

Workspport Announces Successful Level 1 Tesla Charging with COR Battery Generator

2024-09-11

COR System Provides Seven Miles of Charge Power to Tesla Model 3 in Lab Test Data; Acts as an EV Range Extender with Unlimited Charge Power with Modular Batteries.

West Seneca, New York--(Newsfile Corp. - September 11, 2024) - Workspport Ltd. (NASDAQ: WKSP) ("Workspport" or the "Company"), a U.S.-based manufacturer and innovator of hybrid and clean energy solutions for the light truck, overlanding, and global consumer goods sectors, announces the successful lab test results of its **COR portable energy system** as a range extender for Tesla electric vehicles like the Model 3 and CyberTruck. The COR Hub + Battery, which carries over 1.7 kWh of power, was tested with a Tesla Model 3. Test data showed the capability of adding approximately seven miles of range as a Level 1 power source. Workspport views this development as a notable step forward for the Tesla community and electric vehicle ("EV") owners at large, addressing range anxiety, a key factor in broader EV adoption.

Designed for modular functionality, the COR system enables users to effectively integrate additional COR batteries, offering 1.5 kWh more power per battery. With each battery, one could Level 1 Charge a Tesla Model 3 an approximate additional 7 miles. **The Workspport COR** is intended to serve as a practical tool for power on the go at campsites, worksites, and in emergency situations. However, the Company anticipates that future iterations of the COR system will function as a range extender for Tesla and other EVs. The system will officially launch with an Alpha Release iteration later this September, entering a growing multi-billion-dollar market.

SOLIS & COR: A Powerful Microgrid Solution

In tandem with the COR battery, Workspport's **SOLIS solar tonneau cover** is designed to provide a fully off-grid

power solution for all type of users, including EV and ICE vehicle owners. The patented SOLIS cover is capable of charging the 1.5kWh COR battery up to 2-3 times per day with optimal sun conditions, offering a renewable source of mobile energy.

Level 2 Charging: In Progress

The Company is exploring strategic partnerships to develop battery powered Level 2 EV Charging Solutions, leveraging the SOLIS solar array to provide solar power to the battery banks of the Level 2 EV Charging systems. This technology would facilitate faster, on-the-go mobile battery charging for a wide range of EVs, including Tesla vehicles. More information about these partnerships is forthcoming.

Steven Rossi, CEO of Workspport, stated, "Our COR system's successful test with the Tesla Model 3 underscores the massive potential of this groundbreaking portable energy solution for the electric vehicle market and beyond. We are tackling range anxiety head-on, delivering reliable last-mile range extension. With the imminent launch of our SOLIS solar cover, the combination of the **COR and SOLIS** duo creates a powerful, clean energy microgrid, allowing users to harness solar power to be used anywhere - campsites, worksites, or emergency response. Based on our initial test results, we expect future iterations of the COR system to also function as an EV range extender. An EV Industry insider told me that EVs tend to run out of power only miles away from a grid-powered EV charge station. Our COR Mobile Battery Generator could provide essential miles required to arrive at a destination charger. Workspport is committed to launching our energy products soon, while also focusing on building lasting partnerships and securing long-term contracts with key industry leaders."

About Workspport

Workspport Ltd. (NASDAQ: WKSP), through its subsidiaries, designs, develops, manufactures, and owns the intellectual property on a variety of tonneau covers, solar integrations, and NP (Non-Parasitic), hydrogen-based true green energy solutions for the sustainable, clean energy, and automotive industries. Workspport has an active partnership with Hyundai for the SOLIS Solar cover. Additionally, Workspport's hard-folding cover, designed and manufactured in-house, is compatible with RAM, Chevrolet, and GMC models from General Motors, as well as Ford, Jeep, Nissan, and Toyota pickup trucks. Workspport seeks to capitalize on the growing shift of consumer mindsets towards clean energy integrations with its proprietary solar solutions, mobile energy storage systems (ESS), and NP (Non-Parasitic), Hydrogen-based technology. Forward-Looking Statements

The information contained herein may contain "forward-looking statements." Forward-looking statements reflect the current view about future events. When used in this press release, the words "anticipate," "believe," "estimate," "expect," "future," "intend," "plan," "project," "should," or the negative of these terms and similar expressions, as they relate to us or our management, identify forward-looking statements. These statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: (i) supply chain delays; (ii)

acceptance of our products by consumers; (iii) delays in or nonacceptance by third parties to sell our products; and (iv) competition from other producers of similar products. More detailed information about the Company and the risk factors that may affect the realization of forward-looking statements is set forth in the Company's filings with the SEC, including, without limitation, our Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q. Investors and security holders are urged to read these documents free of charge on the SEC's web site at **www.sec.gov**. As a result of these matters, changes in facts, assumptions not being realized or other circumstances, the Company's actual results may differ materially from the expected results discussed in the forward-looking statements contained in this press release. The forward-looking statements made in this press release are made only as of the date of this press release, and the Company undertakes no obligation to update them to reflect subsequent events or circumstances.
