Corporate Presentation
May 2022

Cautionary Notes

ALAMOS GOLD INC.

This presentation, the information contained herein, any other materials provided in connection with this presentation and any oral remarks accompanying this presentation (collectively, the “Presentation”), has been prepared by Alamos Gold Inc. (“Alamos” or the “Company”) solely for information purposes. No stock exchange, securities commission or other regulatory authority has approved or disapproved of the information contained herein. This Presentation does not constitute an offering of securities and the information contained herein is subject to the information contained in the Company’s continuous disclosure documents available on the SEDAR website at www.sedar.com or on EDGAR at www.sec.gov.

Cautionary Notes

This Presentation contains statements that constitute forward-looking information as defined under applicable Canadian and U.S. securities laws. All statements in this Presentation, other than statements of historical fact, which address events, results, outcomes or developments that Alamos expects to occur are, or may be deemed to be forward-looking statements and are based on expectations, estimates and projects as at the date of this Presentation. Forward-looking statements are generally, but not always, identified by the use of forward-looking terminology such as “expect”, “assume”, “schedule”, “estimate”, “budget”, “continue”, “potential”, “outlook”, “plan”, “on track” or variations of such words and phrases and similar expressions or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved or the negative connotation of such terms. Such statements include, but may not be limited to, information and expectations as to Alamos’ net asset value, operating cash flow, free cash flow, forecast gold production, mineral reserves, mineral resources, exploration potential, mining rates, mine life, reserve life, gold grades, recoveries, waste-to-ore ratios, forecasted costs including total cash cost, all-in sustaining costs, debt levels, capital expenditures, the Company’s COVID-19 measures, Lynn Lake project and timing of regulatory approvals and construction decision, expected completion dates of the shaft expansion project at Island Gold and construction of the La Yaqui Grande project, and future plans and objectives based on forecasts of future operational or financial results. Alamos cautions that forward-looking statements are necessarily based upon several factors and assumptions that, while considered reasonable by Alamos at the time of making such statements, are inherently subject to significant business, economic, technical, legal, political and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements, and undue reliance should not be placed on such statements and information. Such factors and assumptions include, but are not limited to: changes to current estimates of Mineral Reserves and Resources; changes to production estimates (which assume accuracy of projected ore grade, mining rates, recovery timing and recovery rate estimates which may be impacted by unscheduled maintenance, weather issues, labour and contractor availability and other operating or technical difficulties); operations may be exposed to new diseases, epidemics and pandemics, including the effects and potential effects of the COVID-19 and its impact on the broader market and the trading price of the Company’s shares; provincial and federal orders or mandates (including with respect to mining operations generally or auxiliary businesses or services required for operations) in Canada, Mexico, the United States and Turkey; the duration of regulatory responses to the COVID-19 pandemic; governments and the Company’s attempts to reduce the spread of COVID-19 which may affect many aspects of the Company’s operations including the ability to transport personnel to and from site, contractor and supply availability and the ability to sell or deliver gold doré bars; fluctuations in the price of gold or certain other commodities such as, diesel fuel, natural gas, and electricity; changes in foreign exchange rates (particularly the Canadian Dollar, Mexican Peso, U.S. Dollar and Turkish Lira); the impact of inflation; changes in our credit rating; any decision to declare a quarterly dividend, employee and community relations; litigation and administrative proceedings; (including but not limited to the investment treaty claim announced on April 20, 2021 against the Republic of Turkey by the Company’s wholly-owned Netherlands subsidiaries, Alamos Gold Holdings Coöperatief U.A. and Alamos Gold Holdings B.V.); disruptions affecting operations; availability of and increased costs associated with mining inputs and labour; delays in respect of: the Phase III expansion project at the Island Gold mine, construction at the La Yaqui Grande project, completion of permitting and construction decision at Lynn Lake and/or in the development or updating of mine plans; the risk that the Company’s mines may not perform as planned; uncertainty with the Company’s ability to secure additional capital to execute its business plans, the speculative nature of mineral exploration and development, including the risks of obtaining and maintaining necessary licenses and permits, including the necessary licenses, permits, authorizations and/or approvals from the appropriate regulatory authorities for the Company’s development stage and operating assets; labour and contractor availability (and being able to secure the same on favourable terms); contests over title to properties; expropriation or nationalization of property, inherent risks and hazards associated with mining and mineral processing including environmental hazards, industrial hazards, industrial accidents, unusual or unexpected formations, pressures and cave-ins; changes in national and local government legislation (including tax and employment legislation), controls or regulations in Canada, Mexico, Turkey, the United States and other jurisdictions in which the Company does or may carry on business in the future; increased costs and risks related to the potential impact of climate change; failure to comply with environmental and health and safety laws and regulations; disruptions in the maintenance or provision of required infrastructure and information technology systems; risk of loss due to sabotage, protests and other civil disturbances; impact of global liquidity and credit availability and the values of assets and liabilities based on projected future cash flows; risks arising from holding derivative instruments; and business opportunities that may be pursued by the Company. The litigation against the Republic of Turkey, described above, results from the actions of the Turkish government in respect of the Company’s projects in the Republic of Turkey; it is a mitigation effort and may not be effective or successful. If unsuccessful, the Company’s projects in Turkey may be subject to resource nationalism and further expropriation; the Company may lose any remaining value of its assets and goldmining projects in Turkey and its ability to operate in Turkey. Even if successful, there is no certainty as to the quantum of any damages award or recovery of all, or any, legal costs. Any resumption of activities in Turkey or even retaining control of its assets and gold mining projects in Turkey can only result from agreement with the Turkish government. Such litigation may have an impact on foreign direct investment in the Republic of Turkey which may result in changes to the Turkish economy, including but not limited to high rates of inflation and fluctuation in the Turkish Lira which may also affect the Company’s relationship with the Turkish government, the Company’s ability to effectively operate in Turkey, and which may have a negative effect on overall anticipated project values. Additional risk factors and details with respect to risk factors that may affect the Company’s ability to achieve the expectations set forth in the forward-looking statements contained in this Presentation are set out in the Company’s latest 40-F/Annual Information Form and MD&A, each under the heading “Risk Factors”, available on SEDAR at www.sedar.com or on EDGAR at www.sec.gov and should be reviewed in conjunction with the information, risk factors and assumptions found in this Presentation. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law. Market data and other statistical information used throughout this Presentation are based on internal company research, independent industry publications, government publications, reports by market research firms or their published independent sources. Industry publications, governmental publications, market research surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable. Although Alamos believes such information is accurate and reliable, it has not independently verified any of the data from third party sources cited or used for the Company’s management’s industry estimates, nor has Alamos ascertained the underlying economic assumptions relied upon therein. While Alamos believes internal company estimates are reliable, such estimates have not been verified by any independent sources, and Alamos makes no representations as to the accuracy of such estimates.

