

Alarm.com for Business Introduces Pro Series: Most Advanced Cameras to Date

3/1/2022

TYSONS, Va.--(BUSINESS WIRE)-- In advance of ISC West, Alarm.com for Business introduces its new line of business security cameras, the **Pro Series commercial-grade Power Over Ethernet (PoE) cameras**. For use in a wide range of commercial applications, the cameras help businesses monitor and manage their properties, from a single warehouse to a nationwide chain of storefronts. The cameras include access to exclusive Business Activity Analytics software, transforming them into powerful business operations tools, and are NDAA compliant*.

There are four new cameras now available: Two 1080p domes with varifocal and fixed lens options, a 4MP varifocal turret, and a 4MP varifocal bullet. The 4MP varifocal bullet includes an audible buzzer and supports Alarm.com's Perimeter Guard™ deterrence technology. The cameras integrate seamlessly with the Alarm.com platform including intrusion and access control and both dome cameras include dark grey covers to provide aesthetic and install flexibility.

Alarm.com for Business recently introduced **Business Activity Analytics**, an innovative video analytics technology solution that provides commercial managers with insights on key performance indicators and alerts, to help business owners gain insight into customer and employee behaviors. This suite of analytics offers occupancy tracking, people counting, heat mapping, crowd gathering detection, and queue monitoring. Businesses can receive alerts if occupancy limits are exceeded, checkout line wait times are too long, or if too many people are crowding a defined area. In addition to alerts, businesses can receive reports and heat maps that show foot traffic trends and analysis.

"Historically, investments in surveillance cameras have been for crime deterrence and forensic recording, but we're excited to release the new Pro Series cameras and Business Activity Analytics to additionally deliver operational metrics and provide an enhanced return on investment to business owners," said Dan Kerzner, Chief Product

Officer, Alarm.com.

The new Pro Series cameras are hassle free, offer plug and play install, support 24/7 onboard and SVR recording options, and will be on display during the **ISC West show**, March 23-25, 2022 at the Venetian Expo in Las Vegas. Attendees are invited to visit Alarm.com at booth #16039.

Alarm.com for Business technology is professionally installed and serviced by commercial business security experts. Alarm.com solutions have limited international availability. For more information, please visit **alarm.com**.

Note: *Information regarding NDAA compliance is accurate as of the date of this release. Read **Alarm.com's NDAA Statement for additional information**.
