

Quidel Receives FDA Clearance and CLIA Waiver for Its Point-of-Care Sofia® 2 Instrument for Use with Sofia Strep A+ Assay

December 21, 2017

SAN DIEGO--(BUSINESS WIRE)--Dec. 21, 2017-- **Quidel Corporation (NASDAQ: QDEL)**, a provider of rapid diagnostic testing solutions, cellular-based virology assays and molecular diagnostic systems, announced today it has received 510(k) clearance and Clinical Laboratory Improvements Amendments (CLIA) waiver from the United States Food and Drug Administration (FDA) for its Sofia Strep A+ Fluorescent Immunoassay (FIA) to be used with the Sofia 2 Fluorescent Immunoassay Analyzer for the rapid detection of infections by Group A Streptococcus bacteria. These bacteria are one of the more common causes of acute upper respiratory tract infection.

Sofia 2 is Quidel's next-generation version of its best-selling Sofia instrumented immunoassay diagnostic solution that addresses the specific testing needs of the decentralized point-of-care (POC) market. Sofia 2 utilizes the original Sofia's fluorescent chemistry design while improving upon the graphical user interface and optics system to provide an accurate, automated and objective result in 5 minutes.

Sofia 2 integrates a barcode scanner and wireless connectivity within a smaller footprint than the legacy Sofia instrument. The next-generation Sofia system also comes connected to Virena®, Quidel's data management system, which provides aggregated, de-identified testing data in near real-time.

The Sofia Strep A+ assay employs advanced lateral flow and immunofluorescence technologies to provide enhanced clinical sensitivity for Group A Streptococcus, one of the more serious respiratory diseases in children and seniors. These technologies help ensure a reliable, objective, rapid, and accurate diagnostic result. Early diagnosis and treatment of Group A Streptococcal pharyngitis has been shown to reduce the severity of symptoms and serious complications such as rheumatic fever and glomerulonephritis.^{1,2}

"With the clearance of Sofia Strep A+, Sofia 2 now provides clinicians at the point-of-care with a powerful diagnostic tool that quickly and accurately diagnoses three of the more common respiratory diseases: Influenza A+B, RSV and Strep A. We believe that the Sofia 2 solution is a perfect fit for the specific needs of the point-of-care space, especially as we continue to develop and add incremental assays to the Sofia 2 ecosystem," said Douglas Bryant, president and chief executive officer of Quidel Corporation. "Sofia 2 will build on the successful legacy of our original Sofia flagship product by expanding our instrument placements into the smaller, lower volume physician offices as well as the higher volume health systems, while also significantly growing our Virena wireless coverage throughout the country."

Sofia Strep A+ is the third CLIA-waived assay available on the Sofia 2 system. Sofia 2 is CLIA-waived for use with the Sofia Influenza A+B assay as well as the Sofia RSV assay, for the detection of Respiratory Syncytial Virus.

About Quidel Corporation

Quidel Corporation serves to enhance the health and well-being of people around the globe through the development of diagnostic solutions that can lead to improved patient outcomes and provide economic benefits to the healthcare system. Marketed under the Sofia®, QuickVue®, D3® Direct Detection, Thyretain®, Triage® and InflammDry® leading brand names, as well as under the new Solana®, AmpliVue® and Lyra® molecular diagnostic brands, Quidel's products aid in the detection and diagnosis of many critical diseases and conditions, including, among others, influenza, respiratory syncytial virus, Strep A, herpes, pregnancy, thyroid disease and fecal occult blood. Quidel's recently acquired Triage® system of tests comprises a comprehensive test menu that provides rapid, cost-effective treatment decisions at the point-of-care (POC), offering a diverse immunoassay menu in a variety of tests to provide you with diagnostic answers for quantitative BNP, CK-MB, d-dimer, myoglobin, troponin I and qualitative TOX Drug Screen. Quidel's research and development engine is also developing a continuum of diagnostic solutions from advanced immunoassay to molecular diagnostic tests to further improve the quality of healthcare in physicians' offices and hospital and reference laboratories. This press release contains forward-looking statements within the meaning of the federal securities laws that involve material risks, assumptions and uncertainties. Many possible events or factors could affect our future financial results and performance, such that our actual results and performance may differ materially from those that may be described or implied in the forward-looking statements. As such, no forward-looking statement can be guaranteed. Differences in actual results and performance may arise as a result of a number of factors including, without limitation, fluctuations in our operating results resulting from seasonality, the timing of the onset, length and severity of cold and flu seasons, government and media attention focused on influenza and the related potential impact on humans from novel influenza viruses, adverse changes in competitive conditions in domestic and international markets, changes in sales levels as it relates to the absorption of our fixed costs, lower than anticipated market penetration of our products, the reimbursement system currently in place and future changes to that system, changes in economic conditions in our domestic and international markets, the quantity of our product in our distributors' inventory or distribution channels, changes in the buying patterns of our distributors, and changes in the healthcare market and consolidation of our customer base; our development and protection of intellectual property; our development of new technologies, products and markets; our reliance on a limited number of key distributors; our reliance on sales of our influenza diagnostics tests; our ability to manage our growth strategy; our ability to integrate companies or technologies we have acquired or may acquire, including integration and transition risks, the ability to achieve anticipated financial results and synergies, and effects of disruptions or threatened disruptions to our relationships, or those of the acquired businesses, with distributors, suppliers, customers and employees; intellectual property risks, including but not limited to, infringement litigation; our debt service requirements; our inability to settle conversions of our Convertible Senior Notes in

cash; the effect on our operating results from the trigger of the conditional conversion feature of our Convertible Senior Notes; the possibility that we may incur additional indebtedness; our need for additional funds to finance our operating needs; volatility and disruption in the global capital and credit markets; acceptance of our products among physicians and other healthcare providers; competition with other providers of diagnostic products; adverse actions or delays in new product reviews or related to currently-marketed products by the FDA or any loss of previously received regulatory approvals or clearances; changes in government policies; compliance with other government regulations, such as safe working conditions, manufacturing practices, environmental protection, fire hazard and disposal of hazardous substances; third-party reimbursement policies; our ability to meet demand for our products; interruptions in our supply of raw materials; product defects; business risks not covered by insurance and exposure to other litigation claims; interruption to our computer systems; competition for and loss of management and key personnel; international risks, including but not limited to, compliance with product registration requirements, exposure to currency exchange fluctuations and foreign currency exchange risk sharing arrangements, longer payment cycles, lower selling prices and greater difficulty in collecting accounts receivable, reduced protection of intellectual property rights, political and economic instability, taxes, and diversion of lower priced international products into U.S. markets; dilution resulting from future sales of our equity; volatility in our stock price; provisions in our charter documents, Delaware law and our Convertible Senior Notes that might delay or impede stockholder actions with respect to business combinations or similar transactions; and our intention of not paying dividends. Forward-looking statements typically are identified by the use of terms such as "may," "will," "should," "might," "expect," "anticipate," "estimate," "plan," "intend," "goal," "project," "strategy," "future," and similar words, although some forward-looking statements are expressed differently. The risks described in reports and registration statements that we file with the Securities and Exchange Commission (the "SEC") from time to time, should be carefully considered. You are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis only as of the date of this press release. Except as required by law, we undertake no obligation to publicly release the results of any revision or update of these forward-looking statements, whether as a result of new information, future events or otherwise.