Note to U.S. Investors

All resource and reserve estimates included in this Presentation have been prepared in accordance with Canadian National Instrument 43-101 -Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) –CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the “CIM Standards”). NI 43-101 is a rule developed by the Canadian Securities Administrators, which established standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. U.S. investors should review in detail the cautionary note set out on slide 54.

Cautionary non-GAAP Measures and Additional GAAP Measures

Note that for purposes of this section, GAAP refers to IFRS. The Company believes that investors use certain non-GAAP and additional GAAP measures as indicators to assess gold mining companies. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared with GAAP. “Cash flow from operating activities before changes in non-cash working capital” is a non-GAAP performance measure that could provide an indication of the Company’s ability to generate cash flows from operations and is calculated by adding back the change in non-cash working capital to “cash provided by (used in) operating activities” as presented on the Company’s consolidated statements of cash flows. “Cash flow per share” is calculated by dividing “cash flow from operations before changes in working capital” by the weighted average number of shares outstanding for the period. “Free cash flow” is a non-GAAP performance measure that is calculated as cash flows from operations net of cash flows invested in mineral property, plant and equipment and exploration and evaluation assets as presented on the Company’s consolidated statements of cash flows and that would provide an indication of the Company’s ability to generate cash flows from its mineral projects. “Mine site free cash flow” is a non-GAAP measure which includes cash flow from operating activities at, less capital expenditures at each mine site. “Return on equity” is defined as earnings from continuing operations divided by the average total equity for the current and previous year. “Mining cost per tonne of ore” and “cost per tonne of ore” are non-GAAP performance measures that could provide an indication of the mining and processing efficiency and effectiveness of the mine. These measures are calculated by dividing the relevant mining and processing costs and total costs by the tonnes of ore processed in the period. “Cost per tonne of ore” is usually affected by operating efficiencies and waste-to-ore ratios in the period. “Total cash costs per ounce”, “all-in sustaining costs per ounce”, and “mine-site all-in sustaining costs” as used in this analysis are non-GAAP terms typically used by gold mining companies to assess the level of gross margin available to the Company by subtracting these costs from the unit price realized during the period. These non-GAAP terms are also used to assess the ability of a mining company to generate cash flow from operations. There may be some variation in the method of computation of these metrics as determined by the Company compared with other mining companies. In this context, “total cash costs” reflects mining and processing costs allocated from in-process and doré inventory and associated royalties with ounces of gold sold in the period. Total cash costs per ounce are exclusive of exploration costs. “All-in sustaining costs per ounce” include total cash costs, exploration, corporate and administrative, share based compensation and sustaining capital costs. “Mine-site all-in sustaining costs” include total cash costs, exploration, and sustaining capital costs for the mine-site, but exclude an allocation of corporate and administrative and share based compensation. “Adjusted net earnings” and “adjusted earnings per share” are non-GAAP financial measures with no standard meaning under IFRS. “Adjusted net earnings” excludes the following from net earnings: foreign exchange gain (loss), items included in other loss, certain non-recurring items and foreign exchange gain (loss) recorded in deferred tax expense. “Adjusted earnings per share” is calculated by dividing “adjusted net earnings” by the weighted average number of shares outstanding for the period. Additional GAAP measures that are presented on the face of the Company’s consolidated statements of comprehensive income and are not meant to be a substitute for other subtotals or totals presented in accordance with IFRS, but rather should be evaluated in conjunction with such IFRS measures. This includes “Earnings from operations”, which is intended to provide an indication of the Company’s operating performance and represents the amount of earnings before net finance income/expense, foreign exchange gain/loss, other income/loss, and income tax expense. Non-GAAP and additional GAAP measures do not have a standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other companies. A reconciliation of historical non-GAAP and additional GAAP measures are detailed in the Company’s Management’s Discussion and Analysis available at www.alamosgold.com.

