

## ECS Named Elastic Services Partner of the Year

2025-02-27

Systems integrator recognized for expertise in deploying and managing Elastic products to enhance the customer experience and data innovation

FAIRFAX, Va.--(BUSINESS WIRE)-- **ECS**, an IT systems integrator focused on data and AI, cybersecurity, and enterprise transformation solutions, and an ASGN (NYSE: ASGN) brand, was recently named the top services partner of 2024 by **Elastic**, the Search AI company.

Elastic's annual top services partner distinction recognizes outstanding contributions to the Elastic ecosystem — particularly in the fields of data analysis, artificial intelligence, search solutions, and security applications. The award recognizes expertise in deploying and managing Elastic solutions for search, security, and observability to enhance customer experience and innovation in data-driven environments.

A global Elastic partner, ECS has more Elastic-certified engineers than any other partner. The systems integrator also manages one of the world's largest Elastic environments: a configured Elastic Search AI Platform integral to the **Continuous Diagnostics and Mitigation (CDM) Dashboard Ecosystem**.

ECS has provided the CDM Dashboard for the Cybersecurity and Infrastructure Security Agency (CISA) since 2019. The CDM Dashboard is a complex system-of-systems program that uses an integrated data mesh to enable real-time, bidirectional data sharing between more than 90 federal civilian agencies.

ECS uses Elastic in the **Army Endpoint Security Solution** (AESS), which protects 800,000 endpoints across the U.S. Army's global infrastructure. For the AESS, ECS uses the full stack of Elastic capabilities to provide cyber security and global data mesh search capabilities.

ECS also leverages the Elastic Search AI Platform for search, security, and observability solutions in its intelligence-driven, state-of-the-art **security operations center**. Search enables ECS to rapidly index and retrieve vast amounts of structured and unstructured data, providing real-time insights to identify trends, detect anomalies, and support advanced threat hunting. Security empowers ECS with robust threat detection, prevention, and response capabilities, leveraging tools like security information and event management (SIEM) and endpoint protection to counter sophisticated cyber threats. And observability allows ECS to unify and analyze logs, metrics, and traces — ensuring the performance, availability, and health of customers' complex IT environments.

"We're honored to be named Elastic Services Partner of the Year," said **John Heneghan**, president of ECS. "The

Elastic platform helps us support some of the government's most critical missions with powerful solutions, such as the CDM Dashboard Ecosystem, which dramatically improves how cyber incident responders across federal agencies find and remediate threats and vulnerabilities."

"We are thrilled to have recognized ECS as the 2024 Elastic Services Partner of the Year, which highlights their expertise and commitment to supporting the mission of U.S. public sector customers," said Elastic's Global Vice President of Partner Sales Alyssa Fitzpatrick. "ECS' adaptability and scalability have been instrumental in delivering successful outcomes, and their dedication to excellence makes them an invaluable part of our professional services ecosystem. We look forward to continuing our success together."

## About ECS

ECS, a key segment of ASGN Incorporated, is a trusted IT systems integrator serving government agencies. ECS provides modern digital solutions that enable fast and efficient decision making and support the effective execution of government agency operations.

ECS' leading-edge AI, cybersecurity, and open data management solutions boost collaboration, innovation, and worker productivity, improve employee and customer experiences, and protect critical agency data and assets. For more information, visit [ECStech.com](https://www.ecstech.com).

## About ASGN Incorporated

ASGN Incorporated (NYSE: ASGN) is a leading provider of IT services and solutions across the commercial and government sectors. ASGN helps corporate enterprises and government organizations develop, implement, and operate critical IT and business solutions through its integrated offerings.
