Quarter Ended at Mar. 31, 2007	U.S. Cellular
Operating cash flow:	
Operating income as reported	\$ 108,523
Add:	
Depreciation, amortization and accretion	149,257
Operating cash flow	<u>\$ 257,780</u>

Quarter Ended at Mar. 31, 2006	U.S. Cellular
Operating cash flow:	
Operating income as reported	\$ 70,013
Add:	
Depreciation and Amortization	142,025
Operating cash flow	<u>\$ 212,038</u>

NB: The Operating Cash Flow amounts in the tables presented above are not determined in accordance with accounting principles generally accepted in the United States of America (GAAP). Management uses Operating Cash Flow to evaluate the operating performance of its business, and it is a measure of performance used by some investors, security analysts and others to make informed investment decisions. Operating Cash Flow is used as an analytical indicator of income generated to service debt and fund capital expenditures. In addition, multiples of current or projected Operating Cash Flow are used to estimate current or prospective enterprise value. Operating Cash Flow does not give effect to cash used for debt service requirements, and thus does not reflect funds available for investment or other discretionary uses. Operating Cash Flow as presented herein may not be comparable to similarly titled measures reported by other companies.

Capital Expenditures	\$110 - \$130 million

(1) Operating Cash Flow as used above represents operating income before depreciation, amortization and accretion, and excludes loss on impairment of intangible assets, and (gain) loss on assets held for sale. Operating Cash Flow is not presented as an alternative measure of operating results or cash flows from operating activities as determined in accordance with accounting principles generally accepted in the United States of America. Management uses Operating Cash Flow to evaluate the operating performance of its business, and it is a measure of performance used by some investors, security analysts and others to make informed investment decisions. Operating Cash Flow is used as an analytical indicator of income generated to service debt and fund capital expenditures. In addition, multiples of current or projected Operating Cash Flow are used to estimate current or prospective enterprise value. Operating Cash Flow does not give effect to cash used for debt service requirements, and thus does not reflect funds available for investment or other discretionary uses. Operating Cash Flow as presented herein may not be comparable to similarly titled measures reported by other companies.

(2) Unchanged from guidance issued on Feb. 23, 2007

Any guidance that is not consistent with the above should not be relied upon. The foregoing guidance represents the views of management as of the dates indicated and should not be assumed to be accurate as of any date other than such date. TDS undertakes no legal duty to update such information whether as a result of new information, future events or otherwise.

**TDS PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995
SAFE HARBOR CAUTIONARY STATEMENT**

All statements, other than statements of historical facts, that address activities, events or developments that TDS intends, expects, projects, believes or anticipates will or may occur in the future are forward-looking statements. The words "believes," "anticipates," "estimates," "expects," "plans," "intends" and similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors include those set forth below, as more fully discussed under "Risk Factors" in TDS's Form 10-K for the year ended December 31, 2006. However, such factors are not necessarily all of the important factors that could cause actual results, performance or achievements to differ materially from those expressed in, or implied by, the forward-looking statements contained in this document. Other unknown or unpredictable factors also could have material adverse effects on future results, performance or achievements. TDS undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. You should carefully consider the Risk Factors in TDS's Form 10-K for the year ended December 31, 2006, the following factors and other information contained in, or incorporated by reference into, the Form 8-K.

- Intense competition in the markets in which TDS operates could adversely affect TDS's revenues or increase its costs to compete.
- Consolidation in the telecommunications industry could adversely affect TDS's revenues and increase its costs of doing business.
- Advances or changes in telecommunications technology, such as Voice over Internet Protocol or WiMAX, could render certain technologies used by TDS obsolete, could reduce TDS's revenues or increase its costs of doing business.
- Changes in the regulatory environment or a failure by TDS to timely or fully comply with any regulatory requirements could adversely affect TDS's financial condition, results of operations or ability to do business.
- Changes in TDS's enterprise value, changes in the supply or demand of the market for wireless licenses or telephone company franchises, adverse developments in the business or the industry in which TDS is involved and/or other factors could require TDS to recognize impairments in the carrying value of TDS's license costs, goodwill and/or physical assets.
- Early redemptions of debt or repurchases of debt, issuances of debt, changes in prepaid forward contracts, changes in operating leases, changes in purchase obligations or other factors or developments could cause the amounts reported under Contractual or Other Obligations in TDS's most recent Annual Report on Form 10-K, as updated by the Quarterly Reports on Form 10-Q, to be different from the amounts actually incurred.
- Settlements, judgments, restraints on its current or future manner of doing business and/or legal costs resulting from pending and future litigation could have an adverse effect on TDS's financial condition, results of operations or ability to do business.
- Costs, integration problems or other factors associated with acquisitions/divestitures of properties and/or licenses and/or expansion of TDS's business could have an adverse effect on TDS's business, financial condition or results of operations.
- Changes in various business factors could have an adverse effect on TDS's business, financial condition or results of operations. These business factors may include but are not limited to demand, usage, pricing, growth, penetration, churn, expenses, customer acquisition and retention, roaming rates, minutes of use, mix of products and services and costs.
- A significant portion of TDS's wireless revenues is derived from customers who buy services through independent agents and dealers who market TDS's services on a commission basis. If TDS's relationships with these agents and dealers are seriously harmed, its wireless revenues could be adversely affected.
- TDS's investments in technologies which are unproven or for which success has not yet been demonstrated may not produce the benefits that TDS expects.
- An inability to obtain or maintain roaming arrangements with other carriers on terms that are acceptable to TDS could have an adverse effect on TDS's business, financial condition or results of operations.
- Changes in access to content for data or video services and access to new handsets being developed by vendors, or an inability to manage its supply chain or inventory successfully, could have an adverse effect on TDS's business, financial condition or results of operations.
- A failure by TDS's service offerings to meet customer expectations could limit TDS's ability to attract and retain customers and have an adverse effect on TDS's operations.
- A failure by TDS to complete significant network build-out and system implementation as part of its plans to improve the quality, coverage, capabilities and capacity of its network could have an adverse effect on its operations.
- A failure by TDS's wireless business to acquire adequate radio spectrum could have an adverse effect on TDS's business and operations.