Technical Information

Chris Bostwick, FAusIMM, Alamos Gold’s Senior Vice President, Technical Services, has reviewed and approved the scientific and technical information contained in this presentation. Chris Bostwick is a Qualified Person within the meaning of NI 43-101. The Qualified Persons for the NI 43-101 compliant Mineral Reserve and Resource estimates are detailed in the tables in the appendix of this Presentation.

Debt-free

\$124M cash & \$624M total liquidity¹

Fully funded

organic growth

Balanced approach to capital allocation

Long-term track record of value creation

Counter-cyclical

Approach to M&A, acquiring high-quality assets at weaker point in cycle

\$1.4 billion

combined value^{2,3} added at Young-Davidson and Island Gold since acquisition

\$12/oz

cost to discover 3.7M oz of Inferred Mineral Resources at Island Gold over past four years

¹Cash & cash equivalents as of March 31, 2022. Total liquidity includes cash, and cash equivalents and undrawn \$500M credit facility

²Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

³Based on consensus analyst net asset value estimates plus cumulative free cash flow generated since acquisitions as of Q1 2022, and net of acquisition costs

ESG – leading on key metrics with focus on continuous improvement

ALAMOS GOLD INC.

Environment

Lower GHG emissions per oz gold eq. produced^{1,2}

Higher water efficiency per oz gold eq. produced^{1,2}

- Carbon footprint & energy reduction initiatives
 - Grid power connection at Mulatos
 - Automation with YD lower mine expansion
 - 35% reduction in life of mine GHG emissions with Island Gold Phase III expansion
- Zero significant environmental incidents in 2021

Social

Lost time injury rate

80% of global workforce hired from local communities

\$2.4M invested in community initiatives in 2020

- Recognition for social contributions:
 - Best Corporate Social Responsibility Practice 2019³
 - Empresa Socialmente Responsable (ESR)⁴ award – 14 consecutive years
 - Ethics and Values in Industry⁵ award
- 33% reduction in recordable injury rate since 2018

Governance

89%

Director independence

33%

Board members are women

- Alignment of executive pay to performance & shareholder interests
- Top 15% ranking in 2021 Globe and Mail Board Games, including 3rd highest ranked in materials sector

EMBEDDED SUSTAINABILITY

2020
ESG REPORT

¹ 2020 data sourced from Bloomberg and company reports.

² Intermediate average includes BTO, ELD, NGD, OGC, PAAS, SSRM, YRI. Senior average includes AEM, GOLD, K, KL, NEM

³ Best Corporate Social Responsibility Practice 2019 from Cemefi, AliaRSE and Forum Empresa for Alamos' voluntary relocation program of residents from Mulatos to Matarachi, Mexico

⁴ Empresa Socialmente Responsable (ESR) – CSR Award received from Mexican Center for Philanthropy

⁵ Awarded by CONCAMIN, the Industrial Chambers Confederation of Mexico

ESG – strong relative performance & positive rating trend

ESG disclosure and reporting

- Adopting **TCFD recommendations** and incorporating **climate-related** risk into disclosures
- Completed **CDP** questionnaire for the first time in 2021
- Alignment of practices to WGC's *Responsible Gold Mining Principles* and *Conflict-Free Gold Standard*
- Responsible tailings management: support of *Investor Mining & Tailings Safety Initiative*
- Top quartile ranking** in Credit Suisse's 2020 Precious Metals ESG Scorecard¹
- Advancing **Alamos' Sustainability Performance Framework** with 22 sustainability standards finalized to date
- Improving **ESG disclosure** in support of the following frameworks:

	2018	2019	2020	2021	Trend	Score/notes
 SUSTAINALYTICS	-	47	39	29	↑	Medium risk; 20th percentile in gold subindustry
 MSCI	BB	BBB	BBB	BBB	↑	Key issue score of 4.8 ; better than industry average of 4.4
 REFINITIV	B	A	A-	A-	→	ESG score of 82/100; 18th out of 543 metals & mining companies
 CDP ³	F	F	F	B-	↑	Top 5 among gold companies; group average rating of C ²

Increased transparency driving positive rating trend;
strong relative ESG performance

¹ 2020 data sourced from Bloomberg and company reports

² CDP score relates to the Climate Change Questionnaire

³ in 2018, 2019, and 2020, the Company was rated "F" as it did not complete CDP's Climate Change Questionnaire

Q1 2022 results – on track to achieve full year guidance

	Q1 2022A	Q1 2021A	2022 Guidance
Gold production (000 oz)	98.9	125.8	440-480
Gold sales (000 oz)	98.5	126.5	-
Average realized gold price (US\$/oz)	\$1,874	\$1,798	-
Cost of sales (US\$/oz, includes amortization) ¹	\$1,376	\$1,101	-
Total cash costs (US\$/oz) ³	\$992	\$757	\$875-925
All-in sustaining costs (US\$/oz) ^{2,3}	\$1,360	\$1,030	\$1,190-1,240
Operating revenues (US\$M)	\$185	\$227	-
Adjusted net earnings (US\$M) ³	\$18	\$49	-
Adjusted earnings per share ³	\$0.05	\$0.13	-
Cash provided by operations before changes in working capital (US\$M) ³	\$71	\$120	-

Consolidated free cash flow (US\$M) ³	(\$41)	\$10	-
Cash & cash equivalents (US\$M) ⁵	\$124	\$173	-

¹ Cost of sales includes mining and processing costs, royalties and amortization

² Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses.

