

# Advenica receives order worth 1,5 MSEK from Finnish authority

Advenica has received an order from a Finnish authority. The order concerns Advenica's File Security Screener solution and is worth 1,5 MSEK.

To remain efficient and secure, systems must be updated regularly. An effective way of ensuring secure import of software updates is to run the entire package through a scanning and sanitation system, such as Advenica's File Security Screener solution. This way you can prevent data breaches, maintain system integrity and ensure business continuity.

An order for Advenica's File Security Screener solution has now been received from a Finnish authority. The order will be delivered during Q4 2024.

*With the File Security Screener solution organisations with high security environments can protect networks from data leakage and sanitise all files from malware before import.*

*Eka Ranta, Country Manager Advenica Oy*
