NEWS RELEASE

DuPont Launches Digital Tool to Estimate Sustainability Impact from the Use of Water Treatment Technologies

2024-09-25

Third Party-Validated Water Solutions Sustainability Navigator Compares Technology Scenarios for Carbon Emissions, Waste & Wastewater Generated, Chemical and Land Requirements

WILMINGTON, Del., Sept. 25, 2024 /PRNewswire/ -- DuPont today introduced the Water Solutions Sustainability Navigator, the first digital tool designed to help users estimate key sustainability indicators when using various water treatment technologies—whether from DuPont or from other manufacturers.

The Water Solutions Sustainability Navigator enables users to compare how different potential water treatment scenarios impact sustainability indicators, including carbon emissions, chemicals used, wastewater produced, solid waste generated and footprint needed—with all calculations and indicators validated by a third-party verification performed by LRQA, a global assurance provider.

Carbon emission calculations are in conformance with ISO 14020:2001 and 14021:2016, and chemical, footprint, wastewater and solid waste calculations are in conformance with ISO 14020:2023 and ISO 14021:2016 + A1: 2021.

"While there are many factors that can influence the design and selection of water treatment technologies, the Water Solutions Sustainability Navigator will help users better understand the interconnection of sustainability-driven choices and the cost of operations," said Jeroen Bloemhard, Vice President and General Manager, DuPont Water Solutions. "By uncovering solutions that require fewer chemicals, less energy or a smaller land footprint, our

customers are not only reducing their impact on the planet, but also driving down the total cost of water."

Currently, the tool allows users to input four different water treatment technologies—reverse osmosis (RO), ultrafiltration (UF), ion exchange resins (IER) and membrane bioreactors (MBR) —used alone or in combination.

"By empowering customers to compare up to five different and independently verified scenarios, they have better insight into the total value and long-term savings derived through the selection of sustainability-advantaged water treatment technologies," said Veronica Garcia Molina, Global Marketing Leader, Industrial Water & Energy at DuPont Water Solutions. "Our customers are already beginning to harness the power of the Water Solutions Sustainability Navigator to help them make decisions that positively impact both their operations and their sustainability goals."

Interested users can request access by contacting their DuPont representative. DuPont Water Solutions will host a webinar on October 17 to share a live, hands-on demonstration of the Sustainability Navigator. Registration is free and open to the public at **www.dupontwatersolutions.com/sustainabilitynavigator**.

DuPont offers market-leading technologies to address a variety of challenges faced by water treatment municipalities, seawater desalination plants, and industrial water users, including the microelectronics industry, through a broad portfolio of membranes, resins and complete systems. The team is also innovating solutions that balance the world's growing water and energy demands, with products that help maximize the availability of electricity, lithium and green hydrogen.

In 2023, DuPont Water Solutions was named Water Technology Company of the Year, presented at the Global Water Awards, for innovating solutions to sustainably address the hardest global water challenges.

About DuPont

DuPont (NYSE: DD) is a global innovation leader with technology-based materials and solutions that help transform industries and everyday life. Our employees apply diverse science and expertise to help customers advance their best ideas and deliver essential innovations in key markets including electronics, transportation, construction, water, healthcare and worker safety. Cautionary Statement about Forward Looking Statements

This communication contains "forward-looking statements" within the meaning of the federal securities laws, including Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In this context, forward-looking statements often address expected future business and financial performance and financial condition, and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," "target," "stabilization," "confident," "preliminary," "initial," "drive," "innovate" and similar expressions and variations or negatives of these words.

Forward-looking statements address matters that are, to varying degrees, uncertain and subject to risks, uncertainties, and assumptions, many of which that are beyond DuPont's control, that could cause actual results to differ materially from those expressed in any forward-looking statements. Forward-looking statements are not representations or warranties or guarantees of future results.

Forward-looking statements include statements which relate to the purpose, ambitions, commitments, targets, plans, objectives, and results of DuPont's sustainability strategy, including its activities related to substances of concern. Forward-looking statements include statements related to the standards and measurement of progress against the company's sustainability goals, including metrics, data and other information, which are based on estimates and assumptions believed to be reasonable at the time. The actual conduct of the company's activities and results thereof, including the development, implementation, achievement or continuation of any goal, program, policy or initiative discussed or expected in connection with DuPont's sustainability strategy may differ materially from the statements made herein. The use of the word "material" for the purposes of statements regarding our sustainability strategy and goals should not be read as equating to any use of the word in the company's other disclosures or filings with the U.S. Securities and Exchange Commission.

On May 22, 2024, DuPont announced a plan to separate the company into three distinct, publicly traded companies. Under the plan, DuPont would execute the proposed separations of its Electronics and Water businesses in a tax-free manner to its shareholders leaving DuPont to continue as a diversified industrial company following completion of the separations. DuPont expects to complete the separations within 18 to 24 months of the announcement date. The separation transactions will not require a shareholder vote and are subject to satisfaction of customary conditions, including final approval by DuPont's Board of Directors, receipt of tax opinion from counsel, the filing and effectiveness of Form 10 registration statements with the U.S. Securities and Exchange Commission, applicable regulatory approvals and satisfactory completion of financing.

See DuPont's most recent annual report and subsequent current and periodic reports filed with the U.S. Securities and Exchange Commission for further description of risk factors that could impact the expectations or estimates implied by the Company's forward-looking statements, including (i) the ability to effect the separation transactions described above, and meet expectations regarding the timing, completion, accounting and tax treatments, and

intended benefits related to the separation transactions and other portfolio changes; (ii) risks and costs related to indemnification of legacy liabilities; (iii) risks and uncertainties related to operational and supply chain impacts or disruptions, including ability to offset increased costs, obtain raw materials, and meet customer needs, and (iv) other risks to DuPont's business and operations. Unlisted factors may also present significant additional obstacles to the realization of forward-looking statements. Consequences of material differences in results as compared with those anticipated in the forward-looking statements could include, among other things, business or supply chain disruption, operational problems, financial loss, legal liability to third parties, loss of key customers, reputational harm and similar risks, any of which could have a material adverse effect on DuPont's consolidated financial condition, results of operations, credit rating or liquidity. You should not place undue reliance on forward-looking statements, which speak only as of the date they are made. DuPont assumes no obligation to publicly provide revisions or updates to any forward-looking statements whether as a result of new information, future developments or otherwise, should circumstances change, except as otherwise required by securities and other applicable laws.