For the purposes of calculating all-in sustaining costs at individual mine sites, the Company does not include corporate and administrative and share based compensation expenses

³ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

⁴ Includes capitalized exploration of \$6.1M in Q1/22, \$5.5M in Q1/21

⁵ Comparative cash and cash equivalents balance as of December 31, 2021

⁶ Proven & Probable Mineral Reserves total 10.3 million ounces of gold (202 mt at 1.58 g/t Au) as of December 31, 2021

⁷ Assuming a \$1,750/oz gold price

99k oz

produced in Q1; production & costs consistent with Q1 guidance

Higher production

expected through the year & **lower costs in H2/22** driven by Island Gold & La Yaqui Grande

La Yaqui Grande

on track for initial production in Q3 2022

2022 catalysts

✓ February 2022

Mineral Reserves
4% increase to 10.3M oz;
5% higher grades¹

○ Mid-2022

Island Gold
updated Phase III expansion
mine plan

○ Q3 2022

La Yaqui Grande
initial production

○ H2 2022

Lynn Lake
EIS approval &
construction decision

Groundbreaking for Island Gold Phase III Expansion · April 2022

La Yaqui Grande Project 90% completion · April 2022

¹ Proven & Probable Mineral Reserves total 10.3 million ounces of gold (202 mt at 1.58 g/t Au) as of December 31, 2021. See Mineral Reserve and Resource estimates and associated footnotes in appendix

Three-year outlook – expanding profitability

ALAMOS GOLD INC.

Growing production

- La Yaqui Grande to drive production higher in 2023
- Higher grades at Island Gold to support stable production into 2024

Declining costs

- La Yaqui Grande to drive costs lower in 2023 & 2024
- Higher grades at Island Gold to further improve 2024 costs

Declining capital

- 23% decrease in capital in 2023 with the completion of La Yaqui Grande construction

Further **production growth & decrease in costs & capital** following completion of Island Gold **Phase III Expansion** in 2025

¹ Refer to the Company's January 18, 2022 guidance press release for a summary of the key assumptions and related risks associated with the comprehensive 2022 guidance and three-year production, cost and capital outlook

² Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses. For the purposes of calculating all-in sustaining costs at individual mine sites, the Company does not include corporate and administrative and share based compensation expenses

³ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

⁴ All-in sustaining cost guidance for 2023 and 2024 includes the same assumptions for G&A and stock-based compensation as included in 2022.

⁵ Includes sustaining and growth capital guidance for producing mines and excludes capital for Lynn Lake and other development projects, and capitalized exploration.

High quality, long-life production base; low geopolitical risk profile

Young-Davidson, Ontario, Canada

Underground

- ❑ 2022E Au production: 185-200k oz
- ❑ 2022E Mine-site AISC^{1,2}: \$1,125-1,175/oz

Low-cost operation with 15-year Mineral Reserve life³

- One of Canada's largest underground gold mines
- Completed lower mine expansion in 2020
- Generated record mine-site FCF¹ of \$100M in 2021

Island Gold, Ontario, Canada

Underground

- ❑ 2022E Au production: 125-135k oz
- ❑ 2022E Mine-site AISC^{1,2}: \$850-900/oz

Growing, high-grade, low-cost production

- World's sixth highest grade gold mine⁴
- Phase III expansion to drive ~80% production growth⁵ at lower costs
- Significant upside potential through ongoing exploration success

Mulatos (inc. LYG), Sonora, Mexico

Open pit, heap leach

- ❑ 2022E Au production: 130-145k oz
- ❑ 2022E Mine-site AISC^{1,2}: \$1,325-1,375/oz

Stable production; declining cost profile

- Produced >2M oz & generated ~\$353M of FCF¹ to date
- La Yaqui Grande on track to drive costs lower starting Q3 2022
- Strong upside potential through development of new PDA deposit

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

² Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses. For the purposes of calculating all-in sustaining costs at individual mine sites, the Company does not include corporate and administrative and share based compensation expenses

³ Mineral Reserve life based on Mineral Reserves as of December 31, 2021

⁴ Source: Mines and Metals, July 13, 2020; based on reserve grade for deposits containing reserves of more than 1M oz

⁵ Production growth relative to the mid-point of 2022 production guidance

High-return organic growth in safe jurisdictions

ALAMOS GOLD INC.

Island Gold Phase III Expansion Ontario, Canada

IRR^{1,2}: 17%

³Since completion of acquisition of Island Gold in November 2017

La Yaqui Grande Project – low-cost production on track for Q3 2022

Q3 2022

initial production; construction 90% complete

\$578/oz

average LOM mine-site AISC^{1,2}; expected to drive Mulatos costs 30% lower in H2 2022³

58%

after-tax IRR at \$1,750/oz gold price²

¹Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

²See La Yaqui Grande construction decision press release dated July 28, 2020 for more details. Base case assumptions for gold and silver price were \$1,450 and \$18 per ounce, respectively

³30% decrease in Mulatos AISC relative to H1 2022 cost guidance. See 2022 guidance release dated January 17, 2022

Lynn Lake Project – low cost, high-grade, open pit

ALAMOS GOLD INC.