- Financial difficulties of TDS's key suppliers or vendors, or termination or impairment of TDS's relationships with such suppliers or vendors, could result in a delay or termination of TDS's receipt of equipment, services or content, which could adversely affect TDS's business and results of operations.
- An increase in TDS's debt in the future could subject TDS to various restrictions and higher interest costs and decrease its cash flows and earnings.
- An inability to attract and/or retain management, technical, sales and other personnel could have an adverse effect on TDS's business, financial condition or results of operations.
- TDS has significant investments in entities that it does not control. Losses in the value of such investments could have an adverse effect on TDS's results of operations or financial condition.
- Changes in guidance or interpretations of accounting requirements, changes in industry practice, identification of errors or changes in management assumptions could require amendments to or restatements of financial information or disclosures included in this or prior filings with the SEC.
- Uncertainty of access to capital for telecommunications companies, deterioration in the capital markets, other changes in market conditions, changes in TDS's credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to TDS, which could require TDS to reduce its construction, development and acquisition programs.
- Changes in income tax rates, laws, regulations or rulings, or federal or state tax assessments could have an adverse effect on TDS's financial condition or results of operations.
- War, conflicts, hostilities and/or terrorist attacks or equipment failure, power outages, natural disasters or breaches of network or information technology security could have an adverse effect on TDS's business, financial condition or results of operations.
- Changes in general economic and business conditions, both nationally and in the markets in which TDS operates could have an adverse effect on TDS's business, financial condition or results of operations.
- Changes in facts or circumstances, including new or additional information that affects the calculation of potential liabilities for contingent obligations under guarantees, indemnities or otherwise, could require TDS to record charges in excess of amounts accrued in the financial statements, if any, which could have an adverse effect on TDS's financial condition or results of operations.
- A failure to successfully remediate existing material weaknesses in internal control over financial reporting in a timely manner or the identification of additional material weaknesses in the effectiveness of internal control over financial reporting could result in inaccurate financial statements or other disclosures or fail to prevent fraud, which could have an adverse effect on TDS's business, financial condition or results of operations.
- The restatement of financial statements by TDS and related matters, including resulting delays in filing periodic reports with the SEC, could have an adverse effect on TDS's credit rating, liquidity, financing arrangements, capital resources and ability to access the capital markets, including pursuant to shelf registration statements; could adversely affect TDS's listing arrangements on the American Stock Exchange and/or New York Stock Exchange; and/or could have other negative consequences, any of which could have an adverse effect on the trading prices of TDS's publicly traded equity and/or debt and/or on TDS's business, financial condition or results of operations.
- The pending SEC investigation regarding the restatement of TDS's financial statements could result in substantial expenses, and could result in monetary or other penalties.
- The possible development of adverse precedent in litigation or conclusions in professional studies to the effect that radio frequency emissions from handsets, wireless data devices and/or cell sites cause harmful health consequences, including cancer or tumors, or may interfere with various electronic medical devices such as pacemakers, could have an adverse effect on TDS's wireless business, financial condition or results of operations.
- TDS's assets are concentrated in the U.S. telecommunications industry. As a result, its results of operations may fluctuate based on factors related entirely to conditions in this industry.
- The market prices of TDS's Common Shares and Special Common Shares are subject to fluctuations due to a variety of factors.
- Any of the foregoing events or other events could cause revenues, customer additions, operating income, capital expenditures and/or any other financial or statistical information to vary from TDS's forward looking estimates by a material amount.
- Certain matters, such as control by the TDS Voting Trust and provisions in the TDS Restated Certificate of Incorporation, may serve to discourage or make more difficult a change in control of TDS.

TDS undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. Readers should evaluate any statements in light of these important factors.
