

ALAMOS GOLD INC.

TSX:AGI | NYSE:AGI

**First Quarter 2020
Results Presentation**

April 30, 2020

Cautionary Notes

ALAMOS GOLD INC.

This presentation, the information contained herein, any other materials provided in connection with this presentation and any oral remarks accompanying this presentation (collectively, the “Presentation”), has been prepared by Alamos Gold Inc. (“Alamos” or the “Company”) solely for information purposes. No stock exchange, securities commission or other regulatory authority has approved or disapproved of the information contained herein. This Presentation does not constitute an offering of securities and the information contained herein is subject to the information contained in the Company’s continuous disclosure documents available on the SEDAR website at www.sedar.com or on EDGAR at www.sec.gov.

Cautionary Notes

This Presentation contains statements that constitute forward-looking information as defined under applicable Canadian and U.S. securities laws. All statements in this Presentation other than statements of historical fact, which address events, results, outcomes or development that Alamos expects to occur are, or may be deemed to be forward-looking statements. Forward-looking statements are generally, but not always, identified by the use of forward-looking terminology such as “expect”, “estimate”, “continue”, “potential”, “outlook”, “plans” or variations of such words and phrases and similar expressions or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved or the negative connotation of such terms. Forward-looking statements in this Presentation include information related to Alamos’ H2 outlook, Phase III expansion study at Island Gold, operating cash flow, free cash flow, forecast gold production, mineral reserves, mineral resources, gold grades, recoveries, waste-to-ore ratios, total cash cost, all-in sustaining costs, temporary suspension of operation at Island Gold and Mulatos, completion of lower mine expansion at Young-Davidson, the impact of COVID-19 on its operations and debt levels and future plans and objectives based on forecasts of future operational or financial results.

Alamos cautions that forward-looking statements are necessarily based upon several factors and assumptions that, while considered reasonable by Alamos at the time of making such statements, are inherently subject to significant business, economic, legal, political and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors and assumptions include, but are not limited to: changes to current estimates of mineral reserves and mineral resources; the speculative nature of mineral exploration and development, risks in obtaining and maintaining necessary licenses, permits and authorizations for the Company’s development stage and operating assets; changes to production estimates (which assume accuracy of projected ore grade, mining rates, recovery timing and recovery rate estimates which may be impacted by unscheduled maintenance, labour and contractor availability and other operating or technical difficulties); operations may be exposed to new diseases, epidemics and pandemics, including the effects and potential effects of the global Covid-19 widespread pandemic; the impact of the COVID-19 pandemic on the broader market and the trading price of the Company’s shares; provincial and federal orders or mandates (including with respect to mining operations generally or auxiliary businesses or services required for our operations) in Canada, Mexico, the United States and Turkey; the duration of regulatory responses to the COVID-19 pandemic; governments and the Company’s attempts to reduce the spread of COVID-19 which may affect many aspects of the Company’s operations including the ability to transport personnel to and from site, contractor and supply availability and the ability to sell or deliver gold dore bars; fluctuations in the price of gold or certain other commodities such as, diesel fuel, natural gas, and electricity; changes in foreign exchange rates; the impact of inflation; employee and community relations; litigation; disruptions affecting operations; inherent risks associated with mining and mineral processing; the risk that the Company’s mines may not perform as planned; increased costs associated with mining inputs and labour; contests over title to properties; changes in national and local government legislation (including tax legislation), the costs and timing of construction and development of new deposits; the impact of global liquidity and credit availability and the values of assets and liabilities based on projected future cash flows; risks arising from holding derivative instruments; and business opportunities that may be pursued by the Company. Additional risk factors affecting Alamos are set out in the Company’s latest 40F/Annual Information Form and Management’s Discussion and Analysis, each under the heading “Risk Factors” available on the SEDAR website at www.sedar.com or on EDGAR at www.sec.gov, and should be reviewed in conjunction with this Presentation. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.

