Alarm.com and Verizon Wireless Launch First 4G LTE Powered Connected Home Service

Super-fast cellular connection delivers enhanced interactive services

Vienna, VA – March 31, 2014 – Alarm.com, the leading cloud services provider for the connected home, today announced the next generation of connected home communications. Alarm.com's cellular-based interactive technology will soon be available with Verizon's 4th Generation, Long Term Evolution (4G LTE) network. Pioneers of wireless M2M communications for the connected home, Alarm.com continues to lead the industry by bringing LTE capabilities to interactive home services.

Verizon's 4G LTE network offers a super-fast cellular connection and the robust data capacity needed to rapidly deliver all of Alarm.com's interactive services. With the largest and most reliable LTE network in the United States, Verizon also offers best in class network life.

Alarm.com's dedicated, cellular connection offers tamper resistant home security, simpler installation and lower lifetime account management costs than landline based broadband or telephone offerings.

"Alarm.com is continually developing the next great technologies and services that define the connected home," said Daniel Ramos, Alarm.com's Senior Vice President for Corporate Development. "Partnering with Verizon and leveraging their advanced 4G LTE network gives our dealers a long-term platform that will deliver the most advanced, high value features to their customers."

With the broadband speed and data capacity of Verizon's 4G LTE network, Alarm.com will reliably deliver a growing range of capabilities and the next generation of connected home services.

"Verizon Wireless is proud to continue its partnership with Alarm.com and be part of the innovation that is bringing the connected home to new heights. Delivering their advanced home automation and security services over the nation's most reliable, most advanced, high-capacity 4G LTE network opens a world of possibility and translates into real value for consumers," said Marquett Smith, Verizon's regional president in Maryland, DC and Virginia. "With our robust 4G LTE network – one that covers more than 500 markets and 97% of the U.S. population – providing interactive connected home services in real-time becomes a reality and brings benefits that will have a tremendous impact on security."

Alarm.com with Verizon 4G LTE will be exclusively available to Alarm.com's dealer partners. For additional information Alarm.com's partners can contact their account executive.
