

NEWS RELEASE

Probe Gold Advances Permitting for Novador Project

2024-09-11

Highlights:

- Probe Gold has officially received guidelines from both federal and provincial governments specifying the required elements for the impact study, necessary to secure permitting for the Novador project.
- The Company will now conduct the Impact Study based on these guidelines, which will be used by both governments to carry out environmental analyses and grant the necessary permits for the project.
- This milestone concludes the planning phase and initiates the impact assessment phase, a crucial step in advancing the Novador project toward permitting.

TORONTO, Sept. 11, 2024 (GLOBE NEWSWIRE) -- PROBE GOLD INC. (TSX: PRB) (OTCQB: PROBF) ("Probe" or the "Company") is pleased to announce that the Company has received the tailored impact statement guidelines for the impact assessment from the Impact Assessment Agency of Canada (IAAC) at the federal level and the guideline for the impact study from the Ministry of the Environment, the Fight Against Climate Change, Wildlife and Parks (MELCCFP) at the Quebec provincial level. These guidelines clearly outline the requirements Probe must meet to secure permits for the Novador project. The receipt of these guidelines follows Probe's earlier filings of the Initial Project Description and Detailed Project Description with the IAAC at the federal level, as well as the official submission of the "Project Notice" with the MELCCFP at the provincial level.

The next step in the permitting process is to initiate the impact study, which IAAC will use, along with other collected information, to create an impact assessment report. At the provincial level, the impact study will have all necessary information for the environmental review and government decisions.

Figure 1: Federal and Provincial Environmental Permitting Process

Probe Gold will work closely with the IAAC and the MELCCFP throughout the rigorous environmental assessment process to ensure the responsible execution of the Novador project. Indigenous groups and other stakeholders will play an important role in the development of the project, as their collaboration throughout the development of the project is essential.

About Probe Gold:

Probe Gold Inc. is a leading Canadian company focused on the acquisition, exploration, and development of highly prospective gold properties. The Company is well-funded and dedicated to exploring and developing high-quality gold projects. Notably, it owns 100% of its flagship asset, the multimillion-ounce Novador Gold Project in Quebec, as well as an early-stage Detour Gold Quebec project. Probe controls a large land package of approximately 1685-square-kilometres of exploration ground within some of the most prolific gold belts in Quebec. The Company's recent Novador updated Preliminary Economic Assessment outlines a robust mining plan with an average annual gold production of 255,000 ounces over a 12.6-year mine life.

On behalf of Probe Gold Inc.,

Dr. David Palmer,
President & Chief Executive Officer

Forward-Looking Statements

Neither TSX nor its Regulation Services Provider (as that term is defined in the policies of the TSX) accepts responsibility for the adequacy or accuracy of this release. This News Release includes certain "forward-looking statements" which are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the

Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management's expectations. Risks, uncertainties, and other factors involved with forward-looking information could cause actual events, results, performance, prospects, and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward looking information in this news release includes, but is not limited to, the Company's objectives, goals or future plans, statements, exploration results, potential mineralization, the estimation of mineral resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, political risks, inability to fulfill the duty to accommodate First Nations and other indigenous peoples, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital and operating costs varying significantly from estimates and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company's public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.
