Being a mom is the ultimate job, but is so incredibly busy that moms need "48 hours a day." This year, don't just give mom flowers, but give her something she'll use every day. She will think of you every time she uses it and will forever be so grateful for her favorite child in helping make life easier (or giving her something fabulous to show her colleagues at work and BFF). Whether your mom loves to watch television, listen to music, enjoys storing all her family pictures and sharing them, enjoys cooking or loves the latest and greatest smartphones, there are so many amazing tech gifts to choose from, besides gifting her flowers. So, think outside the bouquet and see below are some of the best of the best that tech has to offer.
