eHub Integrates with Logiwa IO to Offer Customers Improved Shipping Solutions and Industry-Leading Rates

2024-09-11

CHICAGO--(BUSINESS WIRE)-- Logiwa Inc., a leading provider of cloud-based Fulfillment Management Systems (FMS) for high-volume businesses, is excited to announce a new integration with eHub, an innovative shipping API platform. This partnership offers Logiwa IO customers access to **eHub**'s advanced analytics, dynamic API and competitive shipping rates directly from their Logiwa IO accounts, streamlining the shipping process and helping reduce costs.

As the industry embraces digital transformation and data-driven decision-making, this integration comes at a crucial time. It allows companies to automate processes more effectively, addressing the ongoing need for efficiency and improved service in the shipping and logistics sector.

Logiwa IO users can now handle all shipping tasks from a single platform. They can rate shop, create and void labels, and generate end-of-day reports without switching systems. The eHub integration introduces essential shipping features to Logiwa IO, including domestic label creation, management of multiple package types and shipping services, and direct label printing from the Packing Station. This streamlined approach enhances operational efficiency and simplifies overall management.

"We're excited to bring our industry-leading shipping solutions directly to Logiwa IO customers through this seamless integration. With access to eHub's powerful rate-shopping tools and shipping automation features, Logiwa users can now simplify their shipping processes, reduce costs, and enhance operational efficiency—all within a few clicks," said Wade Sleater, Founder & CEO of eHub. "This partnership is a significant step toward making shipping easier and more cost-effective for businesses navigating today's fast-paced logistics landscape."

"Our goal is to equip businesses with the tools they need to operate more efficiently and cost-effectively," said Erhan Musaoglu, Founder & CEO of Logiwa. "By integrating with eHub, we are providing our customers with even greater flexibility and control over their shipping processes, allowing them to focus on what matters most—growing their business."

With this new integration, eHub becomes one of the first featured partners in the Logiwa IO App Store, realizing Logiwa's vision to empower our partners and democratize fulfillment solutions.
