Sonendo Announces EndoCon 2023, An Endodontic Conference on Practice Growth

10/5/2023

The Event Will Offer Lectures, Workshops and Training Sessions for Clinicians, Staff and Postgrad Residents

LAGUNA HILLS, Calif.--(BUSINESS WIRE)-- **Sonendo**, Inc. (NYSE: SONX), a leading dental technology company and developer of the GentleWave® System, today announced its third **EndoCon**, a comprehensive program covering the latest in endodontic technology and innovation. Taking place in San Diego at the Manchester Grand Hyatt from Oct. 5-7, the three-day event will offer lectures, workshops and training sessions for clinicians, staff and postgrad residents.

Offering something for everyone, EndoCon will give endodontists and their teams access to decades worth of experience and knowledge from master clinicians and endodontic thought leaders. The schedule is comprised of world-class clinical and practice management lectures, continuing education sessions and hands-on learning opportunities. The scientific, expert and keynote continuing education sessions will focus on compelling and forward-looking topics including growth mindset – the art and science of success, artificial intelligence (AI) in medical imaging, leveraging AI for business success, and modern AI pathology platform solutions.

"We remain committed to driving innovation and excellence in endodontics and supporting industry professionals as best we can," said Michael Smith, chief commercial officer at Sonendo. "EndoCon embodies our dedication to advancing the field and providing clinicians and their teams with the tools and knowledge they need to succeed and, most importantly, deliver exceptional patient care."

Additionally, the event provides an opportunity for attendees to network and socialize, with special events spanning a welcome reception, resident and program director luncheon and Women in Endodontics luncheon. The complete

schedule can be viewed [here](#).

EndoCon attendees will also learn more about how the GentleWave System can support practice growth, streamline workflows and enhance overall patient care. For additional information on EndoCon, visit [here](#).

About Sonendo

Sonendo is a commercial-stage medical technology company focused on saving teeth from toothdecay, the most prevalent chronic disease globally. Sonendo develops and manufactures the GentleWave® System, an innovative technology platform designed to treat tooth decay by cleaning and disinfecting the microscopic spaces within teeth without the need to remove tooth structure. The system utilizes a proprietary mechanism of action, which combines procedure fluid optimization, broad-spectrum acoustic energy and advanced fluid dynamics, to debride and disinfect deep regions of the complex root canal system in a less invasive procedure that preserves tooth structure. The clinical benefits of the GentleWave System when compared to conventional methods of root canal therapy include improved clinical outcomes, such as superior cleaning that is independent of root canal complexity and tooth anatomy, high and rapid rates of healing and minimal to no post-operative pain. In addition, the GentleWave System can improve the workflow and economics of dental practices. Sonendo is also the parent company of TDO Software, the developer of widely used endodontic practice management software solutions, designed to simplify practice workflow. TDO Software integrates practice management, imaging, referral reporting and CBCT imaging, and offers built-in communication with the GentleWave System.
