

Paystand Integrates with Microsoft Dynamics 365 Business Central for One-Click Accounts Receivable Automation

10/9/2023

Cloud-based system delivers enterprise finance faster time-to-cash with no fees

SCOTT VALLEY, Calif.--(BUSINESS WIRE)-- **Paystand**, the fastest-growing, blockchain-enabled B2B payments platform, today announced its new integrated solution for the Microsoft Dynamics 365 Business Central portfolio of intelligent business applications. Now, SMB finance departments may eliminate slow manual AR processes to reduce days sales outstanding (DSO) and speed time-to-cash, all with zero fees.

This integration gives Microsoft Dynamics 365 Business Central customers a modern Payments-as-a-Service mode that is fully digital and intuitive. Users on the platform can now incentivize their customers to pay sooner using automated Paystand features such as the embedded “pay now” buttons.

“Accounting teams need faster and more efficient approaches to help them improve margins and operating cash flow. With the new integration, Paystand provides Microsoft Dynamics users one-click features that eliminate expensive and error-prone processes,” said Jeremy Almond, CEO and co-founder, Paystand. “By democratizing access to blockchain applications we empower businesses to escape financial gravity, thrive without unnecessary fees, and emerge as pioneers of a digitally transformed financial era.”

Delivered as a native integration to Microsoft Dynamics 365 Business Central, Paystand’s technology:

- Accesses **Paystand’s Bank-to-Bank Network** – the only zero-fee, real-time payment rail available for business
- Unlocks Paystand’s profitability behavior model

- Creates smart invoices with embedded payment options

“The integration with Microsoft further expands Paystand’s vision for cashless B2B payments by providing all businesses within the Microsoft Dynamics ecosystem a way to seamlessly automate receivables and revenue,” said Bindu Gakhar, head of product at Paystand. “Paystand saves businesses across multiple industries 50% or more on the cost of receivables by eliminating transaction fees and also speeds up time to cash by up to 60%, helping them scale and increase ROI significantly.”

The Microsoft integration is Paystand’s third native integration, expanding its proven record and its reach to SMB finance departments. Paystand was first integrated with NetSuite, followed by a Sage integration in 2021.

Paystand will offer early access to the new integration at the **Microsoft Dynamics User Group Conference** in Charlotte, N.C. later this month, and the integration is expected to be available in AppSource later this year. This invitation will also be open to Microsoft Dynamics VAR Partners to onboard them inside Paystand’s partnership program.

At Community Summit, visit Paystand at booth #1947.

About Paystand

Paystand is on a mission to create an open commercial finance system, starting with a zero-fee network for B2B payments. Paystand is the largest B2B receivables, payables and payments network running on a commercial blockchain. The company makes it possible to digitize receivables, automate processing, reduce time-to-cash, eliminate transaction fees, and enable new revenue. The AR/AP solutions are designed for both U.S. and LATAM businesses of all sizes. For more information about Paystand, visit us at **paystand.com**.
