

NEWS RELEASE

## ROME Therapeutics to Participate in 2024 Cantor Global Healthcare Conference

2024-09-11

BOSTON, Sept. 11, 2024 (GLOBE NEWSWIRE) -- **ROME Therapeutics**, a biotechnology company harnessing the power of the dark genome to develop breakthrough medicines for serious diseases, today announced that Rosana Kapeller, M.D., Ph.D., President, CEO and Co-Founder of ROME, and members of the company's Senior Leadership Team, will participate in the Cantor Global Healthcare Conference on Wednesday, September 18, 2024 in New York, NY.

### About ROME

ROME Therapeutics is developing novel therapies for a range of serious diseases, including autoimmune disease, cancer, and neurodegeneration, by illuminating the role of the dark genome — the vast genomic expanse beyond the traditional genes, which includes virus-like repetitive elements and non-coding sequences — in human health and disease. Leveraging the company's unprecedented data sciences platform, ROME has built a deep pipeline of therapies targeting the dark genome. To lead this exploration, ROME has assembled a team of world-class leaders in drug discovery and development across immunology, oncology, chemistry, and machine learning. ROME is based in Boston, Mass. For more information, please visit [www.rometx.com](http://www.rometx.com).
