Materion Recognized for Supplier Excellence

Advanced Materials Group Wins Award

BUFFALO, N.Y.--(BUSINESS WIRE)-- The Advanced Materials group of Materion Corporation (NYSE:MTRN) is being honored for "supplier excellence" by Analog Devices Inc. (ADI), a world leader in high performance signal processing. Presented annually, this award is given to outstanding suppliers who partner with ADI and contribute to their business success while maintaining quality standards and advancing technology.

Throughout 2014, Materion facilities in Buffalo and Brewster, New York, Milwaukee, Wisconsin, Subic Bay, Philippines and Singapore were key suppliers to ADI of packaging materials and thin film products. Among the products supplied to ADI were platinum targets, silicon chromium (si-chrome) targets and Combo-Lids™. The team was particularly cited for consistent on-time delivery and high quality physical vapor deposition (PVD) and packaging materials as well as product development for si-chrome targets.

Upon notification of the award, Materion Advanced Materials President Donald Klimkowicz commented, "Our employees are honored and grateful to be the recipient of this prestigious award. It is their commitment to excellence that made it possible. We look forward to continuing our key role in providing Analog Devices with superior products."

The award ceremony and banquet was held in Hong Kong in March. In attendance from Materion Advanced Materials were Christopher Konczyk, Regional Manager from Buffalo, New York and Chee Kong Lee, Vice President of Asia from Singapore who accepted the award on behalf of Materion. Vince Simonelli, Director of Global Purchasing for ADI, presented the Supplier Excellence Award to Materion in the category of "Indirect Materials".

Materion Corporation is headquartered in Mayfield Heights, Ohio. The company, through its wholly owned subsidiaries, supplies highly engineered advanced enabling materials to global markets. Products include precious and non-precious metals, inorganic chemicals and powders, specialty coatings, specialty engineered beryllium alloys, beryllium and beryllium composites, and engineered clad and plated metal systems.
