## EORTC Extends Medidata Partnership to Help Power New Phase of Oncology Research

2024-09-11

Medidata technology deployed to increase access to and transform the patient experience for cancer trials

LONDON--(BUSINESS WIRE)-- **Medidata**, a Dassault Systèmes brand and leading provider of clinical trial solutions to the life sciences industry, and the European Organisation for Research and Treatment of Cancer (EORTC), announced today a four-year extension to their partnership. The extended relationship will enable EORTC to further increase patient access to oncology clinical trials, make trial participation easier, and help to deliver new treatments to the market faster. EORTC is now leveraging 13 Medidata solutions, enabling their researchers to access and manage all clinical data in a single place and offering patients a seamless trial experience.

Vassilis Golfinopoulos, headquarters director, EORTC, said, "We chose the **Medidata Platform** to further expand our data management and patient engagement capabilities based on our years of experience working together. This partnership will enhance our support for oncology researchers as we collaborate on innovative ways of working with clinical trial data in the future."

"This expansion benefits patients through an improved clinical trial experience, engaging with study activities on their personal mobile devices, while researchers will have the ability to make better decisions faster," said Janet Butler, executive vice president, head of global sales, Medidata. "The integration of additional solutions, including **Medidata Rave CTMS** and **Medidata Rave eTMF**, will empower EORTC researchers with higher data quality, allowing them to shorten study timelines and deliver safer oncology trials for patients."

For EORTC the expanded partnership also allows the exploration of a joint research and data collaboration with

**Medidata AI** solutions in pursuit of improved standards of cancer care.

## About Medidata

Medidata is powering smarter treatments and healthier people through digital solutions to support clinical trials. Celebrating 25 years of ground-breaking technological innovation across more than 34,000 trials and 10 million patients, Medidata offers industry-leading expertise, analytics-powered insights, and the largest patient-level historical clinical trial data set in the world. More than 1 million registered users across approximately 2,200 customers trust Medidata's seamless, end-to-end platform to improve patient experiences, accelerate clinical breakthroughs, and bring therapies to market faster. A Dassault Systèmes brand (Euronext Paris: FR0014003TT8, DSY.PA), Medidata is headquartered in New York City and has been recognized as a Leader by Everest Group and IDC.
