## Xsolla Announces Acquisition of AcceleratXR, a Multi-Player Platform for Games

9/27/2023

Leading a Transformative Shift in Cross-Play Technology Through Strategic Partnership

LOS ANGELES--(BUSINESS WIRE)-- Xsolla, a global video game commerce company, announces its strategic acquisition of AcceleratXR, a provider of in-game server backend technology designed for live service games and software. The AcceleratXR platform and network engine offer robust scalability, supporting experiences across multiple platforms and devices. It functions similarly to an operating system optimized for modern interactive digital content.

AcceleratXR technology equips development teams—regardless

of size or skill level—to create cutting-edge online and multiplayer experiences on a grand scale. Boasting more than 20 specialized systems, such as live cloud scripting, AcceleratXR is the most flexible and feature-packed platform for developing games, digital entertainment, the metaverse, and more.

This acquisition underscores a transformative shift towards marketing comprehensive cross-play and cross-pay solutions available out of the box, allowing players to maintain their identity and access their purchase history across any platform they want to play on - PC, web, console, mobile, and VR.

"Today, we welcome AcceleratXR, a significant new addition to the Xsolla game tech family," said Chris Hewish, CEO of Xsolla. "AcceleratXR brings robust game server backend technology capable of catering to various platforms - from web to PC to console to mobile. It marks a promising stride in our journey to redefine cross-play technology."

"We're thrilled about the acquisition by Xsolla, as it supercharges our core mission of making game development tools accessible to all and enhancing social experiences within gaming communities," said Jean-Philippe Steinmetz, Co-Founder of AcceleratXR. "This momentous step forward presents promising opportunities to reshape the global gaming industry."