Note to U.S. Investors

Alamos prepares its disclosure in accordance with the requirements of securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. Terms relating to mineral resources in this presentation are defined in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”) under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum’s Standards, Best Practices and Guidance for Mineral Resources and Mineral Reserves. The United States Securities and Exchange Commission (the “SEC”) permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. Alamos may use certain terms, such as “Measured Mineral Resources”, “Indicated Mineral Resources”, “Inferred Mineral Resources” and “Probable Mineral Reserves” which differ materially from the definitions in SEC Industry Guide 7 under the United States *Securities Exchange Act of 1934*, as amended. Investors are cautioned not to assume that all or any part of mineral deposits in these categories will ever be converted into Mineral Reserves. “Inferred Mineral Resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, except in very limited circumstances. Disclosure of “contained ounces” in a Mineral Resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “Mineral Reserves” by SEC standards as in place tonnage and grade without reference to unit measures. The SEC has adopted final rules, effective February 25, 2019, to replace SEC Industry Guide 7 with new mining disclosure rules under sub-part 1300 of Regulation S-K of the U.S. Securities Act (the “**SEC Modernization Rules**”). The SEC Modernization Rules replace the historical property disclosure requirements included in SEC Industry Guide 7. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources”. In addition, the SEC has amended its definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” to be substantially similar to international standards. The SEC Modernization Rules will become mandatory for U.S. reporting companies beginning with the first fiscal year commencing on or after January 1, 2021.

Cautionary non-GAAP Measures and Additional GAAP Measures

Note that for purposes of this section, GAAP refers to IFRS. The Company believes that investors use certain non-GAAP and additional GAAP measures as indicators to assess gold mining companies. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared with GAAP. “Cash flow from operating activities before changes in non-cash working capital” is a non-GAAP performance measure that could provide an indication of the Company’s ability to generate cash flows from operations, and is calculated by adding back the change in non-cash working capital to “cash provided by (used in) operating activities” as presented on the Company’s consolidated statements of cash flows. “cash flow per share” is calculated by dividing “cash flow from operations before changes in working capital” by the weighted average number of shares outstanding for the period. “Free cash flow” is a non-GAAP performance measure that is calculated as cash flows from operations net of cash flows invested in mineral property, plant and equipment and exploration and evaluation assets as presented on the Company’s consolidated statements of cash flows and that would provide an indication of the Company’s ability to generate cash flows from its mineral projects. “Mine site free cash flow” is a non-GAAP measure which includes cash flow from operating activities at, less capital expenditures at each mine site. “Return on equity” is defined as earnings from continuing operations divided by the average total equity for the current and previous year. “Mining cost per tonne of ore” and “cost per tonne of ore” are non-GAAP performance measures that could provide an indication of the mining and processing efficiency and effectiveness of the mine. These measures are calculated by dividing the relevant mining and processing costs and total costs by the tonnes of ore processed in the period. “Cost per tonne of ore” is usually affected by operating efficiencies and waste-to-ore ratios in the period. “Total cash costs per ounce”, “all-in sustaining costs per ounce”, and “mine-site all-in sustaining costs” as used in this analysis are non-GAAP terms typically used by gold mining companies to assess the level of gross margin available to the Company by subtracting these costs from the unit price realized during the period. These non-GAAP terms are also used to assess the ability of a mining company to generate cash flow from operations. There may be some variation in the method of computation of these metrics as determined by the Company compared with other mining companies. In this context, “total cash costs” reflects mining and processing costs allocated from in-process and dore inventory associated and associated royalties with ounces of gold sold in the period. Total cash costs per ounce are exclusive of exploration costs. “All-in sustaining costs per ounce” include total cash costs, exploration, corporate and administrative, share based compensation and sustaining capital costs. “Mine-site all-in sustaining costs” include total cash costs, exploration, and sustaining capital costs for the mine-site, but exclude an allocation of corporate and administrative and share based compensation. “All-in sustaining cost margin” is calculated as the realized gold price less all-in sustaining costs. “Adjusted net earnings” and “adjusted earnings per share” are non-GAAP financial measures with no standard meaning under IFRS. “Adjusted net earnings” excludes the following from net earnings: foreign exchange gain (loss), items included in other loss, certain non-reoccurring items and foreign exchange gain (loss) recorded in deferred tax expense. “Adjusted earnings per share” is calculated by dividing “adjusted net earnings” by the weighted average number of shares outstanding for the period. Additional GAAP measures that are presented on the face of the Company’s consolidated statements of comprehensive income and are not meant to be a substitute for other subtotals or totals presented in accordance with IFRS, but rather should be evaluated in conjunction with such IFRS measures. This includes “Earnings from operations”, which is intended to provide an indication of the Company’s operating performance and represents the amount of earnings before net finance income/expense, foreign exchange gain/loss, other income/loss, and income tax expense. Non-GAAP and additional GAAP measures do not have a standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other companies. A reconciliation of historical non-GAAP and additional GAAP measures are detailed in the Company’s Management’s Discussion and Analysis available at www.alamosgold.com.

