Veterans can get start-up assistance at the Entrepreneur Collaborative Center [2] [2] in Ybor City through Hillsborough Community College's Operation Startup.

The program offers free services to honorably discharged veterans, active-duty military personnel preparing to transition to civilian life within a year, and current Reserve or National Guard members living in Florida. Spouses and civilian business partners also are eligible. The program allows these future entrepreneurs to develop business concepts and collaborate in a hub where teams are working to improve the community.

More information is available at 813-259-6024 or by email [3].
