Alarm.com Extends the Connected Home Experience with Apple CarPlay® Support

2025-07-29

Alarm.com's powerful smart home features are now available directly on Apple users' car display, making security and automation manageable on-the-go with a simple tap

TYSONS, Va.--(BUSINESS WIRE)-- Alarm.com (Nasdaq: ALRM), the leading platform for the intelligently connected property, announces support for Apple CarPlay®, extending customers' smart home control to their vehicle's built-in display. With CarPlay's simple and intuitive interface, iPhone users can manage key security and automation features seamlessly and safely from their car while keeping their focus on the road.

Alarm.com now available on Apple CarPlay®.

"At Alarm.com, we're always looking for ways to make home

security and automation more intuitive and accessible, wherever life takes our customers," said Dan Kerzner, President of Platforms Business at Alarm.com. "This new capability continues Alarm.com's commitment to expanding the connected home experience beyond traditional screens, ensuring that users can stay safe, informed, and in control when they're on the road."

This new integration, alongside existing Android Auto™ support, further extends Alarm.com's robust platform—giving customers secure, convenient access to their property controls whether at home or on the move. In addition, customers can use Alarm.com Places to automate routines like adjusting lights, locking doors, and managing thermostats based on their phone's location. Together, these features deliver seamless security and control from anywhere.

Key Features of Alarm.com on Apple CarPlay® include:

- Hassle-Free Garage Door Control: Easily open and close compatible garage doors with a tap, whether pulling into the driveway or leaving for the day. Plus, conveniently check the status of the garage door from the car's display to verify that it is closed and secure.
- Easily Come and Go: Quickly activate Home, Away, and customized Scenes to automate multiple smart home devices simultaneously for whole-property control. Turn on entryway lights, unlock the front door, and disarm the system as you arrive home with the tap of a button.
- Streamline Operations: Simplify daily operations by setting up Open and Close Scenes tailored for small businesses. With one tap, turn off lights, adjust the thermostat, arm the system, and lock doors at closing—or reverse it all when opening.

To use Alarm.com on Apple CarPlay®, customers need a compatible vehicle or aftermarket system, as well as a supported iPhone. Alarm.com-powered systems are professionally installed and monitored, with availability in select international markets. For more information on the broader Alarm.com ecosystem of products and services, visit <https://alarm.com>.

Apple CarPlay is a trademark of Apple Inc., registered in the U.S. and other countries.