Lower risk:

- ✓ Favorable jurisdiction: Manitoba, Canada
- ✓ Good infrastructure: access to low-cost hydro electric power
- ✓ Brownfield site: paved highways in proximity to site
- ✓ Low-cost, high-grade, conventional open-pit, milling project

Significant upside:

- ✓ Attractive economics¹
- ✓ Significant exploration potential across large land package (58,000 ha)
- ✓ 27% increase in Mineral Reserves to 2.1M oz^{3,4} since 2017 Feasibility Study
- Environmental Impact Statement approval expected H2 2022 with construction decision to follow

170k oz

Average annual production over initial six years; 143k oz average over 10 year life¹

\$745/oz

Average LOM mine-site AISC^{1,2}

¹ See Lynn Lake Dec. 2017 feasibility study as detailed in press release dated Dec. 14, 2017 for more details. Base case assumptions for gold & silver price were \$1,250/oz & \$16/oz

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

³ See Mineral Reserve and Resource estimates and associated footnotes in appendix

⁴ Proven & Probable Mineral Reserves totaled 1.6m oz (26.8 mt at 1.89 g/t Au) as of Dec. 1, 2017 and 2.1m oz (36.5 mt at 1.75 g/t Au) as of Dec. 31, 2021

Growing, long-life North American production; declining cost profile

~750k oz annual production potential by 2025 at **~\$800/oz** AISC¹

Alamos – value creation opportunities

**Growing, diversified,
intermediate gold
producer**

**Expanding margins &
profitability**

**Conservative, low-
risk strategy**

**Sustainable business
model supporting
growing returns over
the long-term**

Catalysts

✓ 4% increase in YE 2021 Mineral Reserves¹ at 5% higher grades February 2022

○ Island Gold Phase III Expansion mine plan update mid 2022

○ La Yaqui Grande initial production Q3 2022

○ Lynn Lake EIS approval & construction decision H2 2022

○ ~65% growth potential to ~750k oz by 2025

○ ~30% reduction in AISC² to ~\$800/oz by 2025

¹ Mineral Reserves as of December 31, 2021. See Mineral Reserve and Resource estimates and associated footnotes in appendix

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

² Capital includes capital advances

2022 - 2024 guidance: operating mines¹

	2022	2023	2024
Gold Production (000 oz)			
Young-Davidson	185-200	185-200	185-200
Island Gold	125-135	115-125	140-155
Mulatos	130-145	160-175	135-145
Total Gold Production	440-480	460-500	460-500
Total cash costs (US\$/oz) ⁽²⁾	\$875-925	\$775-875	\$650-750
All-in sustaining costs (US\$/oz) ^{(2),(3)}	\$1,190-1,240	\$1,075-1,175	\$950-1,050
Capital expenditures (US\$M)			
Sustaining capital ^{(2),(4)}	\$90-105	\$95-110	\$95-110
Growth capital ^{(2),(4)}	\$200-225	\$125-150	\$135-160
Total sustaining & growth capital^{(2),(4)} <i>(Operating mines; ex. exploration)</i>	\$290-330	\$220-260	\$230-270

¹ Refer to the Company's January 18, 2022 guidance press release for a summary of the key assumptions and related risks associated with the comprehensive 2022 guidance and three-year production, cost and capital outlook.

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures.

³ All-in sustaining cost guidance for 2023 and 2024 includes the same assumption for G&A and stock based compensation as included in 2022.

⁴ Sustaining and growth capital guidance is for producing mines and excludes capital for Lynn Lake and other development projects, and capitalized exploration.

⁵ 2023 and 2024 Cost of sales guidance has not been provided given amortization charges are based on reserves and resources at the end of each of these years and cannot be reasonably estimated at this time.

Significant exploration potential; strong track record

Mineral Reserves growing in size & quality¹

2022 Exploration Budget (US\$M)

Island Gold

176% increase in Mineral Reserves & Resources since 2016; open laterally & at depth

Young-Davidson

Deposit open at depth & to the west; higher-grades intersected in HW & FW

Mulatos

Large underexplored district; long-term track record of Mineral Reserve replacement

Lynn Lake

Significant near mine & regional potential across 80km greenstone belt

¹ Proven & Probable Mineral Reserves total 10.3 million ounces of gold (202 mt at 1.58 g/t Au) as of December 31, 2021. See Mineral Reserve and Resource estimates and associated footnotes in appendix

COVID-19 – focused on the health & safety of our people & communities

ALAMOS GOLD INC.

Amending COVID-19 health & safety protocols

- Adopting the advice of public health authorities; adhering to government regulations
- On-site testing for COVID-19 on a voluntary basis
- Vaccinations offered to employees at Island Gold and Mulatos due to their camp set-ups

COVID-19 testing facility at Island Gold

Supporting our communities

- Our teams in Canada, Mexico, and Turkey have donated their medical equipment & supplies, food & funds to support:
 - Hospitals & medical clinics
 - Frontline workers
 - Vulnerable members of our communities

Young-Davidson – long-life, low-cost production

ALAMOS GOLD INC.

