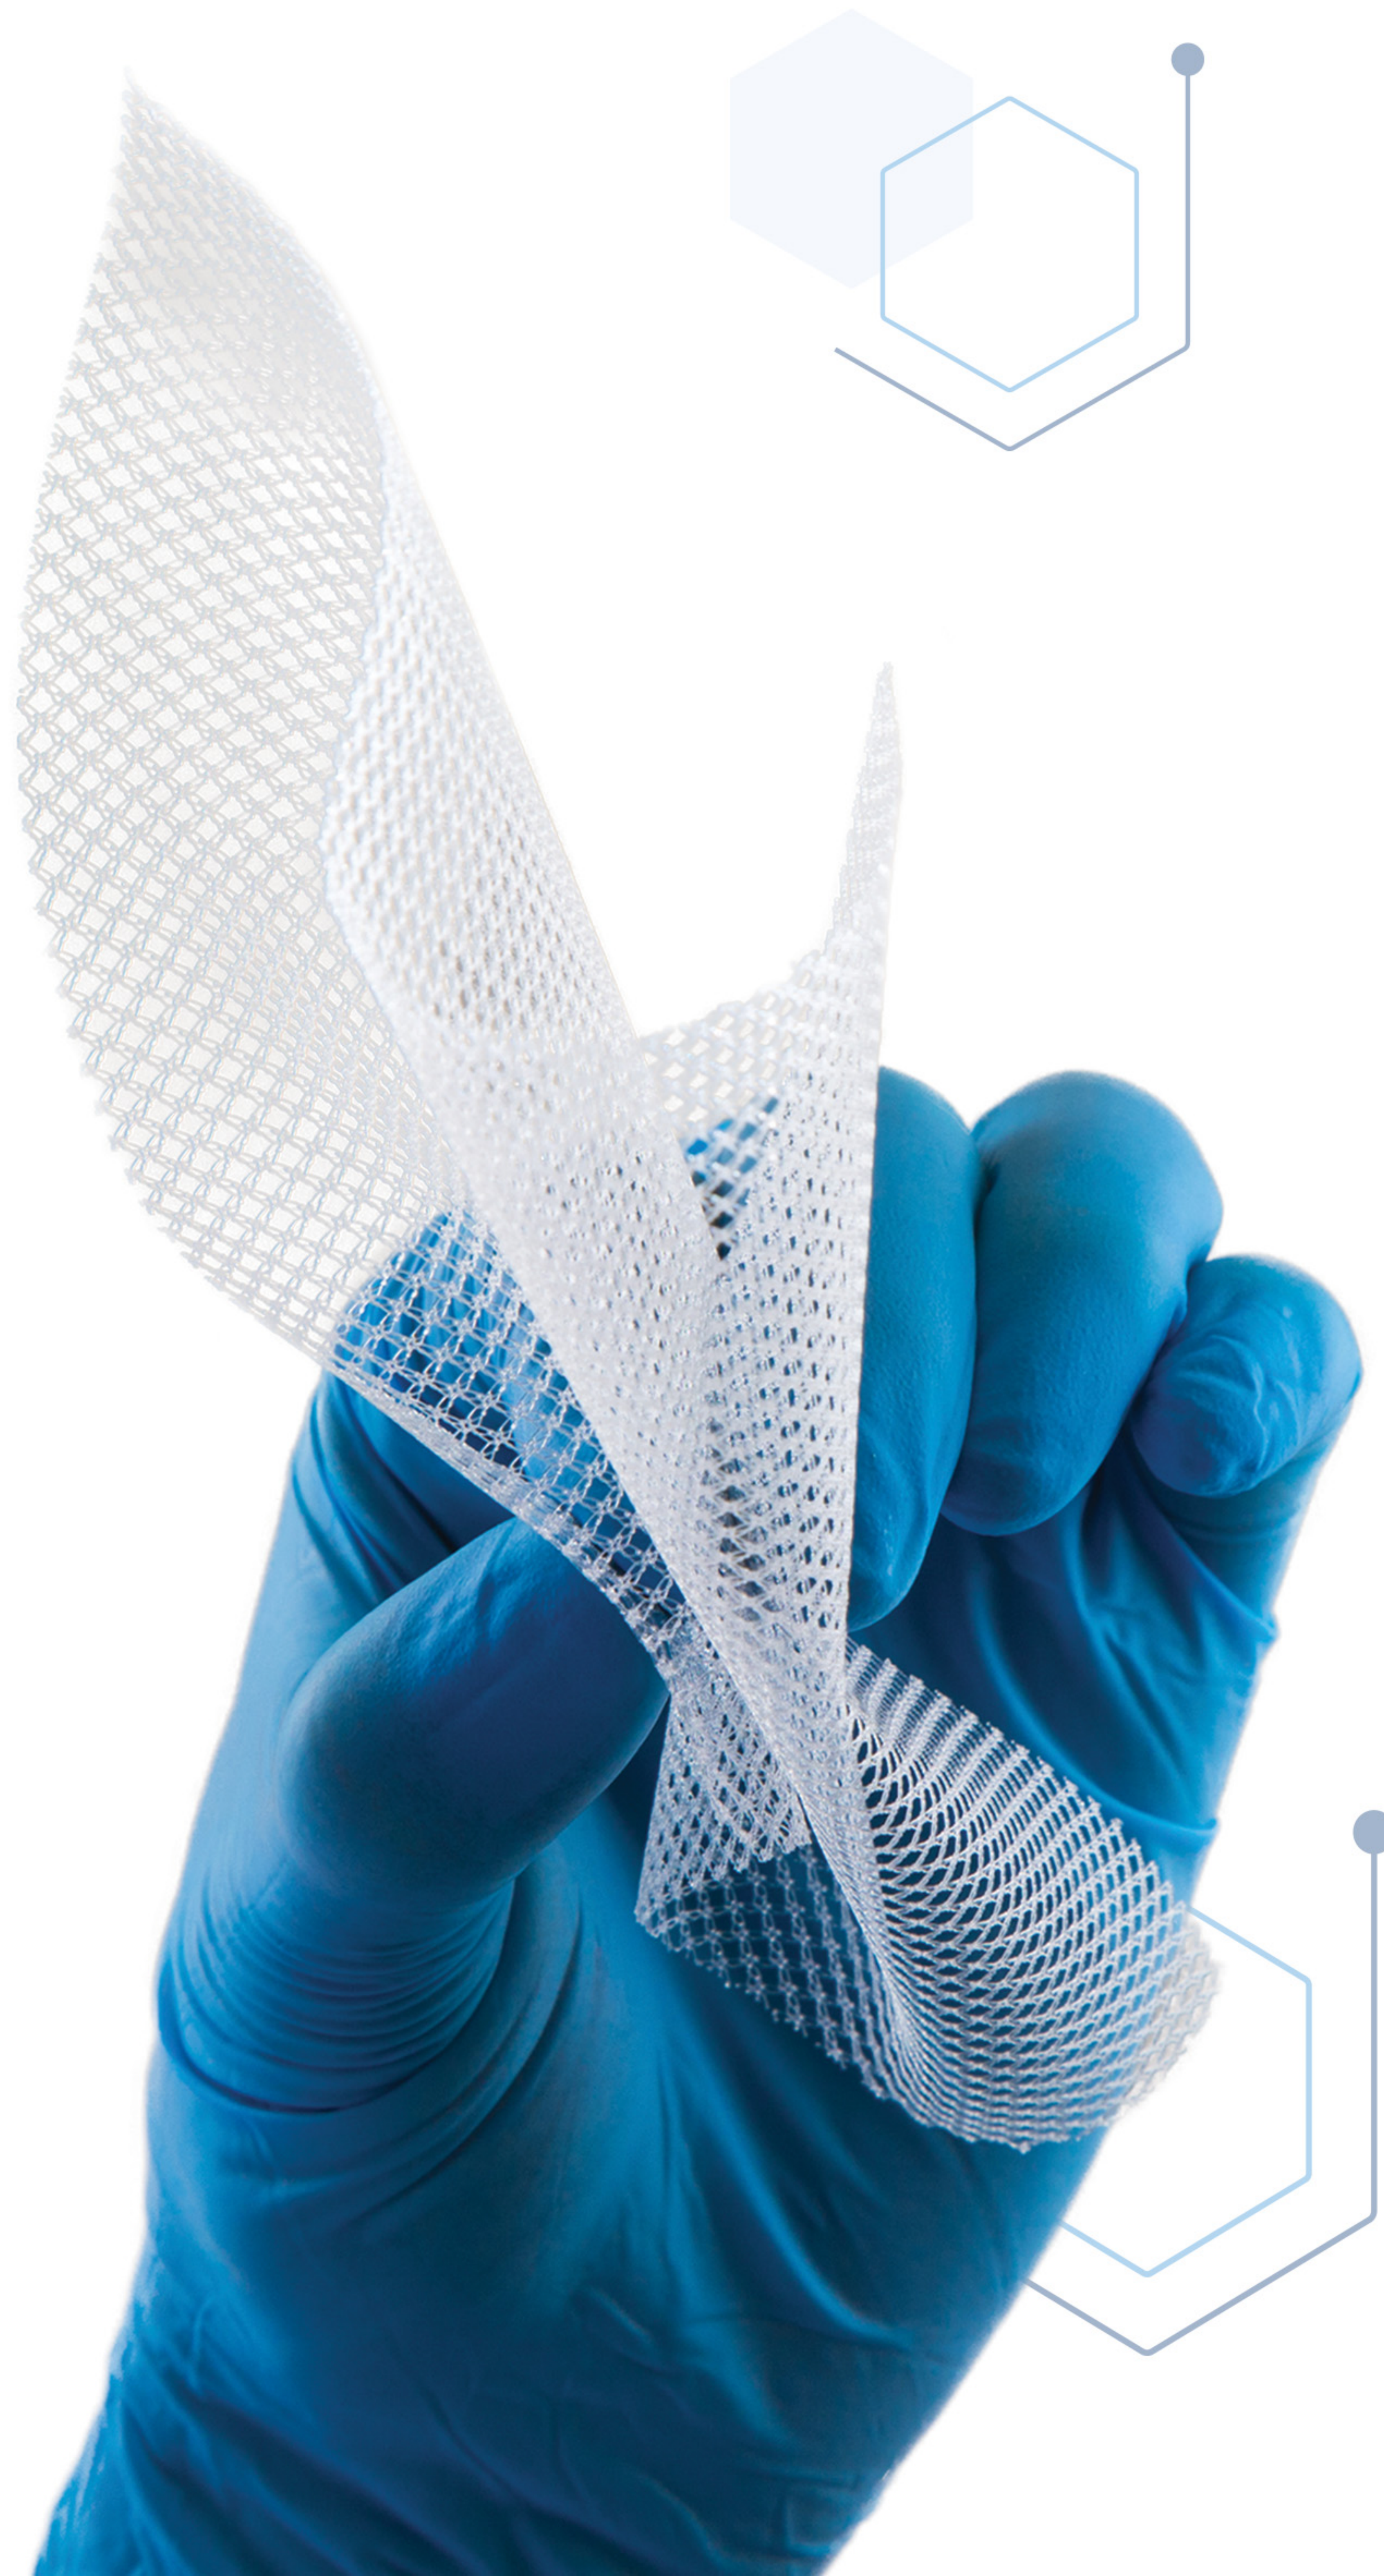

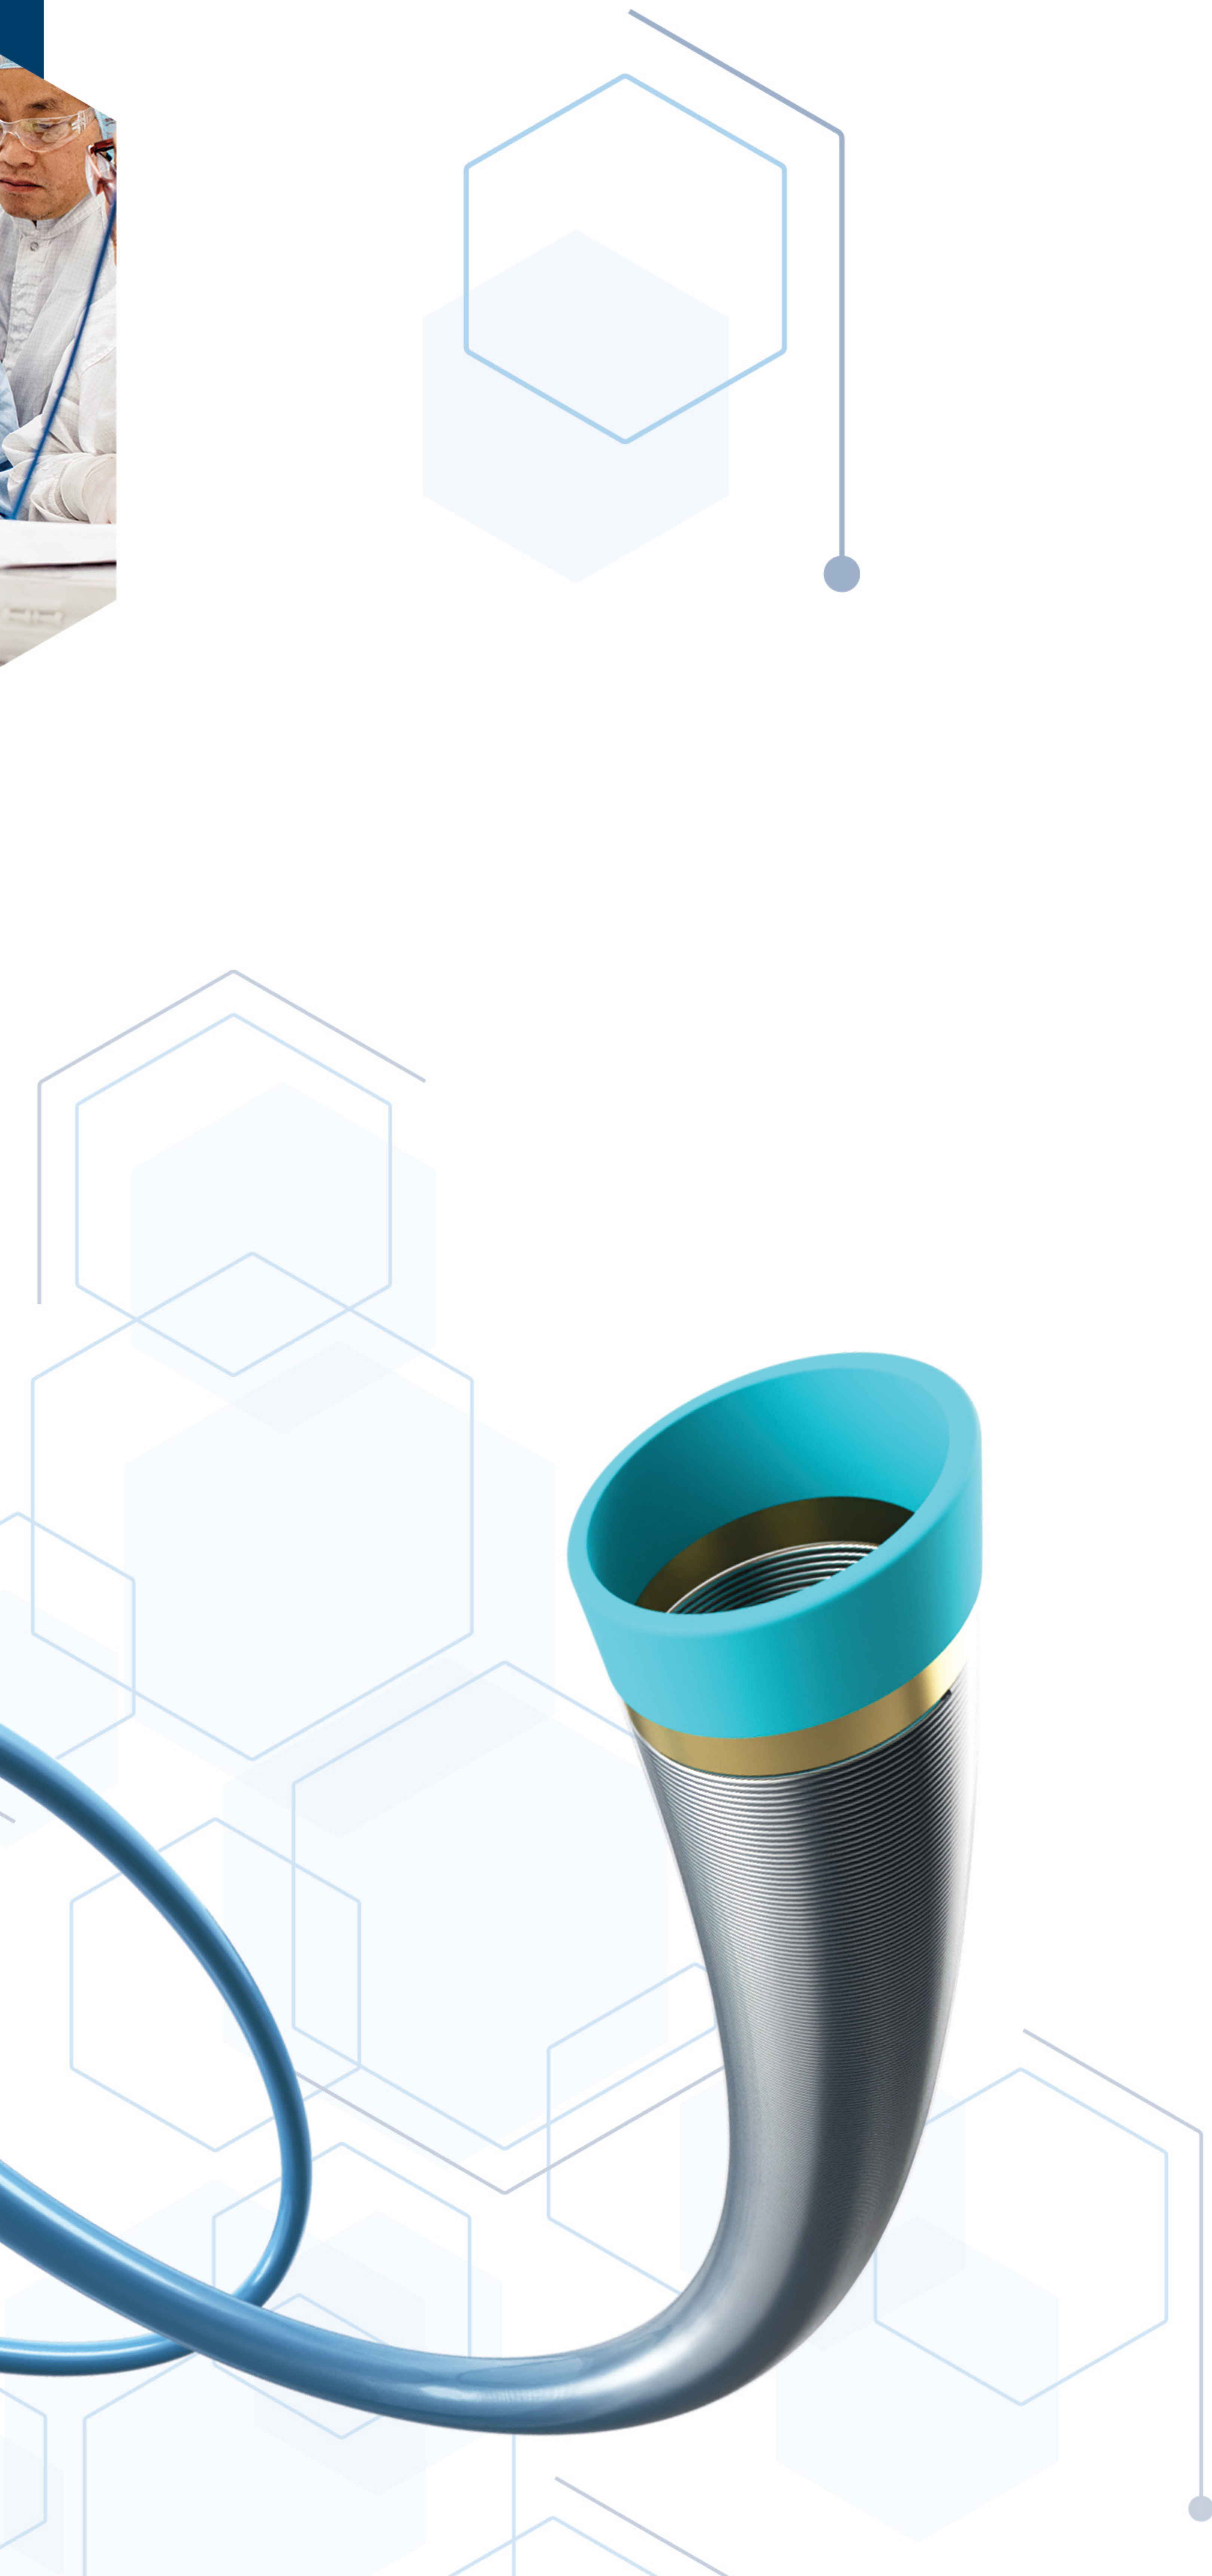

**Our engineer-to-engineer
relationships make your
innovation process seamless.**

Rapid Prototyping

Prototypes completed in as little as two weeks

We offer localized support with sites engaged across Europe and the US.

All Your Needs Under One Roof

From Rapid Prototype
to Production

Our rapid prototyping services support specialized cardiovascular markets, including structural heart, electrophysiology, neurovascular, and peripheral vascular.

- ◆ Introducers
- ◆ Braiding and Textiles
- ◆ Catheter Shafts and Guidewires
- ◆ Steerable Sheaths
- ◆ Machined Components

A Culture of Collaboration and Innovation

Our engineers speak your language, understand your goals, and go the extra mile to deliver solutions that matter

“At Integer, the customer is in the driver’s seat. We help support our customers in the twists and turns of complex design and development projects.”

James Oh

SENIOR DIRECTOR, R&D

“We really do develop a collaborative relationship with our customers. It really helps build the trust if we can communicate sooner rather than later”

Gwen Lotzow

NEW PRODUCT INTEGRATION MANAGER

“When a customer comes to us for something quick, we’re already ahead of the game because we have core materials that are used in catheter development and they’re at our fingertips ready to go.”

Grant Scheibe

DIRECTOR, PRODUCT DEVELOPMENT ENGINEERING

Engineered for Excellence. Delivered with Trust.