Technical Information

Chris Bostwick, FAusIMM, Alamos Gold’s Vice President, Technical Services, has reviewed and approved the scientific and technical information contained in this presentation. Chris Bostwick is a Qualified Person within the meaning of Canadian Securities Administrator’s National Instrument 43-101 (“NI 43-101”). The Qualified Persons for the NI 43-101 compliant mineral reserve and resource estimates are detailed in the tables in the appendix of this Presentation. All figures in US\$ unless otherwise indicated.

Q1 2020 Highlights

ALAMOS GOLD INC.

	Q1 2020A	Q1 2019A	QoQ % Change	Previous 2020 Guidance ⁵
Gold production (000 oz)	110.8	125.3	(12%)	425-465
Gold sales (000 oz)	111.9	119.7	(7%)	-
Total cash costs (US\$/oz) ^{1,4}	\$759	\$732	4%	\$757-797
All-in sustaining costs (\$US/oz) ^{1,2,4}	\$1,010	\$957	6%	\$1,007-1,047
AISC margin (\$US/oz) ^{1,3}	\$572	\$347	65%	-
Cash flow from operations, before working capital and cash taxes (US\$M) ¹	\$82	\$62	32%	-
Cash flow from operations (US\$M)	\$57	\$42	36%	-

- Produced 110,800 ounces of gold, exceeding Q1 2020 guidance, driven by strong performances at Island Gold and Mulatos
 - Island Gold produced 38,800 ounces of gold and generated mine-site free cash flow¹ of \$19.6 million
 - Mulatos produced 42,600 ounces of gold and generated \$14.1 million of mine-site free cash flow¹
- Total cash costs and all-in sustaining costs both at the low end of previous 2020 guidance
- Production lower and costs higher from Q1 2019 reflecting planned start of tie-in of upper and lower mines at Young-Davidson
- Strong H2 2020 outlook intact with good progress on lower mine expansion at Young-Davidson & Phase III expansion study at Island Gold

Gold production (000 oz)

All-in sustaining costs (US\$/oz)^{1,2,4}

Cash flow from operations, before changes in working capital (US\$M)¹

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

² Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses.

³ AISC margin calculated as realized gold price less AISC.

⁴ Island Gold and consolidated total cash costs and AISC guidance reduced following repurchase and cancellation of a 3% NSR royalty at Island Gold on March 16, 2020

⁵ Previous 2020 guidance - withdrawn due to COVID-19-related temporary operational suspensions

- Our primary focus remains the health and safety of our people and the communities in which we operate
- No confirmed cases of COVID-19 across Alamos operations or offices
- We continue to be diligent in taking precautions to help prevent the potential spread of COVID-19 including instituting the following measures across the Company:
 - Medical screening for all personnel prior to entry to site for symptoms of COVID-19
 - Training on proper hand hygiene and self protection
 - Remote work options have been implemented for eligible employees
 - Mandatory use of PPE for cleaners, nursing staff and security personnel
 - Rigid camp and site hygiene protocols have been instituted and are being followed
 - Social distancing practices have been implemented for all meetings, huddles and transportation
 - Elimination of all non-essential business travel
 - Required 14-day quarantine for any employees returning from out of country travel

Operation	Status	Outlook
Young-Davidson	Operating under heightened health & safety protocols ○ Tie-in of upper & lower mines underway	Lower mine expansion expected to be completed in July 2020 ○ Schedule slightly delayed by COVID-19-related labour & productivity constraints
Island Gold	Operations suspended on March 25, 2020 ○ Voluntary action given location of camp within the local community	Restart of operations planned for early May ○ Operations will be ramped up safely in phased approach
Mulatos	Operations suspended on April 2, 2020 ○ Suspension mandated by Mexican government ○ Continuing gold recovery through leaching ore stacked on the pad in Q1 2020	Government suspension extended to May 31st with potential removal on May 18th for areas with limited to no impact ○ No confirmed cases at Mulatos nor in surrounding regions

Strong H2 2020 Outlook Intact with Several Transformational Catalysts

Island Gold & Mulatos well positioned for a safe restart of operations

Balance sheet solid with \$215m cash & \$615m total liquidity¹

Island Gold Phase III expansion study expected mid-2020

Young-Davidson lower mine expansion scheduled for completion July 2020

Transition to strong free cash flow growth in H2 2020

¹ Cash & cash equivalents as of March 31, 2020. Total liquidity includes cash, and cash equivalents as of March 31, 2020 and \$500m credit facility, of which \$100 is drawn

Financial Highlights

ALAMOS GOLD INC.

	Q1 2020A	Q1 2019A	QoQ % Change
Realized gold price (US\$/oz)	\$1,582	\$1,304	21%
Operating revenues (US\$M)	\$177	\$156	13%
Cash flow from operations (US\$M)	\$57	\$42	36%
Cash flow from operations, before changes in working capital and cash taxes ¹	\$82	\$62	32%
Cash flow from operations, before changes in working capital and cash taxes, per share ¹	0.21	0.16	31%
Net (loss) earnings (US\$M)	(\$12)	\$17	(171%)
Net (loss) earnings, per share	(\$0.03)	\$0.04	(175%)
Adjusted net earnings (US\$M) ¹	\$29	\$10	190%
Adjusted net earnings, per share ¹	\$0.08	\$0.03	167%
Capital expenditures (sustaining + growth) (US\$M) ¹	\$59	\$50	18%
Capital expenditures (capitalized exploration) (US\$M) ²	\$5	\$3	67%
Cash and cash equivalents (US\$M) ⁴	\$215	\$183	17%

- Consolidated total cash costs & all-in sustaining costs at lower end of previous guidance reflecting strong quarters at Island Gold & Mulatos
 - Benefiting across operations from weaker Canadian dollar & Mexican Peso
- Island Gold generated mine-site free cash flow of \$20m. Costs benefited from repurchase of 3% NSR royalty & NIER electricity rebate
- Near record cash flow from operations of \$82m before changes in working capital
- Adjusted net earnings of \$29m, or \$0.08/sh, up 190% YoY. Includes adjustment for unrealized FX losses of \$42m, largely within deferred taxes
- Paid Q1 dividend of \$6m, a 50% increase from the previous quarter, at an annual rate of \$0.06/sh
- Repurchased 1.1m shares under share buyback program at total cost of \$6m, or US\$4.90/sh
- Cash & cash equivalents of \$215m & equity securities of \$16m at end of Q1, with \$400m of additional liquidity
 - Includes \$100m drawn on \$500m credit facility for financial flexibility in light of COVID-19

AISC margin (US\$/oz)^{1,3}

Cash flow from operations, before changes in working capital (US\$M)¹

Cash flow from operations, before changes in working capital (US\$/share)¹

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

² Includes capitalized exploration at Mulatos and Island Gold.

³ AISC margin calculated as realized gold price less AISC.

⁴ Comparative cash and cash equivalents balance as at December 31, 2019

Operational Highlights – Young-Davidson

ALAMOS GOLD INC.

	Q1 2020A	Q1 2019A	Previous 2020 Guidance ⁴
Gold production (koz)	28.7	45.0	145-160
Cost of sales, including amortization, per ounce of gold sold ¹	\$1,515	\$1,293	\$1,360
Total cash costs, per ounce of gold sold ²	\$1,093	\$839	\$910-950
Mine-site all-in sustaining costs, per ounce of gold sold ²	\$1,242	\$1,068	\$1,110-1,150
Capital expenditure (US\$M) ³	\$27	\$22	\$76-86
Mine-site free cash flow (US\$M)	(\$19)	\$1	-
Unit mining costs (CAD\$/t)	\$77	\$52	-
Underground mining rate (tpd)	4,290	6,540	-
Grade mined (g/t Au)	2.17	2.54	-
Milling rate (tpd)	5,107	6,777	-
Grade milled (g/t)	1.93	2.47	-
Recovery rate (%)	91%	90%	-

- As previously guided, production decreased & costs increased reflecting shutdown of Northgate shaft in February to complete tie-in of upper and lower mines
- Underground mining rates averaged 6,700 tpd prior to start of tie-in & 3,000 tpd following the shutdown of the Northgate shaft with ore trucked to surface – exceeded guidance of 2,500 tpd
- Operations continuing under heightened health & safety protocols with some COVID-19-related labour & productivity constraints
- Lower mine expansion scheduled for completion July 2020

¹ Cost of sales includes mining and processing costs, royalties and amortization.

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

³ Includes sustaining and growth capital for each corresponding period

⁴ Previous 2020 guidance - withdrawn due to COVID-19-related temporary operational suspensions

Production & total cash costs²

Underground mining rate & grade

Heightened health & safety measures:

- Some labour constraints due to site restrictions:
 - 14 day quarantines for employees who had traveled out of country
 - Medical screens for elevated temperatures and/or potential exposure incidents
- Practicing social distancing in meetings, huddles, and transportation including in the cage
- Providing disinfecting solution and wipes to staff including equipment operators to wipe down workspaces and equipment
- Supplying hand sanitization and hygiene products throughout the property
- Cleaning station in refuge stations
- Verbal and posted reminders about hygiene best practices

8990 Crusher

Several critical path items recently completed

- Main ramp to the lower mine infrastructure completed
- 8940 level loading pocket, including the conveyor and ore/waste bins completed ready for commissioning
- 8930 level ore and waste loadout substantially complete
- Installation of the hangers and trays for the main conveyor from the crusher loadout level to the top of the shaft bins are two-thirds complete
- Crusher installation complete and ready for commissioning
- Skips, ropes and shaft bottom steel has been removed from the mid shaft loading pocket
- Pentice separating upper and lower portions of Northgate shaft drilled off, blasted and removed mid-April with ground support now complete

Young-Davidson lower mine expansion – completion July 2020

Lower mine conveyor

Items to be completed in Q2 2020

- 9025 rockbreaker station and coarse ore bins
- Permanent installation and changeover of new ropes and installation of new skips
- 8930 load-out, including conveyor drive

Completion of lower mine expansion expected in July 2020

- Slight delay from previous guidance of June 2020 due to COVID-19-related labour and productivity limitations
- Mining rate expected to ramp up to 7,500 tpd by year-end 2020
- **Higher mining rates expected to drive production to ~200,000 ounces in 2021 at lower costs**

Operational Highlights – Island Gold

ALAMOS GOLD INC.

	Q1 2020A	Q1 2019A	Previous 2020 Guidance ⁵
Gold production (koz)	38.8	35.6	130-145
Cost of sales, including amortization, per ounce of gold sold ¹	\$780	\$852	\$840
Total cash costs, per ounce of gold sold ^{2,4}	\$452	\$497	\$480-520
Mine-site all-in sustaining costs, per ounce of gold sold ^{2,3,4}	\$670	\$649	\$740-780
Capital expenditure (US\$M) (sustaining + growth) ²	\$18	\$9	\$50-60
Exploration spending (US\$M) (expensed & capitalized) ^{2,3}	\$4	\$3	\$19
Mine-site free cash flow (US\$M)	\$20	\$17	-
Unit mining costs (CAD\$/t)	\$120	\$150	-
Underground mining rate (tpd)	1,240	1,083	-
Grade mined (g/t Au)	11.69	11.40	-
Milling rate (tpd)	1,164	1,133	-
Grade milled (g/t Au)	11.73	11.11	-
Recovery rate (%)	97%	97%	-

- Production of 38.8k oz in Q1, 9% increase YoY with higher tonnes and grade mined and processed
- Mining rate averaged a record 1,240 tpd in the quarter, a 14% increase YoY
- Milling rate averaged a record 1,164 tpd in the quarter & 1,261 tpd prior to the COVID-19-related temporary suspension
- Total cash costs & mine-site AISC both below previous annual guidance reflecting strong quarter & NIER electricity rebate
- Generated \$20m in mine-site free cash flow in Q1/20
- Temporary suspension of operations due to COVID-19 announced on March 24th; phased restart planned for early May
- Phase III expansion study expected mid-2020

¹ Cost of sales includes mining and processing costs, royalties and amortization.

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

³ Exploration spending in Q1/20 totaled \$4.2m including \$4.0m of capitalized exploration.

⁴ On March 16, 2020, the Company updated total cash cost and AISC guidance to reflect the repurchase and cancellation of a 3% royalty at Island Gold

⁵ Previous 2020 guidance - withdrawn due to COVID-19-related temporary operational suspensions

Production & total cash costs^{2,5}

Mining rate & mined grade

Operational Highlights – Mulatos

ALAMOS GOLD INC.

	Q1 2020A	Q1 2019A	Previous 2020 Guidance ⁴
Gold production (koz)	42.6	38.9	150-160
Cost of sales, including amortization, per ounce of gold sold ¹	\$1,050	\$937	\$1,085
Total cash costs, per ounce of gold sold ²	\$812	\$743	\$840-880
Mine-site all-in sustaining costs, per ounce of gold sold ²	\$958	\$809	\$940-980
Capital expenditure (US\$M) ^{2,3}	\$7	\$13	\$20-25
Mine-site free cash flow (US\$M)	\$14	(\$12)	-
Waste-to-ore ratio (operating)	0.59	0.51	-
Tonnes of ore stacked (tpd)	22,342	20,800	-
Grade – crushed & stacked (g/t Au)	1.25	0.98	-
Recovery ratio (%)	52%	66%	-

- Mulatos produced 42,600 ounces in Q1/20, a 10% increase YoY, driven by higher grades & tonnes stacked
- Ounces stacked increased 38%, reflecting new production from higher grade Cerro Pelon ore
- Generated \$14m in mine-site free cash flow in the quarter
- Temporary suspension of operations on April 2nd in response to Mexican government mandate to suspend all non-essential businesses due to COVID-19.
 - Suspension period extended to May 31st, with potential to be lifted on May 18th
 - Continue to leach ore and recover gold given the significant amount of gold stacked in the first quarter
- Well positioned to restart mining, crushing, and stacking ore once government mandated suspension is lifted
- La Yaqui Grande construction decision expected in Q2 2020

Production & total cash costs²

Ore crushed & stacked & grade stacked

¹ Cost of sales includes mining and processing costs, royalties and amortization.

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

³ Capital expenditure includes sustaining and growth capital and capitalized exploration

⁴ Previous 2020 guidance - withdrawn due to COVID-19-related temporary operational suspensions

Strong platform for delivering long-term value

Diversified, long-life gold production

Expanding margins & profitability

Strong balance sheet to support growth

Long-term track record of creating value for all stakeholders

2020 – transformational year

✓ Island Gold – 0.9 million ounce increase in Reserves & Resources

○ Island Gold – Phase III expansion study mid-2020

○ Young-Davidson – completion of lower mine expansion July 2020

○ Transition to strong free cash flow growth – H2 2020

Strong outlook; **compelling** valuation **opportunity**

1. Refer to the "Non-GAAP Measures and Additional GAAP" disclosure.

2. For the purposes of calculating mine-site all-in sustaining costs at individual mine sites, the Company does not include an allocation of corporate and administrative and share based compensation expenses to the mine sites.

3. Cost of sales includes mining and processing costs, royalties, and amortization expense, and is calculated based on the mid-point of total cash cost guidance.

