

KB Cares and Community Service

Caring for our communities means taking special care of the most vulnerable among us. The KB Cares program aims to support local charitable organizations across the country, with a special focus on supporting causes in the areas of housing and shelter, women and children, and the local environment.

In collaboration with our team of passionate employees and trade partners, we strive to create positive change in the areas in which we live, work and build homes. Together, we can build stronger relationships with external stakeholders and business partners, and demonstrate good corporate citizenship. We believe that our involvement helps contribute to more robust, viable communities for all of us.

In 2019, the KB Cares initiative has provided time and donations to over 115 important local organizations and causes.

Some of the organizations benefitting from this work include Ronald McDonald House Charities®, Make-A-Wish® Foundation, Shriners Hospitals®, TreePeople and Riverside University Health System Medical Center.

Welcoming Our Wounded Warriors Home

In 2019 and 2020, KB Home partnered with Jared Allen's Homes for Wounded Warriors to build a personalized, mortgage-free new home for Master Sergeants Daniel "Reese" and Kyle Hines. The Hines are both veterans of the United States Air Force who sustained combat-related injuries in Afghanistan and Iraq, respectively. In February 2020, the Hines family received the keys to their new home, designed to accommodate their current and future needs.

KB Home built a single-story home with accessibility features that adapt to the lifestyle needs of the Hines family and their three service dogs. These features include wider interior and exterior entries, level or zero-edge thresholds, a roll-in master bath shower, and adjusted-height light switches and electrical outlets. The 2,300-square-foot, three-bedroom, two-bath home is located at

Mirabel, a KB Home community in Boerne, Texas, approximately 15 miles northwest of San Antonio. The Hines family worked directly with the KB Home Design Studio team to choose features and fixtures to personalize their new home.

While we can't change what happened to them in Afghanistan or Iraq, we can provide their family with a new home personalized to their needs. We are honored to be part of thanking Reese and Kyle for their extraordinary service and sacrifice for our country and are delighted to welcome them home.
