OnShift Launches “OnShift Schedule X”

9/27/2023

New scheduling technology will help healthcare facilities maximize workforce goals and grow demand

CLEVELAND--(BUSINESS WIRE)-- **OnShift**, a **ShiftKey** company, today launched **OnShift Schedule X**, a modern scheduling technology that provides critical data and actionable insights to drive strategic workforce decisions at scale. OnShift Schedule X's intuitive workforce technology maximizes shift coverage, accelerates growth, and brings healthcare facilities data – and access to a licensed talent pool – into a singular, intuitive system to optimize resources and fill shifts.

“Workforce and scheduling questions are top of mind, both for facility directors on-the-ground and for executives concerned about the overall health of their business. We've spent more than a year listening to customer feedback and developed a scheduling technology to meet their needs,” said Thomas Fredell, Chief Product Officer, ShiftKey. “OnShift Schedule X's tech-forward, data-driven insights provide facilities with optimized scheduling strategies and help them to drive scale – alleviating the pressure of exclusively meeting scheduling and patient needs through the facility's own employees.”

Built on a state-of-the-art technology platform, OnShift will be able to quickly adapt the product to grow and evolve alongside customer needs. OnShift Schedule X propels facilities into the future by delivering the simplicity, flexibility and insights needed to drive success. Initial results from over 150 communities include up to 300 hours of scheduling time saved annually. Key features include:

- Recurring schedule patterns that simplify schedule creation, saving time
- Multi-week power view that maximizes visibility into open shifts

- Intuitive design that drives adoption with average scheduler training time of 2.5 hours per community
- Fully integrated with time and attendance for additional workforce insights

Our award-winning integrated solution, SAMI (Scheduling Automation Marketplace Integration), is ready for use with OnShift Schedule X. The integration comes at no additional cost for facilities using the ShiftKey and OnShift platforms. For more information on OnShift Schedule X, or to schedule a demo, please visit:
