

2015 Estimated Results

Estimates of full-year 2015 results for U.S. Cellular, TDS Telecom, and TDS are shown below. Such estimates represent management's view as of July 31, 2015. Such forward-looking statements should not be assumed to be current as of any future date. TDS undertakes no duty to update such information, whether as a result of new information, future events, or otherwise. There can be no assurance that final results will not differ materially from such estimated results.

Operating cash flow is defined as net income, adjusted for the items set forth in the reconciliation below. Adjusted EBITDA is defined as net income, adjusted for the items set forth in the reconciliation below. Operating cash flow and Adjusted EBITDA exclude these items in order to show operating results on a more comparable basis from period to period. From time to time, TDS may exclude other items from Operating cash flow and/or Adjusted EBITDA if such items help reflect operating results on a more comparable basis. TDS does not intend to imply that any such items that are excluded are non-recurring, infrequent or unusual; such items may occur in the future. Operating cash flow and Adjusted EBITDA are not measures of financial performance under Generally Accepted Accounting Principles in the United States ("GAAP") and should not be considered as alternatives to net income as indicators of the company's operating performance or as alternatives to cash flows from operating activities, determined in accordance with GAAP, as indicators of cash flows or as measures of liquidity. TDS believes Operating cash flow and Adjusted EBITDA are useful measures of TDS' operating results before significant recurring non-cash charges, gains and losses, and other items as indicated below. The following tables provide a reconciliation to Operating cash flow and Adjusted EBITDA for 2015 estimated results, and actual results for the six months ended June 30, 2015 and year ended December 31, 2014:
