

ECS Awarded a Spot on \$13.4 Billion Air Force SBEAS IDIQ

Company will provide a range of software development, cybersecurity, and IT services

FAIRFAX, Va.--(BUSINESS WIRE)-- **ECS**, a leader in advanced technology, science, and engineering solutions, has been awarded a spot on the \$13.4 billion **Air Force Small Business Enterprise Application Solutions (SBEAS)** contract vehicle, in a joint-venture partnership with award-winning small business Eminent IT. Managed by the Air Force Life Cycle Management Center, SBEAS is a 10-year indefinite-delivery, indefinite-quality (IDIQ) contract vehicle that replaces the previous Network-Centric Solutions-2 (NETCENTS-2) Application Solutions Small Business (ASSB) IDIQ.

Through SBEAS, ECS will provide a wide variety of IT services including software development, cybersecurity, infrastructure support, training, and technology refresh. SBEAS also calls for business analysis, commercial off-the-shelf product management, and utilization, data, and information services. To perform this work, ECS will draw on experience supporting other Air Force initiatives, including managing the **Global Air Transportation Execution System (GATES)**, as well as providing similar IT solutions for the Naval Information Warfare Center (NIWC), Defense Information Systems Agency (DISA), and United States Forces Japan (USFJ).

"SBEAS is the premier vehicle to deliver a wide range of IT services and solutions to the Air Force," said **Jackie Fendrock**, ECS vice president of business development operations. "We are eager to provide more of the solutions that we are already delivering on **NETCENTS-2** today."

"ECS is proud of our long history of service to the Air Force, delivering advanced solutions that keep our men and women in uniform safe," said **George Wilson**, president of ECS.

ECS, a segment of ASGN, delivers advanced solutions in cloud, cybersecurity, artificial intelligence (AI), machine learning (ML), application and IT modernization, science, and engineering. The company solves critical, complex challenges for customers across the U.S. public sector, defense, intelligence, and commercial industries. ECS maintains partnerships with leading cloud, cybersecurity, and AI/ML providers and holds specialized certifications in their technologies. Headquartered in Fairfax, Virginia, ECS has more than 3,000 employees throughout the United States. For more information, visit [ECStech.com](https://www.ecstech.com).
