Dan Timko Joins ThinkOn to Drive Aggressive U.S. Growth Plans

2/11/2021

ATLANTA--(BUSINESS WIRE)-- ThinkOn Inc. welcomed seasoned technology leader, Dan Timko, on January 11, 2021 as General Manager for their U.S. business.

Timko stepped into the newly created role with over ten years of leadership experience in wholesale cloud services to drive ThinkOn's accelerating growth strategy for the U.S. market.

"I am thrilled to join ThinkOn, not only because it is a leader in wholesale cloud services, but because of the company vision. ThinkOn's DNA revolves around being the single source of truth for data, which has quickly become one of the company's most valuable assets. I look forward to working closely with our strategic partners and alliances to grow ThinkOn's secure and innovative product offerings within the U.S."

Most recently, Dan was the Chief Strategy Officer for J2 Global's backup and disaster recovery business and headed product strategy with an emphasis on expanding their partnership with global strategic alliances. Dan's ability to identify strategic growth opportunities stems from founding and leading Cirrity, an early leader in channel-only secure cloud services throughout the U.S. Cirrity was acquired by Green Cloud Technologies to become the largest channel-only cloud services provider, where Dan served as Chief Technology Officer.

"With Dan as part of the ThinkOn team, we expect to see significant growth in the wholesale services market across the entire country," says Craig McLellan Founder and Chief Executive Officer. "Dan's experience and industry knowledge will be an incredible boost for both ThinkOn and our distribution partners who are working diligently to

provide their customers with innovative data management outcomes. His appointment will serve as further confirmation that we are committed to providing the most innovative services to the cloud data protection marketplace.”

ThinkOn Inc.: Where Data Thrives

ThinkOn is an exclusive wholesale provider of cloud infrastructure and data management services with over 150 partners and over 1,100 end subscribers in the commercial and public sector. Headquartered in Toronto, the company delivers true data availability, protection, and privacy with 20+ operating regions compliant to critical industry level certifications across the globe.