4. Island Gold and consolidated total cash costs and AISC reduced following repurchase and cancellation of 3% NSR royalty at Island Gold on March 16, 2020

5. Previous 2020 guidance - withdrawn due to COVID-19-related temporary operational suspensions

Notes to Mineral Reserve and Resource estimates

Qualified Persons

Chris Bostwick, FAusIMM, Alamos Gold's Vice President, Technical Services, has reviewed and approved the scientific and technical information contained in this presentation. Chris Bostwick is a Qualified Person within the meaning of Canadian Securities Administrator's National Instrument 43-101 ("NI 43-101"). The Qualified Persons for the National Instrument 43-101 compliant mineral reserve and resource estimates are detailed in the following table.

Resources		
Jeffrey Volk, CPG, FAusIMM	Director - Reserves and Resource, Alamos Gold Inc.	Young-Davidson, Lynn Lake
Raynald Vincent, P.Eng., M.G.P.	Chief Geologist - Island Gold	Island Gold
Marc Jutras, P.Eng	Principal, Ginto Consulting Inc.	Mulatos Pits, Cerro Pelon, La Yaqui, Carricito, Esperanza, Ağı Dağı, Kirazlı, Çamyurt, Quartz Mountain
Reserves		
Chris Bostwick, FAusIMM	VP Technical Services, Alamos Gold Inc.	Young-Davidson, Lynn Lake
Nathan Bourgeault, P.Eng	Chief Engineer - Island Gold	Island Gold
Herb Welhener, SME-QP	VP, Independent Mining Consultants Inc.	Mulatos Pits, Cerro Pelon, La Yaqui, Ağı Dağı, Kirazlı

Notes to Mineral Reserve and Resource Tables:

- The Company's Mineral Reserves and Mineral Resource as at December 31, 2019 are classified in accordance with the Canadian Institute of Mining Metallurgy and Petroleum's "CIM Standards on Mineral Resources and Reserves, Definition and Guidelines" as per Canadian Securities Administrator's NI 43-101 requirements.
- Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- Mineral Resources are exclusive of Mineral Reserves.
- Mineral Reserve cut-off grade for the Mulatos Mine, the Cerro Pelon Pit, the La Yaqui Pits, the Kirazlı Pit and the Ağı Dağı Pit are determined as a net of process value of \$0.10 per tonne for each model block
- All Measured, Indicated and Inferred open pit Mineral Resources are pit constrained with the exception of those outside the Mulatos Main Pits on the Mulatos property which have no economic restrictions and are tabulated by gold cut-off grade.
- Mineral Reserve estimates assumed a gold price of \$1,250 per ounce and Mineral Resource estimates assumed a gold price of \$1,400 per ounce. Metal prices, cut-off grades and metallurgical recoveries are set out in the table below.

	Resources		Reserves		Met Recovery
	Gold Price	Cut-off	Gold Price	Cut-off	
Mulatos:					
Mulatos Main Open Pit	\$1,400	0.5	\$1,250	see notes	>50%
Cerro Pelon	\$1,400	0.3	\$1,250	see notes	75%
La Yaqui	\$1,400	0.3	\$1,250	see notes	75%
Carricito	\$1,400	0.3	n/a	n/a	n/a
Young-Davidson - Surface	\$1,400	0.5	\$1,250	0.5	91%
Young-Davidson - Underground	\$1,400	1.3	\$1,250	1.9	91%
Island Gold	\$1,400	4.0	\$1,250	2.82-4.89	96.5%
Lynn Lake - MacLellan	\$1,400	0.42	\$1,250	0.47	91-92%
Lynn Lake - MacLellan Underground	\$1,400	2.0	n/a	n/a	n/a
Lynn Lake - Gordon	\$1,400	0.62	\$1,250	0.69	89-94%
Esperanza	\$1,400	0.4	n/a	n/a	60-72%
Ağı Dağı	\$1,400	0.2	\$1,250	see notes	80%
Kirazlı	\$1,400	0.2	\$1,250	see notes	81%
Çamyurt	\$1,400	0.2	n/a	n/a	78%
Quartz Mountain	\$1,400	0.21 Oxide, 0.6 Sulfide	n/a	n/a	65-80%
