Alarm.com Wins Multiple Awards for New Products at CES 2021

1/26/2021

Flex IO™ and Touchless Video Doorbell Recognized for Tech Advancements and Consumer Impact

TYSONS, Va.--(BUSINESS WIRE)-- Alarm.com (Nasdaq: ALRM) Flex IO™ and Touchless Video Doorbell, two new products unveiled at this year's all-virtual CES, have each earned a 2021 TWICE Picks Award for the impact and value they deliver to consumers. Flex IO is a next-generation, battery-powered sensor that operates anywhere there is LTE cellular service – without requiring a panel, hub or Wi-Fi – to give property owners greater awareness. The **Alarm.com** Touchless Video Doorbell, featuring advanced video analytics and the industry's first touch-free capability, addresses one of the major challenges of the COVID-19 pandemic – enhanced awareness of front door activities and making home visits and deliveries safer for all.

The Flex IO also won a Techlicious Top Picks of CES 2021 Award for its versatility and potential to significantly improve lives.

"Awareness is one of the foundational aspects of security. We care deeply about helping people stay informed about the things that matter most to them and staying safe within their homes," said Nate Natale, senior vice president at Alarm.com. "These awards from TWICE and Techlicious reinforce the impact that innovative solutions like Flex IO and Touchless Video Doorbell can have on the smart home and business security markets."

The **Alarm.com** Touchless Video Doorbell and Flex IO seamlessly integrate into new and existing Alarm.com-powered smart home security systems offered through a robust network of service providers. Flex IO is also available as a standalone solution for use in other applications where consumer needs have gone unmet due to range restrictions. More information about these and other award-winning smart home and business solutions from Alarm.com is found at www.alarm.com.
