"The fourth quarter was a strong conclusion to the year across multiple fronts. From a topline performance perspective, we ended 2024 on a high note - with net revenue showing positive year-over-year growth. These

results enabled us to drive nearly \$100 million dollars of adjusted EBITDA in the quarter, and deliver on our goal of approximately 50% year-over-year dollar growth for 2024," said Niraj Shah, CEO, co-founder and co-chairman, Wayfair.

Shah continued, "Our strong financial performance enabled us to tap into the high yield markets for the first time, putting us in the strongest balance sheet position in many years. We're making smart, high return investments across the business, and at the same time remain committed to growing adjusted EBITDA dollars year-over-year. We are confident this approach sets us up well for a compelling payoff over 2025 and are excited to bring all of our stakeholders with us on this next leg of the Wayfair journey."

Other Fourth Quarter Highlights

- Active customers totaled 21.4 million as of December 31, 2024, a decrease of 4.5% year over year
- LTM net revenue per active customer was \$555 as of December 31, 2024, an increase of 3.4% year over year

⁽¹⁾ The number of active customers represents the total number of individual customers who have purchased at least once directly from our sites during the preceding twelve-month period. The change in active customers in a reported period captures both the inflow of new customers as well as the outflow of existing customers who have not made a purchase in the last twelve months. We view the number of active customers as

well as the outflow of existing customers who have not made a purchase in the last twelve months. We view the number of active customers as a key indicator of our growth.

(2) LTM net revenue per active customer represents our total net revenue in the last twelve months divided by our total number of active customers for the same preceding twelve-month period. We view LTM net revenue per active customer as a key indicator of our customers' purchasing patterns, including their initial and repeat purchase behavior.

(3) Orders delivered represent the total orders delivered in any period, inclusive of orders that may eventually be returned. As we ship a large volume of packages through multiple carriers, actual delivery dates may not always be available, and as such we estimate delivery dates based on historical data. We recognize net revenue when an order is delivered, and therefore orders delivered, together with average order value, is an indicator of the net revenue we expect to recognize in a given period. We view orders delivered as a key indicator of our growth.

(4) We define average order value as total net revenue in a given period divided by the orders delivered in that period. We view average order value as a key indicator of the mix of products on our sites, the mix of offers and promotions and the purchasing behavior of our customers.

Non-GAAP Financial Measures

To supplement our condensed consolidated financial statements presented in accordance with generally accepted accounting principles ("GAAP"), this earnings release and the accompanying tables and the related earnings conference call contain certain non-GAAP financial measures, including Adjusted EBITDA, Adjusted EBITDA Margin, Free Cash Flow, Adjusted Diluted Earnings or Loss per Share and Net Revenue Constant Currency Growth. We use these non-GAAP financial measures internally in analyzing our financial results and believe they are useful to investors, as a supplement to GAAP measures, in evaluating our ongoing operational performance. We have provided a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measure in this earnings release.

We calculate Adjusted EBITDA as net income or loss before depreciation and amortization, equity-based compensation and related taxes, interest income or expense, net, other income or expense, net, provision or benefit for income taxes, net, non-recurring items and other items not indicative of our ongoing operating performance. Adjusted EBITDA Margin is calculated by dividing Adjusted EBITDA by Net Revenue. We disclose Adjusted EBITDA because it is a key measure used by our management and board of directors to evaluate our operating performance, generate future operating plans and make strategic decisions regarding the allocation of capital. In particular, we believe the exclusion of certain expenses in calculating Adjusted EBITDA facilitates operating performance comparisons on a period-to-period basis as these costs may vary independent of business performance. For instance, we exclude the impact of equity-based compensation and related taxes as we do not consider this item to be indicative of our core operating performance. Investors should, however, understand that equity-based compensation and related taxes will be a significant recurring expense in our business and an important part of the compensation provided to our employees. Accordingly, we believe that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors.

We calculate Free Cash Flow as net cash provided by or used in operating activities less net cash used to purchase property and equipment and site and software development costs (collectively, "Capital Expenditures"). We disclose Free Cash Flow because it is an important indicator of our business performance as it measures the amount of cash we generate. Accordingly, we believe that Free Cash Flow provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management.

We calculate Adjusted Diluted Earnings or Loss per Share as net income or loss plus equity-based compensation

and related taxes, provision or benefit for income taxes, net, non-recurring items, other items not indicative of our ongoing operating performance, and, if dilutive, interest expense associated with convertible debt instruments under the if-converted method divided by the weighted-average number of shares of common stock used in the computation of diluted earnings or loss per share. Accordingly, we believe that these adjustments to our adjusted diluted net income or loss before calculating per share amounts for all periods presented provide a more meaningful comparison between our operating results from period to period.

We calculate Net Revenue Constant Currency Growth by translating the current period local currency net revenue by the currency exchange rates used to translate the financial statements in the comparable prior-year period. We disclose Net Revenue Constant Currency Growth because it is an important indicator of our operating results. Accordingly, we believe that Net Revenue Constant Currency Growth provides useful information to investors and others in understanding and evaluating trends in our operating results in the same manner as our management.

We calculate forward-looking non-GAAP financial measures based on internal forecasts that omit certain amounts that would be included in forward-looking GAAP financial measures. We do not attempt to provide a reconciliation of forward-looking non-GAAP financial measures to forward looking GAAP financial measures because forecasting the timing or amount of items that have not yet occurred and are out of our control is inherently uncertain and unavailable without unreasonable efforts. Further, we believe that such reconciliations would imply a degree of precision and certainty that could be confusing to investors. Such items could have a substantial impact on GAAP measures of financial performance.

The non-GAAP financial measures have limitations as analytical tools. We do not, nor do we suggest that investors should consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Investors should also note that the non-GAAP financial measures we use may not be the same non-GAAP financial measures and may not be calculated in the same manner as that of other companies, including other companies in our industry.

The following table reflects the reconciliation of net income or loss to Adjusted EBITDA and Adjusted EBITDA margin for each of the periods indicated:
