

Ecolomondo Retains ITG for Market Liquidity Services

9/29/2023

MONTREAL--(BUSINESS WIRE)-- **Ecolomondo Corporation** (TSXV: ECM) (OTC: ECLMF) (the “**Company**” or “**Ecolomondo**”), a cleantech company specializing in the commercialization of its Thermal Decomposition Process (“**TDP**”) proprietary recycling technology and the global deployment of TDP turnkey facilities, announces that, subject to regulatory approval, it has retained Independent Trading Group (ITG), Inc. (“**ITG**”) to provide market making services to the Company in compliance with the policies and guidelines of the TSX Venture Exchange (“**TSXV**”) and other applicable legislation.

ITG will trade shares of Ecolomondo Corporation on the TSXV for the purposes of maintaining a reasonable and orderly market, and improving the liquidity of the companies’ common shares.

Under the agreement dated September 27, 2023, the Company will pay ITG \$5,000 for fees plus applicable taxes per month. ITG will be responsible for the costs it incurs in buying and selling the Company's shares, and no third party will be providing funds or securities for the market making activities. The engagement has a term of one month and will renew for subsequent one-month terms, at \$5,000 per month, unless either party provides 15 days written notice prior to the end of a term. The Company and ITG have an arm's length relationship, but ITG and/or its clients may have an interest, directly or indirectly, in the securities of the Company. The agreement is principally for the purposes of maintaining market stability and liquidity for the Company's common shares and is not a formal market making agreement. There are no performance factors contained in the agreement between ITG and the Company and ITG will not receive any shares or options from the Company as compensation for services it will render.

About Independent Trading Group (ITG), Inc.

ITG is a Toronto-based CRO dealer-member that specializes in market making, liquidity provision, agency execution, ultra-low latency connectivity, and bespoke algorithmic trading solutions. Established in 1992, with a focus on market structure, execution and trading, ITG has leveraged its own proprietary technology to deliver high quality liquidity provision and execution services to a broad array of public issuers and institutional investors. For further information regarding ITG, please visit ITG's website at <https://independent-trading-group.com>.

About Ecolomondo Corporation

Ecolomondo Corporation is a Canadian cleantech company that prides itself after its proprietary Thermal Decomposition technology TDP which is headquartered in Québec, Canada. It has a 25-year history and during this time has been focused on its development of its technology and the deployment of TDP turnkey facilities. TDP recovers high value re-usable commodities from scrap tire waste, notably rCB, oil, syngas, fiber and steel. Ecolomondo expects to be a leading player in the cleantech space and be an active contributor to the global circular economy. Ecolomondo trades on the TSX Venture Exchange under the symbol (TSXV:ECM). To learn more, visit www.ecolomondo.com

About TDP

The TDP process is technically proven and more advanced than most other pyrolysis technologies. Over the years, our Technological teams were able to overcome all uncertainties that plagued most competitors especially in these areas: pre-filtration, reactor cooling, reactor rotation, water recycling, processing of rCB, (hydrocarbon removal), mass monitoring, heat curve development, humidity and water removal, safety testing, system automation, emissions control and monitoring.

TDP is Environmentally Friendly – CO2 Reduction

By producing rCB, TDP reduces GHG emissions by 90% versus the production of virgin carbon black. The production of rCB at the Hawkesbury and Shamrock facilities are expected to reduce CO2 emissions by 22,400 and 67,200 tons per year, respectively.

About the Hawkesbury Plant – A 2-Reactor TDP Facility

The Hawkesbury facility building is 46,200 sq.ft and has an impressive indoor clearance of 28 feet. It is state-of-the-art and houses 4 main production departments, tire shredding, thermal decomposition, recycled carbon black refining and oil fractionation. Once fully operational, this facility is expected to process a minimum of 12,786 metric tons of tire waste per year and produce 4,200 metric tons of recovered carbon black, 5,200 metric tons of oil, 1,430 metric tons of steel, 1,270 metric tons of process gas and 675 metric tons of fiber.

About the Shamrock Project – A 6-Reactor TDP Facility

Processing capabilities for the Shamrock facility is projected at 42,000 metric tons per year of end-of-life tires, yielding approximately 15,900 metric tons of recovered carbon black, 128,100 barrels of oil, 5,400 metric tons of steel, 2,550 metric tons of fiber and 4,800 metric tons of syngas; roughly three times the size of the Company's Hawkesbury (Ontario) plant output. Facility construction is expected to begin by the end of the fourth quarter of 2023 with completion expected by the end of the second quarter of 2025. Projected cost to build is approximately US \$93 million.

Our Mission, Vision & Strategy

Ecolomondo's mission is to be a contributing participant in a dynamic Circular Economy and to increase shareholder value by producing and supplying large quantities of recovered resources to be re-used in the manufacture of new products.

Ecolomondo's vision is to be a leading producer and reseller of recovered resources by building and operating TDP facilities, strategically located in industrialized countries, close to feedstock, labor and offtake clients.

Our strategy is to become a major global builder and operator of TDP turnkey facilities, for now specializing in the processing of ELTs. Our intent is to expand aggressively in North America and Europe. Our experience and modular technology should help us get there faster and better. We plan to keep performing ongoing research and development to ensure that Ecolomondo remains technologically advanced.

ISO Certification

The Company has obtained ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 certification of its Integrated Management System (IMS), which acknowledges Ecolomondo's commitment for quality, environmental impact and health and safety at work.

ISCC Certification

The Company received the International Sustainability and Carbon Certification ("ISCC") for its Hawkesbury TDP facility. ISCC is an independent Global Sustainability Certification System and offers chain-of-custody certification systems to ensure traceability and feedstock identity. It is an independent multi-stakeholder initiative and leading certification system supporting sustainable, fully traceable, deforestation-free and climate-friendly supply chains. Certifications by ISCC cover sustainable agricultural biomass, biogenic waste and residues, non-biological renewable materials and recycled carbon-based materials.

Environmental, Social & Governance (ESG)

On the social aspect the Company plans to measure global health and safety, injury rate and gender diversity, and finally in the corporate governance aspect, the Company is measuring ethics and anticorruption, ESG reporting and board independence.