Location: Ontario, Canada

Stage: Producing

Ownership: 100% interest

Operation: Underground

- One of Canada's largest underground gold mines
- 15 year mine life based on YE 2021 Mineral Reserves
- Large resource base & exploration potential to support mine life extension
- Significant Canadian dollar exposure; ~95% of costs

	2020A	2021A	2022E	Q1/22A
Gold Production (k oz)	136	195	185-200	51.9
Cost of Sales¹ (US\$/oz)	\$1,491	\$1,254	-	\$1,254
Total Cash Costs² (US\$/oz)	\$1,019	\$846	\$850-900	\$840
Mine-site AISC² (US\$/oz)	\$1,214	\$1,072	\$1,125-1,175	\$1,044
Total Capital^{4,5} (US\$M)	\$102	\$82	\$55-65	\$22
Exploration Spending⁵ (US\$M)	-	\$7	\$5	\$3
Mine-site FCF² (US\$M)	\$0	\$100	-	\$23

Gold Reserves & Resources³	Tonnes (000)	Grade (g/t Au)	oz Au (000)
P&P Mineral Reserves	43,690	2.42	3,394
M&I Mineral Resources	8,815	3.30	936
Inferred Mineral Resources	2,093	2.99	201

¹ Cost of sales includes mining and processing costs, royalties and amortization

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

³ See Mineral Reserve and Resource estimates and associated footnotes in appendix

⁴ Total capital excludes capitalized exploration

⁵ Exploration spending in Q1/2022 totaled \$2.6M, of which \$1.0M was capitalized. 2021 was \$7.2M, of which \$6.5M was capitalized. Guidance of \$5M in 2022, \$4M of which is capitalized.

⁶ Includes capitalized exploration

Young-Davidson – transition to lower mine infrastructure completed July 2020

Lower mine infrastructure **larger**,
more **productive** & highly
automated

	Upper mine infrastructure	Lower mine infrastructure	% Change
Timeline	Pre-July 2020	Long term – July 2020 onward	
Design ore capacity	6,000 tpd	8,000 tpd	+33%
Skip capacity	17.5t	24.5t	+40%
Fine ore bin capacity	500t	6,000t	+1,100%
Lateral material handling	Trucking	Conveying	
Avg. stope size	24kt	37kt	+54%

Young-Davidson longitudinal – significant exploration potential

- Mineral Reserves increased **5%** in 2021 to **3.4m oz** supporting **15 year** Reserve life¹
- Mineralization **open** at depth, **along strike** to west
- **21,600 m** of underground exploration drilling planned in 2022 focused on expanding Resources
- **3,500 m** of surface exploration drilling focused on regional targets

¹ Young-Davidson Mineral Reserves total 3.4 million ounces of gold (44 mt at 2.42 g/t Au) as of December 31, 2021. See Mineral Reserve and Resource estimates and associated footnotes in appendix

Young-Davidson exploration drilling – extending gold mineralization within syenite

ALAMOS GOLD INC.

Detailed Longitudinal – 8960L drilling

Detail Longitudinal = Azimuth 111.5°

July 12, 2021

Legend

- Gold mineralization intersected within syenite **220 m** below previous Mineral Resources in 2020 and extended an additional **150 m** below Inferred Mineral Resources in 2021 YTD
- **High-grade** mineralization intersected **200 m** outside of the syenite in the hanging wall and **100 m** from syenite contact in the footwall

Young-Davidson – increasing mining rates & productivity

Mulatos – our founding operation

ALAMOS GOLD INC.

Location: Sonora, Mexico

Stage: Producing

Ownership: 100% interest

Operation: Open pit, heap leach

- Initial production 2005
- More than 2M oz produced & ~\$353M of free cash flow² generated to date
- Declining cost profile with development of La Yaqui Grande
- No third party royalty
- Large underexplored land package (28,773 ha)

	2020A	2021A	2022E	Q1/22A
Gold Production (k oz)	151	121	130-145	22.5

M&I Mineral Resources	8,204	1.34	353
Inferred Mineral Resources	1,724	1.06	59

¹ Cost of sales includes mining and processing costs, royalties and amortization

² Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

³ Includes capital advances; excludes capitalized exploration

⁴ Exploration spending: Q1/22 totaled \$1.6M, all of which was expensed. 2021 totaled \$9.0M, including \$1.7M capitalized. 2020 totaled \$5.1M including \$0.9M capitalized. 2022 guidance of \$7M is all expensed.

⁵ See Mineral Reserve and Resource estimates and associated footnotes in appendix

⁶ Includes capitalized exploration

⁷ Includes \$27M of taxes paid in 2021

⁸ Total capital includes \$8.4M of capital advances in 2021

Mulatos – district exploration potential

ALAMOS GOLD INC.

District potential

large underexplored land package
totaling **28,773 ha**

>70%

of past drilling focused near Mulatos mine

1.2M oz

Combined Mineral Reserves^{1,2} at the
La Yaqui Grande & Puerto Del Aire
higher grade discoveries

¹ See Mineral Reserve and Resource estimates and associated footnotes in appendix

² Includes Proven & Probable Reserves of 742,000 oz (18.4 Mt at 1.25 g/t Au) for La Yaqui Grande and Proven & Probable Reserves of 428,000 oz (2.8 Mt at 4.67 g/t Au) for Puerto Del Aire

La Yaqui Grande Internal Economic Study – 2020

La Yaqui Grande Project Highlights	Life of Mine ¹
Production	
Mine life (years)	5
Total gold production (000 oz)	616
Total silver production (000 oz)	1,471
Average annual gold production (000 oz)	123
Total ore mined (000 tonnes)	19,205
Average tonnes of ore mined & stacked (tonnes per day (“tpd”))	10,000
Average gold grade (grams per tonne)	1.17
Gold recovery (%)	85%
Silver recovery (%)	15%
Waste-to-ore ratio (Life of Mine including pre-strip)	5.50
Waste-to-ore ratio (post pre-strip)	4.04
Operating Costs	
Mining costs per tonne of material (life of mine, including pre-stripping)	\$2.42
Processing costs per tonne of ore	\$5.05
G&A costs per tonne of ore	\$2.34
Total cash cost (per ounce sold) ²	\$539
Mine-site all-in sustaining cost (per ounce sold) ²	\$578
Capital Costs (US\$M) ¹	
Initial capital expenditure ³	\$137
Sustaining capital expenditure	\$24
Reclamation	\$35
Total capital expenditure, including reclamation	\$196
Base Case Economic Analysis¹	
IRR (after-tax)	41%
NPV @ 0% discount rate (millions, after-tax)	\$226
NPV @ 5% discount rate (millions, after-tax)	\$165
Gold & silver price assumption (average, per ounce sold)	\$1,450 / \$18
Exchange Rate (Mexican Peso/US Dollar)	21
Economic Analysis at \$1,750 per ounce Gold Price¹	
IRR (after-tax)	58%
NPV @ 0% discount rate (millions, after-tax)	\$345
NPV @ 5% discount rate (millions, after-tax)	\$260
Gold & silver price assumption (average, per ounce sold)	\$1,750 / \$18
Exchange Rate (Mexican Peso/US Dollar)	21

¹ Capital spending and economic analysis (NPV and IRR) are calculated starting January 1, 2020

² Total cash costs and mine-site all-in sustaining costs include royalties and silver by-product credit

³ Initial capital is offset by \$5 million of pre-production revenue less operating costs

Lynn Lake Feasibility Study – 2017

Feasibility Study Highlights - December 2017	
Production	
Mine life (years)	10.4
Total gold production (000 oz)	1,495
Total silver production (000 oz)	1,263
Average annual gold production ¹	
Years 1 to 6 (000 oz)	170
Years 1 to 10 (000 oz)	143
Total ore mined (000 tonnes)	26,803
Total waste mined (000 tonnes)	195,188
Total material mined (000 tonnes)	221,991
Waste-to-ore ratio ²	7.28
Average grade (grams per tonne)	
Gold	1.89
Silver	2.99
Recovery (%)	
Gold (Average MacLellan and Gordon)	92%
Silver (MacLellan only)	49%
Average mill throughput (tonnes per day ("tpd"))	7,000
Operating Costs	
Total cost per tonne of ore ³	\$36.06
Total cash cost (per ounce sold) ⁴	\$645
Mine-site all-in sustaining cost (per ounce sold) ⁴	\$745
Capital Costs (US\$M)	
Pre-production capital expenditure	\$338.0
Sustaining capital expenditure	\$126.6
Reclamation costs	\$21.1
Total capital expenditure	\$485.6
Base Case Economic Analysis	
IRR (after-tax)	12.5%
NPV @ 0% discount rate (millions, after-tax)	\$279.0
NPV @ 5% discount rate (millions, after-tax)	\$123.4
Gold price assumption (average, per ounce sold)	\$1,250
Silver price assumption (average, per ounce sold)	\$16.00
Exchange Rate (US Dollar/Canadian Dollar)	0.75

¹ Average annual production excludes pre-commercial production

² Reported waste-to-ore ratio is over the life of mine and includes overburden as waste. The waste-to-ore ratio during commercial production is 7.06:1

³ Total unit cost per tonne ("t") of ore includes royalties and silver as a by-product credit

⁴ Total cash costs and mine-site all-in sustaining costs include royalties and silver as a by-product credit

Turkish Development Projects

- \$1B investment treaty claim filed against Republic of Turkey for expropriation & unfair & inequitable treatment of its Turkish gold projects¹
- Construction of Kirazlı project suspended in October 2019 after government failed to grant routine renewal of the Company’s mining licenses
- Non-cash, after-tax impairment charge of \$214M taken in Q2 2021 representing entire carrying value of assets

2017 Economic Studies ²		After-Tax NPV ^{8%} (\$M)			After-Tax IRR (%)

Notes to Mineral Reserve and Resource estimates

Qualified Persons

Chris Bostwick, FAusIMM, Alamos Gold's Senior Vice President, Technical Services, has reviewed and approved the scientific and technical information contained in this presentation. Chris Bostwick is a Qualified Person within the meaning of Canadian Securities Administrator's National Instrument 43-101 ("NI 43-101"). The Qualified Persons for the National Instrument 43-101 compliant mineral reserve and resource estimates are detailed in the following table.

Mineral Resources QP	Company	Project
Jeffrey Volk, CPG, FAusIMM	Director - Reserves and Resource, Alamos Gold Inc.	Young-Davidson, Lynn Lake
Raynald Vincent, P.Eng., M.G.P.	Exploration Superintendent - Island Gold	Island Gold
Marc Jutras, P.Eng	Principal, Ginto Consulting Inc.	Mulatos Pits, PDA, La Yaqui, Carricito, Ağı Dağı, Kirazlı, Çamyurt, Quartz Mountain
Mineral Reserves QP	Company	Project
Chris Bostwick, FAusIMM	SVP Technical Services, Alamos Gold Inc.	Young-Davidson, Lynn Lake, PDA Underground
Nathan Bourgeault, P.Eng	Chief Engineer - Island Gold	Island Gold
Herb Welhener, SME-QP	VP, Independent Mining Consultants Inc.	Mulatos Pits, La Yaqui, Ağı Dağı, Kirazlı

Notes to Mineral Reserve and Resource Tables:

- The Company's Mineral Reserves and Mineral Resources as at December 31, 2021 are classified in accordance with the Canadian Institute of Mining Metallurgy and Petroleum's "CIM Standards on Mineral Resources and Reserves, Definition and Guidelines" as per Canadian Securities Administrator's NI 43-101 requirements.
- Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- Mineral Resources are exclusive of Mineral Reserves.
- Mineral Reserve cut-off grade for the Mulatos Mine, the La Yaqui Pit, the Kirazlı Pit and the Ağı Dağı Pit are determined as a net of process value of \$0.10 per tonne for each model block.
- All Measured, Indicated and Inferred open pit Mineral Resources are pit constrained.
- With the exception of the Mulatos main open pit, Mineral Reserve estimates assumed a gold price of \$1,250 per ounce and Mineral Resource estimates assumed a gold price of \$1,400 per ounce. As the Mulatos main open pit has a Mineral Reserve life remaining of less than two years, a gold price of \$1,400 was used.
- Metal prices, cut-off grades and metallurgical recoveries are set out in the table below.

	Resources		Reserves		Met Recovery
	Gold Price	Cut-off	Gold Price	Cut-off	
Mulatos:					
Mulatos Main Open Pit	\$1,400	0.5	see notes	see notes	>50%
PDA Underground	\$1,400	2.5	\$1,250	3.0	85%
La Yaqui	\$1,400	0.3	\$1,250	see notes	75%
Carricito	\$1,400	0.3	n/a	n/a	n/a
Young-Davidson - Surface	\$1,400	0.5	\$1,250	0.5	91%
Young-Davidson - Underground	\$1,400	1.3	\$1,250	1.5	91%
Island Gold	\$1,400	4.0	\$1,250	2.89-4.22	96.5%
Lynn Lake - MacLellan	\$1,400	0.42	\$1,250	0.47	91-92%
Lynn Lake - MacLellan UG	\$1,400	2.0	n/a	n/a	n/a
Lynn Lake - Gordon	\$1,400	0.62	\$1,250	0.69	89-94%
Ağı Dağı	\$1,400	0.2	\$1,250	see notes	80%
Kirazlı	\$1,400	0.2	\$1,250	see notes	81%
Çamyurt	\$1,400	0.2	n/a	n/a	78%
Quartz Mountain	\$1,400	0.21 Oxide, 0.6 Sulfide	n/a	n/a	65-80%

Cautionary Note to U.S. Investors

All resource and reserve estimates included in this Presentation have been prepared in accordance with Canadian National Instrument 43-101 -Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) –CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the “CIM Standards”). NI 43-101 is a rule developed by the Canadian Securities Administrators, which established standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Mining disclosure in the United States was previously required to comply with SEC Industry Guide 7 (“SEC Industry Guide 7”) under the United States Securities Exchange Act of 1934, as amended. The U.S. Securities and Exchange Commission (the “SEC”) has adopted final rules, to replace SEC Industry Guide 7 with new mining disclosure rules under sub-part 1300 of Regulation S-K of the U.S. Securities Act (“Regulation S-K 1300”) which became mandatory for U.S. reporting companies beginning with the first fiscal year commencing on or after January 1, 2021. Under Regulation S-K 1300, the SEC now recognizes estimates of “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources”. In addition, the SEC has amended its definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” to be substantially similar to international standards.

Investors are cautioned that while the above terms are “substantially similar” to CIM Definitions, there are differences in the definitions under Regulation S-K 1300 and the CIM Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that the Company may report as “proven mineral reserves”, “probable mineral reserves”, “measured mineral resources”, “indicated mineral resources” and “inferred mineral resources” under NI 43-101 would be the same had the Company prepared the mineral reserve or mineral resource estimates under the standards adopted under Regulation S-K 1300. U.S. investors are also cautioned that while the SEC recognizes “measured mineral resources”, “indicated mineral resources” and “inferred mineral resources” under Regulation S-K 1300, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization described using these terms has a greater degree of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any measured mineral resources, indicated mineral resources, or inferred mineral resources that the Company reports are or will be economically or legally mineable.
